

Microsoft

Exam Questions MD-101

Managing Modern Desktops (beta)

NEW QUESTION 1

- (Exam Topic 1)

You need to meet the device management requirements for the developers. What should you implement?

- A. folder redirection
- B. Enterprise State Roaming
- C. home folders
- D. known folder redirection in Microsoft OneDrive

Answer: B

Explanation:

Litware identifies the following device management requirements:

➤ Ensure that Microsoft Edge Favorites are accessible from all computers to which the developers sign in. Enterprise State Roaming allows for the synchronization of Microsoft Edge browser setting, including favorites and reading list, across devices.

Reference:

<https://docs.microsoft.com/en-us/azure/active-directory/devices/enterprise-state-roaming-windows-settings-refer>

NEW QUESTION 2

- (Exam Topic 1)

You need to recommend a solution to meet the device management requirements.

What should you include in the recommendation? To answer, select the appropriate options in the answer area. NOTE: Each correct selection is worth one point.

For the Research department employees:

<input checked="" type="checkbox"/>
An app configuration policy
An app protection policy
Azure information Protection
iOS app provisioning profiles

For the Sales department employees:

<input checked="" type="checkbox"/>
An app configuration policy
An app protection policy
Azure information Protection
iOS app provisioning profiles

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

Reference:

<https://github.com/MicrosoftDocs/IntuneDocs/blob/master/intune/app-protection-policy.md> <https://docs.microsoft.com/en-us/azure/information-protection/configure-usage-rights#do-not-forward-option-fo>

NEW QUESTION 3

- (Exam Topic 1)

You need to capture the required information for the sales department computers to meet the technical requirements.

Which Windows PowerShell command should you run first?

- A. Install-Module WindowsAutoPilotIntune
- B. Install-Script Get-WindowsAutoPilotInfo
- C. Import-AutoPilotCSV
- D. Get-WindowsAutoPilotInfo

Answer: B

Explanation:

References:

<https://docs.microsoft.com/en-us/windows/deployment/windows-autopilot/existing-devices>

"This topic describes how to convert Windows 7 or Windows 8.1 domain-joined computers to Windows 10 devices joined to either Azure Active Directory or Active Directory (Hybrid Azure AD Join) by using Windows Autopilot"

NEW QUESTION 4

- (Exam Topic 2)

You are evaluating which devices are compliant.

For each of the following statements, select Yes if the statement is true. Otherwise, select No.

NOTE: Each correct selection is worth one point.

Statements	Yes	No
Device1 is compliant	<input type="radio"/>	<input type="radio"/>
Device3 is compliant	<input type="radio"/>	<input type="radio"/>
Device4 is compliant	<input type="radio"/>	<input type="radio"/>

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

Statements	Yes	No
Device1 is compliant	<input type="radio"/>	<input checked="" type="radio"/>
Device3 is compliant	<input checked="" type="radio"/>	<input type="radio"/>
Device4 is compliant	<input checked="" type="radio"/>	<input type="radio"/>

NEW QUESTION 5

- (Exam Topic 2)

What is the maximum number of devices that User1 and User2 can enroll in Intune? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

User1 can enroll a maximum of:

5 devices

10 devices

15 devices

1,000 devices

An unlimited number of devices

User2 can enroll a maximum of:

5 devices

10 devices

15 devices

1,000 devices

An unlimited number of devices

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

User1 can enroll a maximum of:

5 devices
10 devices
15 devices
1,000 devices
An unlimited number of devices

User2 can enroll a maximum of:

5 devices
10 devices
15 devices
1,000 devices
An unlimited number of devices

NEW QUESTION 6

- (Exam Topic 3)
You need to ensure that computer objects can be created as part of the Windows Autopilot deployment. The solution must meet the technical requirements.
To what should you grant the right to create the computer objects?

- A. Server2
- B. Server1
- C. GroupA
- D. DC1

Answer: B

Explanation:

Reference:
<https://blog.matrixpost.net/set-up-windows-autopilot-production-environment-part-2/>

NEW QUESTION 7

- (Exam Topic 3)
For each of the following statements, select Yes if the statement is true. Otherwise, select No. NOTE: Each correct selection is worth one point.

Answer Area

Statements	Yes	No
If User1 adds a shortcut to the desktop of Device1, when User1 signs in to Device3, the same shortcut will appear on the desktop.	<input type="radio"/>	<input type="radio"/>
If User1 sets the desktop background to blue on Device2, when User1 signs in to Device4, the desktop background will be blue.	<input type="radio"/>	<input type="radio"/>
If User2 increases the size of the font in the command prompt of Device2, when User2 signs in to Device3, the command prompt will show the increased font size.	<input type="radio"/>	<input type="radio"/>

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

Text, letter Description automatically generated

NEW QUESTION 8

- (Exam Topic 3)
You implement Boundary1 based on the planned changes.
Which devices have a network boundary of 192.168.1.0/24 applied?

- A. Device2 only
- B. Device3 only
- C. Device 1. Device2. and Device5 only
- D. Device 1, Device2, Device3, and Device4 only

Answer: D

Explanation:

Reference:
<https://docs.microsoft.com/en-us/mem/intune/configuration/network-boundary-windows>

NEW QUESTION 9

- (Exam Topic 4)

You have computers that run Windows 10 as shown in the following table.

Name	Configuration
Computer1	Active Directory domain-joined
Computer2	Microsoft Azure Active Directory (Azure AD) –joined
Computer3	Hybrid Microsoft Azure Active Directory (Azure AD)-joined

Computer2 and Computer3 are enrolled in Microsoft Intune.
In a Group Policy object (GPO) linked to the domain, you enable the Computer Configuration/Administrative Templates/Windows Components/Search/Allow Cortana setting.
In an Intune device configuration profile, you configure the following:

- > Device/Vendor/MSFT/Policy/Config/ControlPolicyConflict/MDMWinsOverGP to a value of 1
- > Experience/AllowCortana to a value of 0.

Each of the following statement, select Yes if the statement is true. Otherwise, select No. NOTE: Each correct selection is worth one point.

Statements	Yes	No
Computer1 can use Cortana for each.	<input type="radio"/>	<input type="radio"/>
Computer2 can use Cortana for search.	<input type="radio"/>	<input type="radio"/>
Computer3 can use Cortana for search.	<input type="radio"/>	<input type="radio"/>

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:
Reference:
<https://blogs.technet.microsoft.com/cbernier/2018/04/02/windows-10-group-policy-vs-intune-mdm-policy-who>

NEW QUESTION 10
- (Exam Topic 4)

You have an Azure Active Directory (Azure AD) tenant named contoso.com that contains the devices shown in the following table.

Name	Operating system	Azure AD status	Mobile device management (MDM)
Device1	Windows 8.1	Registered	None
Device2	Windows 10	Joined	None
Device3	Windows 10	Joined	Microsoft Intune

Contoso.com contains the Azure Active Directory groups shown in the following table.

Name	Members
Group1	Group2, Device1, Device3
Group2	Device2

You add a Windows Autopilot deployment profile. The profile is configured as shown in the following exhibit.

Create profile ...

Windows PC

- ✓ Basics
- ✓ Out-of-box experience (OOBE)
- ✓ Assignments
- Review + create**

Summary

Basics

Name	Profile1
Description	--
Convert all targeted devices to Autopilot	Yes
Device type	Windows PC

Out-of-box experience (OOBE)

Deployment mode	Self-Deploying (preview)
Join to Azure AD as	Azure AD joined
Skip AD connectivity check (preview)	No
Language (Region)	Operating system default
Automatically configure keyboard	Yes
Microsoft Software License Terms	Hide
Privacy settings	Hide
Hide change account options	Hide
User account type	Standard
Allow White Glove OOBE	No
Apply device name template	No

Assignments

Included groups	Group1
Excluded groups	--

For each of the following statements, select Yes if the statement is true. Otherwise, select No.
NOTE: Each correct selection is worth one point.

Statements	Yes	No
If Device1 starts in Out of Box Experience (OOBE) mode, the device will be deployed by using Autopilot.	<input type="radio"/>	<input type="radio"/>
If Device2 starts in Out of Box Experience (OOBE) mode, the device will be deployed by using Autopilot.	<input type="radio"/>	<input type="radio"/>
If Device3 starts in Out of Box Experience (OOBE) mode, the device will be deployed by using Autopilot.	<input type="radio"/>	<input type="radio"/>

- A. Mastered
B. Not Mastered

Answer: A

Explanation:

Box 1: No

Device1 has no Mobile device Management (MDM) configured.

Note: Device1 is running Windows 8.1, and is registered, but not joined. Device1 is in Group1.

Profile1 is assigned to Group1. Box 2: No

Device2 has no Mobile device Management (MDM) configured. Note: Device2 is running Windows 10, and is joined.

Device2 is in Group2. Group2 is in Group1.

Profile1 is assigned to Group1. Box 3: Yes

Device3 has Mobile device Management (MDM) configured. Device3 is running Windows 10, and is joined

Device1 is in Group1.

Profile1 is assigned to Group1.

Mobile device management (MDM) enrollment: Once your Windows 10 device joins Azure AD, Autopilot ensures your device is automatically enrolled with MDMs such as Microsoft Intune. This program can automatically push configurations, policies and settings to the device, and install Office 365 and other business apps without you having to get IT admins to manually sort the device. Intune can also apply the latest updates from Windows Update for Business.

Reference: <https://xo.xello.com.au/blog/windows-autopilot>

NEW QUESTION 10

- (Exam Topic 4)

You need to ensure that feature and quality updates install automatically on a Windows to compute during a maintenance window.

Solution: in Group Policy. from the Windows Update settings, you enable Configure Automatic Updates, select 4 - Auto download and schedule the Install, and then enter a time.

Does this meet the goal?

- A. Yes
- B. No

Answer: B

NEW QUESTION 15

- (Exam Topic 4)

Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution that might meet the stated goals. Some question sets might have more than one correct solution, while others might not have a correct solution.

After you answer a question in this section, you will NOT be able to return to it. As a result, these questions will not appear in the review screen.

You have an Azure Directory group named Group1 that contains Windows 10 Enterprise devices and Windows 10 Pro devices.

From Microsoft Intune, you create a device configuration profile named Profile1.

You need to ensure that Profile1 applies to only the Windows 10 Enterprise devices in Group1. Solution: You configure an applicability rule for Profile1. You assign Profile1 to Group1. Does this meet the goal?

- A. Yes
- B. No

Answer: A

Explanation:

Reference:

<https://docs.microsoft.com/en-us/mem/intune/configuration/device-profile-create>

NEW QUESTION 20

- (Exam Topic 4)

You have a Windows 10 device named Device1 that is joined to Active Directory and enrolled in Microsoft Intune.

Device 1 is managed by using Group Policy and Intune.

You need to ensure that the Intune settings override the Group Policy settings. What should you configure?

- A. a device configuration profile
- B. an MDM Security Baseline profile
- C. a device compliance policy
- D. a Group Policy Object (GPO)

Answer: A

Explanation:

Reference:

<https://uem4all.com/2018/04/02/windows-10-group-policy-vs-intune-mdm-policy-who-wins/>

NEW QUESTION 22

- (Exam Topic 4)

You have 200 computers that run Windows 10. The computers are joined to Microsoft Azure Active Directory (AD) and enrolled in Microsoft Intune.

You need to enable self-service password reset on the sign-in screen.

Which settings should you configure from the Microsoft Intune blade?

- A. Device configuration
- B. Device compliance
- C. Device enrollment
- D. Conditional access

Answer: A

Explanation:

References:

<https://docs.microsoft.com/en-us/azure/active-directory/authentication/tutorial-sspr-windows>

NEW QUESTION 27

- (Exam Topic 4)

You have an Azure Active Directory (Azure AD) tenant named adatum.com that contains the users shown in the following table.

Name	Role
User1	None
User2	Global administrator
User3	Cloud device administrator
User4	Intune administrator

You configure the following device settings for the tenant:

- Users may join devices to Azure AD: User1
- Additional local administrators on Azure AD joined devices: None

You install Windows 10 on a computer named Computer1.

You need to identify which users can join Computer1 to adatum.com, and which users will be added to the Administrators group after joining adatum.com.

Which users should you identify? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

Users who can join Computer1 to adatum.com:

Users who will be added to the Administrators group after joining adatum.com:

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

Reference:

<https://docs.microsoft.com/en-us/azure/active-directory/devices/assign-local-admin>

NEW QUESTION 30

- (Exam Topic 4)

You have a hybrid deployment of Azure Active Directory (Azure AD) that contains 50 Windows 10 devices.

All the devices are enrolled in Microsoft Endpoint Manager.

You discover that Group Policy settings override the settings configured in Microsoft Endpoint Manager policies.

You need to ensure that the settings configured in Microsoft Endpoint Manager override the Group Policy settings.

What should you do?

- A. From the Microsoft Endpoint Manager admin center, create an Administrative Templates device profile
- B. From Group Policy Management Editor, configure the Computer Configuration settings in the Default Domain Policy
- C. From the Microsoft Endpoint Manager admin center, create a custom device profile
- D. From Group Policy Management Editor, configure the User Configuration settings in the Default DomainPolicy

Answer: C

Explanation:

Reference:

<https://uem4all.com/2018/04/02/windows-10-group-policy-vs-intune-mdm-policy-who-wins/>

NEW QUESTION 32

- (Exam Topic 4)

You have groups that use the Dynamic Device membership type as shown in the following table.

Name	Syntax
Group1	(device.deviceOwnership -eq "Company")
Group2	(device.deviceOwnership -eq "Personal")

You are deploying Microsoft 365 apps.

You have devices enrolled in Microsoft Intune as shown in the following table.

Name	Ownership	Platform
LT1	Company	Windows 10 Enterprise x64
LT2	Personal	Windows 10 Enterprise x64
LT3	Company	MacOS Big Sur

In the Microsoft Endpoint Manager admin center, you create a Microsoft 365 Apps app as shown in the exhibit. (Click the Exhibit tab.)

App Information [Edit](#)

Name	Microsoft 365 Apps for Windows 10
Description	Microsoft 365 Apps for Windows 10
Publisher	Microsoft
Category	Productivity
Show this as a featured app in the Company Portal	No
Information URL	https://products.office.com/en-us/explore-office-for-home
Privacy URL	https://privacy.microsoft.com/en-US/privacystatement
Developer	Microsoft
Owner	Microsoft
Notes	...
Logo	
Architecture	Teams, Word
Update channel	64-bit
Remove other versions	Current Channel
Version to install	Yes
Use shared computer activation	Latest
Accept the Microsoft Software License	No
Teams on behalf of users	No
Install background service for Microsoft	No
Search in Bing	No
Apps to be installed as part of the suite	1 language(s) selected

Assignments [Edit](#)

Group mode	Group
<input type="checkbox"/> Required	
<input checked="" type="checkbox"/> Included	Group1
Available for enrolled devices	

For each of the following statements, select Yes if the statement is true. Otherwise, select No.
NOTE: Each correct selection is worth one point.

Statements	Yes	No
LT1 will have Microsoft Office 365 installed	<input type="radio"/>	<input type="radio"/>
LT2 will have Microsoft Office 365 installed	<input type="radio"/>	<input type="radio"/>
LT3 will have Microsoft Office 365 installed	<input type="radio"/>	<input type="radio"/>

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

Graphical user interface, text, application Description automatically generated
Reference:
<https://docs.microsoft.com/en-us/mem/intune/apps/apps-add-office365>
<https://docs.microsoft.com/en-us/mem/intune/apps/apps-deploy> <https://docs.microsoft.com/en-us/mem/intune/apps/apps-add>

NEW QUESTION 37

- (Exam Topic 4)
Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution that might meet the stated goals. Some question sets might have more than one correct solution, while others might not have a correct solution.
After you answer a question in this section, you will NOT be able to return to it. As a result, these questions will not appear in the review screen.
Your network contains an Active Directory domain. The domain contains a computer named Computer1 that runs Windows 8.1.
Computer1 has apps that are compatible with Windows 10.
You need to perform a Windows 10 in-place upgrade on Computer1.
Solution: You copy the Windows 10 installation media to a Microsoft Deployment Toolkit (MDT) deployment share. You create a task sequence, and then you run the MDT deployment wizard on Computer1.
Does this meet the goal?

- A. Yes

B. No

Answer: B

NEW QUESTION 40

- (Exam Topic 4)

Your company standardizes on Windows 10 Enterprise for all users.

Some users purchase their own computer from a retail store. The computers run Windows 10 Pro.

You need to recommend a solution to upgrade the computers to Windows 10 Enterprise, join the computers to Microsoft Azure Active Directory (Azure AD), and install several Microsoft Store apps. The solution must meet the following requirements:

- Ensure that any applications installed by the users are retained.
- Minimize user intervention.

What is the best recommendation to achieve the goal? More than one answer choice may achieve the goal. Select the BEST answer.

- A. Microsoft Deployment ToolKit (MDT)
- B. Windows Deployment Services (WDS)
- C. a Windows Configuration Designer provisioning package
- D. Windows AutoPilot

Answer: C

Explanation:

You use Windows Configuration Designer to create a provisioning package (.ppkg) that contains customization settings. You can apply the provisioning package to a device running Windows 10.

NEW QUESTION 42

- (Exam Topic 4)

You have a Microsoft 365 tenant that uses Microsoft Intune to manage the devices shown in the following table.

Name	Platform
Device1	Windows 10
Device2	Android device administrator
Device3	Android Enterprise
Device4	iOS
Device5	iPadOS

You need to deploy a compliance solution that meets the following requirements:

- Marks the devices as Not Compliant if they do not meet compliance policies
- Remotely locks noncompliant devices

What is the minimum number of compliance policies required, and which devices support the remote lock action? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

Minimum number of compliance policies required:

▼

1

2

3

4

5

Devices that support the remote lock action:

▼

Device1 only

Device2 and Device3 only

Device4 and Device5 only

Device2, Device3, Device4, and Device5

Device1, Device2, Device3, Device4, and Device5

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

Graphical user interface, application, table Description automatically generated

Reference:

<https://docs.microsoft.com/en-us/mem/intune/protect/device-compliance-get-started> <https://docs.microsoft.com/en-us/mem/intune/protect/actions-for-noncompliance>

NEW QUESTION 43

- (Exam Topic 4)

Your network contains an Active Directory domain. The domain contains the users shown in the following table.

Name	Member of
User1	Group1
User2	Group2

You have a server named Server that runs Windows Server 2019 and has the Windows Deployment Services role installed. Server1 contains an x86 boot image and three Windows 10 install images. The install images are shown in the following table.

Name	Architecture	User permission
Image1	x64	Full control: Administrators, WDSServer
Image2	x64	Full control: Administrators Read: Group1
Image3	x86	Full control: Administrators, WDSServer Read: Group2

You purchase a computer named Computer1 that is compatible with the 64-bit version of Windows 10. For each of the following statements, select Yes if the statement is true. Otherwise, select No.
NOTE: Each correct selection is worth one point.

Statements	Yes	No
User1 can install Image1 on Computer1 by using Windows Deployment Services (WDS).	<input type="radio"/>	<input type="radio"/>
User1 can install Image2 on Computer1 by using Windows Deployment Services (WDS).	<input type="radio"/>	<input type="radio"/>
User2 can install Image3 on Computer1 by using Windows Deployment Services (WDS).	<input type="radio"/>	<input type="radio"/>

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

Box 1: No
User1 is a member of Group1. User1 does not have any permission to Image1. Box 2: Yes
User1 has read permissions to Image2 through Group1. Box 3: Yes
User2 has read permissions to Image3 through Group2.

NEW QUESTION 46

- (Exam Topic 4)
Your network contains an Active Directory forest. The forest contains a single domain and three sites named Site1, Site2, and Site3. Each site is associated to two subnets. Site1 contains two subnets named SubnetA and SubnetB.
All the client computers in the forest run Windows 10. Delivery Optimization is enabled. You have a computer named Computer1 that is in SubnetA.
From which hosts will Computer1 download updates?

- A. the computers in Site1 only
- B. any computer in the domain
- C. the computers in SubnetA only
- D. any computer on the network

Answer: C

Explanation:

Delivery Optimization allows updates from other clients that connect to the Internet using the same public IP as the target client (NAT).
References:
<https://docs.microsoft.com/en-us/windows/deployment/update/waas-delivery-optimization>

NEW QUESTION 51

- (Exam Topic 4)
HOTSPOT
Your company uses Microsoft System Center Configuration Manager (Current Branch) and purchases 365 subscription.
You need to set up Desktop Analytics for Configuration Manager.
What should you do? To answer, select the appropriate options in the answer area.
NOTE: Each correct selection is worth one point.

Set up the Desktop Analytics cloud service by using:

▼

The Configuration Manager console
The Microsoft 365 admin center
The Microsoft Endpoint Manager admin center

From the Configuration Manager console, select:

▼

Add Microsoft Intune Subscription
Configure Azure Services
Configure co-management
Create Cloud Management Gateway

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

Reference:

<https://docs.microsoft.com/en-us/mem/configmgr/desktop-analytics/connect-configmgr>

NEW QUESTION 53

- (Exam Topic 4)

Your company has a System Center Configuration Manager deployment that uses hybrid mobile device management (MDM). All Windows 10 devices are Active Directory domain-joined.

You plan to migrate from hybrid MDM to Microsoft Intune standalone. You successfully run the Intune Data Importer tool.

You need to complete the migration.

Which two actions should you perform? Each correct answer presents part of the solution.

NOTE: Each correct selection is worth one point.

- A. In Intune, add a device enrollment manager (DEM).
- B. Change the tenant MDM authority to Intune.
- C. Assign all users Intune licenses.
- D. Create a new Intune tenant.

Answer: BC

Explanation:

References:

<https://docs.microsoft.com/en-us/sccm/mdm/deploy-use/migrate-hybridmdm-to-intunesa> <https://docs.microsoft.com/en-us/sccm/mdm/deploy-use/migrate-prepare-intune> <https://docs.microsoft.com/en-us/sccm/mdm/deploy-use/change-mdm-authority>

NEW QUESTION 55

- (Exam Topic 4)

Your network contains an Active Directory domain named contoso.com that syncs to Azure Active Directory (Azure AD). The domain contains the users shown in the following table.

Name	Source	User profile path
User1	Windows Active Directory	\\Server1.contoso.com\users\User1
User2	Azure Active Directory	<i>Not applicable</i>

Enterprise State Roaming is enabled for User2.

You have the computers shown in the following table.

Name	Operating system	Joined to
Computer1	Windows 10	Azure AD tenant
Computer2	Windows 8.1	On-premises Active Directory domain
Computer3	Windows 10	Azure AD tenant

For each of the following statements, select Yes if the statement is true. Otherwise, select No.

NOTE: Each correct selection is worth one point.

Statements	Yes	No
If User1 modifies his desktop icons on Computer1, the changes will be available when the user signs in to Computer2.	<input type="radio"/>	<input type="radio"/>
If User1 modifies his desktop icons on Computer1, the changes will be available when the user signs in to Computer3.	<input type="radio"/>	<input type="radio"/>
If User2 modifies his desktop icons on Computer1, the changes will be available when the user signs in to Computer3.	<input type="radio"/>	<input type="radio"/>

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

Statements	Yes	No
If User1 modifies his desktop icons on Computer1, the changes will be available when the user signs in to Computer2.	<input type="radio"/>	<input checked="" type="radio"/>
If User1 modifies his desktop icons on Computer1, the changes will be available when the user signs in to Computer3.	<input type="radio"/>	<input checked="" type="radio"/>
If User2 modifies his desktop icons on Computer1, the changes will be available when the user signs in to Computer3.	<input checked="" type="radio"/>	<input type="radio"/>

NEW QUESTION 60

- (Exam Topic 4)

You have a Microsoft Intune subscription that has the following device compliance policy settings: Mark devices with no compliance policy assigned as: Compliant
Compliance status validity period (days): 14

On January 1, you enroll Windows 10 devices in Intune as shown in the following table.

Name	BitLocker Drive Encryption (BitLocker)	Firewall	Scope (Tags)	Member of
Device1	Enabled	Off	Tag1	Group1
Device2	Disabled	On	Tag2	Group2

On January 4, you create the following two device compliance policies:

- > Name: Policy1
- > Platform: Windows 10 and later
- > Require BitLocker: Require
- > Mark device noncompliant: 5 days after noncompliance
- > Scope (Tags): Tag1
- > Name: Policy2
- > Platform: Windows 10 and later
- > Firewall: Require
- > Mark device noncompliant: Immediately
- > Scope (Tags): Tag2

On January 5, you assign Policy1 and Policy2 to Group1.

For each of the following statements, select Yes if the statement is true. Otherwise, select No.

NOTE: Each correct selection is worth one point.

Statements	Yes	No
On January 7, Device1 is marked as compliant.	<input type="radio"/>	<input type="radio"/>
On January 8, Device1 is marked as compliant.	<input type="radio"/>	<input type="radio"/>
On January 8, Device2 is marked as compliant.	<input type="radio"/>	<input type="radio"/>

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

Box 1: No.

Policy1 and Policy2 apply to Group1 which Device1 is a member of. Device1 does not meet the firewall requirement in Policy2 so the device will immediately be marked as non-compliant.

Box 2: No

For the same reason as Box1.

Box 3: Yes

Policy1 and Policy2 apply to Group1. Device2 is not a member of Group1 so the policies don't apply.

The Scope (tags) have nothing to do with whether the policy is applied or not. The tags are used in RBAC.

NEW QUESTION 64

- (Exam Topic 4)

You have a Microsoft 365 subscription.

You need to deploy Microsoft Office 365 ProPlus applications to Windows 10 devices. What should you do first?

- A. From Microsoft Azure Active Directory (Azure AD), create an app registration.
- B. From the Device Management admin center, create an app.
- C. From the Device Management admin center, create an app configuration policy.
- D. From the Device Management admin center, enable Microsoft Store for Business synchronization

Answer: B

Explanation:

Reference:

<https://docs.microsoft.com/en-us/mem/intune/apps/apps-add-office365>

NEW QUESTION 68

- (Exam Topic 4)

You have a Microsoft 365 tenant that contains the objects shown in the following table.

Name	Type
Admin1	User
Group1	Microsoft 365 group
Group2	Distribution group
Group3	Mail-enabled security group
Group4	Security group

In the Microsoft Endpoint Manager admin center, you are creating a Microsoft 365 Apps app named App1. To which objects can you assign App1?

- A. Admin1, Group3. and Group4 only
- B. Group1, Group2. Group3. and Group4 only
- C. Admin1, Group1, Group2. Group3, and Group4
- D. Group1, Group3, and Group4 only
- E. Group3 and Group4 only

Answer: D

Explanation:

Reference:

<https://docs.microsoft.com/en-us/mem/intune/apps/apps-deploy>

NEW QUESTION 71

- (Exam Topic 4)

You have an Azure Active Directory (Azure AD) tenant that syncs to an on-premises Active Directory domain.

The tenant contains computers that run Windows 10. The computers are hybrid Azure AD joined and enrolled in Microsoft Intune. The Microsoft Office settings on the computers are configured by using a Group Policy Object (GPO).

You need to migrate the GPO to Intune.

Which three actions should you perform in sequence? To answer, move the appropriate actions from the list of actions to the answer area and arrange them in the correct order.

Actions

Import an ADMX file.

Assign the policy.

Create a configuration profile.

Assign the profile.

Configure the Administrative Templates settings.

Set a scope tag to the policy.

Create a compliance policy.

Answer Area

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

Reference:

<https://docs.microsoft.com/en-us/mem/intune/configuration/administrative-templates-windows>

NEW QUESTION 72

- (Exam Topic 4)

Your network contains an Active Directory domain that is synced to Microsoft Azure Active Directory (Azure AD). All computers are joined to the domain and registered to Azure AD.

The network contains a Microsoft System Center Configuration Manager (Current Batch) deployment that is configured for co-management with Microsoft Intune. All the computers in the finance department are managed by using Configuration Manager. All the computers in the marketing department are managed by using Intune.

You install new computers for the users in the marketing department by using the Microsoft Deployment Toolkit (MDT).

You purchase an application named App1 that uses an MSI package.

You need to install App1 on the finance department computers and the marketing department computers.

How should you deploy App1 to each department? To answer, drag the appropriate deployment methods to the correct departments. Each deployment method may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view content.

NOTE: Each correct selection is worth one point.

Deployment Methods	Answer Area
From Intune, add a line-of-business app.	Finance department: <input type="text"/>
From Azure AD, add an application registration.	Marketing department: <input type="text"/>
From Configuration Manager, add an application.	
From Microsoft Store for Business, add an app to the private store.	

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

<https://docs.microsoft.com/en-us/intune/apps-add>

<https://docs.microsoft.com/en-us/sccm/apps/get-started/create-and-deploy-an-application>

NEW QUESTION 73

- (Exam Topic 4)

Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution that might meet the stated goals. Some question sets might have more than one correct solution, while others might not have a correct solution.

After you answer a question in this section, you will NOT be able to return to it. As a result, these questions will not appear in the review screen.

You have a computer named Computer1 that runs Windows 10.

You save a provisioning package named Package1 to a folder named C:\Folder1. You need to apply Package1 to Computer1.

Solution: From File Explorer, you go to C:\Folder1, and then you double-click the Package1.ppkg file.

Does this meet the goal?

- A. Yes
- B. No

Answer: B

Explanation:

To install a provisioning package, navigate to Settings > Accounts > Access work or school > Add or remove a provisioning package > Add a package, and select the package to install.

Reference:

<https://docs.microsoft.com/en-us/windows/configuration/provisioning-packages/provisioning-apply-package>

NEW QUESTION 74

- (Exam Topic 4)

You have a Microsoft 365 E5 subscription that contains 1,000 Windows 11 devices. All the devices are enrolled in Microsoft Intune.

You plan to integrate Intune with Microsoft Defender for Endpoint.

You need to establish a service-to-service connection between Intune and Defender for Endpoint. Which settings should you configure in the Microsoft Endpoint Manager admin center?

- A. Connectors and tokens
- B. Premium add-ons
- C. Microsoft Tunnel Gateway
- D. Tenant enrollment

Answer: A

Explanation:

Microsoft Defender for Endpoint – Important Service and Endpoint Settings You Should Configure Right Now.

As a prerequisite, however, head to tenant administration > connectors and tokens > Microsoft Defender for Endpoint and confirm the connection is enabled. You previously set this up in the advanced settings of Microsoft 365 Defender.

Reference: <https://petri.com/microsoft-defender-for-endpoint-which-settings-configure-right-now/>

NEW QUESTION 79

- (Exam Topic 4)

You have a computer named Computer1 that runs Windows 8.1.

You plan to perform an in-place upgrade of Computer1 to Windows 10 by using an answer file. You need to identify which tool to use to create the answer file.

What should you identify?

- A. System Configuration (Msconfig.exe)
- B. Windows Configuration Designer
- C. Windows System Image Manager (Windows SIM)
- D. Windows Deployment Services (WDS)

Answer: C

Explanation:

Reference:

<https://thesleepyadmins.com/2019/05/31/create-windows-10-answer-file/>

NEW QUESTION 80

- (Exam Topic 4)

You have 200 computers that run Windows 10. The computers are joined to Microsoft Azure Active Directory (Azure AD) and enrolled in Microsoft Intune.

You need to set a custom image as the wallpaper and sign-in screen.

Which two settings should you configure in Device restrictions? To answer, select the appropriate settings in the answer area.

NOTE: Each correct selection is worth one point.

NEW QUESTION 85

- (Exam Topic 4)

You have a Microsoft 365 E5 subscription and 150 Windows 10 devices. All the devices are enrolled in Microsoft Intune. You need to use Intune to apply Windows updates to the devices. What should you do first?

- A. From the Microsoft Endpoint Manager admin center, configure scope tags.
- B. Create a device restriction policy that has telemetry set to the minimum setting of Required
- C. From the Microsoft Endpoint Manager admin center, configure a security baseline.
- D. Create a device restriction policy that has telemetry set to Security (Enterprise Only).

Answer: A

NEW QUESTION 90

- (Exam Topic 4)

Your network contains an Active Directory domain. The domain contains 5,000 computers that run Windows 10.

All users use Roaming User Profiles.

Some users report that it takes a long time to sign in to the computers. You discover that the users have user profiles that are larger than 1 GB. You need to reduce the amount of time it takes for the users to sign in. What should you configure?

- A. Delivery Optimization in the Settings app
- B. Folder Redirection by using a Group Policy Object (GPO)
- C. Microsoft User Experience Virtualization (UE-V) by using PowerShell
- D. Sync your settings in the Settings app

Answer: C

Explanation:

Reference:

<https://docs.microsoft.com/en-us/windows/configuration/ue-v/uev-for-windows>

NEW QUESTION 94

- (Exam Topic 4)

Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution that might meet the stated goals. Some question sets might have more than one correct solution, while others might not have a correct solution.

After you answer a question in this section, you will NOT be able to return to it. As a result, these questions will not appear in the review screen.

Your company has an Azure Active Directory (Azure AD) tenant named contoso.com that contains several Windows 10 devices.

When you join new Windows 10 devices to contoso.com, users are prompted to set up a four-digit pin. You need to ensure that the users are prompted to set up a six-digit pin when they join the Windows 10 devices to contoso.com.

Solution: From the Azure Active Directory admin center, you configure automatic mobile device management (MDM) enrollment. From the Device Management admin center, you create and assign a device restrictions profile.

Does this meet the goal?

- A. Yes
- B. No

Answer: B

Explanation:

Instead, from the Azure Active Directory admin center, you configure automatic mobile device management (MDM) enrollment. From the Device Management admin center, you configure the Windows Hello for Business enrollment options.

References:

<https://docs.microsoft.com/en-us/intune/protect/windows-hello>

NEW QUESTION 95

- (Exam Topic 4)

You have 100 computers that run Windows 10. The computers are joined to Microsoft Azure Active Directory (Azure AD) and enrolled in Microsoft Intune.

You need to configure the following device restrictions:

- Block users from browsing to suspicious websites.
- Scan all scripts loaded into Microsoft Edge.

Which two settings should you configure in Device restrictions? To answer, select the appropriate settings in the answer area.

NOTE: Each correct selection is worth one point.

NEW QUESTION 96

- (Exam Topic 4)
Your network contains an Active Directory domain that is synced to Microsoft Azure Active Directory (Azure AD).
You have a Microsoft Office 365 subscription. All computers are joined to the domain and have the latest Microsoft OneDrive sync client (OneDrive.exe) installed.
On all the computers, you configure the OneDrive settings as shown in the following exhibit.

Setting	State
Allow syncing OneDrive accounts for only specific organizations	Enabled
Configure team site libraries to sync automatically	Not configured
Set the maximum percentage of upload bandwidth that OneDrive.exe uses	Not configured
Prevent users from moving their Windows known folders to OneDrive	Not configured
Block syncing OneDrive accounts for specific organizations	Not configured
Migrate Pre-existing TeamSites with OneDrive Files On-Demand	Not configured
The maximum size of a user's OneDrive for Business before they will be prompted to ch...	Not configured
Enable OneDrive Files On-Demand	Not configured
Prevent users from redirecting their Windows known folders to their PC	Disabled
Silently move Windows known folders to OneDrive	Enabled
Prompt users to move Windows known folders to OneDrive	Not configured
Prevent OneDrive from generating network traffic until the user signs in to OneDrive	Not configured
Prevent users from using the remote file fetch feature to access files on the computer	Enabled
SharePoint on-premises server URL and tenant folder name	Not configured
SharePoint prioritization setting for hybrid customers that use SharePoint Online (SPO)...	Not configured
Silently configure OneDrive using the primary Windows account	Enabled

Use the drop-down menus to select the answer choice that completes each statement based on the information presented in the graphic.
NOTE: Each correct selection is worth one point.

Answer Area

[answer choice] will sync automatically by using OneDrive

No folders

The Documents folder

The Favontes folder

To reduce the disk space used by a user profile, you must [answer choice].

configure team site libraries to sync automatically

enable OneDrive Files On-Demand

set the maximum percentage of upload bandwidth used by OneDrive.exe

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

Box 1:

Silently move known folders to OneDrive is enabled. Known folder include: Desktop, Documents, Pictures, Screenshots, and Camera Roll

Box 2:

OneDrive Files On-Demand enables users to view, search for, and interact with files stored in OneDrive from within File Explorer without downloading them and taking up space on the local hard drive.

References:

<https://docs.microsoft.com/en-us/onedrive/redirect-known-folders> <https://docs.microsoft.com/en-us/onedrive/plan-onedrive-enterprise>

NEW QUESTION 97

- (Exam Topic 4)

Your company has 200 computers that run Windows 10. The computers are managed by using Microsoft Intune.

Currently, Windows updates are downloaded without using Delivery Optimization. You need to configure the computers to use Delivery Optimization.

What should you create in Intune?

- A. a device configuration profile
- B. a device compliance policy
- C. an app protection policy
- D. a Windows 10 update ring

Answer: A

Explanation:

References:

<https://docs.microsoft.com/en-us/intune/delivery-optimization-windows>

NEW QUESTION 100

- (Exam Topic 4)

You are creating a device configuration profile in Microsoft Intune. You need to configure specific OMA-URI settings in the profile. Which profile type should you use?

- A. Identity protection
- B. Custom
- C. Device restrictions (Windows 10 Team)
- D. Device restrictions

Answer: B

Explanation:

Reference:

<https://docs.microsoft.com/en-us/mem/intune/configuration/custom-settings-windows-10>

NEW QUESTION 102

- (Exam Topic 4)

Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution that might meet the stated goals. Some question sets might have more than one correct solution, while others might not have a correct solution.

After you answer a question in this section, you will NOT be able to return to it. As a result, these questions will not appear in the review screen.

You have a computer named Computer1 that runs Windows 10.

You save a provisioning package named Package1 to a folder named C:\Folder1. You need to apply Package1 to Computer1.

Solution: From the Settings app, you select Access work or school, and then you select Add or remove a provisioning package.

Does this meet the goal?

- A. Yes
- B. No

Answer: A

Explanation:

To install a provisioning package, navigate to Settings > Accounts > Access work or school > Add or remove a provisioning package > Add a package, and select the package to install.

Reference:

<https://docs.microsoft.com/en-us/windows/configuration/provisioning-packages/provisioning-apply-package>

NEW QUESTION 103

- (Exam Topic 4)

You have an Azure Active Directory (Azure AD) tenant named contoso.com. You create a terms of use (ToU) named Terms1 in contoso.com.

You are creating a conditional access policy named Policy1 to assign a cloud app named App1 to the users in contoso.com.

You need to configure Policy1 to require the users to accept Terms1. What should you configure in Policy1?

- A. Grant in the Access controls section
- B. Conditions in the Assignments section
- C. Cloud apps or actions in the Assignments section

D. Session in the Access controls section

Answer: A

Explanation:

Reference:

<https://docs.microsoft.com/en-us/azure/active-directory/conditional-access/require-tou>

NEW QUESTION 108

- (Exam Topic 4)

Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution that might meet the stated goals. Some question sets might have more than one correct solution, while others might not have a correct solution.

After you answer a question in this section, you will NOT be able to return to it. As a result, these questions will not appear in the review screen.

Your network contains an Active Directory domain. The domain contains member computers that run Windows 8.1 and are enrolled in Microsoft Intune.

You need to identify which computers can be upgraded to Windows 10.

Solution: You install the Microsoft Assessment and Planning Toolkit. From the Microsoft Assessment and Planning Toolkit, you collect inventory data and run the Windows 8.1 Readiness scenario.

Does this meet the goal?

A. Yes

B. No

Answer: B

NEW QUESTION 110

- (Exam Topic 4)

You have a Microsoft 365 tenant.

You plan to enable Enterprise State Roaming.

Which three types of data will sync across devices? Each correct answer presents a complete solution. NOTE: Each correct selection is worth one point.

A. desktop theme settings

B. internet passwords

C. Microsoft Edge Chromium settings

D. Microsoft Teams settings

E. mouse settings

Answer: ABC

NEW QUESTION 114

- (Exam Topic 4)

You have a Microsoft 365 tenant that uses Microsoft Intune.

From the Microsoft Endpoint Manager admin center, you plan to create a baseline to monitor the Startup score and the App reliability score of enrolled Windows 10 devices.

You need to identify which tool to use to create the baseline and the minimum number of devices required to create the baseline.

What should you identify? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

Tool to use:

Workbooks

Log Analytics

Endpoint analytics

Security baselines

Minimum number of devices:

1

5

10

25

A. Mastered

B. Not Mastered

Answer: A

Explanation:

Graphical user interface, application, table Description automatically generated

Reference:

<https://docs.microsoft.com/en-us/mem/analytics/scores#understanding-scores>

NEW QUESTION 119

- (Exam Topic 4)

Your company has several Windows 10 devices that are enrolled in Microsoft Intune.

You deploy a new computer named Computer1 that runs Windows 10 and is in a workgroup. You need to enroll Computer1 in Intune.

Solution: From Computer1, you sign in to <https://portal.manage.microsoft.com> and use the Devices tab. Does this meet the goal?

A. Yes

B. No

Answer: B

Explanation:

Use MDM enrolment.

MDM only enrollment lets users enroll an existing Workgroup, Active Directory, or Azure Active directory joined PC into Intune. Users enroll from Settings on the existing Windows PC.

Reference:

<https://docs.microsoft.com/en-us/mem/intune/enrollment/windows-enrollment-methods>

NEW QUESTION 121

- (Exam Topic 4)

You have a public computer named Public1 that runs Windows 10. Users use Public1 to browse the Internet by using Microsoft Edge.

You need to view events associated with website phishing attacks on Public1. Which Event Viewer log should you view?

- A. Applications and Services Logs > Microsoft\Windows > DeviceGuard > Operational
- B. Applications and Services Logs > Microsoft > Windows > Security-Mitigations> User Mode
- C. Applications and Services Logs > Microsoft > Windows > SmartScreen > Debug
- D. Applications and Services Logs > Microsoft > Windows > Windows Defender > Operational

Answer: C

Explanation:

Reference:

<https://docs.microsoft.com/en-us/windows/security/threat-protection/microsoft-defender-smartscreen/microsoft-defender-smartscreen-overview#viewing-windows-event-logs-for-microsoft-defender-smartscreen>

NEW QUESTION 124

- (Exam Topic 4)

Your network contains an Active Directory domain that is synced to Microsoft Azure Active Directory (Azure AD). The domain contains 500 laptops that run Windows 8.1 Professional. The users of the laptops work from home.

Your company uses Microsoft Intune, the Microsoft Deployment Toolkit (MDT), and Windows Configuration Designer to manage client computers.

The company purchases 500 licenses for Windows 10 Enterprise.

You verify that the hardware and applications on the laptops are compatible with Windows 10.

The users will bring their laptop to the office, where the IT department will deploy Windows 10 to the laptops while the users wait.

You need to recommend a deployment method for the laptops that will retain their installed applications. The solution must minimize how long it takes to perform the deployment.

What should you include in the recommendation?

- A. an in-place upgrade
- B. a clean installation by using a Windows Configuration Designer provisioning package
- C. Windows AutoPilot
- D. a clean installation and the User State Migration Tool (USMT)

Answer: A

Explanation:

References:

<https://docs.microsoft.com/en-us/windows/deployment/windows-10-deployment-scenarios#in-place-upgrade>

NEW QUESTION 127

- (Exam Topic 4)

You have a Microsoft 365 tenant that contains the devices shown in the following table.

Name	Platform	(Azure Active Directory) Azure AD join type	Managed by using Microsoft Intune
Device1	Windows 10	Joined	Yes
Device2	Android	Registered	Yes
Device3	iOS	None	Yes
Device4	Windows 10	None	No
Device5	iPadOS	Registered	No

You need to assign app protection settings to the devices.

What is the minimum number of app protection policies required?

- A. 1
- B. 2
- C. 3
- D. 4
- E. 5

Answer: B

Explanation:

Reference:

<https://docs.microsoft.com/en-us/mem/intune/apps/app-protection-policies>

NEW QUESTION 128

- (Exam Topic 4)

You have a server named Server1 and computers that run Windows 8.1. Server1 has the Microsoft Deployment Toolkit (MDT) installed.

You plan to upgrade the Windows 8.1 computers to Windows 10 by using the MDT deployment wizard. You need to create a deployment share on Server1.

What should you do on Server1, and what are the minimum components you should add to the MDT deployment share? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

On Server1:

<input type="checkbox"/>	Import the Deployment Image Servicing and Management (DISM) PowerShell module.
<input type="checkbox"/>	Import the WindowsAutopilotIntune Windows PowerShell module.
<input type="checkbox"/>	Install the Windows Assessment and Deployment Kit (Windows ADK).
<input type="checkbox"/>	Install the Windows Deployment Services server role.

Add to the MDT deployment share:

<input type="checkbox"/>	Windows 10 image and package only
<input type="checkbox"/>	Windows 10 image and task sequence only
<input type="checkbox"/>	Windows 10 image only
<input type="checkbox"/>	Windows 10 image, task sequence, and package

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

Box 1: Install the Windows Deployment Services role. Install and initialize Windows Deployment Services (WDS) On the server:

Open an elevated Windows PowerShell prompt and enter the following command: `Install-WindowsFeature -Name WDS -IncludeManagementTools WDSUTIL /Verbose /Progress /Initialize-Server /Server:MDT01 /RemInst:"D:\RemoteInstall" WDSUTIL /Set-Server /AnswerClients:All`

Box 2: Windows 10 image and task sequence only Create the reference image task sequence

In order to build and capture your Windows 10 reference image for deployment using MDT, you will create a task sequence.

Reference:

<https://docs.microsoft.com/en-us/windows/deployment/deploy-windows-mdt/prepare-for-windows-deployment>

<https://docs.microsoft.com/en-us/windows/deployment/deploy-windows-mdt/create-a-windows-10-reference-im>

NEW QUESTION 132

- (Exam Topic 4)

You manage a Microsoft 365 environment that has co-management enabled.

All computers run Windows 10 and are deployed by using the Microsoft Deployment Toolkit (MDT). You need to recommend a solution to deploy Microsoft Office 365 ProPlus to new computers. The latest

version must always be installed. The solution must minimize administrative effort.

What is the best tool to use for the deployment? More than one answer choice may achieve the goal. Select the BEST answer.

- A. Microsoft Intune
- B. Microsoft Deployment Toolkit
- C. Office Deployment Toolkit (ODT)
- D. a Group Policy object (GPO)
- E. Microsoft System Center Configuration Manager

Answer: C

Explanation:

References:

<https://docs.microsoft.com/en-us/deployoffice/overview-of-the-office-2016-deployment-tool>

NEW QUESTION 137

- (Exam Topic 4)

You have a Microsoft 365 subscription. All devices run Windows 10.

You need to prevent users from enrolling the devices in the Windows Insider Program.

What two configurations should you perform from Microsoft 365 Device Management? Each correct answer is a complete solution.

NOTE: Each correct selection is worth one point.

- A. a device restrictions device configuration profile
- B. an app configuration policy
- C. a custom device configuration profile
- D. a Windows 10 security baseline
- E. a Windows 10 update ring

Answer: BE

NEW QUESTION 140

- (Exam Topic 4)
You have a Microsoft 365 subscription.
Users have iOS devices that are not enrolled in Microsoft 365 Device Management.
You create an app protection policy for the Microsoft Outlook app as shown in the exhibit. (Click the Exhibit tab.)

Dashboard > Client apps > App protection policies > Create policy > Settings

Create policy

Name

Policy1

Description

1 app selected

Settings

Review configured settings

Settings

Data protection

Default settings configured

Access requirements

Default settings configured

Conditional launch

Default settings configured

Scope (Tags)

0 scope(s) selected

You need to configure the policy to meet the following requirements:

- Prevent the users from using the Outlook app if the operating system version is less than 12.0.0.
- Require the users to use an alphanumeric passcode to access the Outlook app.

What should you configure in an app protection policy for each requirement? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

Prevent the users from using Outlook if the operating system version is less than 12.0.0:

Access requirements

Conditional launch

Data protection

Scope

Require the users to use an alphanumeric passcode to access Outlook:

Access requirements

Conditional launch

Data protection

Scope

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:
References:
<https://docs.microsoft.com/en-us/intune/app-protection-policy-settings-ios>

NEW QUESTION 142

- (Exam Topic 4)
Your company uses Microsoft Intune to manage devices. You need to ensure that only Android devices that use Android work profiles can enroll in Intune.
Which two configurations should you perform in the device enrollment restrictions? Each correct answer presents part of the solution.
NOTE: each correct selection is worth one point.

- A. From Select platforms, set Android work profile to Allow.
- B. From Configure platforms, set Android Personally Owned to Block.
- C. From Configure platforms, set Android Personally Owned to Allow.
- D. From Select platforms, set Android to Block.

Answer: AD

Explanation:
<https://docs.microsoft.com/en-us/Intune/enrollment-restrictions-set>

NEW QUESTION 143

- (Exam Topic 4)

Your network contains an Active Directory domain named contoso.com. The domain contains 200 computers that run Windows 10. Folder Redirection for the Desktop folder is configured as shown in the following exhibit.

The target is set to Server1.

You plan to use known folder redirection in Microsoft OneDrive for Business.

You need to ensure that the desktop content of users remains on their desktop when you implement known folder redirection.

Which two actions should you perform? Each correct answer presents part of the solution. NOTE: Each correct selection is worth one point.

- A. Clear the Grant the user exclusive rights to Desktop check box.
- B. Change the Policy Removal setting.
- C. Disable Folder Redirection.
- D. Clear the Move the contents of Desktop to the new location check box.

Answer: BC

Explanation:

The OneDrive Known Folder Move Group Policy objects won't work if you previously used Windows Folder Redirection Group Policy objects to redirect the Documents, Pictures, or Desktop folders to a location other than OneDrive. Remove the Windows Group Policy objects for these folders before you enable the OneDrive Group Policy objects. The OneDrive Group Policy objects won't affect the Music and Videos folders, so you can keep them redirected with the Windows Group Policy objects. For info about Windows Folder Redirection, see [Deploy Folder Redirection with Offline Files](#).

NEW QUESTION 145

- (Exam Topic 4)

You have an Azure Active Directory (Azure AD) tenant named contoso.com.

You plan to use Windows Autopilot to configure the Windows 10 devices shown in the following table.

Name	Memory	TPM
Device1	16 GB	None
Device2	8 GB	Version 1.2
Device3	4 GB	Version 2.0

Which devices can be configured by using Windows Autopilot self-deploying mode?

- A. Device2 and Device3 only
- B. Device3 only
- C. Device2 only
- D. Device 1, Device2, and Device3

Answer: B

Explanation:

Reference:

<https://docs.microsoft.com/en-us/windows/deployment/windows-autopilot/self-deploying>

NEW QUESTION 148

- (Exam Topic 4)

You have a Microsoft 365 subscription.

You have 20 computers that run Windows 10 and are joined to Microsoft Azure Active Directory (Azure AD)

You plan to replace the computers with new computers that run Windows 10. The new computers will be joined to Azure AD.

You need to ensure that the desktop background, the favorites, and the browsing history are available on the new computer. What should you use?

- A. Roaming user profiles
- B. Folder Redirection
- C. The Microsoft SharePoint Migration Tool
- D. Enterprise State Roaming

Answer: D

Explanation:

Reference:

<https://docs.microsoft.com/en-us/azure/active-directory/devices/enterprise-state-roaming-faqs>

NEW QUESTION 150

- (Exam Topic 4)

You have an Azure Active Directory (Azure AD) tenant named contoso.com.

You plan to create a Conditional Access policy to block users that have a high sign-in risk level.

You need to identify the required license, and what to use to identify the sign-in risk level. The solution must minimize costs.

To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

License:

Azure Active Directory Premium Plan 1
Azure Active Directory Premium Plan 2
Microsoft Office 365 E3

Use:

Azure AD Identity Protection
Security defaults
Verifiable credentials

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

Box 1: Azure AD Premium Plan 2

You will need an Azure AD Premium P1 license to get access to the Microsoft Office 365 conditional access policy feature.

However, need Azure AD Premium Plan 2 to sign-in risk. Box 2: Azure AD Identity Protection

A sign-in risk represents the probability that a given authentication request isn't authorized by the identity owner. Organizations with Azure AD Premium P2 licenses can create Conditional Access policies incorporating Azure AD Identity Protection sign-in risk detections.

Reference:

<https://docs.microsoft.com/en-us/azure/active-directory/conditional-access/howto-conditional-access-policy-risk>

<https://blog.mydock365.com/what-is-conditional-access-in-microsoft-365>

NEW QUESTION 152

- (Exam Topic 4)

You have a Microsoft 365 E5 subscription that contains 500 macOS devices enrolled in Microsoft Intune. You need to ensure that you can apply Microsoft Defender for Endpoint antivirus policies to the macOS devices. The solution must minimize administrative effort.

What should you do?

- A. From the Microsoft Endpoint Manager admin center, create a configuration profile.
- B. From the Microsoft Endpoint Manager admin center, create a security baseline.
- C. Onboard the macOS devices to the Microsoft 365 compliance center.
- D. Install Defender for Endpoint on the macOS devices.

Answer: D

Explanation:

Just install, and use Defender for Endpoint on Mac. Reference:

<https://docs.microsoft.com/en-us/microsoft-365/security/defender-endpoint/microsoft-defender-endpoint-mac>

NEW QUESTION 157

- (Exam Topic 4)

You use a Microsoft Intune subscription to manage iOS devices.

You configure a device compliance policy that blocks jailbroken iOS devices. You need to enable Enhanced jailbreak detection.

What should you configure?

- A. the device compliance policy

- B. the Compliance policy settings
- C. a network location
- D. a configuration profile

Answer: A

Explanation:

Reference:
<https://docs.microsoft.com/en-us/mem/intune/protect/device-compliance-get-started>

NEW QUESTION 162

- (Exam Topic 4)

Your network contains an Active Directory Domain Services (AD DS) domain named contoso.com. The domain contains Windows 10 devices that are managed by using Microsoft Endpoint Configuration Manager. You plan to deploy Microsoft 365 Apps for enterprise to the devices by using Configuration Manager. You create a Configuration.xml file as shown in the following exhibit.

```
<Configuration ID="67e*0d4f-814a-4466-9e3c-1388d66a527c">
  <Add OfficeClientEdition="64" Channel="Current" OfficeMgmtCOM="TRUE">>
    <Product ID="O365ProPlusRetail">
      <Language ID="MatchOS" />
      <ExcludeApp ID="Access" />
      <ExcludeApp ID="Groove" />
      <ExcludeApp ID="Lync" />
      <ExcludeApp ID="Publisher" />
    </Product>
  </Add>
  <Property Name="SharedComputerLicensing" Value="0"/>
  <Property Name="PinIconsToTaskbar" Value="TRUE"/>
  <Property Name="SCLCacheOverride" Value="0" />
  <Property Name="AUTOACTIVATE" Value="0" />
  <Property Name="FORCEAPPSHUTDOWN" Value="TRUE"/>
  <Property Name="DeviceBasedLicensing" Value="1" />
  <RemoveMSI />
  <AppSettings>
    <Setup Name="Company" Value="Contoso.com" />
  </AppSettings>
  <Display Level="None" AcceptEULA="TRUE" />
  <Logging Level="Standard" Path="\\Server1\Office" />
</Configuration>
```

Use the drop-down menus to select the answer choice that completes each statement based on the information presented in the graphic.
 NOTE: Each correct selection is worth one point.

Microsoft 365 Apps for enterprise will be installed from [answer choice]

\\Server1\Office

a Configuration Manager distribution point

the Office 365 Content Delivery Network (CDN)

New Microsoft Office feature updates will be available to devices [answer choice]

twice a year in January and July

once a month, on the second Tuesday of the month

as soon as the update is ready, but on no set schedule

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

Reference:
<https://docs.microsoft.com/en-us/deployoffice/office-deployment-tool-configuration-options> <https://docs.microsoft.com/en-us/deployoffice/overview-update-channels#semi-annual-enterprise-channel-overv>

NEW QUESTION 164

- (Exam Topic 4)

You have a Microsoft Intune subscription associated to an Azure Active Directory (Azure AD) tenant named contoso.com. Users use one of the following three suffixes when they sign in to the tenant: us.contoso.com, eu.contoso.com, or contoso.com. You need to ensure that the users are NOT required to specify the mobile device management (MDM) enrollment URL as part of the enrollment process. The solution must minimize the number of changes. Which DNS records do you need?

- A. three TXT records
- B. one CNAME record only
- C. one TXT record only

D. three CNAME records

Answer: D

Explanation:

Reference:

<https://docs.microsoft.com/en-us/mem/intune/enrollment/windows-enroll#simplify-windows-enrollment-withou>

NEW QUESTION 168

- (Exam Topic 4)

You have a Microsoft 365 subscription.

A remote user purchases a laptop from a retail store. The laptop is intended for company use and has Windows 10 Pro edition installed.

You need to configure the laptop to meet the following requirements:

- > Modify the layout of the Start menu
- > Upgrade Windows 10 to Windows 10 Enterprise
- > Join the laptop to a Microsoft Azure Active Directory (Azure AD) domain named contoso.com

What should you do?

- A. Create a custom Windows image (.wim) file that contains an image of Windows 10 Enterprise and upload the file to a Microsoft
- B. Create a provisioning package (.ppkg) file and email the file to the user
- C. Create a Windows To Go workspace and ship the workspace to the user
- D. Create a Sysprep Unattend (.xml) file and email the file to the user

Answer: B

Explanation:

Reference:

<https://docs.microsoft.com/en-us/windows/configuration/provisioning-packages/provisioning-packages>

NEW QUESTION 172

- (Exam Topic 4)

You have devices enrolled in Microsoft Intune as shown in the following table.

Name	Platform	Encryption	Secure Boot	Member of
Device1	Windows 10	Yes	No	Group1
Device2	Windows 10	No	Yes	Group2
Device3	Android	No	<i>Not applicable</i>	Group3

Intune includes the device compliance policies shown in the following table.

Name	Platform	Encryption	Secure Boot
Policy1	Windows 10	Not configured	Not configured
Policy2	Windows 10	Not configured	Required
Policy3	Windows 10	Required	Required
Policy4	Android	Not configured	<i>Not applicable</i>

The device compliance policies have the assignments shown in the following table.

Name	Assigned to
Policy1	Group1
Policy2	Group1, Group2
Policy3	Group3
Policy4	Group3

For each of the following statements, select Yes if the statement is true. Otherwise, select No.

NOTE: Each correct selection is worth one point.

Statements	Yes	No
Device1 is marked as compliant.	<input type="radio"/>	<input type="radio"/>
Device2 is marked as compliant.	<input type="radio"/>	<input type="radio"/>
Device3 is marked as compliant.	<input type="radio"/>	<input type="radio"/>

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

Box 1: No
 Device1 is in Group1. Policy1 is assigned to Group1. Policy2 is also assigned to Group1. Device1 is compliant to Policy1, but not compliant to Policy2 (fails on Secure Boot).
 By default, each device compliance policy includes the action to mark a device as noncompliant if it fails to meet a policy rule.
 Box 2: Yes
 Device2 is in Group2. Policy2 is assigned to Group2. Device2 is compliant to Policy2 (Secure boot met). Box 3: Yes
 Device3 is in Group 3. Policy3 and Policy4 are assigned to Group3. Policy3 is for Windows 10 so it is disregarded. Device3 is compliant to Policy4.
 Reference: <https://docs.microsoft.com/en-us/mem/intune/protect/device-compliance-get-started>

NEW QUESTION 175

- (Exam Topic 4)
 You have the 64-bit computers shown in the following table.

Name	Operating system	Memory	BitLocker Drive Encryption (BitLocker)
Computer1	32-bit version of Windows 7 Service Pack 1 (SP1)	1 GB	Enabled
Computer2	64-bit version of Windows 7 Service Pack 1 (SP1)	4 GB	Enabled
Computer3	32-bit version of Windows 8.1	2 GB	Enabled
Computer4	64-bit version of Windows 8.1	4 GB	Disabled

You plan to perform an in-place upgrade to the 64-bit version of Windows 10.
 Which computers can you upgrade to the 64-bit version of Windows 10 in their current state?

- A. Computer2 and Computer4 only
- B. Computer4 only
- C. Computer3 and Computer4 only
- D. Computer1, Computer2, Computer3 and Computer4
- E. Computer2, Computer3, and Computer4 only

Answer: A

Explanation:

References:
<https://docs.microsoft.com/en-us/windows/deployment/windows-10-deployment-scenarios>

NEW QUESTION 178

- (Exam Topic 4)
 Your network contains an Active Directory domain. The domain contains 1,200 computers that run Windows 8.1.
 You deploy an Upgrade Readiness solution in Microsoft Azure and configure the computers to report to Upgrade Readiness.
 From Upgrade Readiness, you open a table view of the applications.
 You need to filter the view to show only applications that can run successfully on Windows 10.
 How should you configure the filter in Upgrade Readiness? To answer, select the appropriate options in the answer area.
 NOTE: Each correct selection is worth one point.

Filter column:

▼

Issue
 UpgradeAssessment
 UpgradeDecison

Filter value:

▼

No known issues
 Ready to upgrade
 Supported version available

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

<https://docs.microsoft.com/en-us/windows/deployment/upgrade/upgrade-readiness-resolve-issues>

NEW QUESTION 181

- (Exam Topic 4)

Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution that might meet the stated goals. Some question sets might have more than one correct solution, while others might not have a correct solution.

After you answer a question in this section, you will NOT be able to return to it. As a result, these questions will not appear in the review screen.

Your network contains an Active Directory domain. The domain contains member computers that run Windows 8.1 and are enrolled in Microsoft Intune.

You need to identify which computers can be upgraded to Windows 10.

Solution: From Windows on the Devices blade of the Microsoft Endpoint Manager admin center, you create a filter and export the results as a CSV file.

Does this meet the goal?

A. Yes

B. No

Answer: B

NEW QUESTION 185

- (Exam Topic 4)

Your company has computers that run Windows 10. The company uses Microsoft Intune to manage the computers.

You have an app protection policy for Microsoft Edge. You assign the policy to a group. On a computer named Computer1, you open Microsoft Edge.

You need to verify whether Microsoft Edge on Computer1 is protected by the app protection policy. Which column should you add in Task Manager?

A. Operating system context

B. UAC virtualization

C. Enterprise Context

D. Data Execution Prevention

Answer: C

Explanation:

Reference:

<https://docs.microsoft.com/en-us/windows/security/information-protection/windows-information-protection/wip> <https://www.itpromentor.com/win10-mam-wip/>

NEW QUESTION 188

- (Exam Topic 4)

You have a Microsoft 365 E5 subscription that uses Microsoft Intune.

You need to ensure that users can only enroll devices that meet the following requirements:

➤ Android devices that support the use of work profiles.

➤ iOS devices that run iOS 11.0 or later.

Which two restrictions should you modify? To answer, select the restrictions in the answer area.

NOTE: Each correct selection is worth one point.

Answer Area

Home > Devices > Enroll devices > All Users >

Edit restriction

Device type restriction

1 Platform settings 2 Review + save

Specify the platform configuration restrictions that must be met for a device to enroll. Use compliance policies to restrict devices after enrollment. Define versions as major.minor.build. Version restrictions only apply to devices enrolled with the Company Portal. Intune classifies devices as personally-owned by default. Additional action is required to classify devices as corporate-owned. [Learn more.](#)

Type	Platform	versions	Personally owned	Device manufacturer
Android Enterprise (work profile)	<input checked="" type="button" value="Allow"/> <input type="button" value="Block"/>	Allow min/max range: Min Max	<input checked="" type="button" value="Allow"/> <input type="button" value="Block"/>	Manufacturer name here
Android device administrator	<input checked="" type="button" value="Allow"/> <input type="button" value="Block"/>	Allow min/max range: Min Max	<input checked="" type="button" value="Allow"/> <input type="button" value="Block"/>	Manufacturer name here
iOS/iPadOS	<input checked="" type="button" value="Allow"/> <input type="button" value="Block"/>	Allow min/max range: Min Max	<input checked="" type="button" value="Allow"/> <input type="button" value="Block"/>	Restriction not supported
macOS	<input type="button" value="Allow"/> <input checked="" type="button" value="Block"/>	Restriction not supported	<input type="button" value="Allow"/> <input type="button" value="Block"/>	Restriction not supported
Windows (MDM)	<input type="button" value="Allow"/> <input checked="" type="button" value="Block"/>	Allow min/max range: Min Max	<input type="button" value="Allow"/> <input type="button" value="Block"/>	Restriction not supported

- A. Mastered
B. Not Mastered

Answer: A

Explanation:

Box 1: Android device administrator, Platform: Block Restrict devices running on the following platforms: Android device administrator
Android Enterprise work profile iOS/iPadOS
macOS Windows

Note: If you allow both Android platforms for the same group, devices that support work profile will enroll with a work profile. Devices that don't support it will enroll on the Android device administrator platform. Neither work profile nor device administrator enrollment will work until you complete all prerequisites for Android enrollment.

Box 2: iOS/iPadOS, Allow min/max Range: Min

Reference: <https://docs.microsoft.com/en-us/mem/intune/enrollment/enrollment-restrictions-set>

NEW QUESTION 193

- (Exam Topic 4)

You have 500 Windows 10 devices enrolled in Microsoft Intune.

You plan to use Exploit protection in Microsoft Endpoint Manager to enable the following system settings on the devices:

- Data Execution Prevention (DEP)
- Force randomization for images (Mandatory ASLR)

You need to configure a Windows 10 device that will be used to create a template file.

Which protection areas on the device should you configure in the Windows Security app before you create the template file? To answer, drag the appropriate protection areas to the correct settings. Each protection area may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view content.

NOTE: Each correct selection is worth one point.

Protection areas	Answer Area
Account protection	DEP: <input type="text"/>
App & browser control	Mandatory ASLR: <input type="text"/>
Device security	

- A. Mastered
B. Not Mastered

Answer: A

Explanation:

Box 1: App & browser control

Graphical user interface, text, application Description automatically generated

Windows Security

←

☰

- Home
- Virus & threat protection
- Account protection
- Firewall & network protection
- App & browser control**
- Device security
- Device performance & health
- Family options

Exploit protection

See the Exploit protection settings for your system and programs. You can customise the settings you want.

System settings Program settings

Control flow guard (CFG)
Ensures control flow integrity for indirect calls.

Use default (On)

Data Execution Prevention (DEP)
Prevents code from being run from data-only memory pages.

Use default (On)

Force randomisation for images (Mandatory ASLR)
Force relocation of images not compiled with /DYNAMICBASE

Use default (Off)

Note: Data Execution Prevention (DEP): This mitigation prevents code from being run from data-only memory pages.
Box 2: App & browser control
Force randomization for images (Mandatory ASLR). This mitigation forcibly relocates images not compiled with /DYNAMICBASE.

<https://support.microsoft.com/en-us/windows/app-browser-control-in-windows-security-8f68fb65-ebb4-3cfb-4b>

NEW QUESTION 194

- (Exam Topic 4)

Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution that might meet the stated goals. Some question sets might have more than one correct solution, while others might not have a correct solution.
After you answer a question in this section, you will NOT be able to return to it. As a result, these questions will not appear in the review screen.
Your company has an Azure Active Directory (Azure AD) tenant named contoso.com and a Microsoft Intune subscription.
Contoso.com contains a user named user1@contoso.com.
You have a computer named Computer1 that runs Windows 8.1.
You need to perform an in-place upgrade of Computer1 to Windows 10.
Solution: You start Computer1 from the Windows 10 installation media and use the Install option. Does this meet the goal?

- A. Yes
- B. No

Answer: B

NEW QUESTION 198

- (Exam Topic 4)

You have a Microsoft 365 tenant that contains the objects shown in the following table.

Name	Type
Admin1	User
Group1	Microsoft 365 group
Group2	Distribution group
Group3	Mail-enabled security group
Group4	Security group

You are creating a compliance policy named Compliance1.
Which objects can you specify in Compliance1 as additional recipients of noncompliance notifications?

- A. Group1, Group2, Group3, Group4, and Admin1
- B. Group1, Group2, Group3, and Group4 only
- C. Group3, Group4, and Admin1 only
- D. Group1, Group2, and Group3 only
- E. Group3 and Group4 only

Answer: D

Explanation:

Reference:
<https://www.ravenswoodtechnology.com/microsoft-intune-compliance-notifications/> <https://docs.microsoft.com/en-us/microsoft-365/admin/create-groups/compare-groups?view=o365-worldwide>

NEW QUESTION 200

- (Exam Topic 4)

Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution that might meet the stated goals. Some question sets might have more than one correct solution, while others might not have a correct solution.
After you answer a question in this section, you will NOT be able to return to it. As a result, these questions will not appear in the review screen.
Your company has an Azure Active Directory (Azure AD) tenant named contoso.com and a Microsoft Intune subscription.
Contoso.com contains a user named user1@contoso.com.
You have a computer named Computer1 that runs Windows 8.1.
You need to perform an in-place upgrade of Computer1 to Windows 10.
Solution: You assign a Windows 10 license to User1. You instruct User1 to sign in to Computer1. Does this meet the goal?

- A. Yes
- B. No

Answer: B

NEW QUESTION 205

- (Exam Topic 4)

You have an Azure Active Directory (Azure AD) tenant that contains the named locations shown in the following table.

Name	Location type	Configuration
Location1	IP ranges	40.77.182.32/27
Location2	Countries (IP)	Canada
Location3	IP ranges	2a01:111::/32
Location4	Countries (IP)	Australia Include unknown countries/regions
Location5	Countries (GPS)	United States

You need to create a Conditional Access policy that will have a condition to include only trusted locations. Which two named locations can be marked as trusted? Each correct answer presents a complete solution. NOTE: Each correct selection is worth one point.

- A. Location1
- B. Location2
- C. Location3
- D. Location4
- E. Location5

Answer: AC

Explanation:

Location 1 and Location 3, both the ones I had as well as they include the IP Ranges Subnet as Trusted locations

NEW QUESTION 206

- (Exam Topic 4)

You have an Azure Active Directory (Azure AD) tenant named adatum.com that contains two computers named Computer1 and Computer2. The computers run Windows 10 and are members of a group named GroupA.

The tenant contains a user named User1 that is a member of a group named Group1.

You need to ensure that if User1 changes the desktop background on Computer1, the new desktop background will appear when User1 signs in to Computer2. What should you do?

- A. Create a device configuration profile for Windows 10 and configure the Shared multi-user device setting
- B. Assign the profile to GroupA.
- C. From the Azure Active Directory admin center, enable Enterprise State Roaming for Group1.
- D. From the Azure Active Directory admin center, enable Enterprise State Roaming for GroupA.
- E. Create a device configuration profile for Windows 10 and configure the Shared multi-user device setting
- F. Assign the profile to Group1.

Answer: D

Explanation:

Reference:

<https://docs.microsoft.com/en-us/mem/intune/configuration/shared-user-device-settings-windows> <https://docs.microsoft.com/en-us/mem/intune/configuration/shared-user-device-settings-windows> <https://docs.microsoft.com/en-us/mem/intune/configuration/device-profile-assign>

NEW QUESTION 211

- (Exam Topic 4)

You have unrooted devices enrolled in Microsoft Intune as shown in the following table.

Name	Platform	IP address
Device1	Windows	192.168.10.35
Device2	Android	10.10.10.40
Device3	Android	192.168.10.10

The devices are members of a group named Group1.

In Intune, you create a device compliance location that has the following configurations:

- > Name: Network1
- > IPv4 range: 192.168.0.0/16

In Intune, you create a device compliance policy for the Android platform. The policy has following configurations:

- > Name: Policy1
- > Device health: Rooted devices: Block
- > Locations: Location: Network1
- > Mark device noncompliant: Immediately
- > Assigned: Group1

In Intune device compliance policy has the following configurations:

- > Mark devices with no compliance policy assigned as: Compliant
- > Enhanced jailbreak detection: Enabled
- > Compliance status validity period (days): 20

For each of the following statements, select Yes if the statement is true. Otherwise, select No.

NOTE: Each correct selection is worth one point.

Device1 is marked as compliant. ☐

Device2 is marked as compliant. ☐

Device3 is marked as compliant. ☐

A. Mastered
B. Not Mastered

Answer: A

Explanation:

Reference:

<https://docs.microsoft.com/en-us/intune/device-compliance-get-started>

NEW QUESTION 215

- (Exam Topic 4)

Your network contains an on-premises Active Directory domain that contains the locations shown in the following table.

Name	Internal IP address	Public Network Address Translation (NAT) IP address	Active Directory site
Location1	10.10.0.0/16	131.107.15.0/24	Site1
Location2	10.20.0.0/16	131.107.16.0/24	Site1
Location3	172.16.0.0/16	131.107.196.0/24	Site2

In Microsoft Intune, you enroll the Windows 10 devices shown in the following table.

Name	IP address
Device1	10.10.0.50
Device2	10.20.1.150
Device3	10.10.1.155
Device4	172.16.0.30

You have a Delivery Optimization device configuration profile applied to all the devices. The profile is configured as shown in the following exhibit.

Delivery Optimization

Windows 10 and later

Basics Configuration settings Assignments

If you already configured and deployed Delivery Optimization download mode in Windows 10 update rings, before you begin, go to Software updates – Windows 10 update rings and migrate your existing settings.

NEW QUESTION 220

- (Exam Topic 4)
Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution that might meet the stated goals. Some question sets might have more than one correct solution, while others might not have a correct solution.
After you answer a question in this section, you will NOT be able to return to it. As a result, these questions will not appear in the review screen.
You have a Microsoft 365 subscription.
You have 20 computers that run Windows 10 and are joined to Microsoft Azure Active Directory (Azure AD). You plan to replace the computers with new computers that run Windows 10. The new computers will be joined to Azure AD.
You need to ensure that the desktop background, the favorites, and the browsing history are available on the new computers.
Solution: You configure Enterprise State Roaming. Does this meet the goal?

- A. Yes
- B. No

Answer: A

Explanation:
References:
<https://docs.microsoft.com/en-us/azure/active-directory/devices/enterprise-state-roaming-windows-settingsrefere>

NEW QUESTION 223

- (Exam Topic 4)
Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution that might meet the stated goals. Some question sets might have more than one correct solution, while others might not have a correct solution.
After you answer a question in this section, you will NOT be able to return to it. As a result, these questions will not appear in the review screen.
Your company has an Azure Active Directory (Azure AD) tenant named contoso.com that contains several Windows 10 devices.
When you join new Windows 10 devices to contoso.com, users are prompted to set up a four-digit pin. You need to ensure that the users are prompted to set up a six-digit pin when they join the Windows 10 devices to contoso.com.
Solution: From the Azure Active Directory admin center, you configure the Authentication methods. Does this meet the goal?

- A. Yes
- B. No

Answer: B

Explanation:
Instead, from the Azure Active Directory admin center, you configure automatic mobile device management (MDM) enrollment. From the Device Management admin center, you configure the Windows Hello for Business enrollment options.
References:
<https://docs.microsoft.com/en-us/intune/protect/windows-hello>

NEW QUESTION 227

- (Exam Topic 4)
You have a Microsoft 365 subscription that contains 1,000 Android devices enrolled in Microsoft intune. You create an app configuration policy that contains the following settings:

- Device enrollment type: Managed devices
- Profile Type: All Profile Types
- Platform: Android Enterprise

Which two types of apps can be associated with the policy? Each correct answer presents a complete solution. NOTE: Each correct selection is worth one point.

- A. Android Enterprise system app
- B. Android store app
- C. Web link
- D. Managed Google Play store app
- E. Built-in Android app

Answer: AD

NEW QUESTION 232

- (Exam Topic 4)

You have Windows 10 devices that are managed by using Microsoft Intune. Intune and the Microsoft Store for Business are integrated.

You need to deploy the Remote Desktop modern app as an automatic install to the Windows 10 devices without user interaction.

Which three actions should you perform? Each correct answer presents part of the solution.

NOTE: Each correct selection is worth one point.

- A. Create an Azure Active Directory group that contains all users.
- B. From the Intune portal, create a Microsoft Store app for the Remote Desktop modern app.
- C. From the Intune portal assign the app to the Azure Active Directory group.
- D. Create an Azure Active Directory group that contains the Windows 10 devices.
- E. From the Microsoft Store for Business portal, assign a license for the app to all the users in the Azure Active Directory group.
- F. For your organization, make the app available in the Microsoft Store for Business.

Answer: BCD

Explanation:

Reference:

<https://docs.microsoft.com/en-us/mem/intune/apps/apps-add> <https://docs.microsoft.com/en-us/mem/intune/apps/apps-deploy> <https://docs.microsoft.com/en-us/mem/intune/apps/windows-store-for-business>

NEW QUESTION 237

- (Exam Topic 4)

You have a Microsoft 365 Business Standard subscription and 100 Windows 10 Pro devices. You purchase a Microsoft 365 E5 subscription.

You need to upgrade the Windows 10 Pro devices to Windows 10 Enterprise. The solution must minimize administrative effort.

Which upgrade method should you use?

- A. Subscription Activation
- B. an in-place upgrade by using Windows installation media
- C. a Microsoft Deployment Toolkit (MDT) lite-touch deployment
- D. Windows Autopilot

Answer: A

Explanation:

Windows 10/11 Subscription Activation

Windows 10 Pro supports the Subscription Activation feature, enabling users to “step-up” from Windows 10 Pro or Windows 11 Pro to Windows 10 Enterprise or Windows 11 Enterprise, respectively, if they are subscribed to Windows 10/11 Enterprise E3 or E5.

Reference: <https://docs.microsoft.com/en-us/windows/deployment/windows-10-subscription-activation>

NEW QUESTION 241

- (Exam Topic 4)

Your company uses Windows Defender Advanced Threat Protection (Windows Defender ATP). Windows Defender ATP includes the machine groups shown in the following table.

Rank	Name	Members
1	Group1	Tag Equals demo And OS In Windows 10
2	Group2	Tag Equals demo
3	Group3	Domain Equals adatum.com
4	Group4	Domain Equals adatum.com And OS In Windows 10
5	Group5	Name starts with COMP
Last	Ungrouped machines (default)	Not applicable

You onboard a computer to Windows Defender ATP as shown in the following exhibit.

What is the effect of the Windows Defender ATP configuration? To answer, select the appropriate options in the answer area.
NOTE: Each correct selection is worth one point.

Computer1 will be a member of:

Group3 only
Group4 only
Grou5 only
Group3, Group4, and Group5 only

If you add the tag demo to Computer1, Computer1 will be a member of:

Group1 only
Group2 only
Group1 and Group2 only
Group1, Group2, Group3, Group4, and Group5

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

Computer1 will be a member of:

Group3 only
Group4 only
Grou5 only
Group3, Group4, and Group5 only

If you add the tag demo to Computer1, Computer1 will be a member of:

Group1 only
Group2 only
Group1 and Group2 only
Group1, Group2, Group3, Group4, and Group5

NEW QUESTION 244

- (Exam Topic 4)
Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution that might meet the stated goals. Some question sets might have more than one correct solution, while others might not have a correct solution.
After you answer a question in this section, you will NOT be able to return to it. As a result, these questions will not appear in the review screen.
You have a computer that runs Windows 8.1.
Two days ago, you upgraded the computer to Windows 10. You need to downgrade the computer to Windows 8.1.
Solution: You restart the computer to Windows Recovery Environment (Windows RE) and use the Advanced options.
Does this meet the goal?

- A. Yes
- B. No

Answer: B

NEW QUESTION 245

- (Exam Topic 4)
You have a Microsoft 365 tenant named contoso.com that contains a group named ContosoUsers. All the users in contoso.com are members of ContosoUsers.
You have two Windows 10 devices as shown in the following table.

Name	Join type	Mobile device management (MDM)
Computer1	Azure Active Directory (Azure AD) - registered	Microsoft Intune
Computer2	Azure Active Directory (Azure AD) – joined	Microsoft Intune

Both Computer1 and Computer2 contain two apps named App1 and App2.
You configure an app protection policy named AppPolicy1 that has the following settings:

- > Protected apps: App1
- > Assignments: ContosoUsers
- > Enrollment state: Without enrollment
- > Windows Information Protection mode: Block

For each of the following statements, select Yes if the statement is true. Otherwise, select No.
NOTE: Each correct selection is worth one point.

Statements	Yes	No
On Computer1, a user can copy and paste data from App1 to App2.	<input type="radio"/>	<input type="radio"/>
On Computer2, a user can copy and paste data from App1 to App2.	<input type="radio"/>	<input type="radio"/>
Data created by App1 can be wiped selectively from Computer1.	<input type="radio"/>	<input type="radio"/>

- A. Mastered
B. Not Mastered

Answer: A

Explanation:
Graphical user interface, text, application Description automatically generated

<https://docs.microsoft.com/en-us/mem/intune/apps/windows-information-protection-policy-create> <https://docs.microsoft.com/en-us/mem/intune/apps/apps-selective-wipe>

NEW QUESTION 248

- (Exam Topic 4)
Your company has a Microsoft 365 E5 tenant.
All the devices of the company are enrolled in Microsoft Endpoint Manager.
You need to create advanced reports by using custom queries and visualizations from raw Microsoft Endpoint Manager data.
Which three actions should you perform in sequence? To answer, move the appropriate actions from the list of actions to the answer area and arrange them in the correct order.

Actions

Add a certificate connector to Microsoft Endpoint Manager.

Add diagnostic settings.

Install Microsoft Power BI Desktop.

Create a Log Analytics workspace.

Purchase an Azure subscription.

Create a Microsoft SharePoint Online site.

Answer Area

NEW QUESTION 251

- (Exam Topic 4)

You have a Microsoft 365 subscription. The subscription contains 500 computers that run Windows 11 and are enrolled in Microsoft Endpoint Manager. You need to manage the deployment of monthly security updates. The solution must meet the following requirements:

- Updates must be deployed to a group of test computers for quality assurance.
- Updates must be deployed automatically 15 days after the quality assurance testing. What should you create in the Microsoft Endpoint Manager admin center?

- A. an update ring
- B. a security baseline
- C. a feature update policy
- D. a device configuration profile

Answer: A

NEW QUESTION 255

- (Exam Topic 4)

You have following types of devices enrolled in Microsoft Intune:

- Windows 10
- Android
- iOS

For which types of devices can you create VPN profiles in Microsoft Endpoint Manager?

- A. Windows 10 and Android only
- B. Windows 10, Android, and iOS
- C. Windows 10 only
- D. Windows 10 and iOS only
- E. Android and iOS only

Answer: B

Explanation:

Reference:

<https://docs.microsoft.com/en-us/mem/intune/configuration/vpn-settings-android>

NEW QUESTION 259

- (Exam Topic 4)

You use Microsoft Intune to manage client computers. The computers run one of the following operating systems:

- Windows 8.1
- Windows 10 Pro
- Windows 10 Enterprise
- Windows 10 Enterprise LTSC

You plan to manage Windows updates on the computers by using update rings. Which operating systems support update rings?

- A. Windows 10 Pro, Windows 10 Enterprise, and Windows 10 Enterprise LTSC only
- B. Windows 8.1, Windows 10 Pro, Windows 10 Enterprise, and Windows 10 Enterprise LTSC
- C. Windows 10 Enterprise and Windows 10 Enterprise LTSC only
- D. Windows 10 Pro and Windows 10 Enterprise only

Answer: D

Explanation:

Reference:

<https://docs.microsoft.com/en-us/mem/intune/protect/windows-update-for-business-configure>

NEW QUESTION 263

- (Exam Topic 4)

You have a Microsoft 365 subscription that uses Microsoft Intune and contains 100 Windows 10 devices. You need to create Intune configuration profiles to perform the following actions on the devices:

- Deploy a custom Start layout.
- Rename the local Administrator account.

Which profile template should you use for each action? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

Deploy a custom Start layout:

Delivery optimization
Device restriction
Endpoint protection
Identity protection

Rename the local Administrator account:

Delivery optimization
Device restriction
Endpoint protection
Identity protection

- A. Mastered
 B. Not Mastered

Answer: A

Explanation:

Box 1: Device restriction

Customize Start Menu Custom & Taskbar

Here is a quick step-by-step guide to help you to deploy the prepared XML file. This Intune policy helps to customize the start menu and taskbar for Windows 10 devices.

Logon to Microsoft Endpoint Manager Portal.

Navigate to Devices -> Windows -> Configuration Profiles. Select Platform -> Windows 10 and later.

Select Profile Type -> Template.

Search with "device" and select Device Restrictions. Click on Create button.

Box 2: Identity protection

Use an Identity protection profile to manage Windows Hello for Business on groups of devices in Microsoft Intune. Windows Hello for Business is a method for signing in to Windows devices by replacing passwords, smart cards, and virtual smart cards. Intune includes built-in settings so Administrators can configure and use Windows Hello for Business.

Reference:

<https://www.anoopcnaire.com/start-menu-taskbar-custom-layout-intune-cloudpc/> <https://docs.microsoft.com/en-us/mem/intune/protect/identity-protection-configure>

NEW QUESTION 268

- (Exam Topic 4)

You have computers that run Windows 10, are joined to Azure Active Directory (Azure AD), and are enrolled in Microsoft Intune.

You have an Azure web app named App1. App1 only allows connections over HTTPS. App1 uses a certificate from an on-premises certification authority (CA).

You need to ensure that the computers can connect to App1 from Microsoft Edge.

Which type of device configuration profile should you create in Microsoft Endpoint Manager?

- A. trusted certificate
 B. Simple Certificate Enrollment Protocol (SCEP) certificate
 C. imported public key pair (PKCS) certificate
 D. public key pair (PKCS) certificate

Answer: B

Explanation:

Reference:

<https://docs.microsoft.com/en-us/mem/intune/protect/certificates-scep-configure> <https://docs.microsoft.com/en-us/mem/intune/protect/certificates-configure>

NEW QUESTION 272

- (Exam Topic 4)

Your company has a Microsoft Azure Active Directory (Azure AD) tenant and computers that run Windows 10.

The company uses Microsoft Intune to manage the computers. The Azure AD tenant has the users shown in the following table.

Name	Member of
User1	Group1
User2	Group1, Group2
User3	None

The device type restrictions in Intune are configured as shown in the following table:

Priority	Name	Allowed platform	Assigned to
1	Policy1	Android, iOS, Windows (MDM)	None
2	Policy2	Windows (MDM)	Group2
3	Policy3	Android, iOS	Group1
Default	All users	Android, Windows (MDM)	All users

User3 is a device enrollment manager (DEM) in Intune.

For each of the following statements, select Yes if the statement is true. Otherwise, select No.

NOTE: Each correct selection is worth one point.

Statements	Yes	No
User1 can enroll a Windows device in Intune.	<input type="radio"/>	<input type="radio"/>
User2 can enroll a Windows device in Intune.	<input type="radio"/>	<input type="radio"/>
User3 can enroll an iOS device in Intune.	<input type="radio"/>	<input type="radio"/>

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

No, Yes, No
 Policy 1 - Priority 1 (Andriod, IOS, Windows) Applied to None Policy 2 - Priority 2 (Windows) Applied to Group 2 Policy 3 - Priority 3 (Android) Applied to Group 1
 User 1 is in G1, so they cannot enroll Windows devices. User 2 is in both G1 & G2, G2 has P2 with a Pri.2 which means, even though they are in G1, G1 has a pri.3, so P3 will not apply User 3 Is not a member of any group so the Default will apply. Policy 1 is assigned to NONE, default is assigned to All users, therefore they can NOT enroll iOS as default is only Android & Win.
 References:
<https://docs.microsoft.com/en-us/intune-user-help/enroll-your-device-in-intune-android>

NEW QUESTION 274

- (Exam Topic 4)
 You have a Microsoft Intune subscription.
 You have devices enrolled in Intune as shown in the following table.

Name	Operating system
Device1	Android 8.1.0
Device2	Android 9
Device3	iOS 11.4.1
Device4	iOS 12.3.1
Device5	iOS 12.3.2

An app named App1 is installed on each device.
 What is the minimum number of app configuration policies required to manage App1?

- A. 1
- B. 2
- C. 3
- D. 4
- E. 5

Answer: B

Explanation:

Reference:
<https://docs.microsoft.com/en-us/mem/intune/apps/app-configuration-policies-overview>

NEW QUESTION 279

- (Exam Topic 4)
 You need to enable Windows Defender Credential Guard on computers that run Windows 10. What should you install on the computers?

- A. Hyper-V
- B. Windows Defender Application Guard
- C. a guarded host
- D. containers

Answer: A

NEW QUESTION 284

- (Exam Topic 4)
 Your company has an infrastructure that has the following:

- > A Microsoft 365 tenant
- > An Active Directory forest
- > Microsoft Store for Business
- > A Key Management Service (KMS) server
- > A Windows Deployment Services (WDS) server
- > A Microsoft Azure Active Directory (Azure AD) Premium tenant

The company purchases 100 new computers that run Windows 10.

You need to ensure that the new computers are joined automatically to Azure AD by using Windows AutoPilot.
 What should you use? To answer, select the appropriate options in the answer area. NOTE: Each correct selection is worth one point.

Management tool:

<input type="checkbox"/>	Azure Active Directory admin center
<input type="checkbox"/>	Microsoft Store for Business
<input type="checkbox"/>	Volume Activation Management Tool console
<input type="checkbox"/>	Windows Deployment Services console

Required information from each computer:

<input type="checkbox"/>	Device serial number and hardware hash
<input type="checkbox"/>	MAC address and computer name
<input type="checkbox"/>	Volume License Key and computer name

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

Reference:

<https://docs.microsoft.com/en-us/intune/enrollment-autopilot>

NEW QUESTION 286

- (Exam Topic 4)

You have the Microsoft Deployment Toolkit (MDT) installed. You install and customize Windows 10 on a reference computer. You need to capture an image of the reference computer and ensure that the image can be deployed to multiple computers. Which command should you run before you capture the image?

- A. dism
- B. wpeinit
- C. bcdedit
- D. sysprep

Answer: D

Explanation:

Reference:

<https://docs.microsoft.com/en-us/windows-hardware/manufacture/desktop/sysprep--system-preparation-- overview>

NEW QUESTION 288

- (Exam Topic 4)

You have 100 computers that run Windows 10 and connect to an Azure Log Analytics workspace. Which three types of data can you collect from the computers by using Log Analytics? Each correct answer a complete solution. NOTE: Each correct selection is worth one point.

- A. error events from the System log
- B. failure events from the Security log
- C. third-party application logs stored as text files
- D. the list of processes and their execution times
- E. the average processor utilization

Answer: ADE

Explanation:

Log Analytics is a tool in the Azure portal to edit and run log queries from data collected by Azure Monitor logs, such as the system log, and interactively analyze their results.

Reference:

<https://docs.microsoft.com/en-us/azure/azure-monitor/logs/log-analytics-tutorial><https://docs.microsoft.com/en-u>

NEW QUESTION 290

- (Exam Topic 4)

Your network contains an on-premises Active Directory domain named contoso.com that syncs to Azure Active Directory (Azure AD). A user named User1 uses the domain-joined devices shown in the following table.

Name	Operating system
Device1	Windows 8.1 Pro
Device2	Windows 10 Pro

In the Azure Active Directory admin center, you assign a Windows 10 Enterprise E5 license to User1. You need to identify what will occur when User1 next signs in to the devices.

What should you identify for each device? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

Device1:

▼

Will activate as Windows 10 Enterprise

Will not upgrade to Windows 10 Enterprise

Will perform a clean installation of Windows 10 Enterprise

Will perform an in-place upgrade to Windows 10 Enterprise

Device2:

▼

Will activate as Windows 10 Enterprise

Will not upgrade to Windows 10 Enterprise

Will perform a clean installation of Windows 10 Enterprise

Will perform an in-place upgrade to Windows 10 Enterprise

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:
Table Description automatically generated
Reference:
<https://docs.microsoft.com/en-us/windows/deployment/windows-10-subscription-activation>

NEW QUESTION 291

- (Exam Topic 4)
Your company has a computer named Computer1 that runs Windows 10. Computer1 was used by a user who left the company. You plan to repurpose Computer1 and assign the computer to a new user. You need to redeploy Computer1 by using Windows AutoPilot. Which three actions should you perform in sequence? To answer, move the appropriate actions from the list of actions to the answer area and arrange them in the correct order.

Actions

Upload the file by using Microsoft Store for Business.

Upload the file by running azcopy.exe.

Generate a JSON file that contains the computer information.

Reset the computer.

Generate a CSV file that contains the computer information.

Answer Area

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:
Reference:
<https://docs.microsoft.com/en-us/intune/enrollment-autopilot>
<https://docs.microsoft.com/en-us/windows/deployment/windows-autopilot/windows-autopilot-reset>

NEW QUESTION 296

- (Exam Topic 4)
You have a Microsoft 365 E5 subscription that contains a user named User1 and the devices shown in the following table.

Name	Operating system	Azure AD status
Device1	Windows 11	Joined
Device2	Windows 10	Joined

User1 can access her Microsoft Exchange Online mailbox from both Device1 and Device2. You plan to create a Conditional Access policy named CAPolicy1 that will have the following settings:

- Assignments
- Users or workload identities: User1
- Cloud apps or actions: Office 365 Exchange Online
- Access controls
- Grant Block access

You need to configure CAPolicy1 to allow mailbox access from Device1 but block mailbox access from Device2. Solution: You add a condition to filter for devices. Does this meet the goal?

- A. Yes
- B. No

Answer: A

Explanation:

Conditional Access: Filter for devices
 When creating Conditional Access policies, administrators have asked for the ability to target or exclude specific devices in their environment. The condition filter for devices gives administrators this capability. Now you can target specific devices using supported operators and properties for device filters and the other available assignment conditions in your Conditional Access policies.
 Reference:
<https://learn.microsoft.com/en-us/azure/active-directory/conditional-access/concept-condition-filters-for-devices>

NEW QUESTION 301

- (Exam Topic 4)
 A company named A-Datum Corporation uses Microsoft Endpoint Configuration Manager, Microsoft Intune, and Desktop Analytics.
 A-Datum purchases a company named Contoso, Ltd. Contoso has devices that run the following operating systems:
 > Windows 8.1
 > Windows 10
 > Android
 > iOS
 A-Datum plans to use Desktop Analytics to monitor the Contoso devices.
 You need to identify which devices can be monitored by using Desktop Analytics and how to add the devices to Desktop Analytics.
 What should you identify? To answer, select the appropriate options in the answer area.
 NOTE: Each correct selection is worth one point.

Devices that can be monitored by using Desktop Analytics:

▼

Windows 10 only
 Windows 10, Android, and iOS only
 Windows 8.1 and Windows 10 only
 Windows 8.1, Windows 10, Android, and iOS

To add a device to Desktop Analytics, you must:

▼

Enroll the device in Microsoft Intune.
 Install the Endpoint Configuration Manager agent.
 Install the Microsoft Monitoring Agent.

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

Reference:
<https://docs.microsoft.com/en-us/mem/configmgr/desktop-analytics/overview>

NEW QUESTION 306

- (Exam Topic 4)
 You have the devices shown in the following table.

Name	Operating system	Domain member
Device1	Windows 8.1 Enterprise	Yes
Device2	Windows 10 Pro	No
Device3	Windows 10 Enterprise	Yes
Device4	Mac OS X	No

You plan to implement Microsoft Defender for Endpoint.
 You need to identify which devices can be onboarded to Microsoft Defender for Endpoint. What should you identify?

- A. Device3 only
- B. Device 1, Device2, and Device3 only
- C. Device 1, Device2, Device3, and Device4
- D. Device2 and Device3 only
- E. Device2, Device3, and Device4 only

Answer: B

Explanation:

References:
<https://docs.microsoft.com/en-us/mem/configmgr/protect/deploy-use/defender-advanced-threat-protection#bkmk>

NEW QUESTION 308

- (Exam Topic 4)

You have a Microsoft 365 E5 subscription and 25 Apple iPads.
You need to enroll the iPads in Microsoft Intune by using the Apple Configurator enrollment method. What should you do first?

- A. Upload a file that has the device identifiers for each iPad.
- B. Modify the enrollment restrictions.
- C. Configure an Apple MDM push certificate.
- D. Add your user account as a device enrollment manager (DEM).

Answer: C

Explanation:
An Apple MDM Push certificate is required for Intune to manage iOS/iPadOS and macOS devices. After you add the certificate to Intune, your users can enroll their devices.
Reference:
<https://docs.microsoft.com/en-us/mem/intune/enrollment/apple-mdm-push-certificate-get>

NEW QUESTION 313

- (Exam Topic 4)
Your network contains an Active Directory domain.
You install the Microsoft Deployment Toolkit (MDT) on a server You have a custom image of Windows 10.
You need to deploy the image to 100 devices by using MDT.
Which three actions should you perform in sequence? To answer, move the appropriate actions from the List of actions to the answer area and arrange them in the correct order.

Actions

Create a deployment share.

Add the Windows 10 image.

Enable multicast.

Create a task sequence.

Install Windows Deployment Services (WDS).

Answer Area

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:
Graphical user interface, text, application Description automatically generated
Reference:
<https://docs.microsoft.com/en-us/windows/deployment/deploy-windows-mdt/deploy-a-windows-10-image-using>

NEW QUESTION 314

- (Exam Topic 4)
You have a Microsoft 365 tenant that uses Microsoft Intune and contains the devices shown in the following table.

Name	Platform
Device1	Windows 10
Device2	macOS

In Endpoint security, you need to configure a disk encryption policy for each device.
Which encryption type should you use for each device, and which role-based access control (RBAC) role in Intune should you use to manage the encryption keys?
To answer, select the appropriate options in the answer area.
NOTE: Each correct selection is worth one point.

Answer Area

Device1:

FileVault

Cryptsetup

Encrypting File System (EFS)

BitLocker Drive Encryption (BitLocker)

Device2:

FileVault

Cryptsetup

Encrypting File System (EFS)

BitLocker Drive Encryption (BitLocker)

RBAC role:

Help Desk Operator

Application Manager

Intune Role Administrator

Policy and Profile Manager

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

Graphical user interface, text, application Description automatically generated

NEW QUESTION 316

- (Exam Topic 4)

You network contains an Active Directory domain. The domain contains 200 computers that run Windows 8.1. You have a Microsoft Azure subscription.

You plan to upgrade the computers to Windows 10.

You need to generate an Upgrade Readiness report for the computers.

What should you do? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

In Azure:

Create a migration project and discover machines.
Create an Azure Log Analytics workspace and add a solution.
Choose the MDM authority and configure Windows enrollment.

On the computers:

Configure the commercial ID.
Enroll in the Windows Insider Program.
Install the Microsoft Monitoring Agent.

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

In Azure:

Create a migration project and discover machines.
Create an Azure Log Analytics workspace and add a solution.
Choose the MDM authority and configure Windows enrollment.

On the computers:

Configure the commercial ID.
Enroll in the Windows Insider Program.
Install the Microsoft Monitoring Agent.

NEW QUESTION 320

- (Exam Topic 4)

You are replacing 100 company-owned Windows devices.

You need to use the Microsoft Deployment Toolkit (MDT) to securely wipe and decommission the devices.

The solution must meet the following requirements:

- > Back up the user state.
- > Minimize administrative effort.

Which task sequence template should you use?

- A. Litetouch OEM Task Sequence
- B. Sysprep and Capture
- C. Standard Client Replace Task Sequence
- D. Standard Client Task Sequence

Answer: C

Explanation:

Reference:

<https://docs.microsoft.com/en-us/windows/deployment/deploy-windows-mdt/get-started-with-the-microsoftdepl>

NEW QUESTION 321

- (Exam Topic 4)
You have a Microsoft 365 subscription and several Conditional Access policies in Azure Active Directory (Azure AD) that contains the resources shown in the following table.
You need to identify which Conditional Access policies will apply to a user when the user signs in to the Microsoft Office 365 portal from a Windows 10 computer.
What should you use?

- A. Event Viewer
- B. the Microsoft 365 compliance center
- C. Resultant Set of Policy (RSoP)

Answer: C

NEW QUESTION 324

- (Exam Topic 4)
Your network contains an Active Directory domain named constoso.com that is synced to Microsoft Azure Active Directory (Azure AD). All computers are enrolled in Microsoft Intune.
The domain contains the computers shown in the following table.

Name	Operating system
Computer1	Windows 8.1 Enterprise
Computer2	Windows 10 Enterprise without the latest feature update
Computer3	Windows 10 Enterprise without the latest feature update

You are evaluating which Intune actions you can use to reset the computers to run Windows 10 Enterprise with the latest update.
Which computers can you reset by using each action? To answer, select the appropriate options in the answer area.
NOTE: Each correct selection is worth one point.

Fresh Start action:

☐

Computer1 only

Computer2 only

Computer3 only

Computer2 and Computer3 only

Computer1, Computer2, and Computer3

Wipe action:

☐

Computer1 only

Computer2 only

Computer3 only

Computer2 and Computer3 only

Computer1, Computer2, and Computer3

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

Reference:
<https://docs.microsoft.com/en-us/intune/device-fresh-start> <https://docs.microsoft.com/en-us/intune/devices-wipe>

NEW QUESTION 327

- (Exam Topic 4)
Your company has an infrastructure that has the following:

- > A Microsoft 365 tenant
- > An Active Directory forest
- > Microsoft Store for Business
- > A Key Management Service (KMS) server
- > A Windows Deployment Services (WDS) server
- > A Microsoft Azure Active Directory (Azure AD) Premium tenant

The company purchases 100 new computers that run Windows 10.
You need to ensure that the new computers are joined automatically to Azure AD by using Windows AutoPilot.
What should you use? To answer, select the appropriate options in the answer area. NOTE: Each correct selection is worth one point.

Management tool:

<input type="checkbox"/>	Azure Active Directory admin center
<input type="checkbox"/>	Microsoft Store for Business
<input type="checkbox"/>	Volume Activation Management Tool console
<input type="checkbox"/>	Windows Deployment Services console

Required information from each computer:

<input type="checkbox"/>	Device serial number and hardware hash
<input type="checkbox"/>	MAC address and computer name
<input type="checkbox"/>	Volume License Key and computer name

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:
 Reference:
<https://docs.microsoft.com/en-us/intune/enrollment-autopilot>

NEW QUESTION 330
 - (Exam Topic 4)
 In Microsoft Intune, you have the device compliance policies shown in the following table.

Name	Type	Encryption	Windows Defender antimalware	Mark device as not compliant	Assigned to
Policy1	Windows 8	Require	<i>Not applicable</i>	5 days	Group1
Policy2	Windows 10	Not configured	Require	7 days	Group2
Policy3	Windows 10	Required	Require	10 days	Group2

The Intune compliance policy settings are configured as shown in the following exhibit.

These settings configure the way the compliance service treats devices. Each device evaluates these as a "Built-in Device Compliance Policy", which is reflected in device monitoring.

Mark devices with no compliance policy assigned as

Enhanced jailbreak detection

Compliance status validity period (days)

On June 1, you enroll Windows 10 devices in Intune as shown in the following table.

Name	Use BitLocker Drive Encryption (BitLocker)	Windows Defender	Member of
Device1	No	Enabled	Group1
Device2	No	Enabled	Group2

For each of the following statements, select Yes if the statement is true. Otherwise, select No.
 NOTE: Each correct selection is worth one point.

Statements	Yes	No
On June 4, Device1 is marked as compliant.	<input type="radio"/>	<input type="radio"/>
On June 6, Device1 is marked as compliant.	<input type="radio"/>	<input type="radio"/>
On June 9, Device2 is marked as compliant.	<input type="radio"/>	<input type="radio"/>

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:
Reference:
<https://docs.microsoft.com/en-us/mem/intune/protect/actions-for-noncompliance>

NEW QUESTION 333

- (Exam Topic 4)
Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution that might meet the stated goals. Some question sets might have more than one correct solution, while others might not have a correct solution.
After you answer a question in this section, you will NOT be able to return to it. As a result, these questions will not appear in the review screen.
Your company uses Windows AutoPilot to configure the computer settings of computers issued to users. A user named User1 has a computer named Computer1 that runs Windows 10. User1 leaves the company. You plan to transfer the computer to a user named User2.
You need to ensure that when User2 first starts the computer, User2 is prompted to select the language setting and to agree to the license agreement.
Solution: You create a new Windows AutoPilot user-driven deployment profile. Does this meet the goal?

- A. Yes
- B. No

Answer: A

Explanation:
Reference:
<https://docs.microsoft.com/en-us/windows/deployment/windows-autopilot/user-driven>
Windows Autopilot user-driven mode lets you configure new Windows devices to automatically transform them from their factory state to a ready-to-use state. This process doesn't require that IT personnel touch the device.
The process is very simple. Devices can be shipped or distributed to the end user directly with the following instructions:
Unbox the device, plug it in, and turn it on.
Choose a language (only required when multiple languages are installed), locale, and keyboard.
Connect it to a wireless or wired network with internet access. If using wireless, the user must establish the Wi-Fi link.
Specify your e-mail address and password for your organization account. The rest of the process is automated. The device will:
Join the organization.
Enroll in Intune (or another MDM service) Get configured as defined by the organization. Reference:

NEW QUESTION 337

- (Exam Topic 4)
You have a Microsoft Azure Active Directory (Azure AD) tenant named contoso.com that contains the users shown in the following table.

Name	Role
Admin1@contoso.com	Security administrator
Admin2@contoso.com	Cloud device administrator
User1@contoso.com	None

You have a computer named Computer1 that runs Windows 10. Computer1 is in a workgroup and has the local users shown in the following table.

Name	Member of
Administrator1	Network Configuration Operators
Administrator2	Power Users
UserA	Administrators

UserA joins Computer1 to Azure AD by using user1 @contoso.com.
For each of the following statements, select Yes if the statement is true. Otherwise, select No.
NOTE: Each correct selection is worth one point.

Statements	Yes	No
User1@contoso.com is a member of the local Administrators group on Computer1.	<input type="radio"/>	<input type="radio"/>
Admin1@contoso.com can configure the firewall and Microsoft Defender on Computer1.	<input type="radio"/>	<input type="radio"/>
Admin2@contoso.com can install software on Computer1.	<input type="radio"/>	<input type="radio"/>

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:
Box 1: No

Users may join devices to Azure AD: This setting enables you to select the users who can register their devices as Azure AD joined devices. The default is All.
Box 2: Yes

Admin1@contoso.com is an Azure AD security administrator Security Administrator

Users with this role have permissions to manage security-related features in the Microsoft 365 Defender portal, Azure Active Directory Identity Protection, Azure Active Directory Authentication, Azure Information

Protection, and Office 365 Security & Compliance Center. This includes:

* Microsoft Defender for Endpoint Assign roles

Manage machine groups

Configure endpoint threat detection and automated remediation View, investigate, and respond to alerts

View machines/device inventory Box 3: No

Admin2@contoso.com is an Azure AD Cloud device administrator. Cloud Device Administrator

Users in this role can enable, disable, and delete devices in Azure AD and read Windows 10 BitLocker keys (if present) in the Azure portal. The role does not grant permissions to manage any other properties on the device.
