Windows 10

About ExamBible

Your Partner of IT Exam

Found in 1998

ExamBible is a company specialized on providing high quality IT exam practice study materials, especially Cisco CCNA, CCDA, CCNP, CCIE, Checkpoint CCSE, CompTIA A+, Network+ certification practice exams and so on. We guarantee that the candidates will not only pass any IT exam at the first attempt but also get profound understanding about the certificates they have got. There are so many alike companies in this industry, however, ExamBible has its unique advantages that other companies could not achieve.

Our Advances

* 99.9% Uptime

All examinations will be up to date.

* 24/7 Quality Support

We will provide service round the clock.

* 100% Pass Rate

Our guarantee that you will pass the exam.

* Unique Gurantee

If you do not pass the exam at the first time, we will not only arrange FULL REFUND for you, but also provide you another exam of your claim, ABSOLUTELY FREE!

NEW QUESTION 1

- (Exam Topic 4)

You have a computer named Computer1 that runs Windows 11.

You receive a notification that Computer1 is running low on disk space. You need to remove the following files from Computer1:

- Unused apps
- Unused Microsoft OneDrive content
- Non-critical files for Microsoft Defender Antivirus The solution must minimize administrative effort.

Which tool should you use to remove each type of file? To answer, drag the appropriate tools to the correct file types. Each tool may be used once, more not at all. You may need to drag the split bar between panes or scroll to view content.

Tools	File types
Cleanup recommendations	Unused apps: Tool
Disk Cleanup	Unused OneDrive content: Tool
Disk Management	Non-critical files for Microsoft Defender Antivirus: Tool
Storage Sense	

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

Tools	File types
Cleanup recommendations	Unused apps: Disk Cleanup
Disk Cleanup	Unused OneDrive content: Disk Management
Disk Management	Non-critical files for Microsoft Defender Antivirus: Cleanup recommendations
Storage Sense	

NEW QUESTION 2

- (Exam Topic 4)

You have 20 computers that run Windows 10.

You configure all the computers to forward all the events from all the logs to a computer named Computer1 that runs Windows 10.

When you sign in to Computer1, you cannot see any security events from other computers. You can see all the other forwarded events from the other computers.

You need to ensure that the security events are forwarded to Computer1. What should you do?

- A. On each computer, run `wecutil ac /q`.
- B. On each computer, add the NETWORK SERVICE account to the Event Log Readers group.
- C. On each computer, run `winrm qc -q`.
- D. On Computer1, add the account of Computer1 to the Event Log Readers group.

Answer: D

Explanation:

References:

<https://docs.microsoft.com/en-us/windows/security/threat-protection/use-windows-event-forwarding-to-assistin>

NEW QUESTION 3

- (Exam Topic 4)

Please wait while the virtual machine loads. Once loaded, you may proceed to the lab section. This may take a few minutes, and the wait time will not be deducted from your overall test time.

When the Next button is available, click it to access the lab section. In this section, you will perform a set of tasks in a live environment. While most functionality will be available to you as it would be in a live environment, some functionality (e.g., copy and paste, ability to navigate to external websites) will not be possible by design.

Scoring is based on the outcome of performing the tasks stated in the lab. In other words, it doesn't matter how you accomplish the task, if you successfully perform it, you will earn credit for that task.

Labs are not timed separately, and this exam may have more than one lab that you must complete. You can use as much time as you would like to complete each lab. But, you should manage your time appropriately to ensure that you are able to complete the lab(s) and all other sections of the exam in the time provided.

Please note that once you submit your work by clicking the Next button within a lab, you will NOT be able to return to the lab.

Username and password

Use the following login credentials as needed:

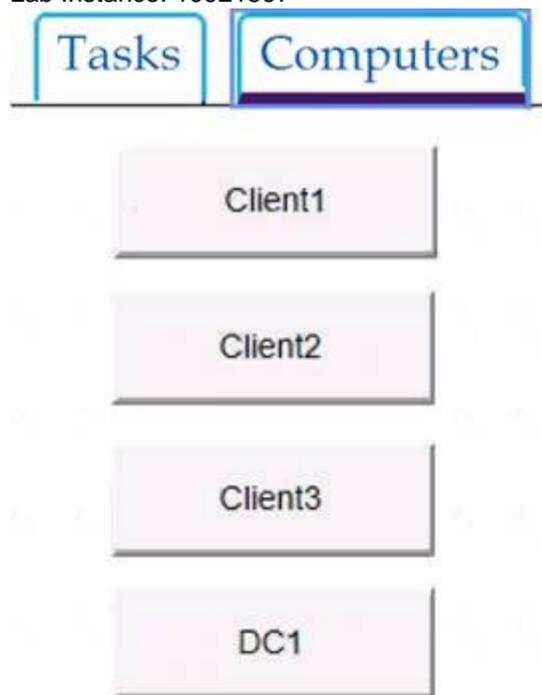

To enter your password, place your cursor in the Enter password box and click on the password below.

Username: Contoso/Administrator

Password: Passw0rd!

The following information is for technical support purposes only:

Lab Instance: 10921597

You need to create a file named Private.txt in a folder named Folder1 on the C drive of Client2.

You need to encrypt Private.txt and ensure that a user named User1 can view the contents of Private.txt.

To complete this task, sign in to the required computer or computers.

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

- > After creating Private.txt and saving it Folder1, right-click on the Private.txt, and select Properties from the context menu.
- > On the General tab, click Advanced. Next, check the box "Encrypt contents to secure data" and click OK.
- > A window will pop up asking you whether or not you want to encrypt the file and its parent folder. Select the "Encrypt the file only" and click OK.
- > Private.txt will now show its file name in green color.
- > Right-click Private.txt and then select Properties.
- > Click Advanced on the General tab.
- > Click Details on the Advanced Attributes tab to open the User Access dialog box.
- > Click Add to open the Encrypting File System dialog box and then select User1.
- > Click OK to add User1 to the list of users who have access to the file.
- > Click OK until you've exited out of the dialog boxes.

NEW QUESTION 4

- (Exam Topic 4)

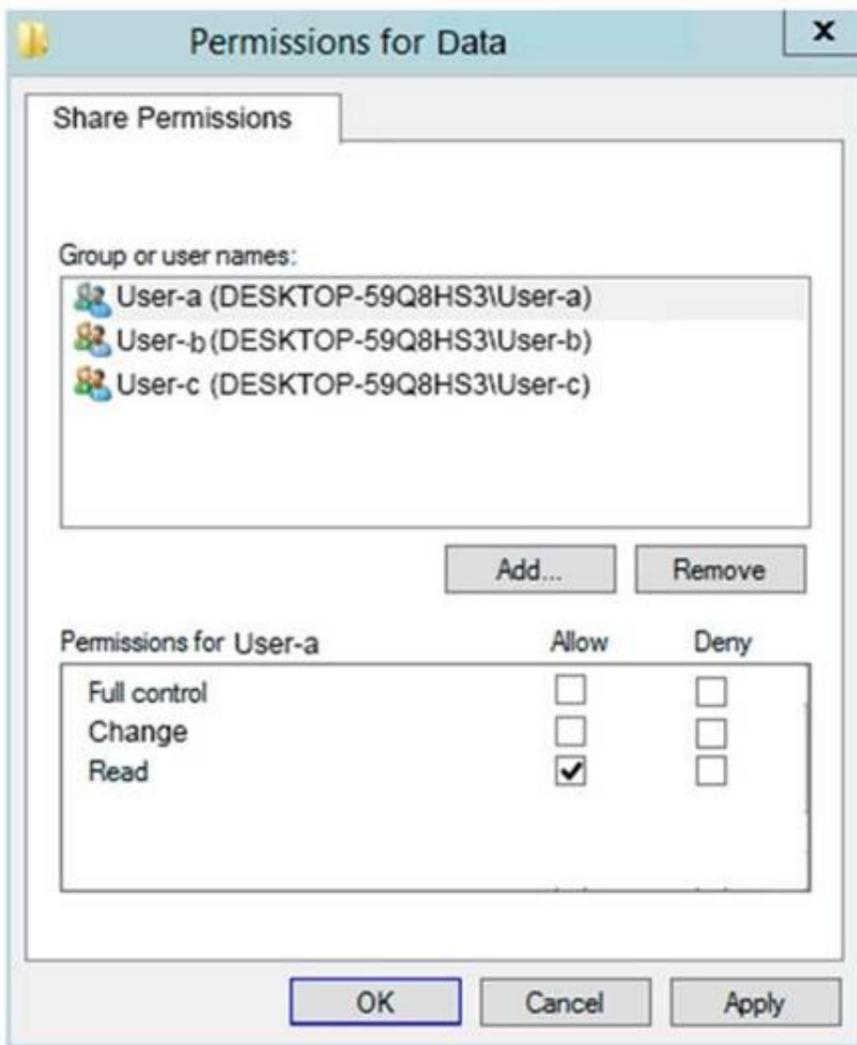

You have a computer named Computer5 that runs Windows 10 that is used to share documents in a workgroup.

You create three users named User-a, User-b, User-c. The users plan to access Computer5 from the network only.

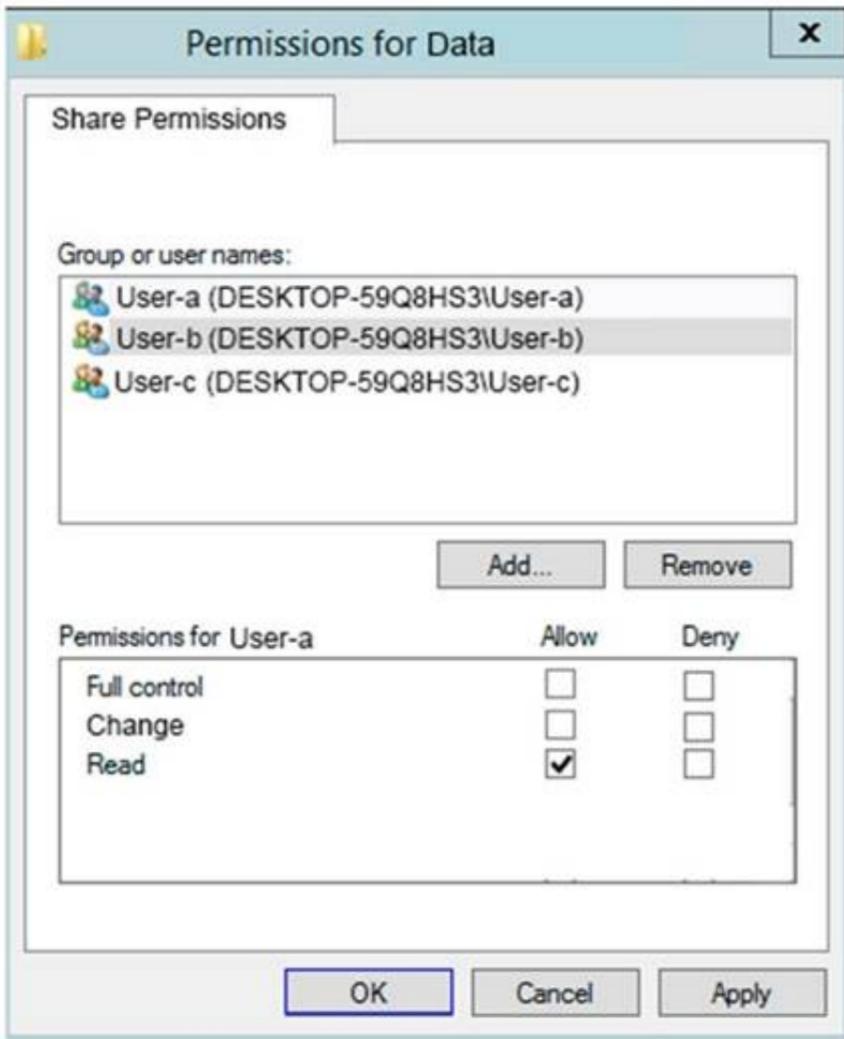

You have a folder named Data. The Advanced Security Settings for the Data folder are shown in the Security exhibit. (Click the Security Exhibit tab).

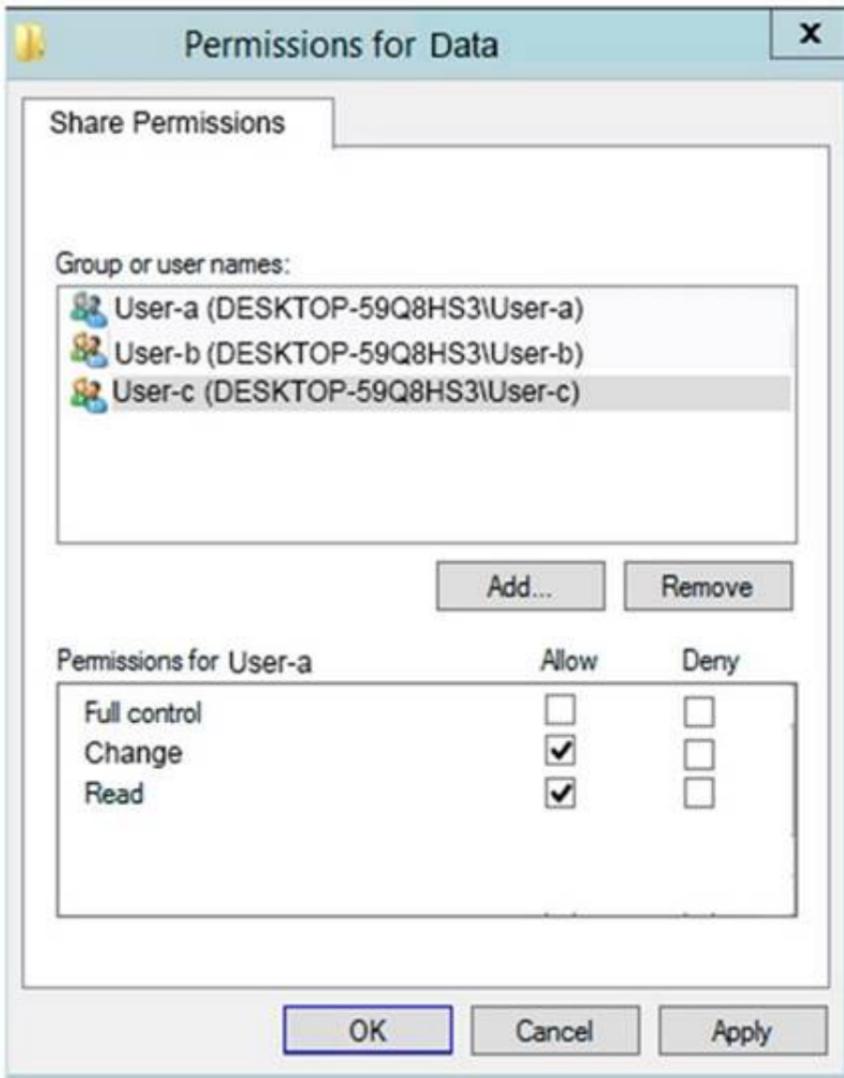

You share the Data folder. The permission for User-a are shown in the User-a exhibit (Click the User-a tab.)

The permissions for user-b are shown in the User-b exhibit. (Click the User-b tab.)

The permissions for user-c are shown in the User-c exhibit. (Click the User-c tab.)

For each of the following statements, select Yes if the statements is true. Otherwise, select No.
 NOTE: Reach correct selection is worth one point.

Statements

- User-a can modify files in the Data share.
- User-b can delete files in the Data share.
- User-c can read files in the Data share.

Yes	No
<input type="radio"/>	<input type="radio"/>
<input type="radio"/>	<input type="radio"/>
<input type="radio"/>	<input type="radio"/>

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

No No Yes

NEW QUESTION 5

- (Exam Topic 4)

Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution that might meet the stated goals. Some question sets might have more than one correct solution, while others might not have a correct solution.

After you answer a question in this section, you will NOT be able to return to it. As a result, these questions will not appear in the review screen.

You have a computer that runs Windows 10. The computer contains a folder named D:\Scripts. D:\Scripts contains several PowerShell scripts.

You need to ensure that you can run the PowerShell scripts without specifying the full path to the scripts. The solution must persist between PowerShell sessions.

Solution: From a command prompt, you run set.exe PATHEXT=d:\scripts. Does this meet the goal?

- A. Yes
- B. No

Answer: B

NEW QUESTION 6

- (Exam Topic 4)

You have computers that run Windows 10. The computers are joined to an Azure Active Directory (Azure AD) tenant and enrolled in Microsoft Intune.

You need to recommend a solution for help desk administrators that meets the following requirements:

- > The administrators must assist users remotely by connecting to each user's computer.
- > The remote connections must be initiated by the administrators. The users must approve the connection.
- > Both the users and the administrators must be able to see the screen of the users' computer.
- > The administrators must be able to make changes that require running applications as a member of each computer's Administrators group.

Which tool should you include in the recommendation?

- A. Remote Desktop
- B. Intune
- C. Remote Assistance
- D. Quick Assist

Answer: B

Explanation:

References:

<https://docs.microsoft.com/en-us/mem/intune/remote-actions/remote-assist-mobile-devices>

NEW QUESTION 7

- (Exam Topic 4)

You have three computers that run Windows 10 as shown in the following table.

Name	TPM version	Operating system
Computer1	None	Windows 10 Enterprise
Computer2	2.0	Windows 10 Pro
Computer3	1.2	Windows 10 Enterprise

All the computers have C and D volumes. The Require additional authentication at startup Group Policy settings is disabled on all the computers.

Which volumes can you encrypt by using BitLocker Drive Encryption (BitLocker)? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

Answer Area

You can encrypt volume C on:

▼
Computer1 only
Computer2 only
Computer3 only
Computer1 and Computer3 only
Computer2 and Computer3 only
Computer1, Computer2 and Computer3

You can encrypt volume D on:

▼
Computer1 only
Computer2 only
Computer3 only
Computer1 and Computer3 only
Computer2 and Computer3 only
Computer1, Computer2 and Computer3

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

Volume C on = Computer 2 and 3 only Volume D on = C1, C2, C3

The "Require additional authentication at startup" setting is located in the Computer Configuration\ Administrative Templates\ Windows Components\ BitLocker Drive Encryption\ Operating System Drives path. If the policy is disabled and there is no TPM chip installed, operating system drives can not be encrypted using BitLocker. Additional data volumes can be protected using a password as a key protector for example.

NEW QUESTION 8

- (Exam Topic 4)

You have a Microsoft Azure Active Directory (Azure AD) tenant.

Some users sign in to their computer by using Windows Hello for Business.

A user named User1 purchases a new computer and joins the computer to Azure AD.

User1 attempts to configure the sign-in options and receives the error message shown in the exhibit.

Sign-in options

***Some settings are hidden or managed by your organization.**

Windows Hello

Sign in to Windows, apps and services by teaching Windows to recognize you.

Windows Hello isn't available on this device.

[See how it works and find compatible devices.](#)

You open Device Manager and confirm that all the hardware works correctly.

You need to ensure that User1 can use Windows Hello for Business facial recognition to sign in to the computer.

What should you do first?

- A. Purchase an infrared (IR) camera.
- B. Upgrade the computer to Windows 10 Enterprise.
- C. Enable UEFI Secure Boot.
- D. Install a virtual TPM driver.

Answer: B

Explanation:

References:

<https://docs.microsoft.com/en-us/windows/security/identity-protection/hello-for-business/hello-planning-guide>

NEW QUESTION 9

- (Exam Topic 4)

Please wait while the virtual machine loads. Once loaded, you may proceed to the lab section. This may take a few minutes, and the wait time will not be deducted from your overall test time.

When the Next button is available, click it to access the lab section. In this section, you will perform a set of tasks in a live environment. While most functionality will be available to you as it would be in a live environment, some functionality (e.g., copy and paste, ability to navigate to external websites) will not be possible by design.

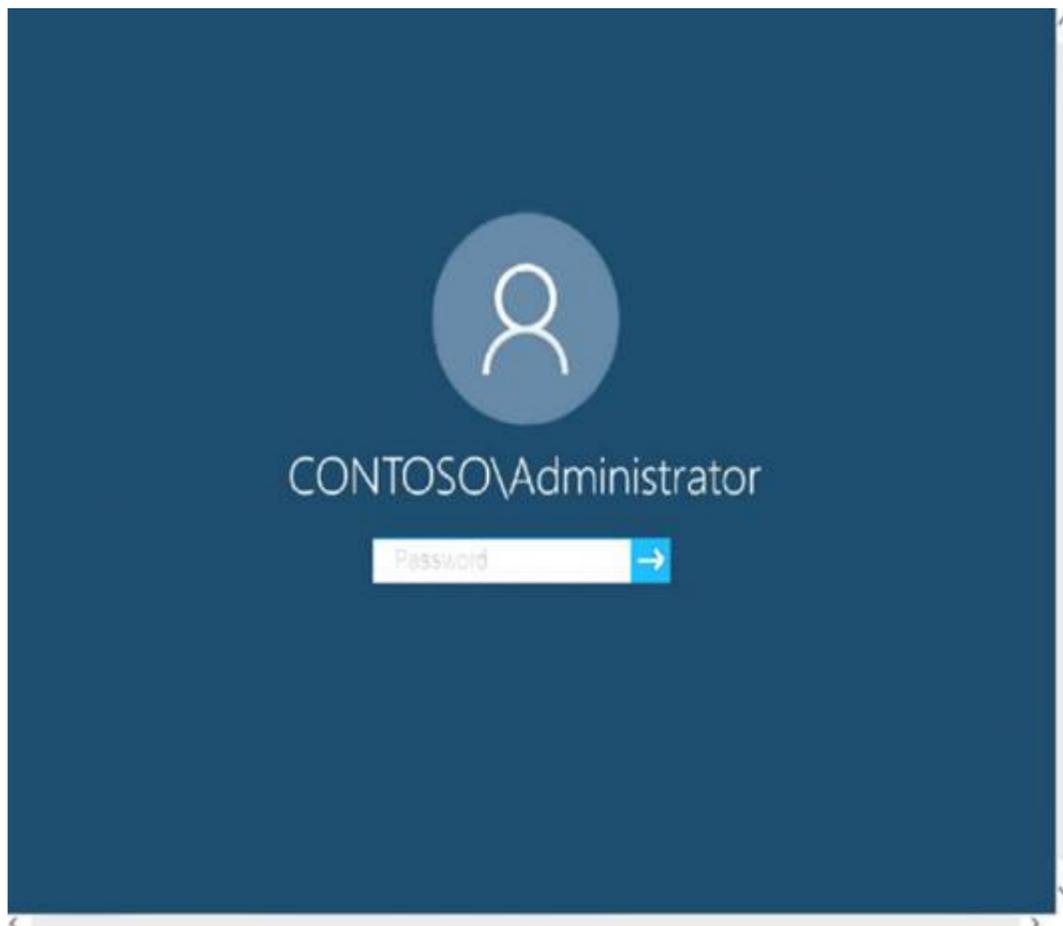

Scoring is based on the outcome of performing the tasks stated in the lab. In other words, it doesn't matter how you accomplish the task, if you successfully perform it, you will earn credit for that task.

Labs are not timed separately, and this exam may more than one lab that you must complete. You can use as much time as you would like to complete each lab.

But, you should manage your time appropriately to ensure that you are able to complete the lab(s) and all other sections of the exam in the time provided.

Please note that once you submit your work by clicking the Next button within a lab, you will NOT be able to return to the lab.

Tasks **Computers**

Client1

Client2

Client3

DC1

Users in the Finance group report that they cannot copy files to Client1\Finance. You need to resolve the issue. To complete this task, sign in to the required computer or computers.

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

- Open File Explorer.
- Browse and find the file or folder you want to have full access.
- Right-click it, and select Properties.
- Click the Security tab to access the NTFS permissions.
- Click the Advanced button.
- On the "Advanced Security Settings" page, you need to click the Change link, in the Owner's field.
- Click the Advanced button.
- On the "Select User or Group" page, click the Find Now button.
- From the search result, select your user account, and click OK.
- On the "Select User or Group" page, click OK.
- Click Apply.
- Click OK.
- Click OK again.
- Click OK one more time to complete this task.

It's important to note that if you're taking ownership of a folder, you can check the Replace ownership on subcontainers and object option in the Advanced Security Settings page to take control of the subfolders inside of the folder.

Now you'll need to grant full access control to your account, to do this use the following steps:

- Right-click the file or folder and select Properties.
- Click the Security tab to access the NTFS permissions.
- Click the Advanced button.
- Under the Permissions tab, click Add.
- Click Select a principal to add your user account.
- On the "Select User or Group" page, click the Find Now button.
- From the search result, select your user account, and click OK.
- On the "Select User or Group" page, click OK.
- On "Permission Entry", check the Full control option.
- Click OK.
- Click OK.
- Click Apply.
- Click OK.
- Click OK to close the file or folder properties to complete the task.

You can now assign the necessary permissions to the Finance group.

If you right-click on a file or folder, choose Properties and click on the Security tab, we can now try to edit some permissions. Go ahead and click the Edit button to get started.

At this point, there are a couple of things you can do. Firstly, you'll notice that the Allow column is probably greyed out and can't be edited. This is because of the inheritance I was talking about earlier. However, you can check items on the Deny column.

When you click the Add button, you have to type in the user name or group name into the box and then click on Check Names to make sure it's correct. If you don't remember the user or group name, click on the Advanced button and then just click Find Now. It will show you all the users and groups.

Click OK and the user or group will be added to the access control list. Now you can check the Allow column or Deny column.

NEW QUESTION 10

- (Exam Topic 4)

You have computers that run Windows 11 as shown in the following table.

Name	IP address	Joined to
Computer1	192.168.10.10	Active Directory
Computer2	192.168.10.15	Workgroup

You ping 192.168.10.15 from Computer1 and discover that the request timed out. You need to ensure that you can successfully ping 192.168.10.15 from Computer1. Solution: On Computer2, you enable PowerShell Remoting. Does this meet the goal?

- A. Yes
- B. No

Answer: A

NEW QUESTION 10

- (Exam Topic 4)

Your network contains an Active Directory domain. The domain contains a computer named Computer1 that runs Windows 10.

You need to ensure that Computer1 will respond to ping requests.

How should you configure Windows Defender Firewall on Computer1? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

Answer Area

Rule to create:

▼

A server-to-server connection security rule

An authentication exemption connection security rule

An inbound rule

An outbound rule

NEW QUESTION 14

- (Exam Topic 4)

You have the computer shown in the following table.

Name	Windows 10 edition	Servicing channel
Computer1	Windows 10 Pro	Preview Build - Fast
Computer2	Windows 10 Pro	Semi-annual
Computer3	Windows 10 Enterprise	Long-term

You plan to configure deployment rings for Windows 10 quality and feature updates.

What is the maximum number of days you can defer installing quality updates, and which computers support installing feature updates from Windows Update? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

Maximum number of days you can defer installing quality updates:

- 7 days
- 30 days
- 180 days
- 365 days

Computers that support installing feature updates from Windows Update:

- Computer1 only
- Computer2 only
- Computer3 only
- Computer1 and Computer2 only
- Computer1, Computer2, and Computer3

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

Graphical user interface, text, application, email Description automatically generated

Reference:

NEW QUESTION 15

- (Exam Topic 4)

You have a Windows 11 Pro device.

You need to perform a scan in Microsoft Defender to check for rootkits. Which type of scan should you use?

- A. full
- B. offline
- C. custom
- D. quick

Answer: B

NEW QUESTION 17

- (Exam Topic 4)

You have a computer that runs Windows 11 and has Windows Sandbox enabled. You need to create a custom Windows Sandbox configuration file. Which file extension should you use?

- A. .ps
- B. .json
- C. .wsb
- D. .xml

Answer: C

NEW QUESTION 18

- (Exam Topic 4)

You have a Microsoft Azure Active Directory (Azure AD) tenant.

Some users sign in to that computer by using Windows Hello for Business. A user User1 purchases a new computer and joins the computer to Azure AD.

User1 attempts to configure the sign-in options and receives the error message shown in the exhibit. (Click the Exhibit tab.)

Sign-in options

***Some settings are hidden or managed by your organization.**

Sign in to Windows, apps and services by teaching Windows to recognize you.

Windows Hello isn't available on this device.

[See how it works and find compatible devices.](#)

Tasks **Computers**

You need to create a group named Group2 on Client2. The members of Group2 must be able to change the system time. The solution must use the principle of least privilege.

To complete this task, sign in to the required computer or computers.

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

- On Client2, Press Windows+R
- Type lusrmgr.msc
- Right click Groups and click New Group.
- Type in the Group name and a description.
- Click Add to add members to this group. Specify the name of the user or group or computer to be added.
- Click Create and Close.
- Press the Win + R keys to open Run, type secpol.msc into Run, and click/tap on OK to open Local Security Policy.
- Expand open Local Policies in the left pane of Local Security Policy, click/tap on User Rights Assignment, and double click/tap on the Change the system time policy in the right pane.
- Click/tap on the Add User or Group button.
- Click/tap on the Object Types button.
- Check all the boxes for Object types, and click/tap on the OK.
- Click/tap on the Advanced button.
- Click/tap on the Find Now button, select the name of the user or group
- Click/tap on OK.
- Click/tap on OK.
- When finished, you can close Local Users and Groups.

NEW QUESTION 27

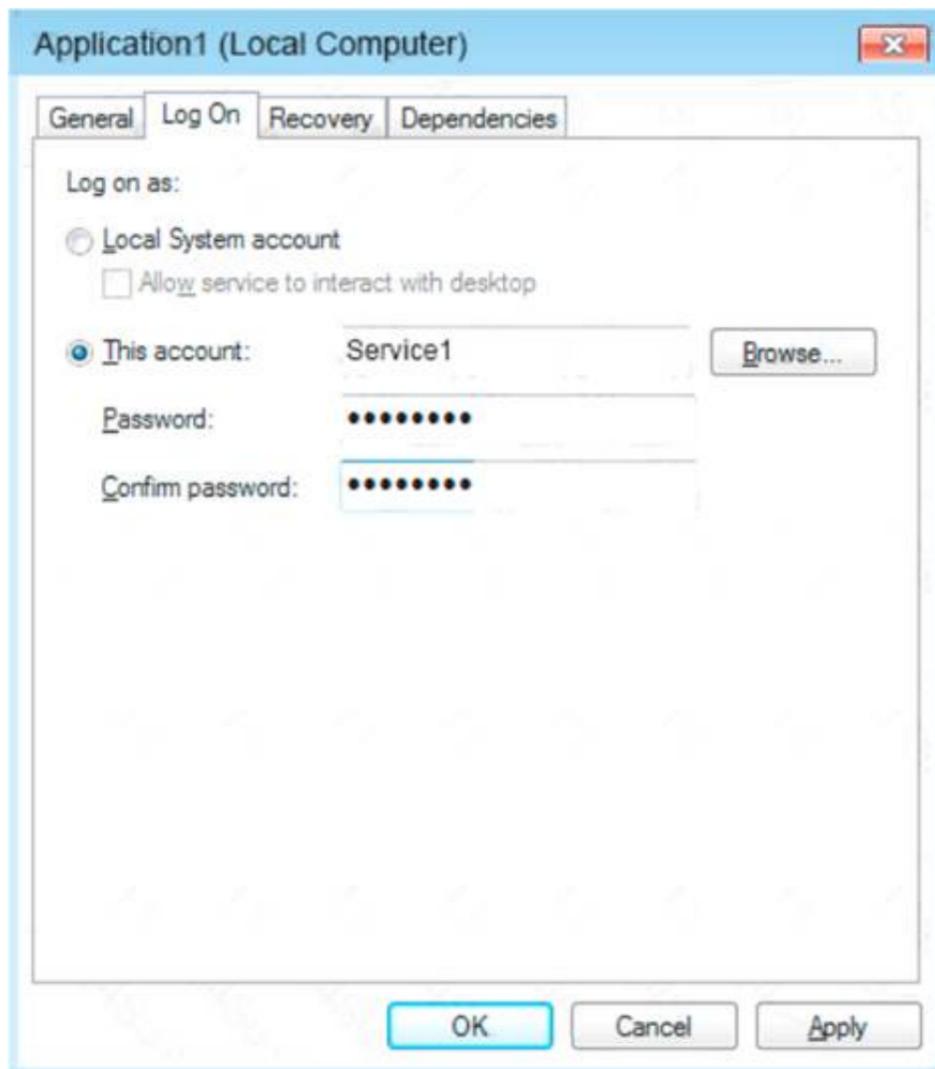

- (Exam Topic 4)

Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution that might meet the stated goals. Some question sets might have more than one correct solution, while others might not have a correct solution.

After you answer a question in this section, you will NOT be able to return to it. As a result, these questions will not appear in the review screen.

You have a computer named Computer1 that runs Windows 10.

A service named Application1 is configured as shown in the exhibit.

You discover that a user used the Service1 account to sign in to Computer1 and deleted some files. You need to ensure that the identity used by Application1 cannot be used by a user to sign in to the desktop on Computer1. The solution must use the principle of least privilege.

Solution: On Computer1, you assign Service1 the deny log on as a service user right. Does this meet the goal?

- A. Yes
- B. No

Answer: B

Explanation:

References:

<https://docs.microsoft.com/en-us/windows/security/threat-protection/security-policy-settings/deny-log-on-as-a-s>

NEW QUESTION 30

- (Exam Topic 4)

Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution that might meet the stated goals. Some question sets might have more than one correct solution, while others might not have a correct solution.

After you answer a question in this section, you will NOT be able to return to it. As a result, these questions will not appear in the review screen.

You have a computer named Computer1 that runs Windows 10.

You test Windows updates on Computer1 before you make the updates available to other users at your company.

You install a quality update that conflicts with a customer device driver. You need to remove the update from Computer1.

Solution: From System Restore, you revert the system state to a restore point that was created before the update was installed.

Does this meet the goal?

- A. Yes
- B. No

Answer: B

Explanation:

References:

<https://support.microsoft.com/en-us/help/934307/description-of-the-windows-update-standalone-installer-in-win>

NEW QUESTION 35

- (Exam Topic 4)

You have a computer named Computer1 that runs Windows 10. Computer1 has an IP address of 10.10.1.200 and a subnet mask of 255.255.255.0.

You configure the proxy settings on Computer1 as shown in the following exhibit.

Manual proxy setup

Use a proxy server for Ethernet or Wi-Fi connections. These settings don't apply to VPN connections.

Use a proxy server

On

Address

Port

Use the proxy server except for addresses that start with the following entries. Use semicolons (;) to separate entries.

Don't use the proxy server for local (intranet) addresses

Save

Use the drop-down menus to select the answer choice that completes each statement based on the information presented in the graphic. NOTE: Each correct selection is worth one point.

Connection attempts to

www.contoso.com will [answer choice].

bypass the proxy only when using Microsoft Edge
 use the proxy only when using Microsoft Edge
 bypass the proxy for all applications
 use the proxy for all applications

If Computer1 attempts to connect to

[answer choice] from Microsoft Edge, the proxy will be bypassed.

NEW QUESTION 39

- (Exam Topic 4)

Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution that might meet the stated goals. Some question sets might have more than one correct solution, while others might not have a correct solution.

After you answer a question in this section, you will NOT be able to return to it. As a result, these questions will not appear in the review screen.

Your network contains an Active Directory domain named contoso.com. The domain contains the users shown in the following table.

Name	Member of
User2	Domain Users
User3	Domain Admins
User4	Server Operators

You have a computer named Computer1 that runs Windows 10 and is in a workgroup.

A local standard user on Computer1 named User1 joins the computer to the domain and uses the credentials of User2 when prompted.

You need to ensure that you can rename Computer1 as Computer33. Solution: You use the credentials of User3 on Computer1.

Does this meet the goal?

- A. Yes
- B. No

Answer: A

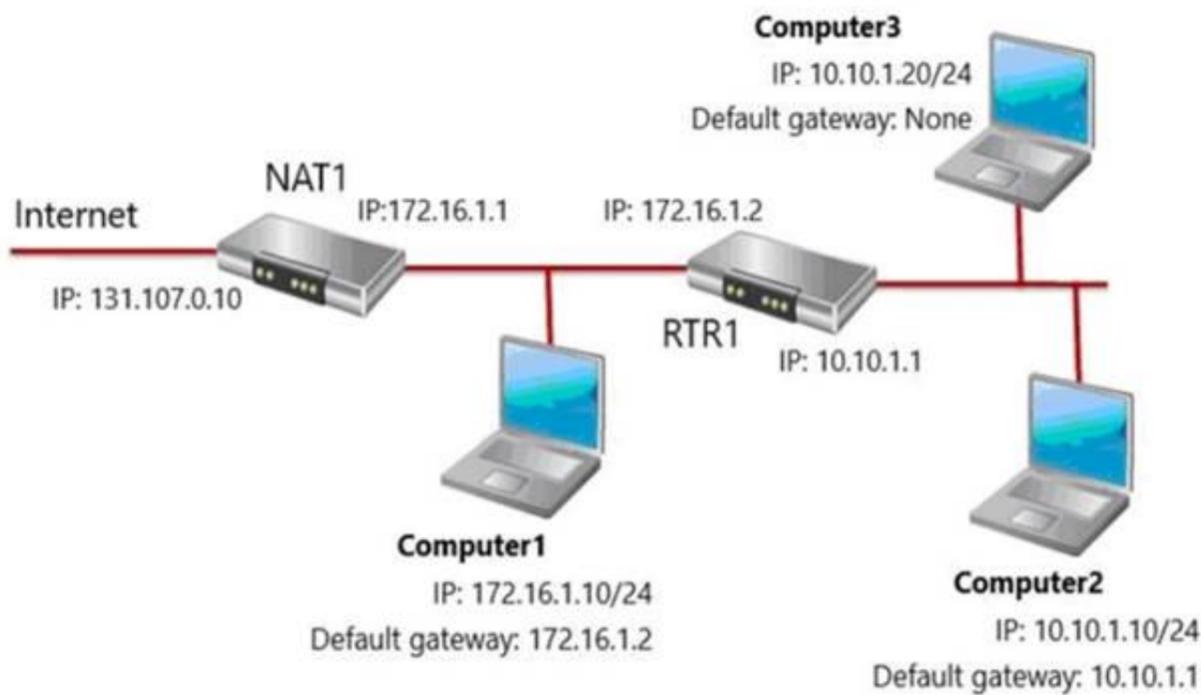

Explanation:

Renaming a domain-joined computer will also rename the computer account in the domain. To do this, you need domain administrator privileges. User3 is a domain administrator. References: <https://docs.microsoft.com/en-us/windows/security/identity-protection/access-control/active-directory-security-g>

NEW QUESTION 41

- (Exam Topic 4)

You have the network shown in the following exhibit.

Computer1, Computer2, and Computer3 run Windows 10. Windows Defender Firewall is configured to allow ICMP traffic. RTR1 is a router. For each of the following statements, select Yes if the statement is true. Otherwise, select No. NOTE: Each correct selection is worth one point.

Answer Area

Statements	Yes	No
If Computer1 pings the IP address of Computer2, Computer1 will receive a reply.	<input type="radio"/>	<input type="radio"/>
If Computer1 pings the IP address of Computer3, Computer1 will receive a reply.	<input type="radio"/>	<input type="radio"/>
If Computer2 pings the IP address of Computer3, Computer2 will receive a reply.	<input type="radio"/>	<input type="radio"/>

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

Answer Area

NEW QUESTION 45

- (Exam Topic 4)

You deploy Windows 10 to a new computer named Computer1. You sign in to Computer1 and create a user named User1. You create a file named LayoutModification.xml in the C:\Users\Default\AppData\Local\Microsoft\Windows\Shell\ folder. LayoutModification.xml contains the following markup.

```
<?xml version= "1.0" encoding= "utf-8"?>
<LayoutModificationTemplate
  xmlns= "http://schemas.microsoft.com/Start/2014/LayoutModification"
  xmlns:defaultlayout= "http://schemas.microsoft.com/Start/2014/FullDefaultLayout"
  xmlns:start= "http://schemas.microsoft.com/Start/2014/StartLayout"
  xmlns:taskbar= "http://schemas.microsoft.com/Start/2014/TaskbarLayout"
  Version= "1">
  <CustomTaskbarLayoutCollection>
    <defaultlayout:TaskbarLayout>
      <taskbar:TaskbarPinList>
        <taskbar:DesktopApp DesktopApplicationLinkPath= "%ALLUSERSPROFILE%\Microsoft\Windows
\Start Menu\Programs\Accessories\Paint.lnk" />
      </taskbar: TaskbarPinList>
    </defaultlayout:TaskbarLayout>
  </CustomTaskbarLayoutCollection>
</LayoutModificationTemplate>
```

What is the effect of the configuration? To answer, select the appropriate options in the answer area.
 NOTE: Each correct selection is worth one point.

When you sign in to Computer1, the taskbar will contain:

▼

- Default apps only
- Default apps and Microsoft Paint
- Microsoft Paint only

When User1 signs in to Computer1, the taskbar will contain:

▼

- Default apps only
- Default apps and Microsoft Paint
- Microsoft Paint only

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

References:
<https://docs.microsoft.com/en-us/windows/configuration/configure-windows-10-taskbar>

NEW QUESTION 49

- (Exam Topic 4)

You have a computer named Computer1 that runs Windows 10. Computer1 is in a workgroup. Computer1 contains the local users shown in the following table.

Name	Member of
Administrator	Administrators, Users
User1	Users
User2	Users

Computer1 contains the folders shown in the following table.

Name	Path
Folder1	D:\Folder1
Folder2	D:\Folder2
Folder3	E:\Folder3

The Users group has Full control permissions to Folder1, Folder2, and Folder3. User1 encrypts two files named File1.docx and File2.docx in Folder1 by using EFS.

Which users can move each file? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

Answer Area

Users who can move File1.docx to Folder2:

▼
User1 only
User1 and Administrator only
User1, User2, and Administrator

Users who can move File2.docx to Folder3:

▼
User1 only
User1 and Administrator only
User1, User2, and Administrator

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

EFS works by encrypting a file with a bulk symmetric key. The symmetric key that is used to encrypt the file is then encrypted with a public key that is associated with the user who encrypted the file. Because the encryption & decryption operations are performed at a layer below NTFS, it is transparent to the user and all their applications.

Box 1: User1, User2, and Administrator Box 2: User1, User2, and Administrator

All three are members of the Users group that has Full control permissions to Folder1, Folder2, and Folder3.

NEW QUESTION 50

- (Exam Topic 4)

You have a computer named Computer1 that has the following configurations:

- RAM: 4 GB
- CPU: 1.6 GHz
- Hard drive: 128 GB
- Operating system: Windows 10 Pro in S mode

You need to upgrade Computer1 to Windows 11. What should you do first?

- A. Increase the amount of RAM.
- B. Increase the storage capacity of the hard drive.
- C. Switch out of S mode.
- D. Upgrade the CPU.

Answer: C

NEW QUESTION 52

- (Exam Topic 4)

Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution that might meet the stated goals. Some question sets might have more than one correct solution, while others might not have a correct solution.

After you answer a question in this section, you will NOT be able to return to it. As a result, these questions will not appear in the review screen.

You have a workgroup computer that runs Windows 10. The computer contains the local user accounts shown in the following table.

Name	Member of
Administrator	Administrators
User1	Administrators
User2	Users
User3	Users

You need to configure the desktop background for User1 and User2 only.

Solution: You create a new local group to which you add User1 and User2. You create a local Group Policy Object (GPO) and configure the Desktop Wallpaper setting in the GPO. At a command prompt, you run the gpupdate.exe/Force command.

Does this meet the goal?

- A. Yes
- B. No

Answer: A

Explanation:

References:

<https://www.windowscentral.com/how-apply-local-group-policy-settings-specific-users-windows-10>

NEW QUESTION 53

- (Exam Topic 4)

You have computers that run Windows 11 as shown in the following table.

Name	IP address	Joined to
Computer1	192.168.10.10	Active Directory
Computer2	192.168.10.15	Workgroup

You ping 192.168.10.15 from Computer1 and discover that the request timed out. You need to ensure that you can successfully ping 192.168.10.15 from Computer 1.

Solution: On Computer2, you allow incoming ICMFV6 traffic in Windows Defender Firewall. Does this meet the goal?

- A. Yes
- B. No

Answer: A

NEW QUESTION 57

- (Exam Topic 4)

You are troubleshooting an issue that prevents you from installing Windows 10 updates. You discover that the issue relates to corrupt protected system files. You need to restore the corrupt system files. Which command should you run?

- A. scanstate
- B. sfc
- C. chkdsk
- D. chknfs

Answer: B

Explanation:

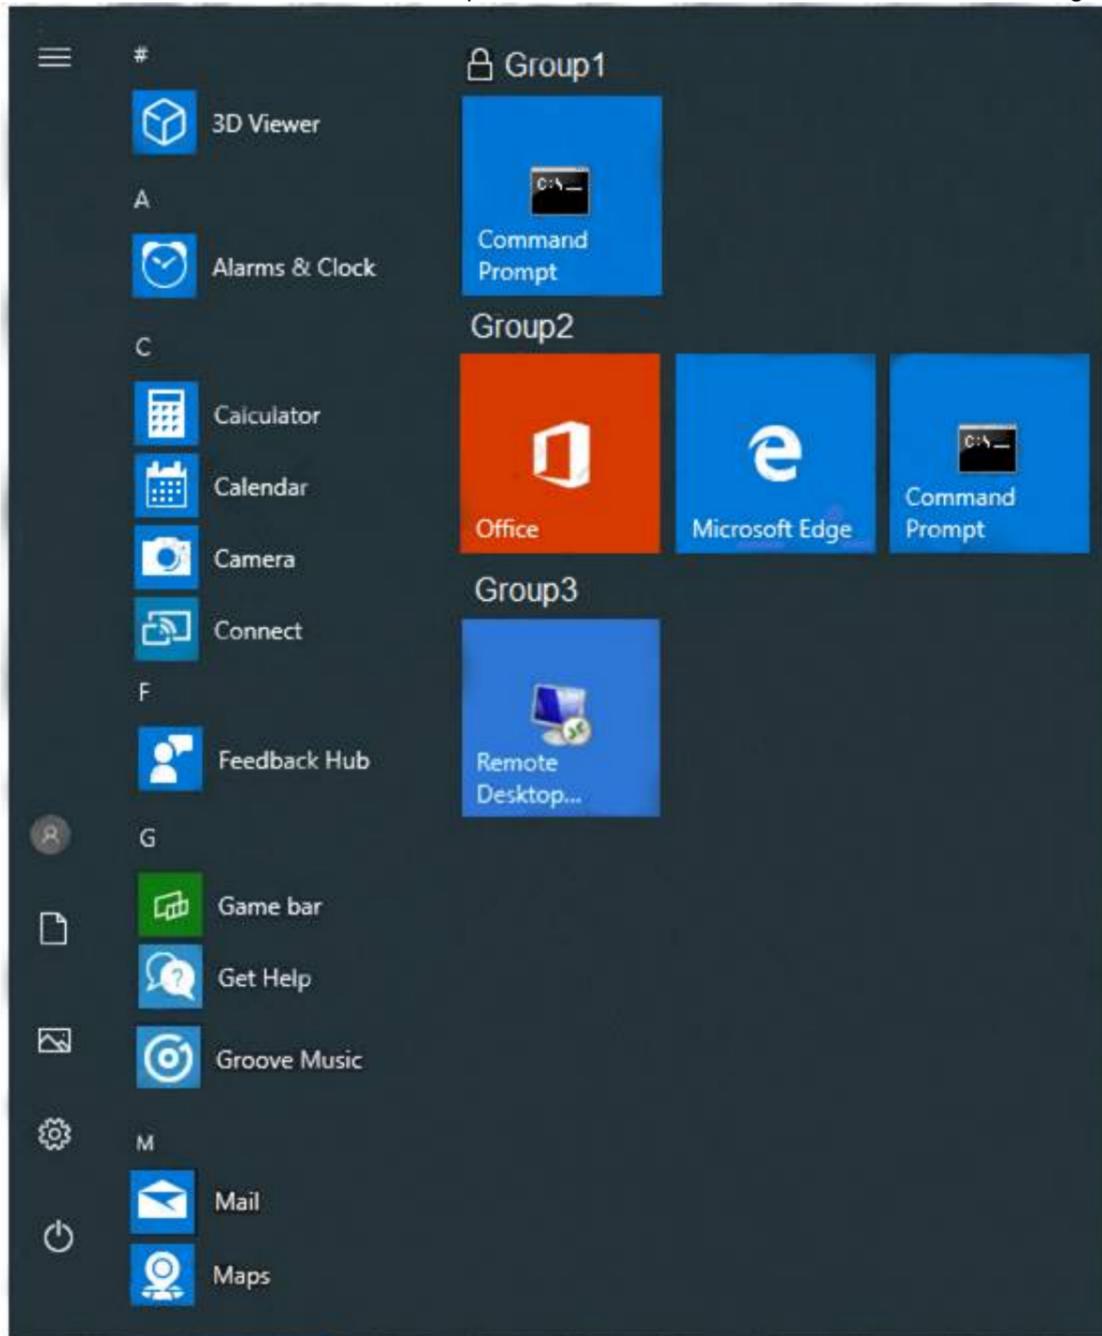

References:

<https://support.microsoft.com/en-us/topic/use-the-system-file-checker-tool-to-repair-missing-or-corrupted-system-files>

NEW QUESTION 62

- (Exam Topic 4)

You customize the Start menu on a computer that runs Windows 10 as shown in the following exhibit.

You need to add Remote Desktop Connection to Group1 and remove Group3 from the Start menu. Which two actions should you perform from the Start menu customizations? Each correct answer presents part of the solution. NOTE: Each correct selection is worth one point.

- A. Unlock Group!
- B. Remove Command Prompt from Group1.
- C. Delete Group3.
- D. Add Remote Desktop Connection to Group1.
- E. Rename Group3 as Group1.

Answer: AD

NEW QUESTION 65

- (Exam Topic 4)

Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution that might meet the stated goals. Some question sets might have more than one correct solution, while others might not have a correct solution.

After you answer a question in this section, you will NOT be able to return to it. As a result, these questions will not appear in the review screen.

A user named User2 has a computer named Computer2 that runs Windows 10. User2 joins Computer2 to contoso.com by using user2@contoso.com.

Computer1 contains a folder named Folder1. Folder1 is in drive C and is shared as Share1. Share1 has the permission shown in the following table.

Group	Share permission
Everyone	Full control
AzureAD\user1@contoso.com	Owner

A user named User2 has a computer named Computer2 that runs Windows 10. User2 joins Computer2 to contoso.com by using user2@contoso.com.

User2 attempts to access Share1 and receives the following error message: "The username or password is incorrect."

You need to ensure that User2 can connect to Share1.

Solution: You create a local group on Computer1 and add the Guest account to the group. You grant the group Modify access to Share1.

Does this meet the goal?

- A. Yes
- B. No

Answer: B

NEW QUESTION 69

- (Exam Topic 4)

Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution that might meet the stated goals. Some question sets might have more than one correct solution, while others might not have a correct solution.

After you answer a question in this section, you will NOT be able to return to it. As a result, these questions will not appear in the review screen.

You have two computers named Computer1 and Computer2 that run Windows 10.

You have an Azure Active Directory (Azure AD) user account named admin@contoso.com that is in the local Administrators group on each computer.

You sign in to Computer1 by using admin@contoso.com.

You need to ensure that you can use Event Viewer on Computer1 to connect to the event logs on Computer2. Solution: On Computer2, you run the Enable-PSRemoting cmdlet.

Does this meet the goal?

- A. Yes
- B. No

Answer: A

Explanation:

The Enable-PSRemoting cmdlet configures the computer to receive PowerShell remote commands that are sent by using the WS-Management technology.

References:

<https://docs.microsoft.com/en-us/powershell/module/microsoft.powershell.core/enable-psremoting?view=power>

NEW QUESTION 70

- (Exam Topic 4)

You are troubleshooting Windows 10 updates that fail to install on a computer that runs Windows 10. You delete the contents of the SoftwareDistribution folder.

You need to delete the signatures of the Windows Update packages. Which folder should you delete?

- A. %systemroot%\system32\catroot2
- B. %systemdrive%\recovery
- C. %systemroot%\WinSxS
- D. %systemdrive%\System Volume Information

Answer: A

Explanation:

References:

<https://tipsmake.com/how-to-delete-pending-updates-on-windows-10>

NEW QUESTION 74

- (Exam Topic 4)

Your company has several mobile devices that run Windows 10.

You need configure the mobile devices to meet the following requirements:

- > Windows updates may only be download when mobile devices are connect to Wi-Fi.
- > Access to email and the Internet must be possible at all times.

What should you do?

- A. Open the Setting app and select Update & Security
- B. Then select and configure Change active hours.
- C. Open the Setting app and select Network & Internet
- D. Then select Change connection properties, and set the Metered connection option for cellular network connections to On.
- E. Open the Setting app and select Network & Internet Then select Data Usage and set a data limit.
- F. Open the Setting app and select Update & Security
- G. Then select and configure Delivery Optimization.

Answer: B

Explanation:

Reference:

<https://www.makeuseof.com/tag/5-ways-temporarily-turn-off-windows-update-windows-10/>

NEW QUESTION 76

- (Exam Topic 4)

Please wait while the virtual machine loads. Once loaded, you may proceed to the lab section. This may take a few minutes, and the wait time will not be deducted from your overall test time.

When the Next button is available, click it to access the lab section. In this section, you will perform a set of tasks in a live environment. While most functionality will be available to you as it would be in a live environment, some functionality (e.g., copy and paste, ability to navigate to external websites) will not be possible by design.

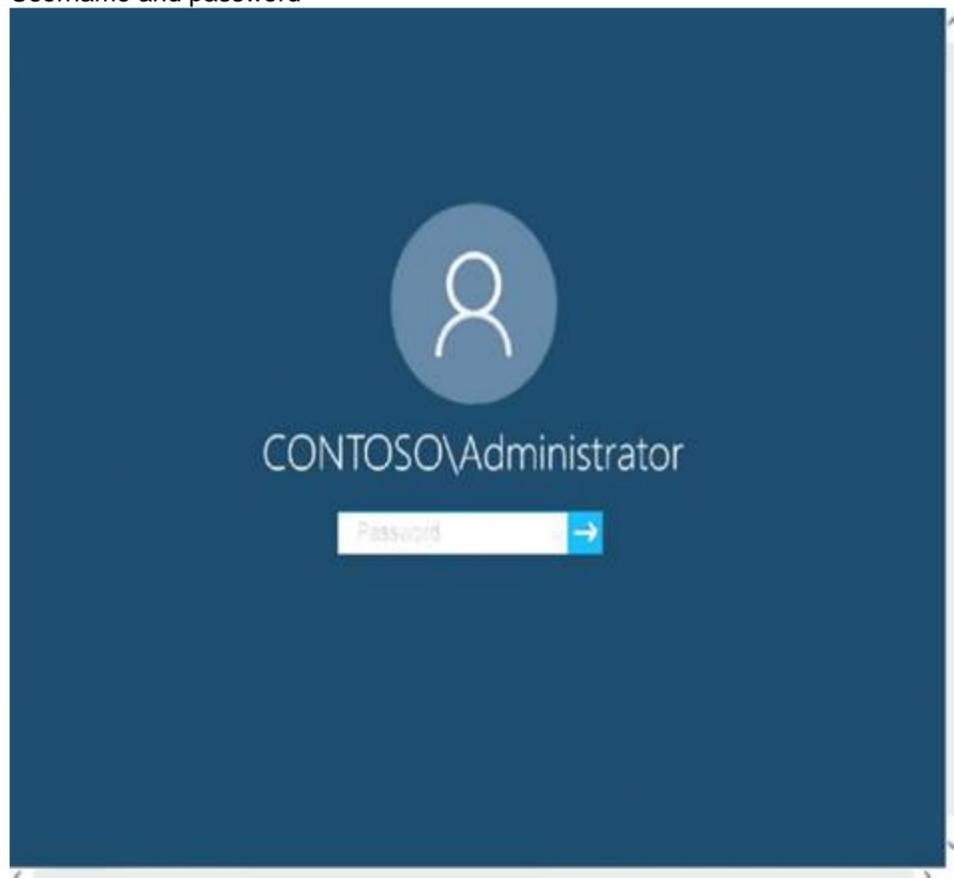

Scoring is based on the outcome of performing the tasks stated in the lab. In other words, it doesn't matter how you accomplish the task, if you successfully perform it, you will earn credit for that task.

Labs are not timed separately, and this exam may have more than one lab that you must complete. You can use as much time as you would like to complete each lab.

But, you should manage your time appropriately to ensure that you are able to complete the lab(s) and all other sections of the exam in the time provided.

Please note that once you submit your work by clicking the Next button within a lab, you will NOT be able to return to the lab.

Username and password

Use the following login credentials as needed:

To enter your password, place your cursor in the Enter password box and click on the password below.

Username: Contoso/Administrator

Password: Passw0rd!

The following information is for technical support purposes only:

Lab Instance: 10921597

Tasks Computers

You need to create a file named File1.txt in a folder named Folder1 on the C drive of Client2. You need to ensure that a user named User1 can read the contents of File1.txt. The solution must prevent User1 from modifying the file.

To complete this task, sign in to Client2 and perform the required action.

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

- > After creating File1.txt in Folder1, right-click the file and select Properties.
- > Access the Security tab, click Disable inheritance
- > Click on Remove all inherited permissions from this object, click Apply, and select Yes in the dialog box that appears.
- > Click OK
- > Back on the Security tab select Edit to change permissions.
- > Click Add, then enter User1 in the Enter the object names to select section.
- > Click Check Names, and then click OK.
- > Check only the Read box in the Allow column.
- > Click apply, Ok, and OK

NEW QUESTION 79

- (Exam Topic 4)

Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution that might meet the stated goals. Some question sets might have more than one correct solution, while others might not have a correct solution.

After you answer a question in this section, you will NOT be able to return to it. As a result, these questions will not appear in the review screen.

Your network contains an Active Directory domain named contoso.com. The domain contains the users shown in the following table.

Name	Member of
User2	Domain Users
User3	Domain Admins
User4	Server Operators

You have a computer named Computer1 that runs Windows 10 and is in a workgroup.

A local standard user on Computer1 named User1 joins the computer to the domain and uses the credentials of User2 when prompted.

You need to ensure that you can rename Computer1 as Computer33. Solution: You use the credentials of User1 on Computer1.

Does this meet the goal?

- A. Yes
- B. No

Answer: B

Explanation:

Renaming a domain-joined computer will also rename the computer account in the domain. To do this, you need domain administrator privileges.

User1 is a standard user. References:

<https://docs.microsoft.com/en-us/windows/security/identity-protection/access-control/active-directory-security-g>

NEW QUESTION 81

- (Exam Topic 4)

You deploy Windows 10 to several computers. The computers will be used by users who frequently present their desktop to other users.

You need to prevent applications from generating toast notifications in the notification area. Which settings should you configure from the Settings app?

- A. Shared experiences
- B. Privacy
- C. Focus assist
- D. Tablet mode

Answer: C

Explanation:

Focus Assist will automatically hide incoming notifications, so they don't pop up and distract you while you're playing a game, giving a presentation, or using a full-screen application.

NEW QUESTION 84

- (Exam Topic 4)

You have a computer named Computer1. Computer1 runs Windows 10 Pro.

You have a mobile device. You use Bluetooth to pair the mobile device to Computer1. You want to enable dynamic lock on Computer1.

What should you do?

To complete this task, sign in to the required computer or computers.

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

> On Computer1, select the Start button > Settings > Accounts > Sign-in options.

> Under Dynamic lock, select the Allow Windows to automatically lock your device when you're away check box.

Reference:

<https://support.microsoft.com/en-za/help/4028111/windows-lock-your-windows-10-pc-automatically-when-you>

NEW QUESTION 85

- (Exam Topic 4)

You have a computer named Computer1 that runs Windows 10.

You restart Computer1 by using Advanced startup and select Boot log.

In which folder is the boot log file stored?

- A. C:\
- B. C:\Windows
- C. C:\Windows\debug
- D. C:\Windows\System32\LogFiles

Answer: B

Explanation:

Reference:

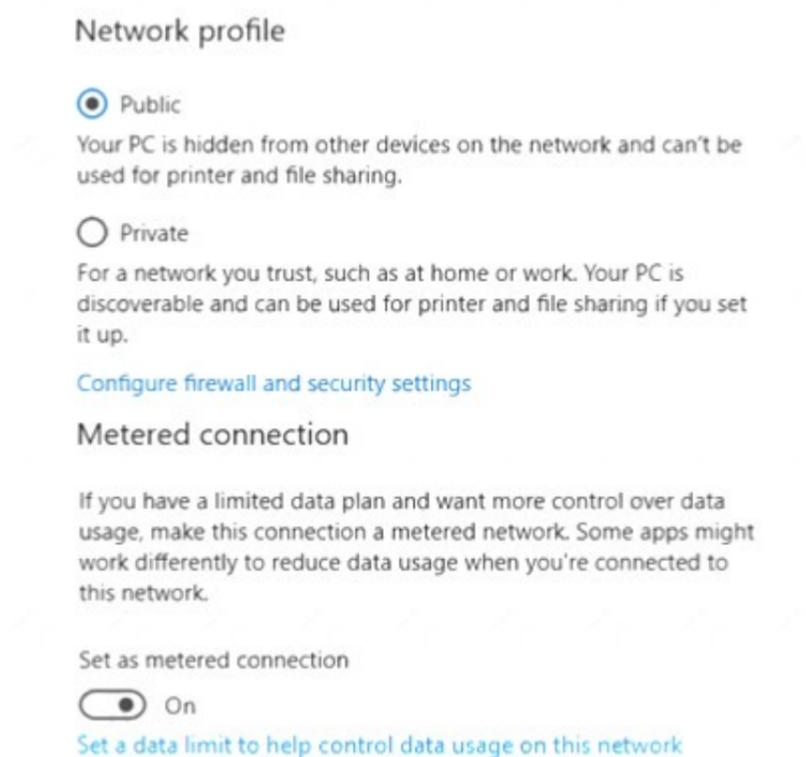

<https://winaero.com/enable-boot-log-windows-10/>

NEW QUESTION 90

- (Exam Topic 4)

You have a computer that runs Windows 10.

From the Settings app, you view the connection properties shown in the following exhibit.

The screenshot shows the 'Network profile' settings in Windows. The 'Public' option is selected with a radio button. Below it, a note states: 'Your PC is hidden from other devices on the network and can't be used for printer and file sharing.' The 'Private' option is unselected. Below it, a note states: 'For a network you trust, such as at home or work. Your PC is discoverable and can be used for printer and file sharing if you set it up.' There is a link to 'Configure firewall and security settings'. Below that is the 'Metered connection' section, which explains that it is for limited data plans. At the bottom, there is a toggle switch for 'Set as metered connection' which is currently turned 'On', and a link to 'Set a data limit to help control data usage on this network'.

Use the drop-down menus to select the answer choice that completes each statement based on the information presented in the graphic.

NOTE: Each correct selection is worth one point.

To enable Windows Remote Management (WinRM), you must first [answer choice].

▼

set the Network profile to Private
run winrm qc at the command prompt
turn off Metered connection

To ensure that Microsoft OneDrive syncs, you must first [answer choice].

▼

set the Network profile to Private
run winrm qc at the command prompt
turn off Metered connection

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

To enable Windows Remote Management (WinRM), you must first [answer choice].

▼

set the Network profile to Private
run winrm qc at the command prompt
turn off Metered connection

To ensure that Microsoft OneDrive syncs, you must first [answer choice].

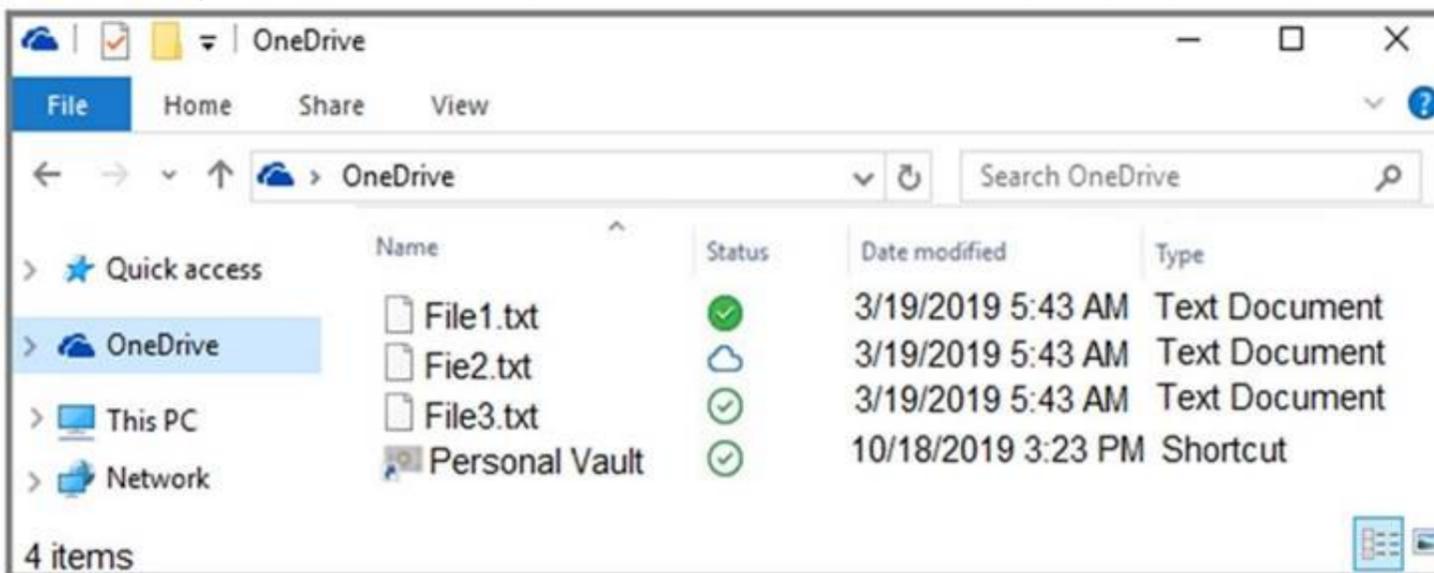

▼

set the Network profile to Private
run winrm qc at the command prompt
turn off Metered connection

NEW QUESTION 93

- (Exam Topic 4)

You have a workgroup computer named Computer1 that runs Windows 10. From File Explorer, you open OneDrive as shown in the following exhibit.

Use the drop-down menus to select the answer choice that answers each question based on the information presented on the graphic.
NOTE: Each correct selection is worth one point.

Answer Area

If Computer1 fails, which files will you be able to recover from Microsoft OneDrive?

▼

File2.txt only
File1.txt and File2.txt only
File2.txt and File3.txt only
File1.txt, File2.txt, and File3.txt

If the network adapter on Computer1 fails, which files will you be able to access on Computer1?

▼

File1.txt only
File1.txt and File2.txt only
File1.txt and File3.txt only
File1.txt, File2.txt, and File3.txt

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

If Computer1 fails, which files will you be able to recover from Microsoft OneDrive?

File2.txt only
File1.txt and File2.txt only
File2.txt and File3.txt only
File1.txt, File2.txt, and File3.txt

If the network adapter on Computer1 fails, which files will you be able to access on Computer1?

File1.txt only
File1.txt and File2.txt only
File1.txt and File3.txt only
File1.txt, File2.txt, and File3.txt

NEW QUESTION 95

- (Exam Topic 4)

You have 10 computers that run Windows 10 and have BitLocker Drive Encryption (BitLocker) enabled. You plan to update the firmware of the computers. You need to ensure that you are not prompted for the BitLocker recovery key on the next restart. The drive must be protected by BitLocker on subsequent restarts. Which cmdlet should you run?

- A. Unlock-BitLocker
- B. Disable-BitLocker
- C. Add-BitLockerKeyProtector
- D. Suspend-BitLocker

Answer: D

Explanation:

References:
<https://support.microsoft.com/en-us/help/4057282/bitlocker-recovery-key-prompt-after-surface-uefi-tpm-firmwa>

NEW QUESTION 99

- (Exam Topic 4)

You have a computer named Computer1 that runs Windows 10. Several users have signed in to Computer1 and have a profile. You create a taskbar modification file named LayoutModification.xml. You need to ensure that LayoutModification.xml will apply to all users who sign in to Computer1. To which folder should you copy LayoutModification.xml?

- A. C:\Users\Public\Public Desktop
- B. C:\Windows\ShellExperiences
- C. C:\Users\Default\AppData\Local\Microsoft\Windows\Shell\
- D. C:\Windows\System32\Configuration

Answer: C

Explanation:

Reference:
<https://docs.microsoft.com/en-us/windows/configuration/start-layout-xml-desktop>

NEW QUESTION 102

- (Exam Topic 4)

You have a computer that runs Windows 10 and contains the folders shown in the following table.

Name	Path
FolderA	C:\FolderA
FolderB	C:\FolderA\FolderB
FolderC	C:\FolderA\FolderB\FolderC

You create the groups shown in the following table.

Name	Members
Group1	User1, User2
Group2	User2, User3
Group3	User1, User3

On FolderA, you remove permission inheritance. To each folder, you assign the NTFS permissions shown in the following table.

Folder	Permission
FolderA	Modify to Group1 Read to Group2
FolderB	Write to Group2
FolderC	Read to Group3

For each of the following statements, select Yes if the statement is true. Otherwise, select No.

NOTE: Each correct selection is worth one point.

Statements	Yes	No
User1 can read and write all files in FolderC.	<input type="radio"/>	<input type="radio"/>
User2 can delete all files in FolderB.	<input type="radio"/>	<input type="radio"/>
User3 can delete all files in FolderC.	<input type="radio"/>	<input type="radio"/>

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:
 YES YES NO

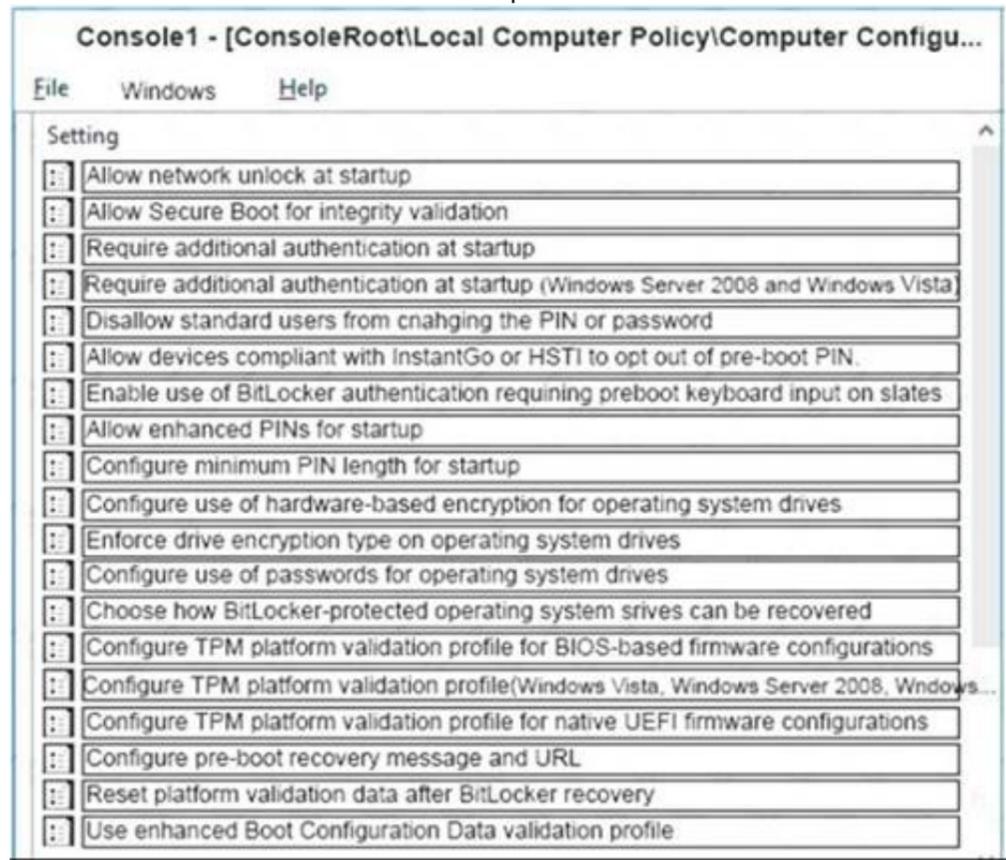

NEW QUESTION 106

- (Exam Topic 4)

Your domain contains named Computer named Computer1 that runs Windows 10. Computer1 does not have a TPM. You need to be able to encrypt the C drive by using BitLocker Drive Encryption (BitLocker). The solution must ensure that the recovery key is stored in Active Directory.

Which two Group Policy settings should you configure? To answer, select the appropriate settings in the answer area.

NOTE: Each correct selection is worth one point.

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:
 References:
<https://docs.microsoft.com/en-us/windows/security/information-protection/bitlocker/bitlocker-group-policy-setti>

NEW QUESTION 107

- (Exam Topic 4)

You have a computer named Client1 that runs Windows 11. Client1 hosts a Hyper-V virtual machine named VM1 that runs Windows 11 Pro. VM1 is in the running state.

You need to enable Windows Sandbox on VM1.

Which five actions should you perform in sequence? To answer, move the appropriate actions from the list of actions to the answer area and arrange them in the correct order.

Actions	Answer Area
From VM1, run the Enable-WindowsOptionalFeature cmdlet.	
Stop VM1.	
From Client1, run the Set-VMProcessor cmdlet.	
From Client1, run the Enable-WindowsOptionalFeature cmdlet.	
Sign in to VM1.	
Start VM1.	

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

Actions	Answer Area
From VM1, run the Enable-WindowsOptionalFeature cmdlet.	
Stop VM1.	
From Client1, run the Set-VMProcessor cmdlet.	
From Client1, run the Enable-WindowsOptionalFeature cmdlet.	
Sign in to VM1.	
Start VM1.	

NEW QUESTION 108

- (Exam Topic 4)

You plan to deploy Windows 10 Enterprise to company-owned devices. You capture a Windows 10 image file from a reference device. You need to generate catalog files and answer files for the deployment. What should you use for each file? To answer, select the appropriate options in the answer area. NOTE: Each correct selection is worth one point.

Catalog file:

- Deployment Image Servicing and Management (DISM)
- Windows Configuration Designer
- Windows Deployment Services (WDS)
- Windows System Image Manager (Windows SIM)

Answer file:

- Deployment Image Servicing and Management (DISM)
- Windows Configuration Designer
- Windows Deployment Services (WDS)
- Windows System Image Manager (Windows SIM)

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

Graphical user interface, text, application Description automatically generated

References:

<https://docs.microsoft.com/en-us/windows-hardware/customize/desktop/wsim/open-a-windows-image-or-catalo>

NEW QUESTION 112

- (Exam Topic 4)

You are a network administrator at your company.

The company uses an application that checks for network connectivity to a server by sending a ping request to the IPv6 address of the server replies, the

application loads.

A user cannot open the application.

You manually send the ping request from the computer of the user and the server does not reply. You send the ping request from your computer and the server replies.

You need to ensure that the ping request works from the user's computer. Which Windows Defender firewall rule is a possible cause of the issue?

- A. File and Printer Sharing (NB-Datagram-In)
- B. File and Printer Sharing (Echo request ICMPv6-Out)
- C. File and Printer Sharing (NB-Datagram-Out)
- D. File and Printer Sharing (Echo Request ICMPv6-In)

Answer: B

NEW QUESTION 116

- (Exam Topic 4)

You plan to install Windows 10 by using a Windows Setup answer file. You need to perform the following actions during the installation:

- Add a local account named LocalAdmin to the Administrators group.
- Add the model and manufacturer information.
- Configure the disks and partitions.

Which Windows Setup configuration pass should you configure for each action? To answer, drag the appropriate configuration passes to the correct actions. Each configuration pass may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view content.

NOTE: Each correct selection is worth one point.

Configuration Pass		Answer Area
auditSystem	auditUser	Add a local account named LocalAdmin to the Administrators group: <input type="text"/>
generalize	offlineServicing	Add the model and manufacturer information: <input type="text"/>
oobeSystem	specialize	Configure the disks and partitions: <input type="text"/>
windowsPE		

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

Configuration Pass		Answer Area
auditSystem	auditUser	Add a local account named LocalAdmin to the Administrators group: <input type="text" value="oobeSystem"/>
generalize	offlineServicing	Add the model and manufacturer information: <input type="text" value="specialize"/>
oobeSystem	specialize	Configure the disks and partitions: <input type="text" value="windowsPE"/>
windowsPE		

NEW QUESTION 119

- (Exam Topic 4)

You have an Azure Active Directory (Azure AD) tenant named contoso.com. You have a workgroup computer named Computer1 that runs Windows 10. You need to add Computer1 to contoso.com.

What should you use?

- A. Computer Management
- B. dsregcmd.exe
- C. the Settings app
- D. netdom.exe

Answer: C

Explanation:

You join a computer to a domain, including an Azure AD domain in the Settings panel in Windows 10, under System->>About

References: <https://aadguide.azurewebsites.net/aadjoin/>

NEW QUESTION 121

- (Exam Topic 4)

You are planning a recovery strategy for computers that run Windows 10.

You need to create recovery procedures to roll back feature updates and quality updates.

What should you include in the procedures? To answer, select the appropriate options in the answer area. NOTE: Each correct selection is worth one point.

To roll back feature updates:

<input type="checkbox"/> Recovery from the Settings app <input type="checkbox"/> Windows Update from the Settings app <input type="checkbox"/> Programs and Features from the Control Panel <input type="checkbox"/> Troubleshoot from the Settings app
--

To roll back quality updates:

<input type="checkbox"/> Recovery from the Settings app <input type="checkbox"/> Windows Update from the Settings app <input type="checkbox"/> Programs and Features from the Control Panel <input type="checkbox"/> Troubleshoot from the Settings app
--

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

References:

<https://www.thewindowsclub.com/rollback-uninstall-windows-10-creators-update> <https://www.dummies.com/computers/pcs/undo-windows-update/>

NEW QUESTION 126

- (Exam Topic 4)

Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution that might meet the stated goals. Some question sets might have more than one correct solution, while others might not have a correct solution.

After you answer a question in this section, you will NOT be able to return to it. As a result, these questions will not appear in the review screen.

You have two computers named Computer1 and Computer2 that run Windows 10.

You have an Azure Active Directory (Azure AD) user account named admin@contoso.com that is in the local Administrators group on each computer.

You sign in to Computer1 by using admin@contoso.com.

You need to ensure that you can use Event Viewer on Computer1 to connect to the event logs on Computer2. Solution: On Computer2, you run the winrm quickconfig command.

Does this meet the goal?

- A. Yes
- B. No

Answer: B

Explanation:

Windows Remote Management is a component of the Windows Hardware Management features that manage server hardware locally and remotely.

References:

<https://docs.microsoft.com/en-us/windows/win32/winrm/about-windows-remote-management>

NEW QUESTION 127

- (Exam Topic 4)

You have several computers that run Windows 10. The computers are in a workgroup and have BitLocker Drive Encryption (BitLocker) enabled.

You join the computers to Microsoft Azure Active Directory (Azure AD).

You need to ensure that you can recover the BitLocker recovery key for the computers from Azure AD. What should you do first?

- A. Disable BitLocker.
- B. Add a BitLocker key protector.
- C. Suspend BitLocker.
- D. Disable the TPM chip.

Answer: B

Explanation:

References:

<https://docs.microsoft.com/en-us/windows/security/information-protection/bitlocker/prepare-your-organization-f>

NEW QUESTION 128

- (Exam Topic 4)

Your network contains an Active Directory domain. The domain contains computers that run Windows 10. You must ensure that Windows BitLocker Drive Encryption is enabled on all client computers, even though a Trusted Platform Module (TPM) chip is installed in only some of them.

You need to accomplish this goal by using one Group Policy object (GPO). What should you do?

- A. Enable the Allow enhanced PINs for startup policy setting, and select the Allow BitLocker without a compatible TPM check box
- B. Enable the Enable use of BitLocker authentication requiring preboot keyboard input on slates policy setting, and select the Allow BitLocker without a compatible TPM check box
- C. Enable the Require additional authentication at startup policy setting, and select the Allow BitLocker without a compatible TPM check box

D. Enable the Control use of BitLocker on removable drives policy setting, and select the Allow BitLocker without a compatible TPM check box

Answer: C

Explanation:

We need to allow Windows BitLocker Drive Encryption on all client computers (including client computers that do not have Trusted Platform Module (TPM) chip). We can do this by enabling the option to allow BitLocker without a compatible TPM in the group policy. The "Allow BitLocker without a compatible TPM" option is a checkbox in the "Require additional authentication at startup" group policy setting. To access the "Allow BitLocker without a compatible TPM" checkbox, you need to first select Enabled on the "Require additional authentication at startup" policy setting.

Reference:

<https://docs.microsoft.com/en-us/windows/security/information-protection/bitlocker/bitlocker-group-policy-setti>

NEW QUESTION 130

- (Exam Topic 4)

Your company has a Remote Desktop Gateway (RD Gateway).

You have a server named Server1 that is accessible by using Remote Desktop Services (RDS) through the RD Gateway.

You need to configure a Remote Desktop connection to connect through the gateway. Which setting should you configure?

- A. Connection settings
- B. Server authentication
- C. Local devices and resources
- D. Connect from anywhere

Answer: D

NEW QUESTION 131

- (Exam Topic 4)

Your network contains an Active Directory domain. The domain contains a computer named Computer1 that runs Windows 10. Computer1 contains a folder named Folder1.

You plan to share Folder1. Everyone will have Read share permissions, and administrators will have Full control share permission.

You need to prevent the share from appearing when users browse the network. What should you do?

- A. Enable access-based enumeration.
- B. Deny the List NTFS permissions on Folder1.
- C. Add Folder1 to a domain-based DFS namespace.
- D. Name the share Folder1\$.

Answer: D

Explanation:

Appending a dollar sign to share name prevents a share from appearing when users browse the network.

NEW QUESTION 135

- (Exam Topic 4)

You have a computer named Client1 that runs Windows 11 Home. You need to ensure that you can create virtual machines on Client1.

Which four actions should you perform in sequence? To answer, move the appropriate actions from the list of actions to the answer area and arrange them in the correct order.

Actions

Answer Area

Restart the operating system

Enter a Windows 11 Pro product key

Enter a Windows 11 Enterprise product key

From Programs and Features, enable the Hyper-V Windows feature

From the Activation settings in the Settings app, select **Change product key**

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

Graphical user interface, application Description automatically generated

NEW QUESTION 139

- (Exam Topic 4)

Please wait while the virtual machine loads. Once loaded, you may proceed to the lab section. This may take a few minutes, and the wait time will not be deducted from your overall test time.

When the Next button is available, click it to access the lab section. In this section, you will perform a set of tasks in a live environment. While most functionality will be available to you as it would be in a live environment, some functionality (e.g., copy and paste, ability to navigate to external websites) will not be possible by design.

Scoring is based on the outcome of performing the tasks stated in the lab. In other words, it doesn't matter how you accomplish the task, if you successfully perform it, you will earn credit for that task.

Labs are not timed separately, and this exam may more than one lab that you must complete. You can use as much time as you would like to complete each lab. But, you should manage your time appropriately to ensure that you are able to complete the lab(s) and all other sections of the exam in the time provided.

Please note that once you submit your work by clicking the Next button within a lab, you will NOT be able to return to the lab.

Username and password

Use the following login credentials as needed:

To enter your password, place your cursor in the Enter password box and click on the password below.

Username: Contoso/Administrator

Password: Passw0rd!

The following information is for technical support purposes only:

Lab Instance: 10921597

You need to create a user account named User5 on Client2. The solution must meet the following requirements:

- Prevent User5 from changing the password of the account.
- Ensure that User5 can perform backups.
- Use the principle of least privilege.

To complete this task, sign in to the required computer or computers.

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

- On Client2, press the Win + X keys on your keyboard. Then, click or tap the Computer Management option from the menu.
- Expand the Local Users and Groups from the left side of the window, and select Users.
- Right-click somewhere on the blank space found in the middle section of the window, and click or tap on New User. This opens the New User window, where you can enter all the details about the new user account.
- Type the user name and, optionally, its full name and description.
- Type the password to be used for that user and confirm it.
- Select the User cannot change password check box.
- Click Create and Windows immediately creates the user account. When you are done creating user accounts, click Close in the New User window.
- Press the Win + R keys to open Run, type secpol.msc into Run, and click/tap on OK to open Local Security Policy.
- Expand open Local Policies in the left pane of Local Security Policy, click/tap on User Rights Assignment, and double click/tap on the Back up files and directories policy in the right pane.
- Click/tap on the Add User or Group button.
- Click/tap on the Object Types button.
- Check all the boxes for Object types, and click/tap on the OK.
- Click/tap on the Advanced button.
- Click/tap on the Find Now button, select the name of the user or group
- Click/tap on OK.
- Click/tap on OK.
- When finished, you can close Local Users and Groups.

Reference:

<https://www.digitalcitizen.life/geeks-way-creating-user-accounts-and-groups>

Use the drop-down menus to select the answer choice that completes each statement based on the information presented in the graphic.

NOTE: Each correct selection is worth one point.

Answer Area

Microsoft Edge is configured by using [answer choice].

- a Group Policy object (GPO)
- Microsoft Intune
- the Internet Explorer Administration Kit (IEAK)

The computer is [answer choice].

- enrolled in Microsoft Intune
- managed by using Endpoint Configuration Manager
- joined to an on-premises Active Directory domain

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

Device is Azure AD joined; not domain joined.
 The MDM URLs in the exhibit indicate the device is enrolled in Intune. References:
<https://docs.microsoft.com/en-us/azure/active-directory/devices/troubleshoot-device-dsregcmd>
<https://github.com/MicrosoftLearning/MD-101T00-ManagingModernDesktops/blob/master/Instructions/Labs/04>

NEW QUESTION 147

- (Exam Topic 4)
 Your network contains an Active Directory domain. The domain contains 1,000 computers that run Windows 10. A user reports that his computer has a compatibility issue with the latest Windows 10 feature update. You need to prevent other computers from installing the feature update for 10 days while you mitigate the issue. Which Windows Update setting should you configure by using a Group Policy Object (GPO)?

- A. Select when Preview Builds and Feature Updates are received
- B. Reschedule Automatic Updates scheduled installations
- C. Disable safeguards for Feature Updates
- D. Automatic Updates detection frequency

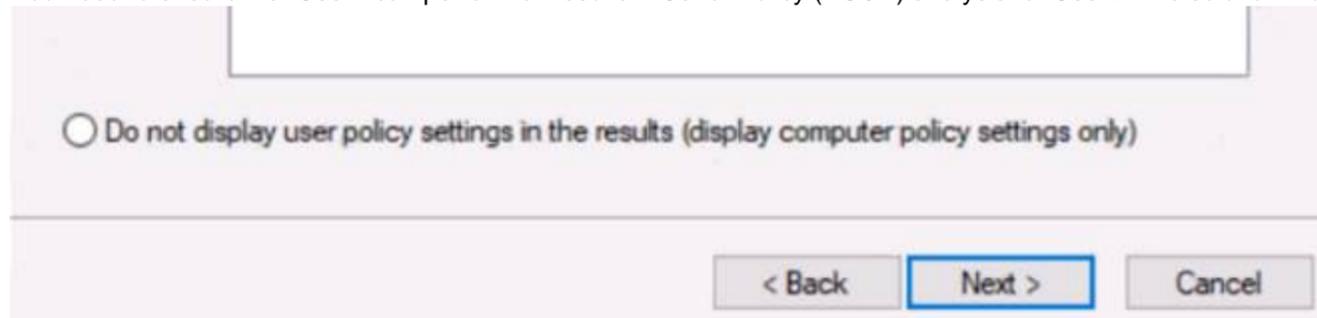

Answer: A

Explanation:

Reference:
<https://docs.microsoft.com/en-us/windows/deployment/update/waas-wufb-group-policy>

NEW QUESTION 152

- (Exam Topic 4)
 You need to ensure that User1 can perform a Resultant Set of Policy (RSOP) analysis for User2. The solution must use the principle of least privilege.

What should you do first?

- A. Add User1 to the local Administrators group.
- B. Add User2 to the local Performance Monitor Users group.
- C. Run RSoP from an elevated-privilege account.
- D. Add User1 to the local Performance Monitor Users group.

Answer: D

NEW QUESTION 154

- (Exam Topic 4)
 You have a computer that runs Windows 11 and hosts the Hyper-V virtual machines shown in the following table.

Name	Generation	Configuration version
VM1	1	9.0
VM2	1	10.0
VM3	2	8.0
VM4	2	10.0

You need to install Windows 11 on a virtual machine. On which virtual machine can you install Windows 11?

- A. VM2only
- B. VM4only
- C. VM3 and VM4 only

- D. VM2 and VM4 only
- E. VM1, VM2, VM3, and VM4

Answer: E

NEW QUESTION 159

- (Exam Topic 4)

You are troubleshooting the network connectivity of a computer that runs Windows 10. The computer is connected physically to the network but rejects network traffic from an external source. You need to reinstall the TCP/IP stack on the computer. What should you run?

- A. the `necsh int ip resec` command
- B. the `Resec-NetAdapcerAdvancedPropercy cmdlet`
- C. the `netcf g -d` command
- D. the `Debug-NecworkController cmdlet`

Answer: A

Explanation:

Reference: <https://howtofix.guide/reset-tcp-ip/>

NEW QUESTION 164

- (Exam Topic 4)

You have a computer that runs Windows 10. You discover that Windows updates are failing to install on the computer. You need to generate a log file that contains detailed information about the failures. Which cmdlet should you run?

- A. `Get-LogProperties`
- B. `Get-WindowsErrorReporting`
- C. `Get-WindowsUpdateLog`
- D. `Get-WinEvent`

Answer: C

Explanation:

References:
<https://docs.microsoft.com/en-us/powershell/module/windowsupdate/get-windowsupdate-log?view=win10-ps>

NEW QUESTION 168

- (Exam Topic 4)

Your network contains an Active Directory domain named `adatum.com`. The domain contains two computers named `Computer1` and `Computer2` that run Windows 10.

The domain contains the user accounts shown in the following table.

Name	Member of
User1	Domain Admins
User2	Domain Users
User3	Domain Users

`Computer2` contains the local groups shown in the following table.

Name	Members
Group1	ADATUM\User2 ADATUM\User3
Group2	ADATUM\User2
Group3	ADATUM\User3
Administrators	ADATUM\Domain Admins ADATUM\User3
Remote Desktop Users	Group1

The relevant user rights assignments for `Computer2` are shown in the following table.

Policy	Security Setting
Allow log on through Remote Desktop Services	Administrators, Remote Desktop Users
Deny log on through Remote Desktop Services	Group2
Deny log on locally	Group3

For each of the following statements, select Yes if the statement is true. Otherwise, select No.

NOTE: Each correct selection is worth one point.

Statements	Yes	No
User1 can establish a Remote Desktop session to Computer2.	<input type="radio"/>	<input type="radio"/>
User2 can establish a Remote Desktop session to Computer2.	<input type="radio"/>	<input type="radio"/>
User3 can establish a Remote Desktop session to Computer2.	<input type="radio"/>	<input type="radio"/>

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

Box 1: Yes

User1 is an administrator and has the Allow log on through Remote Desktop Services.

Box 2: No

User2 is a member of Group2 which has the Deny log on through Remote Desktop Services. Box 3: Yes

User3 is a member of the administrators group and has the Allow log on through Remote Desktop Services.

Note: Deny permissions take precedence over Allow permissions. If a user belongs to two groups, and one of them has a specific permission set to Deny, that user is not able to perform tasks that require that permission even if they belong to a group that has that permission set to Allow.

References:

<https://docs.microsoft.com/en-us/azure/devops/organizations/security/about-permissions?view=azure-devops&ta>

NEW QUESTION 170

- (Exam Topic 4)

You have a computer named Computer1 that runs Windows 10. Computer1 connects to multiple wireless networks.

You need to view the wireless networks to which Computer1 connects. What should you use?

- A. the System log in Event Viewer
- B. Wi-Fi in the Settings app
- C. the properties of the wireless adapter in Network Connections in Control Panel
- D. the Details tab for the wireless adapter in Device Manager

Answer: B

Explanation:

Reference:

<https://www.windowscentral.com/how-connect-wi-fi-network-windows-10>

NEW QUESTION 171

- (Exam Topic 4)

Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution that might meet the stated goals. Some question sets might have more than one correct solution, while others might not have a correct solution.

After you answer a question in this section, you will NOT be able to return to it. As a result, these questions will not appear in the review screen.

A user named User1 has a computer named Computer1 that runs Windows 10. Computer1 is joined to an Azure Active Directory (Azure AD) tenant named contoso.com. User1 joins Computer1 to contoso.com by using user1@contoso.com.

Computer1 contains a folder named Folder1. Folder1 is in drive C and is shared as Share1. Share1 has the permission shown in the following table.

Group	Share permission
Everyone	Full control
AzureAD\user1@contoso.com	Owner

A user named User2 has a computer named Computer2 that runs Windows 10. User2 joins Computer2 to contoso.com by using user2@contoso.com.

User2 attempts to access Share1 and receives the following error message: "The username or password is incorrect."

You need to ensure that User2 can connect to Share1.

Solution: In Azure AD, you create a group named Group1 that contains User1 and User2. You grant Group1 Modify access to Folder1.

Does this meet the goal?

- A. Yes
- B. No

Answer: A

Explanation:

References:

<https://docs.microsoft.com/en-us/previous-versions/windows/it-pro/windows-server-2008-R2-and-2008/cc75417>

NEW QUESTION 173

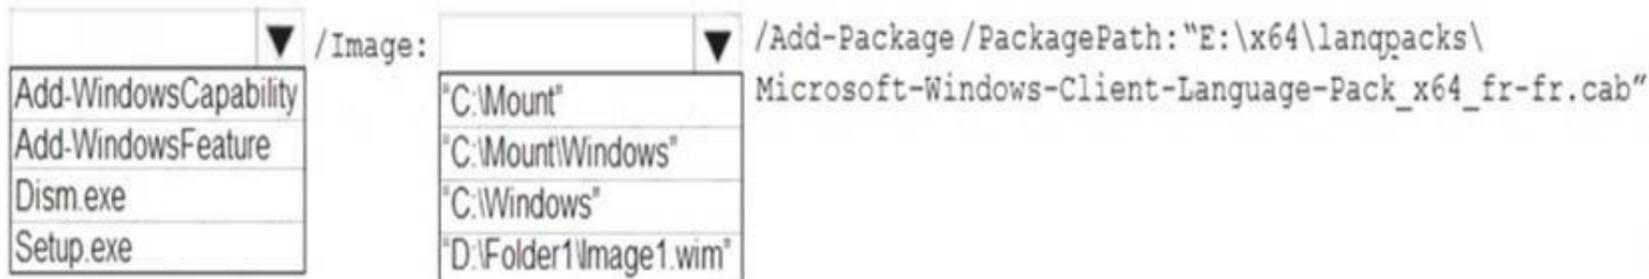

- (Exam Topic 4)

You have the source files shown in the following table.

Source	Location
Custom Windows 10 image	D:\Folder1\Image1.wim
Windows 10 language pack DVD	E:\

You mount an image from Image1.wim to a folder named C:\Mount. You need to add the French language pack to the mounted image. How should you complete the command? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

Note: The referenced document has the mount directory as C:\Mount\Windows. In this question, the mount directory is C:\Mount.

Reference:

<https://docs.microsoft.com/en-us/windows-hardware/manufacture/desktop/add-language-packs-to-windows>

NEW QUESTION 175

- (Exam Topic 4)

You have 200 computers that run Windows 10 and are joined to an Active Directory domain.

You need to enable Windows Remote Management (WinRM) on all the computers by using Group Policy. Which three actions should you perform? Each correct answer presents part of the solution.

NOTE: Each correct selection is worth one point.

- A. Set the Startup Type of the Windows Remote Management (WS-Management) service to Automatic.
- B. Enable the Windows Firewall: Allow inbound remote administration exception setting.
- C. Enable the Allow remote server management through WinRM setting.
- D. Enable the Windows Firewall: Allow inbound Remote Desktop exceptions setting.
- E. Enable the Allow Remote Shell access setting.
- F. Set the Startup Type of the Remote Registry service to Automatic.

Answer: ABC

Explanation:

References:

<https://support.auvik.com/hc/en-us/articles/204424994-How-to-enable-WinRM-with-domain-controller-Group-P>

NEW QUESTION 177

- (Exam Topic 4)

Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution that might meet the stated goals. Some question sets might have more than one correct solution, while others might not have a correct solution.

After you answer a question in this section, you will NOT be able to return to it. As a result, these questions will not appear in the review screen.

A user named User1 has a computer named Computer1 that runs Windows 10. Computer1 is joined to an Azure Active Directory (Azure AD) tenant named contoso.com. User1 joins Computer1 to contoso.com by using user1@contoso.com.

Computer1 contains a folder named Folder1. Folder1 is in drive C and is shared as Share1. Share1 has the permission shown in the following table.

Group	Share permission
Everyone	Full control
AzureAD:user1@contoso.com	Owner

A user named User2 has a computer named Computer2 that runs Windows 10. User2 joins Computer2 to contoso.com by using user2@contoso.com. User2 attempts to access Share1 and receives the following error message: "The username or password is incorrect."

You need to ensure that User2 can connect to Share1.

Solution: In Azure AD, you create a group named Group1 that contains User1 and User2. You grant Group1 Change access to Share1.

Does this meet the goal?

- A. Yes
- B. No

Answer: A

Explanation:

References:

<https://docs.microsoft.com/en-us/azure/storage/files/storage-files-active-directory-enable#assign-access-permiss>

NEW QUESTION 180

- (Exam Topic 4)

You have computers that run Windows 11 as shown in the following table.

Name	IP address	Joined to
Computer1	192.168.10.10	Active Directory
Computer2	192.168.10.15	Workgroup

You ping 192.168.10.15 from Computer1 and discover that the request timed out. You need to ensure that you can successfully ping 192.168.10.15 from Computer1.

Solution: On Computer2, you share a folder. Does this meet the goal?

- A. Yes
- B. No

Answer: B

NEW QUESTION 185

- (Exam Topic 4)

Please wait while the virtual machine loads. Once loaded, you may proceed to the lab section. This may take a few minutes, and the wait time will not be deducted from your overall test time.

When the Next button is available, click it to access the lab section. In this section, you will perform a set of tasks in a live environment. While most functionality will be available to you as it would be in a live environment, some functionality (e.g., copy and paste, ability to navigate to external websites) will not be possible by design.

Scoring is based on the outcome of performing the tasks stated in the lab. In other words, it doesn't matter how you accomplish the task, if you successfully perform it, you will earn credit for that task.

Labs are not timed separately, and this exam may more than one lab that you must complete. You can use as much time as you would like to complete each lab.

But, you should manage your time appropriately to ensure that you are able to complete the lab(s) and all other sections of the exam in the time provided.

Please note that once you submit your work by clicking the Next button within a lab, you will NOT be able to return to the lab.

Username and password

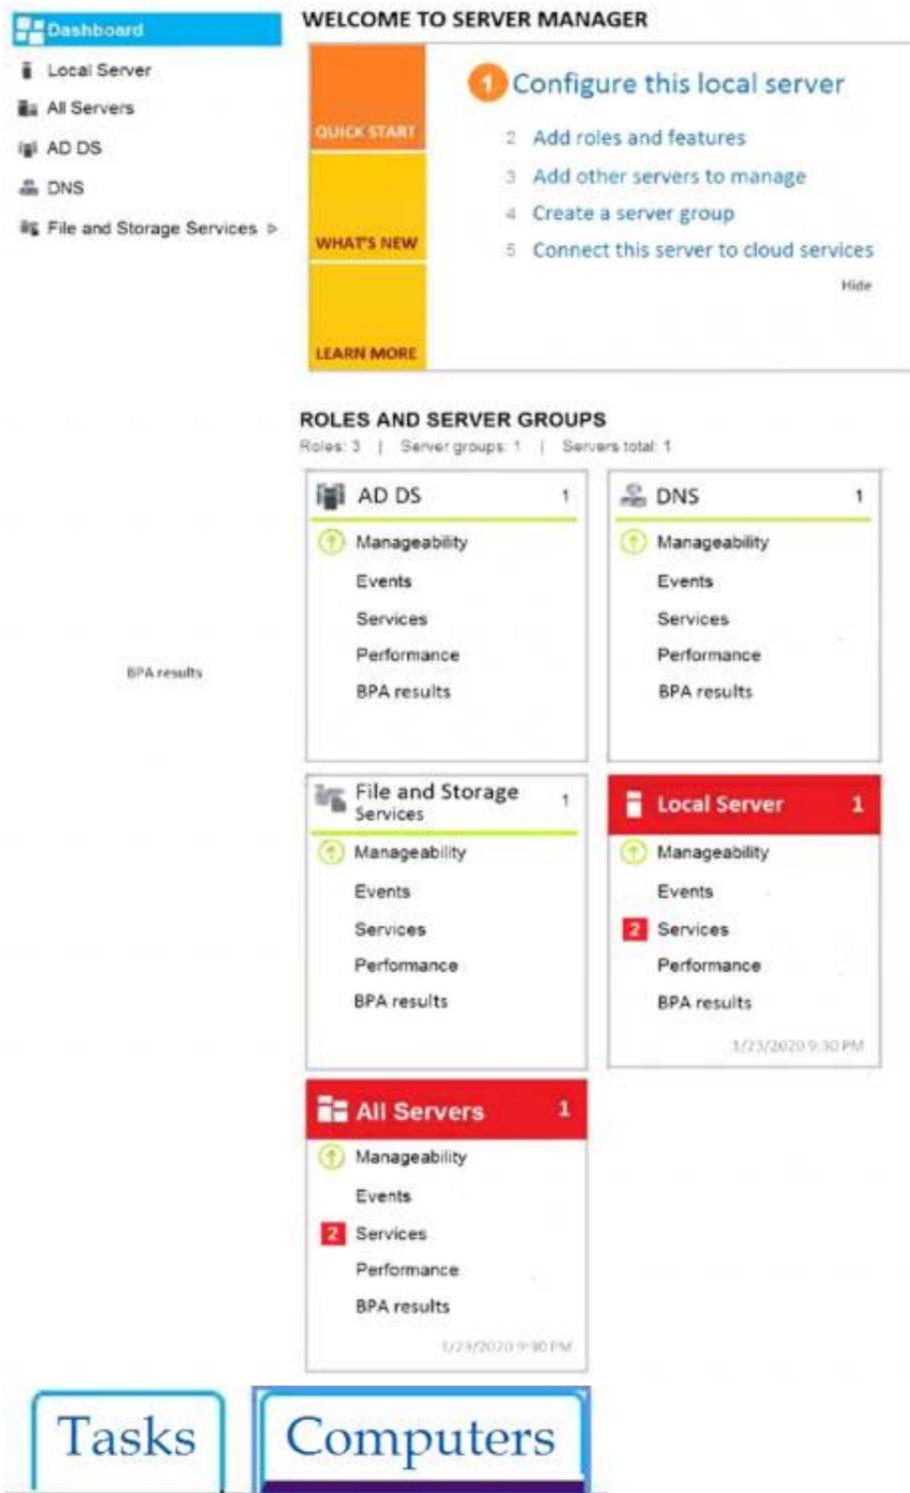

Use the following login credentials as needed:

To enter your password, place your cursor in the Enter password box and click on the password below.

Username: Contoso/Administrator

Password: Passw0rd!

The following information is for technical support purposes only: Lab Instance: 11145882

The screenshot shows the Windows Server Manager interface. On the left is a navigation pane with 'Local Server', 'All Servers', 'AD DS', 'DNS', and 'File and Storage Services'. The main area is titled 'WELCOME TO SERVER MANAGER' and contains a 'QUICK START' section with five numbered steps: 1. Configure this local server, 2. Add roles and features, 3. Add other servers to manage, 4. Create a server group, and 5. Connect this server to cloud services. Below this is the 'ROLES AND SERVER GROUPS' section, which shows a grid of role cards for 'AD DS', 'DNS', 'File and Storage Services', 'Local Server', and 'All Servers'. Each card lists sub-items like 'Manageability', 'Events', 'Services', 'Performance', and 'BPA results'. At the bottom, there are two buttons labeled 'Tasks' and 'Computers'.

Users who attempt to sign in to the domain from Client3 report that the sign-ins fail. You need to resolve the issue. To complete this task, sign in to the required computer or computers.

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

- Use a local administrator account to log on to the computer.
- Select Start, press and hold (or right-click) Computer > Properties.
- Select Change settings next to the computer name.
- On the Computer Name tab, select Change.
- Under the Member of heading, select Workgroup, type a workgroup name, and then select OK.

- When you are prompted to restart the computer, select OK.
- On the Computer Name tab, select Change again.
- Under the Member of heading, select Domain, and then type the domain name.
- Select OK, and then type the credentials of the user who has permissions in the domain.
- When you are prompted to restart the computer, select OK.
- Restart the computer.

Reference:

<https://support.microsoft.com/en-us/help/2771040/the-trust-relationship-between-this-workstation-and-the-prima>

NEW QUESTION 186

- (Exam Topic 4)

You have a computer that runs Windows 10.

You need to configure the local computer policy to meet the following requirements:

- An event must be created in the Security log when changes are made to local users or groups.
- The local administrator and guest accounts must be renamed.

Which Security Settings should you modify? To answer, select the appropriate options in the answer area.

Create an event when local users or groups change:

- Account Lockout Policy
- Audit Policy
- Password Policy
- Security Options
- User Rights Assignment

Rename the local administrator and guest accounts:

- Account Lockout Policy
- Audit Policy
- Password Policy
- Security Options
- User Rights Assignment

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

Box 1: Audit Policy Box 2: Security options

NEW QUESTION 190

- (Exam Topic 4)

You have two computers named Client1 and Client2 that run Windows 10. You perform the following actions on Client1:

- Enable Hyper-V.
- Create a virtual machine named VM1 that runs Windows 10 Pro.
- Install a Microsoft SQL Server 2019 instance on VM1. You plan to deploy a copy of VM1 to Client2.

You need to create an export of VM1. The solution must ensure that the captured state is transactional and consistent.

Which three PowerShell commands should you run in sequence on Client1? To answer, move the appropriate cmdlets from the list of cmdlets to the answer area and arrange them in the correct order.

Commands

Answer Area

- Get-VMCheckpoint -VMName VM1
- Set-VM -Name VM1 -CheckpointType Production
- Checkpoint-VM Name VM1
- Restore-VMCheckpoint -Name VM1Checkpoint -Confirm:\$false
- Export-VMCheckpoint -VMName VM1 -Name VM1Checkpoint -Path C:\Export

- 1
- 2
- 3

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

Commands	Answer Area
Get-VMCheckpoint -VMName VM1	Checkpoint-VM Name VM1
Set-VM -Name VM1 -CheckpointType Production	
Checkpoint-VM Name VM1	Restore-VMCheckpoint -Name VMICheckpoint -Confirm:\$false
Restore-VMCheckpoint -Name VMICheckpoint -Confirm:\$false	Export-VMCheckpoint -VMName VM1 -Name VMICheckpoint -Path C:\Export
Export-VMCheckpoint -VMName VM1 -Name VMICheckpoint -Path C:\Export	

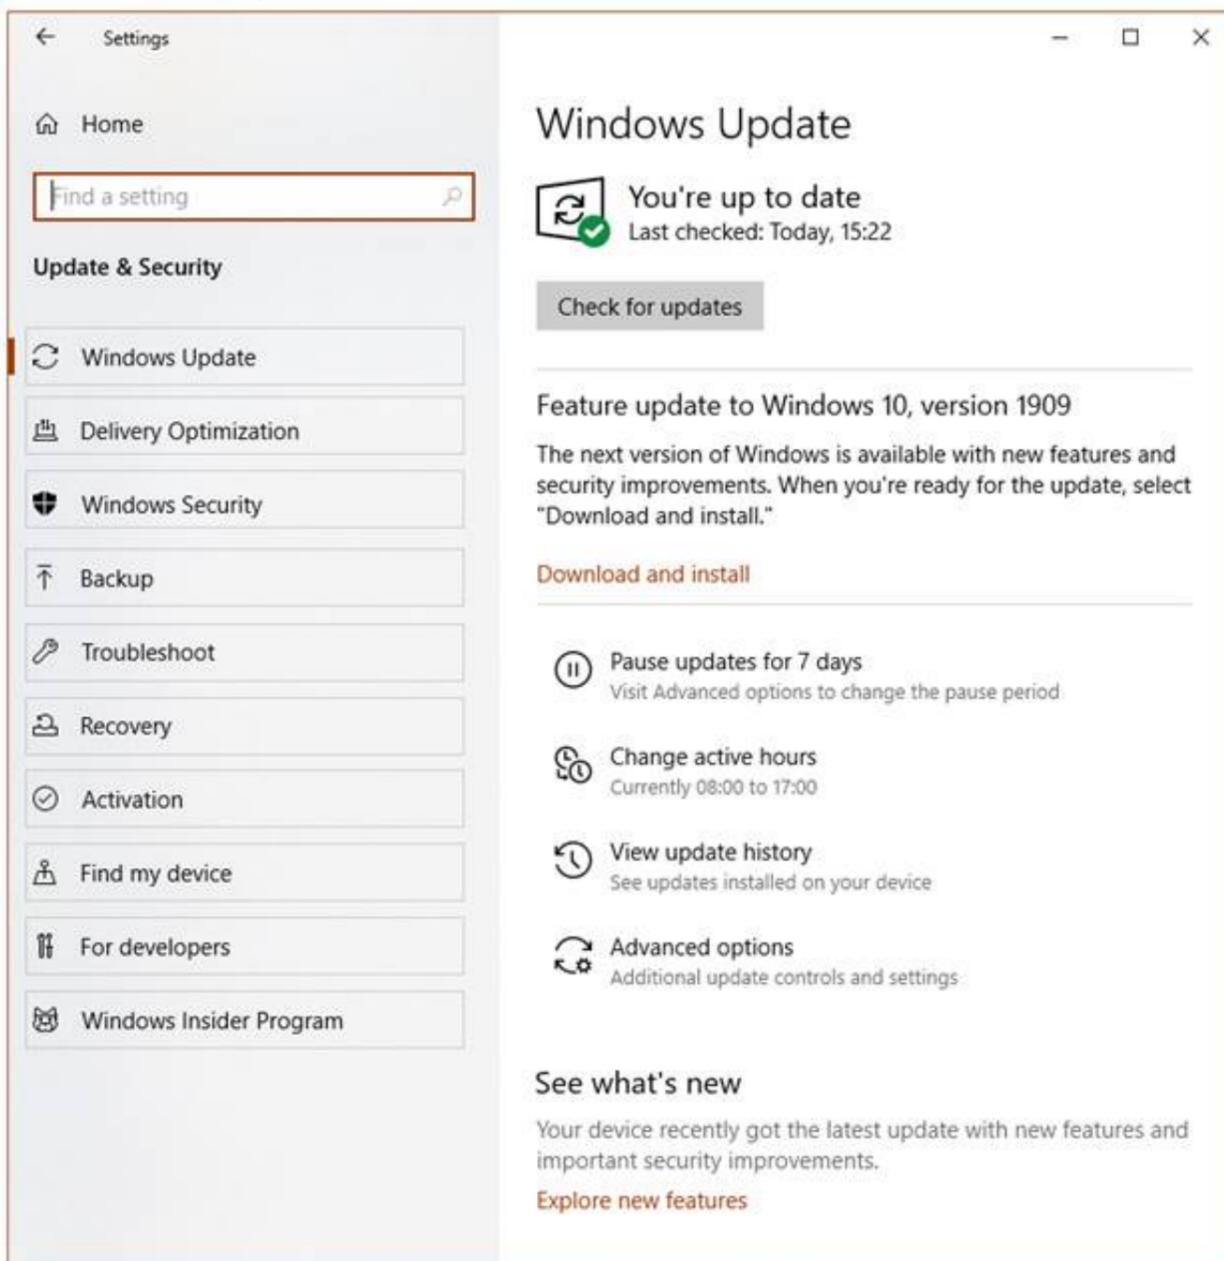

NEW QUESTION 195

- (Exam Topic 4)

You have a computer named Computer1. Computer1 runs Windows 10 Pro. You want to use Computer1 to test new Windows features.

You need to configure Computer1 to receive preview builds of Windows 10 as soon as they are available. You open the Update & Security section in the Settings app.

What should you configure? To answer, select the appropriate options in the answer area.

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

Graphical user interface, text, application, email Description automatically generated

Reference:

<https://insider.windows.com/en-us/getting-started/>

NEW QUESTION 196

- (Exam Topic 4)

Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution that might meet the stated goals. Some question sets might have more than one correct solution, while others might not have a correct solution.

After you answer a question in this section, you will NOT be able to return to it. As a result, these questions will not appear in the review screen.

You have a workgroup computer that runs Windows 10. The computer contains the local user accounts shown in the following table.

Name	Member of
Administrator	Administrators
User1	Administrators
User2	Users
User3	Users

You need to configure the desktop background for User1 and User2 only.

Solution: You create two new local Group Policy Objects (GPOs) and apply one GPO to User1 and the other GPO to User2. You configure the Desktop Wallpaper setting in each GPO.

Does this meet the goal?

- A. Yes
- B. No

Answer: A

Explanation:

Reference:

<https://www.windowscentral.com/how-apply-local-group-policy-settings-specific-users-windows-10>

NEW QUESTION 200

- (Exam Topic 4)

You plan to install Windows 10 on a new computer by using an answer file. You need to create the answer file.

Which tool should you use to create the answer file, and which file is required by the tool? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

Tool to create the answer file:

Windows PE (WinPE)

Windows Configuration Designer

Microsoft Deployment Toolkit (MDT)

Windows System Image Manager (Windows SIM)

File required by the tool:

Boot.wim

Setup.exe

Install.wim

Autorun.inf

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

Graphical user interface, text, application, email Description automatically generated

NEW QUESTION 202

- (Exam Topic 4)

You have two workgroup computers named Computer1 and Computer2 that run Windows 10. The Guest account is enabled on both computers.

The computers contain the users shown in the following table.

Computer name	User name	User password
Computer1	User1	P@ssword1
Computer1	User2	P@ssword2
Computer2	User1	P@ssword1
Computer2	User2	P@ssword2
Computer2	User3	P@ssword3

The computers contain the shared folders shown in the following table.

Computer name	Shared folder name	Permission
Computer1	Share1	Everyone – Read
Computer2	Share2	Everyone – Read

Computer1 has password-protected sharing turned on. Computer2 has password-protected sharing turned off. For each of the following statements, select Yes if the statement is true. Otherwise, select No.

NOTE: Each correct selection is worth one point.

Statements	Yes	No
From Computer1, User1 can access Share2.	<input type="radio"/>	<input type="radio"/>
From Computer2, User2 can access Share1.	<input type="radio"/>	<input type="radio"/>
From Computer2, User3 can access Share1.	<input type="radio"/>	<input type="radio"/>

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

When password protected sharing is turned on, only people who have a user account and password on your computer can access shared files.

Box 1: Yes

Password protected sharing is turned off on Computer2 so User1 can access Share2 from Computer1.

Box 2: Yes

Password protected sharing is turned on on Computer1. User2 has an account on Computer1 so User2 can access Share1 from Computer2.

Box 3: Yes

The answer to this question depends on which version of Windows 10 is running on the computers. This isn't specified in the question so it's likely that the question will be updated in future.

Password protected sharing is turned on on Computer1. User3 does not have an account on Computer1 so User3 cannot access Share1 from Computer2.

However, the Guest account is enabled which could provide access depending on which version of Windows 10 is running. If it is Windows 10 Home or Pro, then the answer to this question is Yes. The Guest account does provide access. However, in later versions of Windows 10 Enterprise and Windows 10 Education (from build 1709 onwards), the Guest account does not enable access to the shared folder.

Reference:

<https://docs.microsoft.com/en-us/troubleshoot/windows-server/networking/guest-access-in-smb2-is-disabled-by>

NEW QUESTION 206

- (Exam Topic 4)

Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution that might meet the stated goals. Some question sets might have more than one correct solution, while others might not have a correct solution.

After you answer a question in this section, you will NOT be able to return to it. As a result, these questions will not appear in the review screen.

You manage devices that run Windows 10.

Ten sales users will travel to a location that has limited bandwidth that is expensive. The sales users will be at the location for three weeks.

You need to prevent all Windows updates from downloading for the duration of the trip. The solution must not prevent access to email and the Internet.

Solution: From Accounts in the Settings app, you turn off Sync settings. Does this meet the goal?

- A. Yes
- B. No

Answer: B

NEW QUESTION 209

- (Exam Topic 4)

Your network contains an Active Directory domain named contoso.com. The domain contains the objects shown in the following table.

Name	Description	Located in
OU1	Organizational unit (OU)	Contoso.com
OU2	Organizational unit (OU)	Contoso.com
User1	User account	OU1
Computer1	Computer that runs Windows 11	OU2

BitLocker Drive Encryption (BitLocker) recovery passwords are stored in Active Directory. User1 enables the following on Computer 1:

- BitLocker on drive C
- BitLocker on a removable drive named E

Which object stores the BitLocker recovery passwords for each drive? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

Active Directory Object

- Computer1
- OU1
- OU2
- TPM devices
- User1

Answer Area

Drive C: Active Directory Object
Drive E: Active Directory Object

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

Active Directory Object

- Computer1
- OU1
- OU2
- TPM devices
- User1

Answer Area

Drive C: OU1
Drive E: TPM devices

NEW QUESTION 214

- (Exam Topic 4)

Use the drop-down menus to select the answer choice that completes each statement based on the information presented on the graphic.

Microsoft Edge is configured by using [answer choice].

▼
a Group Policy object (GPO)
Microsoft Intune
the internet Explorer Administration (IEAK)

The computer is [answer choice].

▼
enrolled in Microsoft Intune
managed by using Microsoft System Center Configuration Manager
joined to an on-premises Active Directory domain

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

Microsoft Edge is configured by using [answer choice].

▼
a Group Policy object (GPO)
Microsoft Intune
the Internet Explorer Administration (IEAK)

The computer is [answer choice].

▼
enrolled in Microsoft Intune
managed by using Microsoft System Center Configuration Manager
joined to an on-premises Active Directory domain

You have a computer named Computer1 that runs Windows 10.
 You complete a full back up of Computer1 to an external USB drive. You store the USB drive offsite.
 You delete several files from your personal Microsoft OneDrive account by using File Explorer, and then you empty the Recycle Bin on Computer1.
 You need to recover the files 60 days after you deleted them in the least amount of time possible. What should you use?

- A. the OneDrive recycle bin
- B. the full backup on the external USB drive
- C. Recovery in the Settings app

Answer: B

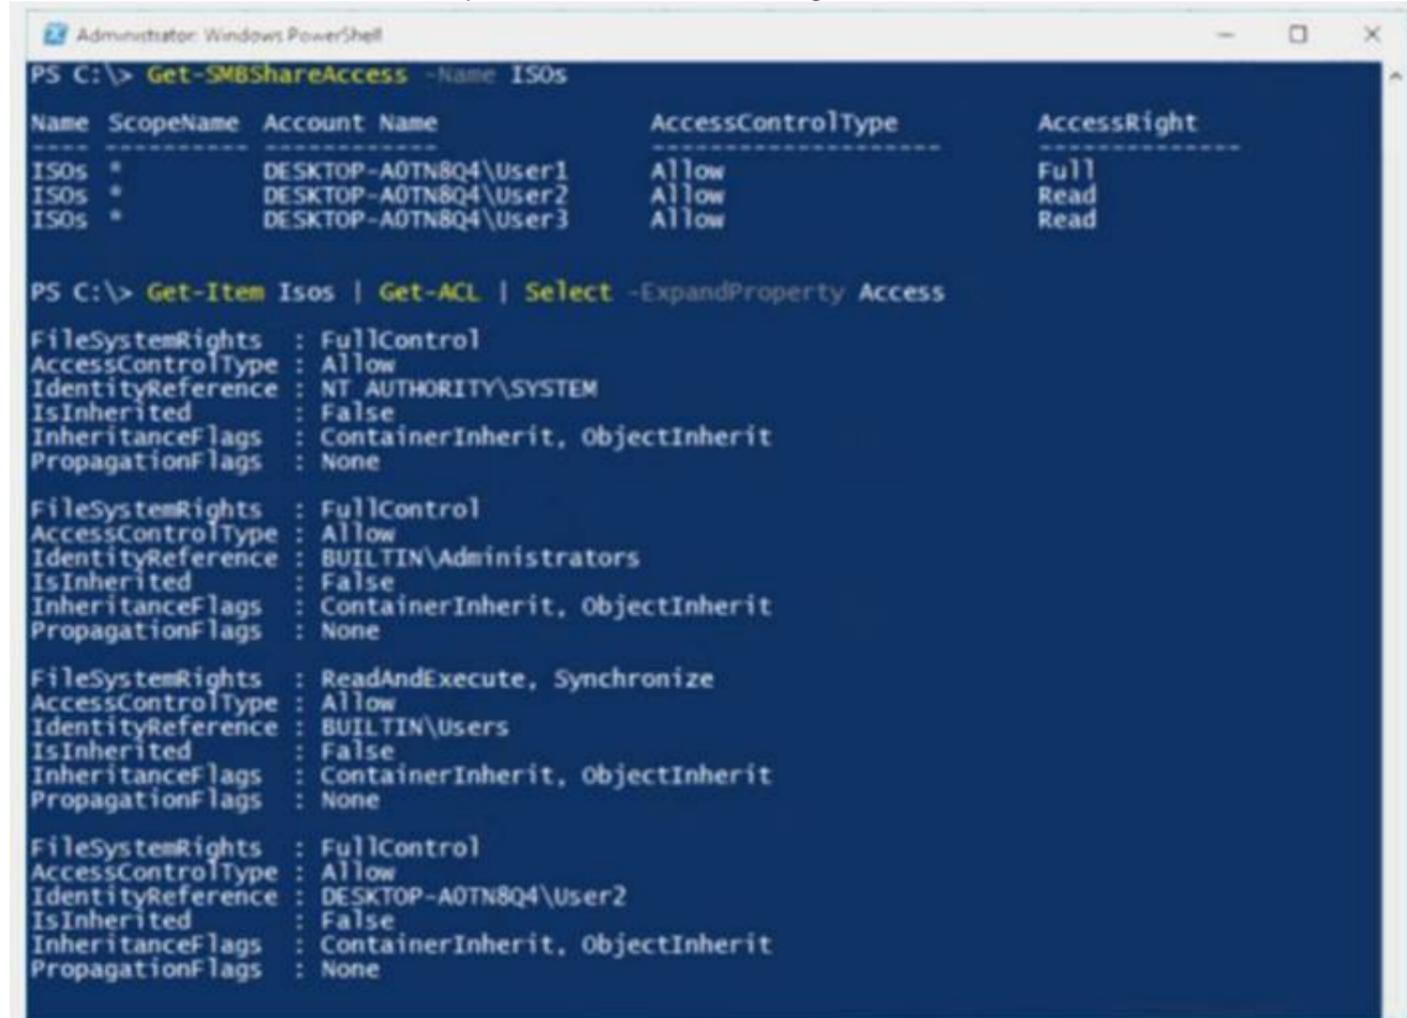

Explanation:

References:
<https://support.office.com/en-us/article/restore-deleted-files-or-folders-in-onedrive-949ada80-0026-4db3-a953-c>

NEW QUESTION 221

- (Exam Topic 4)

You have a computer that runs Windows 10. The computer contains a folder named C:\ISOs that is shared in ISOs.
 You run several commands on the computer as shown in the following exhibit.

Use the drop-down menus to select the answer choice that completes each statement based on the information presented in the graphic.
 NOTE: Each correct selection is worth one point.

[answer choice] can delete files in the ISOs share.

- None of the users
- Only User1
- Only User2
- Only User3
- Only User1 and User2
- Only User1 and User3
- Only User2 and User3
- User1, User2, and User3

[answer choice] can read the files in the ISOs share.

- None of the users
- Only User1
- Only User2
- Only User3
- Only User1 and User2
- Only User1 and User3
- Only User2 and User3
- User1, User2, and User3

A. Mastered

B. Not Mastered

Answer: A

Explanation:

[answer choice] can delete files in the ISOs share.

▼
None of the users
Only User1
Only User2
Only User3
Only User1 and User2
Only User1 and User3
Only User2 and User3
User1, User2, and User3

[answer choice] can read the files in the ISOs share.

▼
None of the users
Only User1
Only User2
Only User3
Only User1 and User2
Only User1 and User3
Only User2 and User3
User1, User2, and User3

NEW QUESTION 226

- (Exam Topic 4)

Your network an Active Directory domain named adatum.com. The domain contains 50 computers that runs Windows 8.1. The computer has locally installed desktop application that are compatible with Windows 10.

You need to upgrade the computers to windows 10, The solution must preserver the locally installed desktop applications.

Solution: You use Windows Autopilot and create a deployment profile. You generalize each computer, and the you restart the computers.

Does this meet the goal?

- A. Yes
- B. No

Answer: B

NEW QUESTION 229

- (Exam Topic 4)

Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution that might meet the stated goals. Some question sets might have more than one correct solution, while others might not have a correct solution.

After you answer a question in this section, you will NOT be able to return to it. As a result, these questions will not appear in the review screen.

You have a computer named Computer1 that runs Windows 10. The computer contains a folder. The folder contains sensitive data.

You need to log which user reads the contents of the folder and modifies and deletes files in the folder. Solution: From the properties of the folder, you configure the Auditing settings and from the Audit Policy in

the local Group Policy, you configure Audit directory service access.

Does this meet the goal?

- A. Yes
- B. No

Answer: B

Explanation:

References:

https://www.netwrix.com/how_to_detect_who_changed_file_or_folder_owner.html

NEW QUESTION 234

- (Exam Topic 4)

Your company uses Microsoft Deployment Toolkit (MDT) to deploy Windows 10 to new computers. The company purchases 1,000 new computers.

You need to ensure that the Hyper-V feature is enabled on the computers during the deployment. What are two possible ways to achieve the goal? Each correct answer presents part of the solution. NOTE: Each correct selection is worth one point.

- A. Add a task sequence step that adds a provisioning package.
- B. In a Group Policy object (GPO), from Computer Configuration, configure Application Control Policies.
- C. Add a custom command to the Unattend.xml file.
- D. Add a configuration setting to Windows Deployment Services (WDS).
- E. Add a task sequence step that runs dism.exe.

Answer: AE

Explanation:

References:

Provisioning package works with Windows Configuration Designer to provision win10 features and runtime settings. WCD (provisioning Package) is GUI based while DISM is command line based and dose same function. Unattend.xml / answer files are used with installation media. It contains settings, definitions and values to use during Windows Setup. In an answer file, you specify various setup options. These options include how to partition disks, where to find the Windows image that will be installed, and which product key to apply.

<https://docs.microsoft.com/en-us/windows/deployment/deploy-windows-mdt/create-a-windows-10-reference-im>

NEW QUESTION 236

- (Exam Topic 4)

Your company has an on-premises network that contains an Active Directory domain. The domain is synced to Microsoft Azure Active Directory (Azure AD). All computers in the domain run Windows 10 Enterprise.

You have a computer named Computer1 that has a folder named C:\Folder1. You want to use File History to protect C:\Folder1.

Solution: You enable File History on Computer1. You then encrypt the contents of Folder1.

Does this meet the goal?

- A. Yes
- B. No

Answer: B

Explanation:

File History only backs up copies of files that are in Libraries, and Desktop folders and the OneDrive files available offline on your PC. If you have files or folders elsewhere that you want backed up, you can add them to one of these folders.

Reference:

<https://support.microsoft.com/en-us/help/17128/windows-8-file-history>

NEW QUESTION 238

- (Exam Topic 4)

You have a computer that runs Windows 8.1.

When you attempt to perform an in-place upgrade to Windows 10, the computer fails to start after the first restart.

You need to view the setup logs on the computer. Which folder contains the logs?

- A. %Windows.~BT\Sources\Panther\
- B. %Windows\Logs
- C. %Windows\Temp
- D. %Windows.~BT\Inf

Answer: A

Explanation:

References:

<https://docs.microsoft.com/en-us/windows-hardware/manufacture/desktop/windows-setup-log-files-and-eventlo>

NEW QUESTION 240

- (Exam Topic 4)

Your network contains an Active Directory domain. The domain contains three computers named Computer1, Computer2, and Computer3 that run Windows 10. The computers are on the same network and have network connectivity.

Windows Defender Firewall on Computer1 has the server-to-server connection security rule shown in the following table.

Name	Endpoint 1	Endpoint 2	Authentication mode
Rule1	Any	Any	Require inbound and request outbound

Windows Defender Firewall on Computer2 has the server-to-server connection security rule shown in the following table.

Name	Endpoint 1	Endpoint 2	Authentication mode
Rule1	Any	Any	Do not authenticate

Windows Defender Firewall on Computer3 has the server-to-server connection security rule shown in the following table.

Name	Endpoint 1	Endpoint 2	Authentication mode
Rule1	Any	Any	Require inbound and request outbound

All the connection security rules are enabled and configured to use only the Computer (Kerberos VS) authentication method.

For each of the following statements, select Yes if the statement is true. Otherwise, select No.

NOTE: Each correct selection is worth one point.

Statements

Yes **No**

If Computer1 initiates communication to Computer2, network traffic will be encrypted.

Computer2 can establish communications to Computer3.

If Computer3 initiates communication to Computer1, network traffic will be encrypted.

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

NO NO NO

Traffic will not be encrypted by default. The question does not have this option configured by default. Encryption is optional, not default to authentications. Encryption needs to be enabled in the GPO. The default is data integrity which is not default to encrypt. Actually, if you encrypt you will use both integrity with encryption. Devices in the encryption zone require authentication to communicate with other devices.

NEW QUESTION 244

- (Exam Topic 4)

Your company deploys Windows 10 Enterprise to all computers. All the computers are joined to Microsoft Azure Active Directory (Azure AD). The company purchases a new computer for a new user and creates an Azure AD account for the user. The user signs in to the computer by using the Azure AD account. The user discovers the activation error shown in the following exhibit.

Activation

Windows

Edition	Windows 10 Pro
Activation	Windows is not activated
Product ID	XXXXX-XXXXX-XXXXX-XXXXX
Product Key	XXXXX-XXXXX-XXXXX-XXXXX-XXXXX

Windows can't activate at this time. Try activating again later. If that doesn't work, contact your system administrator. Error code: 0x800705B4

If you're having problems with activation, select Troubleshoot to try to fix the problem.

Activate Windows now

Running a non-genuine copy of Windows can put you at greater risk from viruses and other security threats.

Go to the Store to buy genuine Windows or enter a product key.

You need to activate Windows 10 Enterprise on the computer. What should you do?

- A. In Azure A
- B. assign a Windows 10 Enterprise license to the user.
- C. At the command prompt, run slmgr /lrc.
- D. Reinstall Windows as Windows 10 Enterprise.
- E. At the command prompt, run slmgr /ato.

Answer: A

Explanation:

Reference:

<https://docs.microsoft.com/en-us/windows/deployment/windows-10-subscription-activation>

NEW QUESTION 249

- (Exam Topic 4)

You have the computers shown in the following table.

Name	Windows 10 edition
Computer1	Windows 10 Pro
Computer2	Windows 10 Pro Workstations
Computer3	Windows 10 Enterprise

You need to identify which computers support the features.

- > BitLocker Drive Encryption (BitLocker)
- > Microsoft Application Virtualization (App-V)

Which computers support the features? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

BitLocker:

- Computer1 only
- Computer2 only
- Computer3 only
- Computer1 and Computer3 only
- Computer2 and Computer3 only
- Computer1, Computer2, and Computer3

App-V:

- Computer1 only
- Computer2 only
- Computer3 only
- Computer1 and Computer3 only
- Computer2 and Computer3 only
- Computer1, Computer2, and Computer3

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

Graphical user interface, text, application Description automatically generated

References:

<https://www.microsoft.com/en-us/windowsforbusiness/compare>

NEW QUESTION 251

- (Exam Topic 4)

You have 10 new Windows 10 devices.

You plan to deploy a provisioning package that will configure a wireless network profile.

You need to ensure that a support technician can install the provisioning package on the devices. The solution must use the principle of least privilege.

To which group should you add the support technician?

- A. Users
- B. Power Users
- C. Network Configuration Operators
- D. Administrators

Answer: D

Explanation:

Reference:

<https://docs.microsoft.com/en-us/windows/configuration/provisioning-packages/provisioning-apply-package>

NEW QUESTION 252

- (Exam Topic 3)

You need to ensure that you can manage Computer2 by using Windows Admin Center on Server1. What should you do on Computer2?

- A. Install the Remote Server Administration Tool (RSAT) optional features.
- B. Run the winrm quickconfig command.
- C. Set the Windows Management Service Startup type to Automatic and start the service.
- D. Run the Sec-Location cmdlet.

Answer: B

Explanation:

References:

<https://docs.microsoft.com/en-us/windows-server/manage/windows-admin-center/azure/manage-azure-vms>

NEW QUESTION 253

- (Exam Topic 3)

Which users can sign in to Computer3 when the computer starts in Safe Mode?

- A. User31 only
- B. User31 and User32 only
- C. User31 and Admin1 only
- D. User31, User 32, User33, and Admin1
- E. User31, User32, and User33 only

Answer: A

Explanation:

Only users with membership of the local Administrators group can log on to a computer in safe mode. Admin1 cannot log in because Computer3 is not joined to the domain.

References:

<https://support.microsoft.com/en-us/windows/advanced-startup-options-including-safe-mode-b90e7808-80b5-a2>

NEW QUESTION 254

- (Exam Topic 3)

For each of the following statements, select Yes if the statement is true. Otherwise, select No.

NOTE: Each correct selection is worth one point.

Statements	Yes	No
When User1 attempts to open D:\Folder1\Report.docx, an event is created in the security event log.	<input type="checkbox"/>	<input type="checkbox"/>
When User1 attempts to save changes to D:\Folder1\Report.docx, an event is created in the security event log.	<input type="checkbox"/>	<input type="checkbox"/>
When User2 attempts to open D:\Folder1\Report.docx, an event is created in the security event log.	<input type="checkbox"/>	<input type="checkbox"/>

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

Graphical user interface, text, application, email Description automatically generated

Reference:

<https://www.sciencedirect.com/topics/computer-science/security-event-log>

NEW QUESTION 257

- (Exam Topic 3)

Which users can sign in to Computer2 by using Remote Desktop?

- A. Admin1 only
- B. User 1 only
- C. Admin1 and User2 only
- D. Admin1, User1, User2, and User3
- E. User2 only

Answer: C

Explanation:

Reference:

<https://4sysops.com/archives/user-rights-assignment-in-windows-server-2016/>

NEW QUESTION 262

- (Exam Topic 3)

You implement the planned changes for Computer1.

For each of the following statements, select Yes if the statement is true. Otherwise, select No.

NOTE: Each correct selection is worth one point.

Statements	Yes	No
User1 can write to D:\Folder1\Report.docx.	<input type="radio"/>	<input type="radio"/>
User2 can write to D:\Folder1\Report.docx.	<input type="radio"/>	<input type="radio"/>
User3 can write to D:\Folder1\Report.docx.	<input type="radio"/>	<input type="radio"/>

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

A screenshot of a computer Description automatically generated with low confidence

Box 1: Yes

User1 already has full control access through membership of Group1. Therefore, User1 can write to the file. Box 2: No

The planned changes will grant User2 full control access to the file. However, User2 is a member of Group2 which has Deny/Write access. The Deny permission will always take precedence. Therefore, User2 will not be able to write to the file.

Box 3: No

The planned changes will grant User3 full control access to the folder. That permission will be inherited by the file. However, User3 is a member of Group2 which has Deny/Write access. The Deny permission will always take precedence. Therefore, User3 will not be able to write to the file.

NEW QUESTION 264

- (Exam Topic 3)

Which Windows 10 computers can you ping successfully from Computer1 and Computer2? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

Computer1:

Computer2 only
Computer3 only
Computer2 and Computer3
No Windows 10 computers

Computer2:

Computer1 only
Computer3 only
Computer1 and Computer3
No Windows 10 computers

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

Graphical user interface, text, application, chat or text message Description automatically generated

Box 1: Computer3 only.

Computer1 and Computer2 are domain joined so both will be using the Domain profile. The firewall rules on Computer1 allow outbound ICMP on all profiles so outbound ICMP will be allowed on the Domain profile.

The firewall rules on Computer2 allow inbound ICMP on the Public profile only, so it will be blocked on the domain profile. Therefore, Computer2 cannot be pinged.

The firewall rules on Computer3 allow inbound ICMP on all profiles. Therefore, Computer3 will not block the inbound pings.

Box 2: No Windows 10 computers.

The firewall rules on Computer2 allow outbound ICMP on the Private profile only, so it will be blocked on the domain profile. Therefore, Computer2 cannot ping any computers.

NEW QUESTION 266

- (Exam Topic 2)

You need to meet the technical requirement for Computer1.

What should you do? To answer, select the appropriate options in the answer area.

Answer Area

User who should configure Kiosk (assigned access):

	▼
User1	
User2	
User3	
User11	
User12	

Configure Kiosk (assigned access) for:

	▼
User4	
User5	
User12	
User13	

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

Answer Area

User who should configure Kiosk (assigned access):

	▼
User1	
User2	
User3	
User11	
User12	

Configure Kiosk (assigned access) for:

	▼
User4	
User5	
User12	
User13	

NEW QUESTION 269

- (Exam Topic 2)

You need to meet the quality update requirement for ComputerA. For how long should you defer the updates?

- A. 14 days
- B. 10 years
- C. 5 years
- D. 180 days
- E. 30 days

Answer: E

Explanation:

References:

<https://www.thewindowsclub.com/delay-defer-feature-updates-365-days-windows-10>

NEW QUESTION 274

- (Exam Topic 2)

You need to meet the technical requirement for User6. What should you do?

- A. Add User6 to the Remote Desktop Users group in the domain.
- B. Remove User6 from Group2 in the domain.
- C. Add User6 to the Remote Desktop Users group on Computer2.
- D. Add User6 to the Administrators group on Computer2.

Answer: B

NEW QUESTION 275

- (Exam Topic 2)

You need to meet the technical requirements for the helpdesk users.

What should you do? To answer, select the appropriate options in the answer area. NOTE: Each correct selection is worth one point.

Answer Area

Add the help desk users to:

- The local Administrators group on the Windows 10 computers
- The Domain Computrers group in the domain group
- The Event Log Readers group in the domain group
- The local Event Log Readers group on the Windows 10 computers
- The Group Policy Creators Owners group in the domain group
- The local Power Users group on the Windows 10 computers

Troubleshooting tool that the helpdesk users should use:

- Get-GPOReport
- GPRresult
- GPOUpdate
- Group Policy Object Editor

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

References:

<https://www.itprotoday.com/compute-engines/what-group-policy-creator-owners-group>

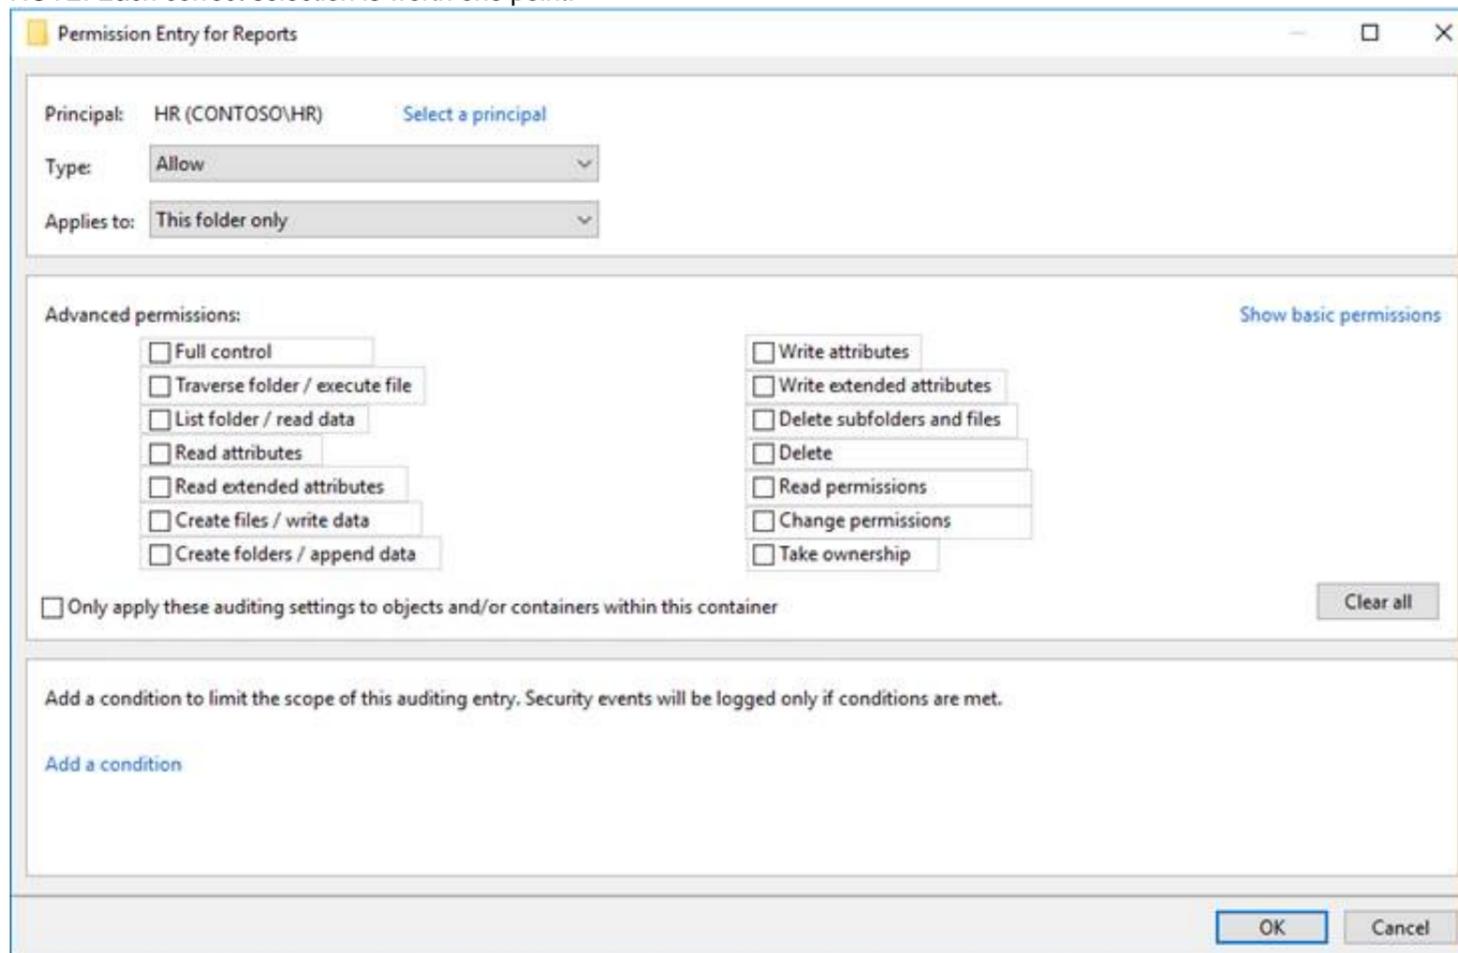

NEW QUESTION 278

- (Exam Topic 2)

You need to meet the technical requirements for the HR department users.

Which permissions should you assign to the HR department users for the D:\Reports folder? To answer, select the appropriate permissions in the answer area.

NOTE: Each correct selection is worth one point.

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

References:

<https://www.online-tech-tips.com/computer-tips/set-file-folder-permissions-windows/>

NEW QUESTION 279

- (Exam Topic 2)

You need to meet the technical requirements for EFS on ComputerA. What should you do?

- A. Run certutil.exe, and then add a certificate to the local computer certificate store.
- B. Run cipher.exe, and then add a certificate to the local computer certificate store.
- C. Run cipher.exe, and then add a certificate to the local Group Policy.
- D. Run certutil.exe, and then add a certificate to the local Group Policy.

Answer: D

Explanation:

References:

<https://docs.microsoft.com/en-us/windows/security/information-protection/windows-information-protection/crea>

NEW QUESTION 284

- (Exam Topic 1)

You need to sign in as LocalAdmin on Computer11. What should you do first?

- A. From the LAPS UI tool, view the administrator account password for the computer object of Computer11.
- B. From Local Security Policy, edit the policy password settings on Computer11.
- C. From the LAPS UI tool, reset the administrator account password for the computer object of Computer11.
- D. From Microsoft Intune, edit the policy password settings on Computer11.

Answer: A

Explanation:

References:

<https://technet.microsoft.com/en-us/mt227395.aspx>

NEW QUESTION 288

- (Exam Topic 1)

You need to implement a solution to configure the contractors' computers.

What should you do? To answer, select the appropriate options in the answer area. NOTE: Each correct selection is worth one point.

Tool to use:

Microsoft Deployment Toolkit (MDT)
Windows AutoPilot
Windows Configuration Designer
Windows Deployment Services (WDS)

File type to create:

CAB
PPKG
WIM
XML

- A. Mastered
- B. Not Mastered

Answer: A

NEW QUESTION 298

- (Exam Topic 4)

Please wait while the virtual machine loads. Once loaded, you may proceed to the lab section. This may take a few minutes, and the wait time will not be deducted from your overall test time.

When the Next button is available, click it to access the lab section. In this section, you will perform a set of tasks in a live environment. While most functionality will be available to you as it would be in a live

environment, some functionality (e.g., copy and paste, ability to navigate to external websites) will not be possible by design.

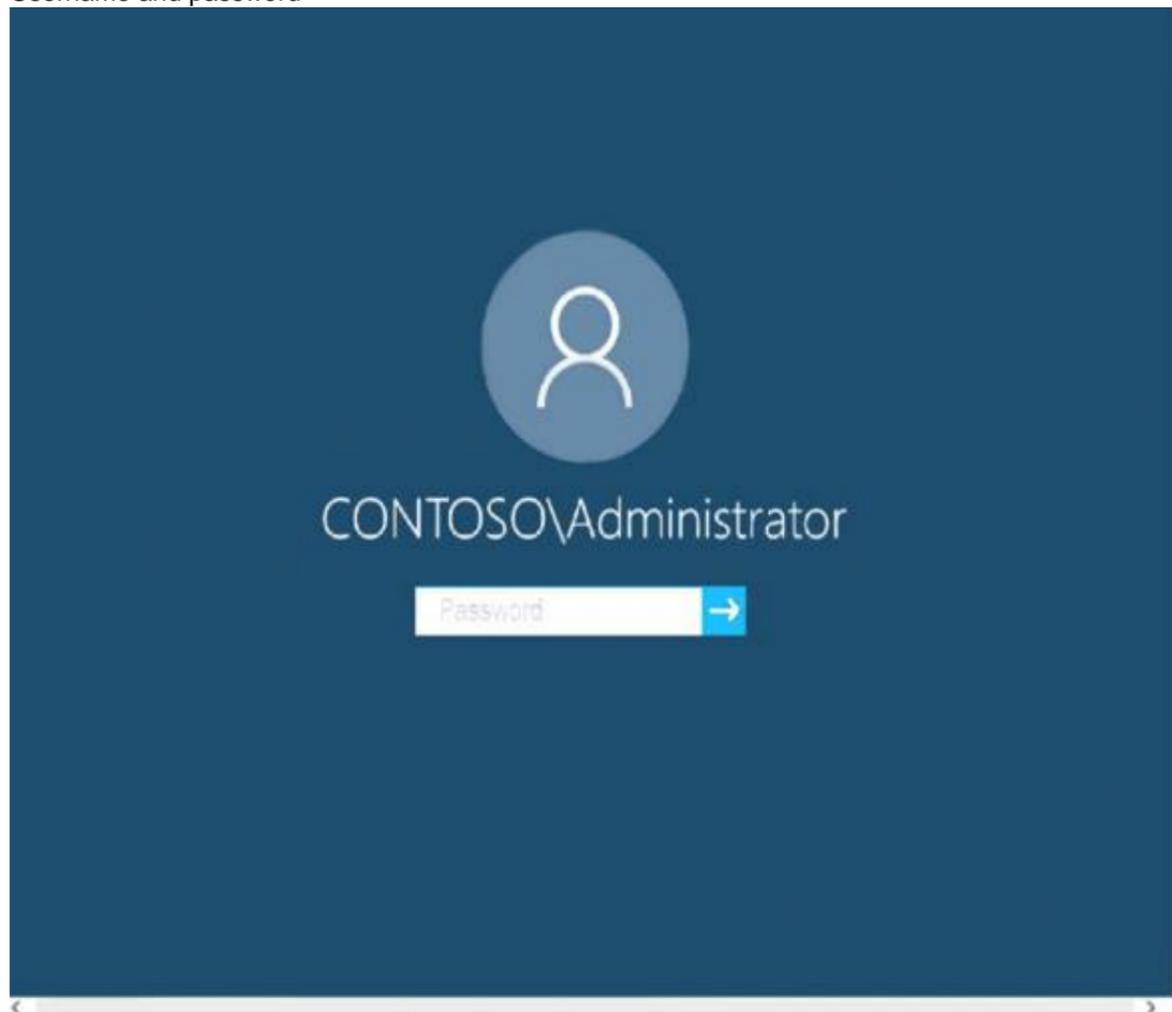

Scoring is based on the outcome of performing the tasks stated in the lab. In other words, it doesn't matter how you accomplish the task, if you successfully perform it, you will earn credit for that task.

Labs are not timed separately, and this exam may more than one lab that you must complete. You can use as much time as you would like to complete each lab.

But, you should manage your time appropriately to ensure that you are able to complete the lab(s) and all other sections of the exam in the time provided.

Please note that once you submit your work by clicking the Next button within a lab, you will NOT be able to return to the lab.

Client2

Client3

DC1

You need to identify the total number of events that have Event ID 63 in the Application event log. You must type the number of identified events into C:\Folder1\FileA.txt.

To complete this task, sign in to the required computer or computers and perform the required action.

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

- > Open Event Viewer.
- > Click the log that you want to filter, then click Filter Current Log from the Action pane or right-click menu. This will open the Filter Current Log dialog box.
- > You can specify a time period if you know approximately when the relevant events occurred. You can specify the event level, choosing between Critical, Warning, Verbose, Error and Information. If you select none of these, all event levels will be returned. You can't modify which event log is being checked as filters apply only to a single log.
- > You can choose the event sources which have generated the log entries, and search for key words, users, or computers. You can also search using specific event IDs.

NEW QUESTION 303

- (Exam Topic 4)

You have a computer named Computer1. Computer1 runs Windows 10 Pro. Computer1 is experiencing connectivity issues. You need to view the IP addresses of any remote computer that Computer1 has an active TCP connection to. Should you do?

- A. In Windows Administrative Tools, open Performance Monitor
- B. In the Control Panel, open Network and Internet Then select Network and Sharing Center
- C. In Windows Administrative Tools, open Resource Monitor
- D. In the Setting ap
- E. open Update and Security Then open Windows Security and select Firewall and Network protection

Answer: C

NEW QUESTION 307

- (Exam Topic 4)

You have a computer named Computer1 that runs Windows 10. On Computer1, you create the local users shown in the following table.

Name	Member of
User1	Users
User2	Users, Guests
User3	Power Users, Guest
User4	Guests, Users, Administrators
User5	Users, Distributed COM Users

Which three user profiles will persist after each user signs out? Each correct answer presents part of the solution.

NOTE: Each correct selection is worth one point.

- A. User1
- B. User2
- C. User3
- D. User4
- E. User5

Answer: ADE

NEW QUESTION 312

- (Exam Topic 4)

Your office has a dedicated wireless network for guests.

You plan to provide access cards that will have a QR code for guests. The QR code will link to a network configuration file stored on a publicly accessible website and provide the wireless network settings for Windows 10 devices.

Which tool should you use to create the configuration file and which file type should you use for the configuration file? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

Answer Area

Tool: ▼

Connection Manager Administration Kit (CMAK)
Local Group Policy Editor Microsoft Deployment
Microsoft Deployment Toolkit (MDT)
Windows Autopilot
Windows Configuration Designer

File type: ▼

ADMX
CAB
PPKG
WIM
XML

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

Reference:

<https://docs.microsoft.com/en-us/windows/configuration/provisioning-packages/provisioning-packages>

NEW QUESTION 316

- (Exam Topic 4)

Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution that might meet the stated goals. Some question sets might have more than one correct solution, while others might not have a correct solution.

After you answer a question in this section, you will NOT be able to return to it. As a result, these questions will not appear in the review screen.

You deploy Windows 10 to a computer named Computer1.

Computer1 contains a folder named C:\Folder1. Folder1 contains multiple documents.

You need to ensure that you can recover the files in Folder1 by using the Previous Versions tab. Solution: You enable File History and add Folder1 in the Documents library.

Does this meet the goal?

- A. Yes
- B. No

Answer: A

Explanation:

Reference:

<https://support.microsoft.com/en-za/help/17128/windows-8-file-history>

NEW QUESTION 321

- (Exam Topic 4)

Your network contains an Active Directory domain. The domain contains 1,000 computers that run Windows 10.

You configure Microsoft Edge settings by using domain and local Group Policy Objects (GPOs).

You need to generate a report that contains all the Microsoft Edge policy settings applied to a computer. What should you do?

- A. From PowerShell
- B. run the Gec-GPO cmdlet.
- C. From PowerShell

- D. run the Gec-GPOReport cmdlet.
- E. From Microsoft Edge, open edge://policy.
- F. From Microsoft Edge, open edge://settings.

Answer: C

Explanation:

The Get-GPOReport cmdlet would generate a report for all domain group policy objects. However, this would not display the settings that are applied by local group policy objects.

To display the settings applied by both domain and local GPOs, you would have to open Microsoft Edge and enter edge://policy in the address bar.
