NEW QUESTION 257

- (Exam Topic 2)

Which practice provides users with a way to get various requests arranged, explained and coordinated?

- A. Service level management

- B. Relationship management
- C. Continual improvement
- D. Service desk

Answer: D

Explanation:

Over time, the focus of service desks has broadened from simply logging and resolving technical issues, to providing more comprehensive support for people and the business. They are increasingly being used to get various matters arranged, explained, and coordinated. The service desk has a major influence on user experience and how the service provider is perceived by the users. By understanding and acting on the business context of transactional activity (i.e. logging tickets), the service desk is better placed to add value to the organization.

NEW QUESTION 333

- (Exam Topic 4)

Which is recommended as part of the 'progress iteratively with feedback' guiding principle?

- A. Prohibit changes to plans after they have been finalized
- B. Analyse the whole situation in detail before taking any action
- C. Reduce the number of steps that produce tangible results
- D. Organize work into small manageable units

Answer: D

Explanation:

The 'progress iteratively with feedback' guiding principle encourages organizations to break down complex initiatives into smaller, simpler, and more manageable units of work. This principle also recommends seeking and acting on feedback from stakeholders, avoiding big-bang approaches, and adapting plans based on

new information². However, this principle does not advise prohibiting changes to plans, analysing the whole situation in detail, or reducing the number of steps that produce tangible results, as these would be contrary to the iterative and adaptive nature of this principle³. NEW QUESTION 336

- (Exam Topic 4)

Which is a key element of the 'think and work holistically' guiding principle?

- A. Assessing which procedures can be re-used when improving a service
- B. Understanding the methods applicable to complex systems
- C. Eliminating metrics which do not contribute to achieving an objective
- D. Using technology for standard tasks to give people time for complex activities

Answer: B

Explanation:

No service, practice, process, department, or supplier stands alone. The outputs that the organization delivers to itself, its customers, and other stakeholders will suffer unless it works in an integrated way to handle its activities as a whole, rather than as separate parts.

Taking a holistic approach to service management includes establishing an understanding of how all the parts of an organization work together in an integrated way (remember the four dimensions of service management?), including having an end-to-end visibility of how demand is captured and translated into outcomes. In a complex system, the alteration of one element can impact others and, where possible, these impacts need to be identified, analysed and planned for.

To apply this principle successfully, consider this advice:

- Recognize the complexity of the systems
- Collaboration is key to thinking and working holistically
- Automation can facilitate working holistically

NEW QUESTION 343

- (Exam Topic 4)

What is the definition of service management?

- A. A set of specialized organizational capabilities for enabling value for customers in the form of services
- B. A result for a stakeholder enabled by one or more outputs
- C. A formal description of one or more services designed to address the needs of a target consumer group
- D. Joint activities performed by a service provider and a service consumer to ensure continual value co-creation

Answer: A

Explanation:

Service management is the term used to describe how organizations manage their services to deliver value to their customers and other stakeholders. Service management requires a set of specialized organizational capabilities, such as processes, roles, tools, and competencies, that enable the effective and efficient delivery of services¹. Service management is also a professional practice supported by an extensive body of knowledge, experience, and skills³. NEW QUESTION 346

- (Exam Topic 4)

What type of change is often used for resolving incidents or implementing security patches?

- A. Standard change
- B. Normal change
- C. Emergency change
- D. Change model

Answer: C

Explanation:

- A change that must be implemented as soon as possible without strictly following the standard process e.g. to resolve an incident or implement a security patch.
 - The process for assessment and authorization is expedited to ensure quick implementation, so scheduling and documentation is not a priority.
 - The change authority may be separate from what is standard or normal practice, typically smaller in number but with greater capacity to expedite approval.

NEW QUESTION 347

- (Exam Topic 4)

What ensures that a service provider and a service consumer continually co-create value?

- A. Service consumption
- B. Service offerings
- C. Change enablement
- D. Service relationship management

Answer: D

Explanation:

A service relationship is defined as the cooperation between a service provider and service consumer. Service relationships are established between two or more organizations to co-create value. An organization can play the role of provider or consumer interchangeably, depending on the situation.
