

Exam Questions MS-102

Microsoft 365 Administrator Exam

<https://www.2passeasy.com/dumps/MS-102/>

NEW QUESTION 1

- (Topic 6)

You have a Microsoft 365 tenant that is signed up for Microsoft Store for Business and contains a user named User1. You need to ensure that User1 can perform the following tasks in Microsoft Store for Business:

- Assign licenses to users.
- Procure apps from Microsoft Store.
- Manage private store availability for all items.

The solution must use the principle of least privilege.

Which Microsoft Store for Business role should you assign to User1?

- A. Basic Purchaser
- B. Device Guard signer
- C. Admin
- D. Purchaser

Answer: C

Explanation:

Reference:

<https://docs.microsoft.com/en-us/microsoft-store/microsoft-store-for-business-overview>

NEW QUESTION 2

HOTSPOT - (Topic 6)

HOTSPOT

You have a Microsoft 365 subscription.

You need to review metrics for the following: The daily active users in Microsoft Teams Recent Microsoft service issues

What should you use? To answer, select the appropriate options in the answer area. NOTE: Each correct selection is worth one point.

Answer Area

Teams daily active users:

<input type="checkbox"/>	Microsoft Secure Score
<input type="checkbox"/>	Adoption Score
<input type="checkbox"/>	Service health
<input type="checkbox"/>	Usage reports

Recent Microsoft service issues:

<input type="checkbox"/>	Microsoft Secure Score
<input type="checkbox"/>	Adoption Score
<input type="checkbox"/>	Service health
<input type="checkbox"/>	Usage reports

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

Box 1: Usage reports

The daily active users in Microsoft Teams

Microsoft 365 Reports in the admin center - Microsoft Teams usage activity

The brand-new Teams usage report gives you an overview of the usage activity in Teams, including the number of active users, channels and messages so you can quickly see how many users across your organization are using Teams to communicate and collaborate. It also includes other Teams specific activities, such as the number of active guests, meetings, and messages.

Box 2: Service Health

Recent Microsoft service issues

You can view the health of your Microsoft services, including Office on the web, Yammer, Microsoft Dynamics CRM, and mobile device management cloud services, on the Service health page in the Microsoft 365 admin center. If you are experiencing problems with a cloud service, you can check the service health to determine whether this is a known issue with a resolution in progress before you call support or spend time troubleshooting.

NEW QUESTION 3

- (Topic 6)

Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution that might meet the stated goals. Some question sets might have more than one correct solution, while others might not have a correct solution.

After you answer a question in this section, you will NOT be able to return to it. As a result, these questions will not appear in the review screen.

You have a Microsoft 365 E5 subscription.

You create an account for a new security administrator named SecAdmin1.

You need to ensure that SecAdmin1 can manage Office 365 Advanced Threat Protection (ATP) settings and policies for Microsoft Teams, SharePoint, and OneDrive.

Solution: From the Azure Active Directory admin center, you assign SecAdmin1 the Teams Service Administrator role.

Does this meet the goal?

- A. Yes
 B. No

Answer: B

Explanation:

You need to assign the Security Administrator role. Reference:

<https://docs.microsoft.com/en-us/microsoft-365/security/office-365-security/office-365-atp?view=o365-worldwide>

NEW QUESTION 4

HOTSPOT - (Topic 6)

HOTSPOT

Your network contains an on-premises Active Directory domain. The domain contains the servers shown in the following table.

Name	Operating system	Configuration
Server1	Windows Server 2022	Domain controller
Server2	Windows Server 2016	Member server
Server3	Server Core installation of Windows Server 2022	Member server

You purchase a Microsoft 365 E5 subscription.

You need to implement Azure AD Connect cloud sync.

What should you install first and on which server? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

Answer Area

Install:

Server:

- A. Mastered
 B. Not Mastered

Answer: A

Explanation:

Box 1: The Azure AD Connect provisioning agent Install the Azure AD Connect provisioning agent

How is Azure AD Connect cloud sync different from Azure AD Connect sync?

With Azure AD Connect cloud sync, provisioning from AD to Azure AD is orchestrated in Microsoft Online Services. An organization only needs to deploy, in their on-premises or IaaS-hosted environment, a light-weight agent that acts as a bridge between Azure AD and AD. The provisioning configuration is stored in Azure AD and managed as part of the service.

Box 2: Server1 or Server2 only.

Cloud provisioning agent requirements include:

* An on-premises server for the provisioning agent with Windows 2016 or later.

This server should be a tier 0 server based on the Active Directory administrative tier model. Installing the agent on a domain controller is supported.

Note: Windows Server Core is a minimal installation option for the Windows Server operating system (OS) that has no GUI and only includes the components required to perform server roles and run applications.

NEW QUESTION 5

- (Topic 6)

Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution that might meet the stated goals. Some question sets might have more than one correct solution, while others might not have a correct solution.

After you answer a question in this section, you will NOT be able to return to it. As a result, these questions will not appear in the review screen.

You have a Microsoft 365 E5 subscription that contains a user named User1. You need to enable User1 to create Compliance Manager assessments.

Solution: From the Microsoft 365 compliance center, you add User1 to the Compliance Manager Assessors role group.

Does this meet the goal?

- A. Yes
 B. No

Answer: A

Explanation:

Reference:

<https://github.com/MicrosoftDocs/microsoft-365-docs/blob/public/microsoft-365/security/office-365-security/permissions-in-the-security-and-compliance-center.md>

NEW QUESTION 6

- (Topic 6)

Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution that might meet the stated goals. Some question sets might have more than one correct solution, while others might not have a correct solution.

After you answer a question in this section, you will NOT be able to return to it. As a result, these questions will not appear in the review screen.

You have a Microsoft 365 E5 subscription.

You create an account for a new security administrator named SecAdmin1.

You need to ensure that SecAdmin1 can manage Microsoft Defender for Office 365 settings and policies for Microsoft Teams, SharePoint, and OneDrive.

Solution: From the Microsoft 365 admin center, you assign SecAdmin1 the Exchange admin role.

Does this meet the goal?

A. Yes

B. No

Answer: B

Explanation:

You need to assign the Security Administrator role. Reference:

<https://docs.microsoft.com/en-us/microsoft-365/security/office-365-security/office-365-atp?view=o365-worldwide>

NEW QUESTION 7

- (Topic 6)

Your company has offices in five cities. The company has a Microsoft 365 tenant.

Each office is managed by a local administrator. You plan to deploy Microsoft Intune.

You need to recommend a solution to manage resources in Intune that meets the following requirements:

? Local administrators must be able to manage only the resources in their respective office.

? Local administrators must be prevented from managing resources in other offices.

? Administrative effort must be minimized.

What should you include in the recommendation?

A. device categories

B. scope tags

C. configuration profiles

D. conditional access policies

Answer: B

Explanation:

Reference:

<https://docs.microsoft.com/en-us/mem/intune/fundamentals/scope-tags>

NEW QUESTION 8

- (Topic 6)

Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution that might meet the stated goals. Some question sets might have more than one correct solution, while others might not have a correct solution.

After you answer a question in this section, you will NOT be able to return to it. As a result, these questions will not appear in the review screen.

You have a Microsoft 365 E5 subscription that contains a user named User1. You need to enable User1 to create Compliance Manager assessments.

Solution: From the Microsoft 365 admin center, you assign User1 the Compliance data admin role.

Does this meet the goal?

A. Yes

B. No

Answer: B

Explanation:

Reference:

<https://github.com/MicrosoftDocs/microsoft-365-docs/blob/public/microsoft-365/security/office-365-security/permissions-in-the-security-and-compliance-center.md>

NEW QUESTION 9

- (Topic 6)

Your company has a Microsoft 365 E5 tenant that contains a user named User1. You review the company's compliance score.

You need to assign the following improvement action to User1: Enable self-service password reset.

What should you do first?

A. From Compliance Manager, turn off automated testing.

B. From the Azure Active Directory admin center, enable self-service password reset (SSPR).

C. From the Microsoft 365 admin center, modify the self-service password reset (SSPR) settings.

D. From the Azure Active Directory admin center, add User1 to the Compliance administrator role.

Answer: D

Explanation:

Reference:

<https://docs.microsoft.com/en-us/microsoft-365/compliance/compliance-manager-improvement-actions?view=o365-worldwide>

<https://docs.microsoft.com/en-us/azure/active-directory/fundamentals/active-directory-users-assign-role-azure-portal>

NEW QUESTION 10

- (Topic 6)

Your network contains an on-premises Active Directory domain named contoso.com. The domain contains the objects shown in the following table.

Name	Configuration
Group1	Global security group
User1	Enabled user account
User2	Disabled user account

You configure Azure AD Connect to sync contoso.com to Azure AD.

Which objects will sync to Azure AD?

- A. Group1 only
- B. User1 and User2 only
- C. Group1 and User1 only
- D. Group1, User1, and User2

Answer: D

Explanation:

Disabled accounts

Disabled accounts are synchronized as well to Azure AD. Disabled accounts are common to represent resources in Exchange, for example conference rooms. The exception is users with a linked mailbox; as previously mentioned, these will never provision an account to Azure AD.

The assumption is that if a disabled user account is found, then we won't find another active account later and the object is provisioned to Azure AD with the userPrincipalName and sourceAnchor found. In case another active account will join to the same metaverse object, then its userPrincipalName and sourceAnchor will be used.

Reference:

<https://learn.microsoft.com/en-us/azure/active-directory/hybrid/connect/concept-azure-ad-connect-sync-user-and-contacts>

NEW QUESTION 10

HOTSPOT - (Topic 6)

HOTSPOT

You have a Microsoft 365 E5 subscription that contains the users shown in the following table.

Name	Role
User1	Global Administrator
User2	Service Support Administrator
User3	Cloud Application Administrator
User4	None

You plan to provide User4 with early access to Microsoft 365 feature and service updates. You need to identify which Microsoft 365 setting must be configured, and which user can

modify the setting. The solution must use the principle of least privilege.

What should you identify? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

Answer Area

Microsoft 365 setting:

▼

Office installation options

Privileged access

Release preferences

User:

▼

User1 only

User2 only

User3 only

User1 and User2 only

User1 and User3 only

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

Answer Area

Microsoft 365 setting:

Office installation options
Privileged access
Release preferences

User:

User1 only
User2 only
User3 only
User1 and User2 only
User1 and User3 only

NEW QUESTION 12

HOTSPOT - (Topic 6)

HOTSPOT

You have a Microsoft 365 E5 subscription that contains two users named Admin1 and Admin2. All users are assigned a Microsoft 365 Enterprise E5 license and auditing is turned on. You create the audit retention policy shown in the exhibit. (Click the Exhibit tab.)

New audit retention policy

Name *:

Policy1

Description

Record Types

AzureActiveDirectory ▾

Activities

Added user, Deleted user, Reset user password, Changed user password, Changed user license, ... (7) ▾

Users:

Admin1 ✕

Duration *:

☒ 90 Days

☐ 6 Months

☐ 1 Year

Priority *:

100

Save

Cancel

After Policy1 is created, the following actions are performed:

? Admin1 creates a user named User1.

? Admin2 creates a user named User2.

How long will the audit events for the creation of User1 and User2 be retained? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

User1:

	▼
0 days	
30 days	
90 days	
180 days	
365 days	

User2:

	▼
0 days	
30 days	
90 days	
180 days	
365 days	

- A. Mastered
 B. Not Mastered

Answer: A

Explanation:

User1:

	▼
0 days	
30 days	
90 days	
180 days	
365 days	

User2:

	▼
0 days	
30 days	
90 days	
180 days	
365 days	

NEW QUESTION 15

- (Topic 6)

You have a Microsoft 365 E5 subscription.

On Monday, you create a new user named User1.

On Tuesday, User1 signs in for the first time and perform the following actions:

- Signs in to Microsoft Exchange Online from an anonymous IP address
- Signs in to Microsoft SharePoint Online from a device in New York City.
- Establishes Remote Desktop connections to hosts in Berlin and Hong Kong, and then signs in to SharePoint Online from the Remote Desktop connections

Which types of sign-in risks will Azure AD Identity Protection detect for User1?

- A. anonymous IP address only
 B. anonymous IP address and atypical travel
 C. anonymous IP address, atypical travel, and unfamiliar sign-in properties
 D. unfamiliar sign-in properties and atypical travel only
 E. anonymous IP address and unfamiliar sign-in properties only

Answer: C

NEW QUESTION 17

- (Topic 6)

You have a Microsoft 365 tenant that contains the groups shown in the following table.

Name	Type
Group1	Distribution
Group2	Mail-enabled security
Group3	Security

You plan to create a new Windows 10 Security Baseline profile. To which groups can you assign to the profile?

- A. Group3 only
 B. Group1 and Group3 only
 C. Group2 and Group3 only
 D. Group1. Group2. and Group3

Answer: A

Explanation:

Reference:

<https://docs.microsoft.com/en-us/mem/intune/protect/security-baselines-configure#create-the-profile>

<https://docs.microsoft.com/en-us/microsoft-365/admin/create-groups/compare-groups?view=o365-worldwide>

NEW QUESTION 18

- (Topic 6)

From the Security & Compliance admin center, you create a content export as shown in the exhibit. (Click the Exhibit tab.)

SharePoint Content_Export

Restart report

Download report

Delete

Status:
The export has completed. You can start downloading the results.

Items included from the search:
All items, excluding ones that have unrecognized format, are encrypted, or weren't indexed for other reasons.

Exchange content format:
One PST file for each mailbox.

De-duplication for Exchange content:
Not enabled.

SharePoint document versions:
Included

Export files in a compressed (zipped) folder:
Yes

The export data was prepared within region:
Default region

Close

Feedback

What will be excluded from the export?

- A. a 10-MB XLSX file
- B. a 5-MB MP3 file
- C. a 5-KB RTF file
- D. an 80-MB PPTX file

Answer: B

Explanation:

Unrecognized file formats are excluded from the search.

Certain types of files, such as Bitmap or MP3 files, don't contain content that can be indexed. As a result, the search indexing servers in Exchange and SharePoint don't perform full-text indexing on these types of files. These types of files are considered to be unsupported file types.

Reference:

<https://docs.microsoft.com/en-us/microsoft-365/compliance/partially-indexed-items-in-content-search?view=o365-worldwide>

<https://docs.microsoft.com/en-us/office365/securitycompliance/export-a-content-search-report>

NEW QUESTION 19

- (Topic 6)

Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution that might meet the stated goals. Some question sets might have more than one correct solution, while others might not have a correct solution.

After you answer a question in this section, you will NOT be able to return to it. As a result, these questions will not appear in the review screen.

You have a Microsoft 365 E5 subscription.

You create an account for a new security administrator named SecAdmin1.

You need to ensure that SecAdmin1 can manage Microsoft Defender for Office 365 settings and policies for Microsoft Teams, SharePoint, and OneDrive.

Solution: From the Microsoft 365 admin center, you assign SecAdmin1 the SharePoint Administrator role.

Does this meet the goal?

- A. Yes
- B. No

Answer: B

NEW QUESTION 23

- (Topic 6)

You have a Microsoft 365 E5 subscription.
You need to compare the current Safe Links configuration to the Microsoft recommended configurations.
What should you use?

- A. Microsoft Purview
- B. Azure AD Identity Protection
- C. Microsoft Secure Score
- D. the configuration analyzer

Answer: C

NEW QUESTION 27

- (Topic 6)

You purchase a new computer that has Windows 10, version 2004 preinstalled.
You need to ensure that the computer is up-to-date. The solution must minimize the number of updates installed.
What should you do on the computer?

- A. Install all the feature updates released since version 2004 and all the quality updates released since version 2004 only.
- B. install the West feature update and the latest quality update only.
- C. install all the feature updates released since version 2004 and the latest quality update only.
- D. install the latest feature update and all the quality updates released since version 2004.

Answer: B

NEW QUESTION 29

HOTSPOT - (Topic 6)

Your company has a Azure AD tenant named comoso.onmicrosoft.com that contains the users shown in the following table.

Name	Role
User1	Password Administrator
User2	Security Administrator
User3	User Administrator
User4	None

You need to identify which users can perform the following administrative tasks:

- Reset the password of User4.
- Modify the value for the manager attribute of User4.

Which users should you identify for each task? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

Answer Area

Reset the password of User4:

Modify the value for the manager attribute of User4:

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

Answer Area

Reset the password of User4:

Modify the value for the manager attribute of User4:

NEW QUESTION 33

HOTSPOT - (Topic 6)

You have an Azure Active Directory (Azure AD) tenant named contoso.com that contains the users shown in the following table.

Name	Member of
User1	Group1
User2	Group2
User3	Group1, Group2

You integrate Microsoft Intune and contoso.com as shown in the following exhibit.

You purchase a Windows 10 device named Device1.

For each of the following statements, select Yes if the statement is true. Otherwise, select No.

NOTE: Each correct selection is worth one point.

Statements	Yes	No
If User1 joins Device1 to contoso.com, Device1 is enrolled in Intune automatically.	<input type="radio"/>	<input type="radio"/>
If User2 joins Device1 to contoso.com, Device1 is enrolled in Intune automatically.	<input type="radio"/>	<input type="radio"/>
If User3 registers Device1 in contoso.com, Device1 is enrolled in Intune automatically.	<input type="radio"/>	<input type="radio"/>

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

Statements	Yes	No
If User1 joins Device1 to contoso.com, Device1 is enrolled in Intune automatically.	<input checked="" type="radio"/>	<input type="radio"/>
If User2 joins Device1 to contoso.com, Device1 is enrolled in Intune automatically.	<input type="radio"/>	<input checked="" type="radio"/>
If User3 registers Device1 in contoso.com, Device1 is enrolled in Intune automatically.	<input type="radio"/>	<input checked="" type="radio"/>

NEW QUESTION 34

- (Topic 6)

You have a Microsoft 365 tenant that contains a Windows 10 device named Device1 and the Microsoft Endpoint Manager policies shown in the following table.

Name	Type	Block execution of potentially obfuscated scripts (js/vbs/ps)
Policy1	Attack surface reduction (ASR)	Audit mode
Policy2	Microsoft Defender ATP Baseline	Disable
Policy3	Device configuration profile	Not configured

The policies are assigned to Device1.

Which policy settings will be applied to Device1?

- A. only the settings of Policy1
- B. only the settings of Policy2
- C. only the settings of Policy3
- D. no settings

Answer: D

NEW QUESTION 37

HOTSPOT - (Topic 6)

Your company has a Microsoft 365 subscription that contains the users shown in the following table.

Name	Role
User1	Global Administrator
User2	Security Administrator, Guest Inviter
User3	None
User4	Password Administrator

External collaboration settings have default configuration.

You need to identify which users can perform the following administrative tasks:

- Modify the password protection policy.
- Create guest user accounts.

Which users should you identify for each task? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

Answer Area

Modify the password protection policy:

Create new guest users in Azure AD:

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

Answer Area

Modify the password protection policy: User1 only

Create new guest users in Azure AD: User1 and User2 only

NEW QUESTION 39

- (Topic 6)

You have a Microsoft 365 tenant.

You plan to implement Endpoint Protection device configuration profiles. Which platform can you manage by using the profile?

- A. Android
- B. CentOS Linux
- C. iOS
- D. Window 10

Answer: D

Explanation:

Reference:

https://docs.microsoft.com/en-us/mem/intune/protect/endpoint-protection-configure

NEW QUESTION 44

HOTSPOT - (Topic 6)

HOTSPOT

You have an Azure AD tenant named contoso.com that contains the users shown in the following table.

Name	Member of	Multi-Factor Auth Status
User1	Group1	Disabled
User2	Group1	Enforced

Multi-factor authentication (MFA) is configured to use 131.107.5.0/24 as trusted IPs. The tenant contains the named locations shown in the following table.

Name	IP address range	Trusted location
Location1	131.107.20.0/24	Yes
Location2	131.107.50.0/24	Yes

You create a conditional access policy that has the following configurations:

? Users or workload identities assignments: All users

? Cloud apps or actions assignment: App1

? Conditions: Include all trusted locations

? Grant access: Require multi-factor authentication

For each of the following statements, select Yes if the statement is true. Otherwise, select No.

NOTE: Each correct selection is worth one point.

Answer Area

Statements	Yes	No
When User1 connects to App1 from a device that has an IP address of 131.107.50.10, User1 must use MFA.	<input checked="" type="checkbox"/>	<input type="checkbox"/>
When User2 connects to App1 from a device that has an IP address of 131.107.20.15, User2 must use MFA.	<input type="checkbox"/>	<input type="checkbox"/>
When User2 connects to App1 from a device that has an IP address of 131.107.5.5, User2 must use MFA.	<input type="checkbox"/>	<input type="checkbox"/>

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

Box 1: Yes

* 131.107.50.10 is in a Trusted Location so the conditional access policy applies. The policy requires MFA. However, User1's MFA status is disabled. The MFA requirement in the conditional access policy will override the user's MFA status of disabled. Therefore, User1 must use MFA.

Box 2: Yes.

* 131.107.20.15 is in a Trusted Location so the conditional access policy applies. The policy requires MFA so User2 must use MFA.

Box 3: No.

IP not from Trusted Location so Policy does not apply, Subnet 131.107.5.5 is not in the range of 131.107.50.0/24

NEW QUESTION 47

- (Topic 6)

You have a Microsoft 365 subscription that contains the alerts shown in the following table.

Name	Severity	Status	Comment	Category
Alert1	Medium	Active	Comment1	Threat management
Alert2	Low	Resolved	Comment2	Other

Which properties of the alerts can you modify?

- A. Status only
- B. Status and Comment only
- C. Status and Severity only
- D. Status, Severity, and Comment only
- E. Status, Severity, Comment and Category

Answer: B

Explanation:

Explanation:

Answer Area		
Statements	Yes	No
User1 can invite guest users.	<input type="radio"/>	<input checked="" type="radio"/>
User2 can invite guest users.	<input type="radio"/>	<input checked="" type="radio"/>
User3 can invite guest users.	<input checked="" type="radio"/>	<input type="radio"/>

NEW QUESTION 53

- (Topic 6)
You have a Microsoft 365 E5 tenant that has sensitivity label support enabled for Microsoft and SharePoint Online. You need to enable unified labeling for Microsoft 365 groups. Which cmdlet should you run?

- A. set-unifiedGroup
- B. Set-Labelpolicy
- C. Execute-AzureAdLebelSync
- D. Add-UnifiedGroupLinks

Answer: C

NEW QUESTION 54

- (Topic 6)

You have a Microsoft Azure Active Directory (Azure AD) tenant named Contoso.com. You create a Microsoft Defender for identity instance Contoso. The tenant contains the users shown in the following table.

Name	Member of group	Azure AD role
User1	Defender for Identity Contoso Administrators	None
User2	Defender for Identity Contoso Users	None
User3	None	Security administrator
User4	Defender for Identity Contoso Users	Global administrator

You need to modify the configuration of the Defender for identity sensors.

Solutions: You instruct User1 to modify the Defender for identity sensor configuration. Does this meet the goal?

- A. Yes
- B. No

Answer: A

NEW QUESTION 55

- (Topic 6)

Your network contains an on-premises Active Directory domain named contoso.com. The domain contains 1,000 Windows 10 devices.

You perform a proof of concept (PoC) deployment of Microsoft Defender for Endpoint for

10 test devices. During the onboarding process, you configure Microsoft Defender for Endpoint-related data to be stored in the United States.

You plan to onboard all the devices to Microsoft Defender for Endpoint. You need to store the Microsoft Defender for Endpoint data in Europe. What should you do first?

- A. Delete the workspace.
- B. Create a workspace.
- C. Onboard a new device.
- D. Offboard the test devices.

Answer: B

Explanation:

Storage locations

Understand where Defender for Cloud stores data and how you can work with your data:

* Machine information

- Stored in a Log Analytics workspace.

- You can use either the default Defender for Cloud workspace or a custom workspace. Data is stored in accordance with the workspace location.

Reference:

<https://learn.microsoft.com/en-us/azure/defender-for-cloud/plan-defender-for-servers-data- workspace>

NEW QUESTION 60

HOTSPOT - (Topic 6)

HOTSPOT

You have a Microsoft 365 E5 tenant that contains the users shown in the following table.

Name	Microsoft 365 role
User1	Cloud application administrator
User2	Application administrator
User3	Application developer
User4	None

Users are assigned Microsoft Store for Business roles as shown in the following table.

User	Role
User1	None
User2	Basic Purchaser
User3	Purchaser
User4	Device Guard signer

Which users can add apps to the private store in Microsoft Store for Business, and which users can install apps from the private store? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

Add apps to the private store:

User3 only

User2 and User3 only

User1 and User3 only

User1, User2 and User3 only

User1, User2, User3, and User4

Install apps from the private store:

User3 only

User2 and User3 only

User1 and User3 only

User2, User3 and User4 only

User1, User2, User3, and User4

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

Add apps to the private store:

User3 only

User2 and User3 only

User1 and User3 only

User1, User2 and User3 only

User1, User2, User3, and User4

Install apps from the private store:

User3 only

User2 and User3 only

User1 and User3 only

User2, User3 and User4 only

User1, User2, User3, and User4

NEW QUESTION 63

- (Topic 6)
You have a Microsoft 365 subscription.
You view the Service health Overview as shown in the following exhibit.

Service health

October 18, 2022 4:20 PM

Overview Issue history Reported issues

View the issues and health status of all services that are available with your current subscriptions. [Learn more about Service Health](#)

Report an issue Customize

Active issues

Issue title	Affected service	Issue type
> Microsoft service health (6)		
Issues in your environment that require action (0)		

Microsoft service health

Shows the current health status of your Microsoft services, and updates when we fix issues.

Service	Status
Exchange Online	3 advisories
Microsoft 365 suite	2 advisories
Microsoft Teams	1 advisory
OneDrive for Business	1 advisory
SharePoint Online	2 advisories

You need to ensure that a user named User1 can view the advisories to investigate service health issues. Which role should you assign to User1?

- A. Message Center Reader
- B. Reports Reader
- C. Service Support Administrator
- D. Compliance Administrator

Answer: B

Explanation:

Service Support admin

Assign the Service Support admin role as an additional role to admins or users who need to do the following in addition to their usual admin role:

- Open and manage service requests
- View and share message center posts
- Monitor service health

Incorrect:

* Message center reader

Assign the Message center reader role to users who need to do the following:

- Monitor message center notifications
- Get weekly email digests of message center posts and updates
- Share message center posts
- Have read-only access to Azure AD services, such as users and groups

* Reports reader

Assign the Reports reader role to users who need to do the following:

- View usage data and the activity reports in the Microsoft 365 admin center
- Get access to the Power BI adoption content pack
- Get access to sign-in reports and activity in Azure AD
- View data returned by Microsoft Graph reporting API

Reference:

<https://learn.microsoft.com/en-us/microsoft-365/admin/add-users/about-admin-roles?view=o365-worldwide>

NEW QUESTION 67

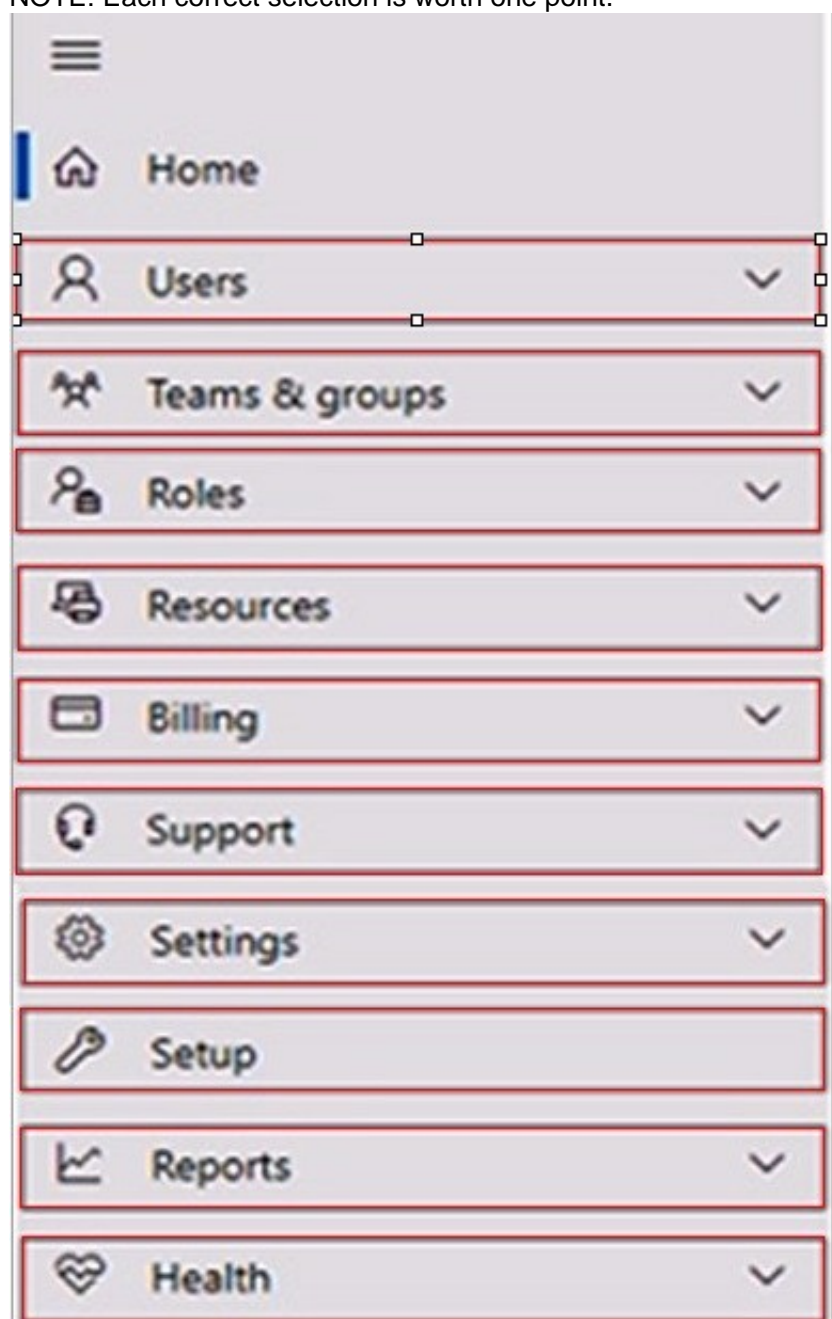

HOTSPOT - (Topic 6)

HOTSPOT

Your company has a Microsoft 365 E5 subscription. You need to perform the following tasks:

View the Adoption Score of the company. Create a new service request to Microsoft.

Which two options should you use in the Microsoft 365 admin center? To answer, select the appropriate options in the answer area.
 NOTE: Each correct selection is worth one point.

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

Box 1: Reports

View the Adoption Score of the company.

How to enable Adoption Score To enable Adoption Score:

? Sign in to the Microsoft 365 admin center as a Global Administrator and go to Reports > Adoption Score

? Select enable Adoption Score. It can take up to 24 hours for insights to become available.

Box 2: Support

Create a new service request to Microsoft.

Sign in to Microsoft 365 with your Microsoft 365 admin account, and select Support > New service request. If you're in the admin center, select Support > New service request.

NEW QUESTION 71

- (Topic 6)

You have a Microsoft 365 E5 subscription that uses Microsoft Defender for Endpoint. From Microsoft Defender for Endpoint you turn on the Allow or block file advanced feature. You need to block users from downloading a file named File1.exe.

What should you use?

- A. an indicator
- B. a suppression rule
- C. a device configuration profile

Answer: A

NEW QUESTION 73

- (Topic 6)

You have a Microsoft 365 E5 subscription that contains the users shown in the following table.

Name	Role
User1	Reports Reader
User2	Exchange Administrator
User3	User Experience Success Manager

Which users can review the Adoption Score in the Microsoft 365 admin center?

- A. User1 only
- B. User2 only
- C. User1 and User2 only
- D. User1 and User3 only
- E. User1, User2, and User3

Answer: E

NEW QUESTION 78

HOTSPOT - (Topic 6)

You have a Microsoft 365 E5 subscription that uses Microsoft Intune. The subscription contains the resources shown in the following table.

Name	Type	Member of
User1	User	Group1
Device1	Device	Group2

User1 is the owner of Device1.

You add Microsoft 365 Apps Windows 10 and later app types to Intune as shown in the following table.

On Thursday, you review the results of the app deployments.

Name	Shows in Company Portal	Assignment	Microsoft Office app to install	Day of creation
App1	Yes	Group1 - Required	Word	Monday
App2	Yes	Group2 - Required	Excel	Tuesday
App3	Yes	Group1 - Available	PowerPoint	Wednesday

For each of the following statements, select Yes if the statement is true. Otherwise, select No.

NOTE: Each correct selection is worth one point.

Answer Area

Statements	Yes	No
Word is installed on Device1.	<input checked="" type="radio"/>	<input type="radio"/>
App3 is displayed in the Company Portal.	<input type="radio"/>	<input type="radio"/>
Excel is installed on Device1.	<input type="radio"/>	<input type="radio"/>

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

Answer Area

Statements	Yes	No
Word is installed on Device1.	<input checked="" type="checkbox"/>	<input checked="" type="checkbox"/>
App3 is displayed in the Company Portal.	<input checked="" type="checkbox"/>	<input type="checkbox"/>
Excel is installed on Device1.	<input checked="" type="checkbox"/>	<input type="checkbox"/>

NEW QUESTION 81

HOTSPOT - (Topic 6)

You have a Microsoft 365 E5 tenant that contains five devices enrolled in Microsoft Intune as shown in the following table.

Name	Platform
Device1	Windows 10
Device2	Android 8.1.0
Device3	Android 10
Device4	iOS 12
Device5	iOS 14

All the devices have an app named App1 installed.
You need to prevent users from copying data from App1 and pasting the data into other apps.
Which policy should you create in Microsoft Endpoint Manager, and what is the minimum number of required policies? To answer, select the appropriate options in the answer area.
NOTE: Each correct selection is worth one point.

Policy to create in Microsoft Endpoint Manager:

An app configuration policy

An app protection policy

A conditional access policy

A device compliance policy

Minimum number of required policies:

1

2

3

5

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

Policy to create in Microsoft Endpoint Manager:

An app configuration policy

An app protection policy

A conditional access policy

A device compliance policy

Minimum number of required policies:

1

2

3

5

NEW QUESTION 82

- (Topic 6)

Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution that might meet the stated goals. Some question sets might have more than one correct solution, while others might not have a correct solution.

After you answer a question in this section, you will NOT be able to return to it. As a result, these questions will not appear in the review screen.

Your network contains an Active Directory domain. You deploy a Microsoft Entra tenant.

Another administrator configures the domain to synchronize to the Microsoft Entra tenant.

You discover that 10 user accounts in an organizational unit (OU) are NOT synchronized to the Microsoft Entra tenant. All the other user accounts synchronized successfully.

You review Microsoft Entra Connect Health and discover that all the user account synchronizations completed successfully.

You need to ensure that the 10 user accounts are synchronized to the Microsoft Entra tenant.

Solution: From Microsoft Entra Connect, you modify the filtering settings. Does this meet the goal?

A. Yes

B. No

Answer: B

NEW QUESTION 86

HOTSPOT - (Topic 6)

You have several devices enrolled in Microsoft Endpoint Manager

You have a Microsoft Azure Active Directory (Azure AD) tenant that includes the users shown in the following table.

Name	Role	Member of
User1	Cloud device administrator	GroupA
User2	Intune administrator	GroupB
User3	None	None

The device limit restrictions in Endpoint manager are configured as shown in the following table.

Priority	Name	Device limit	Assigned to
1	Policy1	15	GroupB
2	Policy2	10	GroupA
Default	All users	5	All users

You add user as a device enrollment manager in Endpoint manager

For each of the following statements, select Yes if the statement is true. Otherwise, select No

Answer Area

Statements	Yes	No
User1 can enroll a maximum of 10 devices in Endpoint Manager.	<input type="radio"/>	<input type="radio"/>
User2 can enroll a maximum of 10 devices in Endpoint Manager.	<input type="radio"/>	<input type="radio"/>
User3 can enroll an unlimited number of devices in Endpoint Manager.	<input type="radio"/>	<input type="radio"/>

A. Mastered

B. Not Mastered

Answer: A

Explanation:

Answer Area

Statements	Yes	No
User1 can enroll a maximum of 10 devices in Endpoint Manager.	<input checked="" type="radio"/>	<input type="radio"/>
User2 can enroll a maximum of 10 devices in Endpoint Manager.	<input type="radio"/>	<input checked="" type="radio"/>
User3 can enroll an unlimited number of devices in Endpoint Manager.	<input checked="" type="radio"/>	<input type="radio"/>

NEW QUESTION 90

- (Topic 6)

You need to notify the manager of the human resources department when a user in the department shares a file or folder from the department's Microsoft SharePoint Online site. What should you do?

A. From the SharePoint Online site, create an alert.

B. From the SharePoint Online admin center, modify the sharing settings.

C. From the Microsoft 365 Defender portal, create an alert policy.

D. From the Microsoft Purview compliance portal, create a data loss prevention (DLP) policy.

Answer: D

NEW QUESTION 91

HOTSPOT - (Topic 6)

HOTSPOT

You have a Microsoft 365 E5 subscription that uses Microsoft Defender for Endpoint and contains the devices shown in the following table.

Name	Operating system	Tag
Device1	Windows 10	Inventory1
Computer1	Windows 10	Inventory2
Device3	Android	Inventory3

Defender for Endpoint has the device groups shown in the following table.

Rank	Name	Matching rule
1	Group1	Tag Contains Inventory And OS in Android
2	Group2	Name Starts with Device And Tag Contains Inventory
Last	Ungrouped devices (default)	Not applicable

You create an incident email notification rule configured as shown in the following table.

Setting	Value
Name	Rule1
Alert severity	Low
Device group scope	Group1, Group2
Recipient email address	User1@contoso.com

For each of the following statements, select Yes if the statement is true. Otherwise, select No.

NOTE: Each correct selection is worth one point.

Answer Area

Statements

If a high-severity incident is triggered for Device1, an incident email notification will be sent.

Yes

☒

No

☐

If a low-severity incident is triggered for Computer1, an incident notification email will be sent.

☐
☐

If a low-severity incident is triggered for Device3, an incident notification email will be sent.

☐
☐

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

Box 1: No

Device1 is in Group2 as Name starts with Device and Tag contains Inventory. However, the Group2 has alert severity low.

Box 2: No

Computer1 does not belong to either Group1 or Group2

Box 3: Yes

Device3 belongs to both Group1 and Group2.

Note: Understanding alert severity

Microsoft Defender Antivirus and Defender for Endpoint alert severities are different because they represent different scopes.

The Microsoft Defender Antivirus threat severity represents the absolute severity of the detected threat (malware), and is assigned based on the potential risk to the individual device, if infected.

NEW QUESTION 92

- (Topic 6)

You have a Microsoft 365 E5 subscription that has Microsoft Defender for Endpoint integrated with Microsoft Endpoint Manager.

Devices are onboarded by using Microsoft Defender for Endpoint.

You plan to block devices based on the results of the machine risk score calculated by Microsoft Defender for Endpoint.

What should you create first?

- A. a device configuration policy
- B. a device compliance policy
- C. a conditional access policy
- D. an endpoint detection and response policy

Answer: B

Explanation:

Reference:

<https://docs.microsoft.com/en-us/mem/intune/protect/advanced-threat-protection-configure>

NEW QUESTION 96

- (Topic 6)

Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution that might meet the stated goals. Some question sets might have more than one correct solution, while others might not have a correct solution.

After you answer a question in this section, you will NOT be able to return to it. As a result, these questions will not appear in the review screen.

You have a Microsoft 365 E5 subscription.

You create an account for a new security administrator named SecAdmin1.

You need to ensure that SecAdmin1 can manage Office 365 Advanced Threat Protection (ATP) settings and policies for Microsoft Teams, SharePoint, and OneDrive.

Solution: From the Microsoft 365 admin center, you assign SecAdmin1 the SharePoint admin role.

Does this meet the goal?

A. Yes

B. No

Answer: B

Explanation:

You need to assign the Security Administrator role. Reference:

<https://docs.microsoft.com/en-us/microsoft-365/security/office-365-security/office-365-atp?view=o365-worldwide>

NEW QUESTION 98

- (Topic 6)

You have a Microsoft 365 E3 subscription that uses Microsoft Defender for Endpoint Plan 1.

Which two Defender for Endpoint features are available to the subscription? Each correct answer presents part of the solution.

NOTE: Each correct selection is worth one point.

A. advanced hunting

B. security reports

C. digital certificate assessment

D. device discovery

E. attack surface reduction (ASR)

Answer: BE

Explanation:

B: Overview of Microsoft Defender for Endpoint Plan 1, Reporting

The Microsoft 365 Defender portal (<https://security.microsoft.com>) provides easy access to information about detected threats and actions to address those threats.

The Home page includes cards to show at a glance which users or devices are at risk, how many threats were detected, and what alerts/incidents were created.

The Incidents & alerts section lists any incidents that were created as a result of triggered alerts. Alerts and incidents are generated as threats are detected across devices.

The Action center lists remediation actions that were taken. For example, if a file is sent to quarantine, or a URL is blocked, each action is listed in the Action center on the History tab.

The Reports section includes reports that show threats detected and their status. E: What can you expect from Microsoft Defender for Endpoint P1?

Microsoft Defender for Endpoint P1 is focused on prevention/EPP including:

Next-generation antimalware that is cloud-based with built-in AI that helps to stop ransomware, known and unknown malware, and other threats in their tracks.

(E) Attack surface reduction capabilities that harden the device, prevent zero days, and offer granular control over access and behaviors on the endpoint.

Device based conditional access that offers an additional layer of data protection and breach prevention and enables a Zero Trust approach.

The below table offers a comparison of capabilities are offered in Plan 1 versus Plan 2.

Capabilities	P1	P2
Unified security tools and centralized management	✓	✓
Next-generation antimalware	✓	✓
Attack surface reduction rules	✓	✓
Device control (e.g.: USB)	✓	✓
Endpoint firewall	✓	✓
Network protection	✓	✓
Web control / category-based URL backing	✓	✓
Device-based conditional access	✓	✓
Controlled folder access	✓	✓
APIs, SIEM connector, custom TI	✓	✓
Application control	✓	✓
Endpoint detection and response		✓
Automated investigation and remediation		✓
Threat and vulnerability management		✓
Threat intelligence (Threat Analytics)		✓
Sandbox (deep analysis)		✓
Microsoft Threat Experts**		✓

**Includes Targeted Attack Notifications (TAN) and Experts On Demand (EOD). Customers must apply for TAN. EOD is available for purchase as an add-on.

Incorrect:

Not A: P2 is by far the best fit for enterprises that need an EDR solution including automated investigation and remediation tools, advanced threat prevention and threat and vulnerability management (TVM), and hunting capabilities.

Reference:

<https://learn.microsoft.com/en-us/microsoft-365/security/defender-endpoint/defender-endpoint-plan-1>

<https://techcommunity.microsoft.com/t5/microsoft-defender-for-endpoint/microsoft-defender-for-endpoint-plan-1-now-included-in-m365-e3/ba-p/3060639>

NEW QUESTION 101

HOTSPOT - (Topic 6)

You have a Microsoft 365 tenant that contains 100 Windows 10 devices. The devices are managed by using Microsoft Endpoint Manager.

You plan to create two attack surface reduction (ASR) policies named ASR1 and ASR2. ASR1 will be used to configure Microsoft Defender Application Guard.

ASR2 will be used to configure Microsoft Defender SmartScreen.

Which ASR profile type should you use for each policy? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

ASR1:

▼

Device control

Exploit protection

Application control

App and browser isolation

Attack surface reduction rules

ASR2:

▼

Device control

Exploit protection

Application control

App and browser isolation

Attack surface reduction rules

A. Mastered

B. Not Mastered

Answer: A

Explanation:

ASR1:

Device control
Exploit protection
Application control
App and browser isolation
Attack surface reduction rules

ASR2:

Device control
Exploit protection
Application control
App and browser isolation
Attack surface reduction rules

NEW QUESTION 103

- (Topic 6)

Your on-premises network contains an Active Directory domain. You have a Microsoft 365 E5 subscription.

You plan to implement a hybrid configuration that has the following requirements:

- Minimizes the number of times users are prompted for credentials when they access Microsoft 365 resources
- Supports the use of Azure AD Identity Protection

You need to configure Azure AD Connect to support the planned implementation. Which two options should you select? Each correct answer presents part of the solution.

NOTE: Each correct selection is worth one point.

- A. Password Hash Synchronization
- B. Password writeback
- C. Directory extension attribute sync
- D. Enable single sign-on
- E. Pass-through authentication

Answer: AB

NEW QUESTION 108

- (Topic 6)

You have a Microsoft 365 subscription that uses an Azure AD tenant named contoso.com. The tenant contains the users shown in the following table.

Name	Role
User1	Exchange Administrator
User2	User Administrator
User3	Global Administrator
User4	None

You add another user named User5 to the User Administrator role. You need to identify which two management tasks User5 can perform.

Which two tasks should you identify? Each correct answer presents a complete solution.

NOTE: Each correct selection is worth one point.

- A. Delete User2 and User4 only.
- B. Reset the password of User4 only
- C. Reset the password of any user in Azure AD.
- D. Delete User1, User2, and User4 only.
- E. Reset the password of User2 and User4 only.
- F. Delete any user in Azure AD.

Answer: AE

Explanation:

Users with the User Administrator role can create users and manage all aspects of users with some restrictions (see below).

Only on users who are non-admins or in any of the following limited admin roles:

- Directory Readers
- Guest Inviter
- Helpdesk Administrator
- Message Center Reader
- Reports Reader
- User Administrator Reference:

<https://docs.microsoft.com/en-us/azure/active-directory/users-groups-roles/directory-assign-admin-roles#available-roles>

NEW QUESTION 110

- (Topic 6)

You have a Microsoft 365 subscription.

You configure a data loss prevention (DLP) policy.

You discover that users are incorrectly marking content as false positive and bypassing the DLP policy.

You need to prevent the users from bypassing the DLP policy. What should you configure?

- A. actions
- B. incident reports
- C. exceptions
- D. user overrides

Answer: D

Explanation:

A DLP policy can be configured to allow users to override a policy tip and report a false positive.

You can educate your users about DLP policies and help them remain compliant without blocking their work. For example, if a user tries to share a document containing sensitive information, a DLP policy can both send them an email notification and show them a policy tip in the context of the document library that allows them to override the policy if they have a business justification. The same policy tips also appear in Outlook on the web, Outlook, Excel, PowerPoint, and Word.

If you find that users are incorrectly marking content as false positive and bypassing the DLP policy, you can configure the policy to not allow user overrides.

Reference:

<https://docs.microsoft.com/en-us/office365/securitycompliance/data-loss-prevention-policies>

NEW QUESTION 115

- (Topic 6)

You implement Microsoft Azure Advanced Threat Protection (Azure ATP). You have an Azure ATP sensor configured as shown in the following exhibit.

How long after the Azure ATP cloud service is updated will the sensor update?

- A. 20 hours
- B. 12 hours
- C. 7 hours
- D. 48 hours

Answer: B

NEW QUESTION 118

HOTSPOT - (Topic 6)

You have a Microsoft 365 tenant that contains the groups shown in the following table.

Name	Type
Group1	Microsoft 365
Group2	Distribution
Group3	Mail-enabled security
Group4	Security

You plan to create a compliance policy named Compliance1.

You need to identify the groups that meet the following requirements:

? Can be added to Compliance1 as recipients of noncompliance notifications

? Can be assigned to Compliance1

To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

Can be added to Compliance1 as recipients of noncompliance notifications:

▼

Group1 and Group4 only

Group3 and Group4 only

Group1, Group2 and Group3 only

Group1, Group3, and Group4 only

Group1, Group2, Group3, and Group4

Can be assigned to Compliance1:

▼

Group1 and Group4 only

Group3 and Group4 only

Group1, Group2 and Group3 only

Group1, Group3, and Group4 only

Group1, Group2, Group3, and Group4

- A. Mastered
B. Not Mastered

Answer: A

Explanation:

Can be added to Compliance1 as recipients of noncompliance notifications:

▼

Group1 and Group4 only

Group3 and Group4 only

Group1, Group2 and Group3 only

Group1, Group3, and Group4 only

Group1, Group2, Group3, and Group4

Can be assigned to Compliance1:

▼

Group1 and Group4 only

Group3 and Group4 only

Group1, Group2 and Group3 only

Group1, Group3, and Group4 only

Group1, Group2, Group3, and Group4

NEW QUESTION 120

HOTSPOT - (Topic 6)

Your company has a Microsoft 365 tenant

You plan to allow users that are members of a group named Engineering to enroll their mobile device in mobile device management (MDM)

The device type restriction are configured as shown in the following table.

Priority	Name	Allowed platform	Assigned to
1	iOS	iOS	Marketing
2	Android	Android	Engineering
Default	All users	All platforms	All users

The device limit restriction are configured as shown in the following table.

Priority	Name	Device limit	Assigned to
1	Engineering	15	Engineering
2	West Region	5	Engineering
Default	All users	10	All users

Answer Area

Device limit:

5

10

15

Allowed platform

Android only

iOS only

All platforms

- A. Mastered
B. Not Mastered

Answer: A

Explanation:

<https://docs.microsoft.com/en-us/mem/intune/enrollment/enrollment-restrictions-set#change-enrollment-restriction-priority>

NEW QUESTION 122

DRAG DROP - (Topic 6)

You have an Azure subscription that is linked to a hybrid Microsoft Entra tenant.
All users sync from Active Directory Domain Services (AD DS) to the tenant by using Express Settings in Microsoft Entra Connect.
You plan to implement self-service password reset (SSPR).
You need to ensure that when a user resets or changes a password, the password syncs with AD DS.
Which actions should you perform in sequence? To answer, drag the appropriate actions to the correct order. Each action may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view content.
NOTE: Each correct selection is worth one point.

Actions

From the Microsoft Entra admin center, configure on-premises integration password writeback.

From the Microsoft Entra admin center, configure the authentication methods for SSPR.

From the Microsoft Entra admin center, configure the registration settings for SSPR.

Select Group writeback in Microsoft Entra Connect.

Select Password writeback in Microsoft Entra Connect.

Answer Area

Step 1: Validate permissions for the Microsoft Entra Connect account.

Step 2:

Step 3:

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

Actions

From the Microsoft Entra admin center, configure on-premises integration password writeback.

From the Microsoft Entra admin center, configure the authentication methods for SSPR.

From the Microsoft Entra admin center, configure the registration settings for SSPR.

Select Group writeback in Microsoft Entra Connect.

Select Password writeback in Microsoft Entra Connect.

Answer Area

Step 1: Validate permissions for the Microsoft Entra Connect account.

Step 2: From the Microsoft Entra admin center, configure on-premises integration password writeback.

Step 3: Select Password writeback in Microsoft Entra Connect.

NEW QUESTION 123

- (Topic 6)

You have a Microsoft 365 E5 subscription.
You create an account for a new security administrator named SecAdmin1.
You need to ensure that SecAdmin1 can manage Microsoft Defender for Office 365 settings and policies for Microsoft Teams, SharePoint and OneDrive.
Solution: From the Azure Active Directory admin center, you assign SecAdmin1 the Teams Administrator role.
Does this meet the goal?

- A. Yes
- B. no

Answer: B

NEW QUESTION 126

- (Topic 6)

You have a Microsoft 365 subscription that contains the users shown in the following table.

Name	Department
User1	Human resources
User2	Research
User3	Human resources
User4	Marketing

You need to configure group-based licensing to meet the following requirements:
? To all users, deploy an Office 365 E3 license without the Power Automate license option.
? To all users, deploy an Enterprise Mobility + Security E5 license.
? To the users in the research department only, deploy a Power BI Pro license.
? To the users in the marketing department only, deploy a Visio Plan 2 license.
What is the minimum number of deployment groups required?

- A. 1
- B. 2
- C. 3
- D. 4
- E. 5

Answer: C

Explanation:

One for all users, one for the research department, and one for the marketing department.

Note: What are Deployment Groups?

With Deployment Groups, you can orchestrate deployments across multiple servers and perform rolling updates, while ensuring high availability of your application throughout. You can also deploy to servers on-premises or virtual machines on Azure or any cloud, plus have end-to-end traceability of deployed artifact versions down to the server level.

Reference:

https://devblogs.microsoft.com/devops/deployment-groups-is-now-generally-available-sharing-of-targets-and-more

NEW QUESTION 127

HOTSPOT - (Topic 6)

HOTSPOT

You have a Microsoft 365 subscription.

You are planning a threat management solution for your organization.

You need to minimize the likelihood that users will be affected by the following threats:

? Opening files in Microsoft SharePoint that contain malicious content

? Impersonation and spoofing attacks in email messages

Which policies should you create in Microsoft 365 Defender? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

Answer Area

Opening files in SharePoint that contain malicious content:

Anti-spam

Anti-Phishing

Safe Attachments

Safe Links

Impersonation and spoofing attacks in email messages:

Anti-spam

Anti-Phishing

Safe Attachments

Safe Links

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

Answer Area

Opening files in SharePoint that contain malicious content:

Anti-spam

Anti-Phishing

Safe Attachments

Safe Links

Impersonation and spoofing attacks in email messages:

Anti-spam

Anti-Phishing

Safe Attachments

Safe Links

NEW QUESTION 130

- (Topic 6)

You have a Microsoft 365 subscription.

You plan to implement Microsoft Purview Privileged Access Management. Which Microsoft Office 365 workloads support privileged access?

- A. Microsoft Exchange Online only
- B. Microsoft Teams only
- C. Microsoft Exchange Online and SharePoint Online only
- D. Microsoft Teams and SharePoint Online only
- E. Microsoft Teams, Exchange Online, and SharePoint Online

Answer: A

Explanation:

Privileged access management

Having standing access by some users to sensitive information or critical network configuration settings in Microsoft Exchange Online is a potential pathway for compromised accounts or internal threat activities. Microsoft Purview Privileged Access Management helps protect your organization from breaches and helps to meet compliance best practices by limiting standing access to sensitive data or access to critical configuration settings. Instead of administrators having constant access, just-in-time access rules are implemented for tasks that need elevated permissions. Enabling privileged access management for Exchange Online in Microsoft 365 allows your organization to operate with zero standing privileges and provide a layer of defense against standing administrative access vulnerabilities.

Note: When will privileged access support Office 365 workloads beyond Exchange? Privileged access management will be available in other Office 365 workloads soon.

Reference:

<https://learn.microsoft.com/en-us/microsoft-365/compliance/privileged-access-management>

NEW QUESTION 132

- (Topic 6)

You have a Microsoft 365 subscription that contains an Azure AD tenant named contoso.com. The tenant includes a user named User1.

You enable Azure AD Identity Protection.

You need to ensure that User1 can review the list in Azure AD Identity Protection of users flagged for risk. The solution must use the principle of least privilege.

To which role should you add User1?

- A. Security Reader
- B. Global Administrator
- C. Owner
- D. User Administrator

Answer: A

NEW QUESTION 137

HOTSPOT - (Topic 6)

HOTSPOT

You have a Microsoft 365 E5 subscription that contains a Microsoft SharePoint Online site named Site1 and the users shown in the following table.

Name	Member of	Device
User1	Group1	Device1
User2	Group1	Device2, Device3

The devices are configured as shown in the following table.

Name	Platform	Azure AD join type
Device1	Windows 11	None
Device2	Windows 10	Joined
Device3	Android	Registered

You have a Conditional Access policy named CAPolicy1 that has the following settings: 1.Assignments

? Users or workload identities: Group1

? Cloud apps or actions: Office 365 SharePoint Online

? Conditions

- Filter for devices: Exclude filtered devices from the policy

- Rule syntax: device.displayName -startsWith "Device" 2.Access controls

? Grant

- Grant: Block access

? Session: 0 controls selected 3.Enable policy: On

For each of the following statements, select Yes if the statement is true. Otherwise, select No.

NOTE: Each correct selection is worth one point.

Answer Area

Statements

Yes

No

User1 can access Site1 from Device1.

☐
☐

User2 can access Site1 from Device2.

☐
☐

User2 can access Site1 from Device3.

☐
☐

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

Box 1: No

User1 is member of Group1 and has Device1.

Device1 is not Azure AD joined.

Note: Requiring a hybrid Azure AD joined device is dependent on your devices already being hybrid Azure AD joined.

Box 2: Yes

User2 is member of Group1 and has devices Device2 and Device3. Device2 is Azure AD joined.

Device2 is excluded from CAPolicy1 (which would block access to Site1). Box 3: Yes

User2 is member of Group1 and has devices Device2 and Device3.

Device3 is Android and is Azure AD registered.

Device3 is excluded from CAPolicy1 (which would block access to Site1).

Note: On Windows 7, iOS, Android, macOS, and some third-party web browsers, Azure AD identifies the device using a client certificate that is provisioned when the device is registered with Azure AD. When a user first signs in through the browser the user is prompted to select the certificate. The end user must select this certificate before they can continue to use the browser.

NEW QUESTION 140

HOTSPOT - (Topic 6)

You have a Microsoft 365 E5 subscription that contains a Microsoft SharePoint site named Site1. Site1 contains the files shown in the following table.

Name	Number of IP addresses in the file
File1	2
File2	3

You have a data loss prevention (DLP) policy named DLP1 that has the advanced DLP rules shown in the following table.

Name	Content contains	Policy tip	If there is a match, stop processing	Priority
Rule1	3 or more IP addresses	Tip1	No	0
Rule2	1 or more IP addresses	Tip2	Yes	1
Rule3	2 or more IP addresses	Tip3	No	2

You apply DLP1 to Site1.

Which policy tip is displayed for each file? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

Answer Area

File1:

File2:

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

Answer Area

NEW QUESTION 144

HOTSPOT - (Topic 6)

You have a Microsoft 365 subscription.

Your network uses an IP address space of 51.40.15.0/24.

An Exchange Online administrator recently created a role named Role1 from a computer on the network.

You need to identify the name of the administrator by using an audit log search.

For which activities should you search and by which field should you filter in the audit log search? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

Activities to search for:

	▼
Exchange mailbox activities	
Site administration activities	
Show results for all activities	
Role administration activities	

Field to filter by:

	▼
Item	
User	
Detail	
IP address	

A. Mastered

B. Not Mastered

Answer: A

Explanation:

Activities to search for:

	▼
Exchange mailbox activities	
Site administration activities	
Show results for all activities	
Role administration activities	

Field to filter by:

	▼
Item	
User	
Detail	
IP address	

NEW QUESTION 149

- (Topic 6)

You have a Microsoft 365 subscription.

You have an Azure AD tenant that contains the users shown in the following table.

Name	Role
User1	Security Administrator
User2	Global Administrator
User3	Service Support Administrator

You configure Tenant properties as shown in the following exhibit.

Technical contact

User1@contoso.com ✓

Global privacy contact

✓

Privacy statement URL

http://contoso.com/privacy ✓

Which users will be contacted by Microsoft if the tenant experiences a data breach?

- A. Used only
- B. User2 only
- C. User3 only
- D. Used and User2 only
- E. User2 and User3 only

Answer: B

Explanation:

Microsoft 365 is committed to notifying customers within 72 hours of breach declaration.
 The customer's tenant administrator will be notified.

Reference:

<https://learn.microsoft.com/en-us/compliance/regulatory/gdpr-breach-office365>

NEW QUESTION 152

- (Topic 6)

You have a Microsoft 365 E5 tenant.

You create an auto-labeling policy to encrypt emails that contain a sensitive info type. You specify the locations where the policy will be applied.

You need to deploy the policy. What should you do first?

- A. Review the sensitive information in Activity explorer
- B. Turn on the policy
- C. Run the policy in simulation mode
- D. Configure Azure Information Protection analytics

Answer: C

Explanation:

Reference:

<https://docs.microsoft.com/en-us/microsoft-365/compliance/apply-sensitivity-label-automatically?view=o365-worldwide>

NEW QUESTION 155

- (Topic 6)

You have Windows 10 devices that are managed by using Microsoft Endpoint Manager. You need to configure the security settings in Microsoft Edge.

What should you create in Microsoft Endpoint Manager?

- A. an app configuration policy
- B. an app
- C. a device configuration profile
- D. a device compliance policy

Answer: C

Explanation:

Reference:

<https://docs.microsoft.com/en-us/deployedge/configure-edge-with-intune>

NEW QUESTION 157

- (Topic 6)

You have a Microsoft 365 subscription that uses Security & Compliance retention policies.

You implement a preservation lock on a retention policy that is assigned to all executive users.

Which two actions can you perform on the retention policy? Each correct answer presents a complete solution.

NOTE: Each correct selection is worth one point?

- A. Add locations to the policy
- B. Reduce the duration of policy
- C. Remove locations from the policy
- D. Extend the duration of the policy
- E. Disable the policy

Answer: AB

NEW QUESTION 158

DRAG DROP - (Topic 6)

Your company has an Azure AD tenant named contoso.onmicrosoft.com.

You purchase a domain named contoso.com from a registrar and add all the required DNS records.

You create a user account named User1. User1 is configured to sign in as user1@contoso.onmicrosoft.com.

You need to configure User1 to sign in as user1@contoso.com.

Which three actions should you perform in sequence? To answer, move the appropriate actions from the list of actions to the answer area and arrange them in the correct order.

Actions

Run Update-igDomain -DomainId contoso.com.

Modify the email address of User1.

Add contoso.com as a SAN for an X.509 certificate.

Add a custom domain name.

Verify the custom domain.

Modify the username of User1.

Answer Area

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

Actions

Run Update-igDomain -DomainId contoso.com.

Modify the email address of User1.

Add contoso.com as a SAN for an X.509 certificate.

Add a custom domain name.

Verify the custom domain.

Modify the username of User1.

Answer Area

Add a custom domain name.

Verify the custom domain.

Modify the username of User1.

NEW QUESTION 162

HOTSPOT - (Topic 6)

HOTSPOT

You have a Microsoft 365 subscription that contains a Microsoft SharePoint Online site named Site1. Site1 has he files in the following table.

Name	Number of IP addresses in the file
File1.docx	1
File2.txt	2
File3.docx	2
File4.bmp	3
File5.doc	3

The Site1 users are assigned the roles shown in the following table.

Name	Role
User1	Owner
User2	Visitor

You create a data less prevention (DLP) policy names Policy1 as shown in the following exhibit.

New DLP policy

NEW QUESTION 163

- (Topic 6)

Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution that might meet the stated goals. Some question sets might have more than one correct solution, while others might not have a correct solution.
After you answer a question in this section, you will NOT be able to return to it as a result these questions will not appear in the review screen.

Passing Certification Exams Made Easy

visit - https://www.2PassEasy.com

Your network contains an Active Directory forest. You deploy Microsoft 365.

You plan to implement directory synchronization.

You need to recommend a security solution for the synchronized identities. The solution must meet the following requirements:

- Users must be able to authenticate successfully to Microsoft 365 services if Active Directory becomes unavailable.
- User passwords must be 10 characters or more.

Solution: Implement pass-through authentication and configure password protection in the Azure AD tenant. Does this meet the goal?

- A. Yes
B. No

Answer: B

NEW QUESTION 167

HOTSPOT - (Topic 6)

You have a Microsoft 365 E5 subscription that contains the devices shown in the following table.

Name	Group
Device1	DeviceGroup1
Device2	DeviceGroup2

At 08:00, you create an incident notification rule that has the following configurations:

- Name: Notification!
- Notification settings
 - o Notify on alert severity: Low
 - o Device group scope: All (3)
 - o Details: First notification per incident
- Recipients: User1@contoso.com, User2@contoso.com

At 08:02, you create an incident notification rule that has the following configurations:

- Name: Notification
- Notification settings
 - o Notify on alert severity: Low, Medium
 - o Device group scope: DeviceGroup1, DeviceGroup2
- Recipients: User1@contoso.com

In Microsoft 365 Defender, alerts are logged as shown in the following table.

Time	Alert name	Severity	Impacted assets
08:05	Activity1	Low	Device1
08:07	Activity1	Low	Device1
08:08	Activity1	Medium	Device1
08:15	Activity2	Medium	Device2
08:16	Activity2	Medium	Device2
08:20	Activity1	High	Device1
08:30	Activity3	Medium	Device2
08:35	Activity2	High	Device2

For each of the following statements, select Yes if the statement is true. Otherwise, select No.

NOTE: Each correct selection is worth one point.

Answer Area

Statements

User1@contoso.com will receive two incident notification emails for the alert at 08:05.

Yes

☐

No

☐

User2@contoso.com will receive an incident notification email for the alert at 08:07.

Yes

☐

No

☐

User1@contoso.com will receive an incident notification email for the alert at 08:20.

Yes

☐

No

☐

NEW QUESTION 177

- (Topic 6)

You have a Microsoft 365 E5 subscription that has published sensitivity labels shown in the following exhibit.

Home > sensitivity

Labels Label policies Auto-labeling (preview)

Sensitivity labels are used to classify email messages, documents, sites, and more. When a label is applied (automatically or by the user), the content or site is protected based on the settings you choose. For example, you can create labels that encrypt files, add content marking, and control user access to specific sites. [Learn more about sensitivity labels](#)

+ Create a label Publish labels Refresh

Name	Order	Created by	Last modified
Label1	0 - highest	Pvi	04/24/2020
Label2	1	Pvi	04/24/2020
Label3	0 - highest	Pvi	04/24/2020
Label4	0 - highest	Pvi	04/24/2020
Label5	5	Pvi	04/24/2020
Label6	0 - highest	Pvi	04/24/2020

Which labels can users apply to content?

- A. Label1, Label2, and Label5 only

- B. Label3, Label4, and Label6 only
- C. Label1, Label3, Label2, and Label6 only
- D. Label1, Label2, Label3, Label4, Label5, and Label6

Answer: C

NEW QUESTION 182

- (Topic 6)

You have a Microsoft 365 subscription that contains an Azure AD tenant named contoso.com. The tenant contains the users shown in the following table.

Name	Username	Type
User1	User1@contoso.com	Member
User2	User2@sub.contoso.com	Member
User3	User3@adatum.com	Member
User4	User4@outlook.com	Guest
User5	User5@gmail.com	Guest

You create and assign a data loss prevention (DLP) policy named Policy1. Policy1 is configured to prevent documents that contain Personally Identifiable Information (PII) from being emailed to users outside your organization. To which users can User1 send documents that contain PII?

- A. User2only
- B. User2and User3only
- C. User2, User3, and User4 only
- D. User2, User3, User4, and User5

Answer: B

NEW QUESTION 186

HOTSPOT - (Topic 6)

HOTSPOT

You have a Microsoft 365 E5 subscription.

All company-owned Windows 11 devices are onboarded to Microsoft Defender for Endpoint.

You need to configure Defender for Endpoint to meet the following requirements:

? Block a vulnerable app until the app is updated.

? Block an application executable based on a file hash.

The solution must minimize administrative effort.

What should you configure for each requirement? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

Answer Area

Block a vulnerable app until the app is updated:

▼

An allow or block file

A file indicator

A remediation request

An update ring

Block an application executable based on a file hash:

▼

An allow or block file

A file indicator

A remediation request

An update ring

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

Box 1: A remediation request

Block a vulnerable app until the app is updated.

Block vulnerable applications

How to block vulnerable applications

? Go to Vulnerability management > Recommendations in the Microsoft 365 Defender portal.

? Select a security recommendation to see a flyout with more information.

? Select Request remediation.

? Select whether you want to apply the remediation and mitigation to all device groups or only a few.

? Select the remediation options on the Remediation request page. The remediation options are software update, software uninstall, and attention required.

? Pick a Remediation due date and select Next.

? Under Mitigation action, select Block or Warn. Once you submit a mitigation action, it is immediately applied.

? Review the selections you made and Submit request. On the final page you can

choose to go directly to the remediation page to view the progress of remediation activities and see the list of blocked applications.

Box 2: A file indicator

Block an application executable based on a file hash.
While taking the remediation steps suggested by a security recommendation, security admins with the proper permissions can perform a mitigation action and block vulnerable versions of an application. File indicators of compromise (IOC)s are created for each of the executable files that belong to vulnerable versions of that application. Microsoft Defender Antivirus then enforces blocks on the devices that are in the specified scope.
The option to View details of blocked versions in the Indicator page brings you to the Settings > Endpoints > Indicators page where you can view the file hashes and response actions.

NEW QUESTION 187

HOTSPOT - (Topic 6)
Your company uses Microsoft Defender for Endpoint.
The devices onboarded to Microsoft Defender for Endpoint are shown in the following table.

Name	Device group
Device1	ATP1
Device2	ATP1
Device3	ATP2

The alerts visible in the Microsoft Defender for Endpoint alerts queue are shown in the following table.

Name	Device
Alert1	Device1
Alert2	Device2
Alert3	Device3

You create a suppression rule that has the following settings:

- Triggering IOC: Any IOC
- Action: Hide alert
- Suppression scope: Alerts on ATP1 device group

For each of the following statements, select Yes if the statement is true. Otherwise, select No. NOTE: Each correct selection is worth one point

Answer Area

Statements	Yes	No
After you create the suppression rule, Alert1 is visible in the alerts queue.	<input type="radio"/>	<input type="radio"/>
After you create the suppression rule, Alert3 is visible in the alerts queue.	<input type="radio"/>	<input type="radio"/>
After you create the suppression rule, a new alert triggered on Device2 is visible in the alerts queue.	<input type="radio"/>	<input type="radio"/>

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

Answer Area

Statements	Yes	No
After you create the suppression rule, Alert1 is visible in the alerts queue.	<input checked="" type="radio"/>	<input type="radio"/>
After you create the suppression rule, Alert3 is visible in the alerts queue.	<input checked="" type="radio"/>	<input type="radio"/>
After you create the suppression rule, a new alert triggered on Device2 is visible in the alerts queue.	<input type="radio"/>	<input checked="" type="radio"/>

NEW QUESTION 192

HOTSPOT - (Topic 6)
You have a Microsoft 365 E5 subscription that contains a Microsoft SharePoint site named Sitel. You need to perform the following tasks:
• Create a sensitive info type named SIT1 based on a regular expression.
• Add a watermark to all new documents that are matched by SIT1.
Which two settings should you use in the Microsoft Purview compliance portal? To answer, select the appropriate settings in the answer area.
NOTE: Each correct selection is worth one point.

Answer Area

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

Answer Area

NEW QUESTION 193

FILL IN THE BLANK - (Topic 6)

You have a Microsoft 365 tenant.

You need to retain Azure Active Directory (Azure AD) audit logs for two years. Administrators must be able to query the audit log information by using the Azure Active Directory admin center.

What should you do? To answer, select the appropriate options in the answer area. NOTE: Each correct selection is worth one point.

Answer Area

Save the audit logs to:

Azure Active Directory admin center blade to use to view the saved audit logs:

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

Answer Area

Save the audit logs to: Azure Log Analytics

Azure Active Directory admin center blade to use to view the saved audit logs: Audit logs

NEW QUESTION 194

HOTSPOT - (Topic 6)

You have a Microsoft 365 E5 subscription.

You need to configure Microsoft Defender for Office 365 to meet the following requirements:

- A user's email sending patterns must be used to minimize false positives for spoof protection.
- Documents uploaded to Microsoft Teams, SharePoint Online, and OneDrive must be protected by using Defender for Office 365.

What should you configure for each requirement? To answer, select the appropriate options in the answer area. NOTE: Each correct selection is worth one point.

Answer Area

A user's email sending patterns must be used to minimize false positives for spoof protection:

Documents uploaded to Teams, SharePoint Online, and OneDrive must be protected by using Defender for Office 365:

- A. Mastered
 B. Not Mastered

Answer: A

Explanation:

Answer Area

A user's email sending patterns must be used to minimize false positives for spoof protection:

Documents uploaded to Teams, SharePoint Online, and OneDrive must be protected by using Defender for Office 365:

NEW QUESTION 198

- (Topic 6)

You have a hybrid deployment of Microsoft 365 that contains the users shown in the following table.

Name	Source	Last sign in
User1	Azure AD	Yesterday
User2	Active Directory Domain Services (AD DS)	Two days ago
User3	Active Directory Domain Services (AD DS)	Never

Azure AD Connect has the following settings:

? Password Hash Sync: Enabled

? Pass-through authentication: Enabled

You need to identify which users will be able to authenticate by using Azure AD if connectivity between on-premises Active Directory and the internet is lost.

Which users should you identify?

- A. none
 B. User1 only
 C. User1 and User2 only
 D. User1, User2, and User3

Answer: D

Explanation:

Reference:

<https://docs.microsoft.com/en-us/azure/active-directory/hybrid/choose-ad-authn>

NEW QUESTION 202

- (Topic 6)

Your company has a Microsoft E5 tenant.

The company must meet the requirements of the ISO/IEC 27001:2013 standard. You need to assess the company's current state of compliance.

What should you use?

- A. eDiscovery
 B. Information governance

- C. Compliance Manager
- D. Data Subject Requests (DSRs)

Answer: C

Explanation:

Reference:

<https://docs.microsoft.com/en-us/compliance/regulatory/offering-iso-27001>

NEW QUESTION 203

- (Topic 6)

Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution that might meet the stated goals. Some question sets might have more than one correct solution, while others might not have a correct solution.

After you answer a question in this section, you will NOT be able to return to it. As a result, these questions will not appear in the review screen.

You have a Microsoft 365 subscription.

From the Microsoft 365 Defender, you create a role group named US eDiscovery Managers by copying the eDiscovery Manager role group.

You need to ensure that the users in the new role group can only perform content searches of mailbox content for users in the United States.

Solution: From the Microsoft 365 Defender, you modify the roles of the US eDiscovery Managers role group.

Does this meet the goal?

- A. Yes
- B. No

Answer: B

NEW QUESTION 206

HOTSPOT - (Topic 6)

You have a Microsoft 365 E5 tenant that contains the users shown in the following table.

Name	Member of
User1	Group1
User2	Group2

You purchase the devices shown in the following table.

Name	Platform
Device1	Windows 10
Device2	Android

In Microsoft Endpoint Manager, you create an enrollment status page profile that has the following settings:

? Show app and profile configuration progress: Yes

? Allow users to collect logs about installation errors: Yes

? Only show page to devices provisioned by out-of-box experience (OOBE): No

? Assignments: Group2

For each of the following statements, select Yes if the statement is true. Otherwise, select No.

NOTE: Each correct selection is worth one point.

Statements	Yes	No
If User1 enrolls Device1 in Microsoft Endpoint Manager, the enrollment status page will appear.	<input type="radio"/>	<input type="radio"/>
If User2 enrolls Device1 in Microsoft Endpoint Manager, the enrollment status page will appear.	<input type="radio"/>	<input type="radio"/>
If User2 enrolls Device2 in Microsoft Endpoint Manager, the enrollment status page will appear.	<input type="radio"/>	<input type="radio"/>

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

Statements	Yes	No
If User1 enrolls Device1 in Microsoft Endpoint Manager, the enrollment status page will appear.	<input type="radio"/>	<input checked="" type="radio"/>
If User2 enrolls Device1 in Microsoft Endpoint Manager, the enrollment status page will appear.	<input checked="" type="radio"/>	<input type="radio"/>
If User2 enrolls Device2 in Microsoft Endpoint Manager, the enrollment status page will appear.	<input type="radio"/>	<input checked="" type="radio"/>

NEW QUESTION 210

- (Topic 6)

You have a Microsoft 365 E5 tenant. You configure sensitivity labels.

Users report that the Sensitivity button is unavailable in Microsoft Word for the web. The sensitivity button is available in Word for Microsoft 365.

You need to ensure that the users can apply the sensitivity labels when they use Word for the web.

What should you do?

- A. Copy policies from Azure information Protection to the Microsoft 365 Compliance center
- B. Publish the sensitivity labels.
- C. Create an auto-labeling policy
- D. Enable sensitivity labels for files in Microsoft SharePoint Online and OneDrive.

Answer: B

NEW QUESTION 212

DRAG DROP - (Topic 6)

DRAG DROP

You have a Microsoft 365 subscription.

In the Exchange admin center, you have a data loss prevention (DLP) policy named Policy1 that has the following configurations:

? Block emails that contain financial data.

? Display the following policy tip text: Message blocked.

From the Security & Compliance admin center, you create a DLP policy named Policy2 that has the following configurations:

? Use the following location: Exchange email.

? Display the following policy tip text: Message contains sensitive data.

? When a user sends an email, notify the user if the email contains health records.

What is the result of the DLP policies when the user sends an email? To answer, drag the appropriate results to the correct scenarios. Each result may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view content.

NOTE: Each correct selection is worth one point.

Results	Answer Area
The email will be blocked, and the user will receive the policy tip: Message blocked.	When the user sends an email that contains financial data and health records: <input type="text" value="Result"/>
The email will be blocked, and the user will receive the policy tip: Message contains sensitive data.	When the user sends an email that contains only financial data: <input type="text" value="Result"/>
The email will be allowed, and the user will receive the policy tip: Message blocked.	
The email will be allowed, and the user will receive the policy tip: Message contains sensitive data.	
The email will be allowed, and a message policy tip will NOT be displayed.	

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

Box 1: The email will be blocked, and the user will receive the policy tip: Message blocked. If you've created DLP policies in the Exchange admin center, those policies will continue to work side by side with any policies for email that you create in the Security & Compliance Center. But note that rules created in the Exchange admin center take precedence. All Exchange mail flow rules are processed first, and then the DLP rules from the Security & Compliance Center are processed.

Box 2: The email will be allowed, and the user will receive the policy tip: Message contains sensitive data.

NEW QUESTION 213

- (Topic 6)

You have a Microsoft 365 E5 subscription.

All users have Mac computers. All the computers are enrolled in Microsoft Endpoint Manager and onboarded to Microsoft Defender for Endpoint.

You need to configure Microsoft Defender for Endpoint on the computers. What should you create from the Endpoint Management admin center?

- A. a Microsoft Defender for Endpoint baseline profile
- B. an update policy for iOS
- C. a device configuration profile
- D. a mobile device management (MDM) security baseline profile

Answer: D

NEW QUESTION 218

- (Topic 6)

Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution that might meet the stated goals. Some question sets might have more than one correct solution, while others might not have a correct solution.

After you answer a question in this section, you will NOT be able to return to it. As a result, these questions will not appear in the review screen.

You have a computer that runs Windows 10.

You need to verify which version of Windows 10 is installed.

Solution: From the Settings app, you select Update & Security to view the update history. Does this meet the goal?

- A. Yes
- B. No

Answer: B

NEW QUESTION 223

HOTSPOT - (Topic 6)

HOTSPOT

You have a Microsoft 365 E5 subscription.

From Azure AD Identity Protection on August 1, you configure a Multifactor authentication registration policy that has the following settings:

? Assignments: All users

? Controls: Require Azure AD multifactor authentication registration

? Enforce Policy: On

? On August 3, you create two users named User1 and User2.

Users authenticate by using Azure Multi-Factor Authentication (MFA) for the first time on the dates shown in the following table.

User	Date
User1	August 5
User2	August 7

By which dates will User1 and User2 be forced to complete their Azure MFA registration? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

User1:

▼

August 6

August 17

August 19

September 3

September 5

User2:

▼

August 8

August 17

August 19

August 21

September 7

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

Box 1: August 19

Note: Security defaults will trigger a 14 day grace period for registration after a user's first login and security defaults being enabled. After 14 days users will be required to register for MFA and will not be able to skip.

Conditional Access by itself without Azure Identity Protection does not allow for the 14 day grace period. Identity Protection includes the registration policy that allows registration on its own with no apps assigned to the policy. If a Conditional Access policy requires Multi- Factor Authentication, then the user must be able to pass that MFA request.

Box 2: August 21

NEW QUESTION 227

HOTSPOT - (Topic 6)

You have a Microsoft 365 subscription that contains a Microsoft 365 group named Group1. Group1 is configured as shown in the following exhibit.

Group1

Private group • 1 owner • 1 member

General Members Settings Microsoft Teams

General settings

☐ Allow external senders to email this group

☒ Send copies of group conversations and events to group members

☐ Hide from my organization's global address list

Privacy

☒ Private

☐ Public

An external user named User1 has an email address of user1@outlook.com. You need to add User1 to Group1. What should you do first, and which portal should you use? To answer, select the appropriate options in the answer area.
 NOTE: Each correct selection is worth one point.

Answer Area

Action:

- Add User1 to the subscription as an active user.
- For Group1, change the Privacy setting to Public.
- For Group1, select Allow external senders to email this group.
- Invite User1 to collaborate with your organization as a guest.

Portal:

- The Microsoft Entra admin center
- The Exchange admin center
- The Microsoft 365 admin center
- The Microsoft Purview compliance portal

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

Box 1: Invite User1 to collaborate with your organization as a guest.

To manage guest users of a Microsoft 365 tenant via the Admin Center portal, go through the following steps.

Navigate with your Web browser to <https://admin.microsoft.com>. On the left pane, click on "Users", then click "Guest Users".

On the "Guest Users" page, to create a new guest user, click on either the "Add a guest user" link on the top of the page or click on "Go to Azure Active Directory to add guest users" link at the bottom of the page. Both of these links will take you to the Azure Active Directory portal, which is located at <https://aad.portal.azure.com>.

On the "New user" page in the Microsoft Azure portal, you must choose to either "Create user" or "Invite user". If you choose the "Create user" option, this will create a new user in your organization, which will have a login address with format username@tenantdomain.dot.com. If you choose the "Invite user" option, this will invite a new guest user to collaborate with your organization. The user will be emailed an email invitation which they can accept in order to begin collaborating. For the purpose of creating a guest user, you must choose the "Invite user" option.

Box 2: The Microsoft Entra admin center

Microsoft Entra admin center unites Azure AD with family of identity and access products

Microsoft Entra admin center gives customers an entire toolset to secure access for everyone and everything in multicloud and multiplatform environments. The entire Microsoft Entra product family is available at this new admin center, including Azure Active Directory (Azure AD) and Microsoft Entra Permissions Management, formerly known as CloudKnox.

Starting this month, waves of customers will begin to be automatically directed to entra.microsoft.com from Microsoft 365 in place of the Azure AD admin center (aad.portal.azure.com).

NEW QUESTION 230

HOTSPOT - (Topic 6)

Your company has a Microsoft 365 subscription that uses an Azure AD tenant named contoso.com. The tenant contains the users shown in the following table.

Name	Role	Office 365 role group
User1	None	Compliance Data Administrator
User2	Global Administrator	None

You create a retention label named Label 1 that has the following configurations:

- Retains content for five years
- Automatically deletes all content that is older than five years

You turn on Auto labeling for Label1 by using a policy named Policy1. Policy1 has the following configurations:

- Applies to content that contains the word Merger
- Specifies the OneDrive accounts and SharePoint sites locations

You run the following command.

Set-RetentionCompliancePolicy Policy1 -RestrictiveRetention Strue -Force

For each of the following statements, select Yes if the statement is true. Otherwise, select No.

NOTE: Each correct selection is worth one point.

Answer Area

Statements	Yes	No
User1 can add Exchange email as a location to Policy1.	<input type="radio"/>	<input type="radio"/>
User2 can remove SharePoint sites from Policy1.	<input type="radio"/>	<input type="radio"/>
User2 can add the word Acquisition to Policy1.	<input type="radio"/>	<input type="radio"/>

A. Mastered

B. Not Mastered

Answer: A

Explanation:

Answer Area

Statements	Yes	No
User1 can add Exchange email as a location to Policy1.	<input checked="" type="radio"/>	<input type="radio"/>
User2 can remove SharePoint sites from Policy1.	<input type="radio"/>	<input checked="" type="radio"/>
User2 can add the word Acquisition to Policy1.	<input checked="" type="radio"/>	<input type="radio"/>

NEW QUESTION 231

HOTSPOT - (Topic 6)

You have a Microsoft 365 E5 subscription that contains the users shown in the following table.

The subscription has the following two anti-spam policies:

- Name: AntiSpam1
- Priority: 0
- Induce these users, groups and domains
 - o Users: User3
 - o Groups: Group1
- Exclude these users, groups and domains
 - o Groups: Group2
- Message limits
 - o Set a daily message limit 100
- Name: AntiSpam2
- Priority: 1
- Include these users, groups and domains
 - o Users: User1
 - o Groups: Group2
- Exclude these users, groups and domains
 - o Users: User3
- Message limits
 - o Set a daily message limit 50

For each of the following statements, select Yes if the statement is true. Otherwise, select No.

NOTE: Each correct selection is worth one point.

Statements	Yes	No
User1 can send a maximum of 150 email messages per day.	<input type="radio"/>	<input type="radio"/>
User2 can send a maximum of 50 email messages per day.	<input type="radio"/>	<input type="radio"/>
User3 can send a maximum of 100 email messages per day.	<input type="radio"/>	<input type="radio"/>

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

Statements	Yes	No
User1 can send a maximum of 150 email messages per day.	<input type="radio"/>	<input checked="" type="radio"/>
User2 can send a maximum of 50 email messages per day.	<input checked="" type="radio"/>	<input type="radio"/>
User3 can send a maximum of 100 email messages per day.	<input checked="" type="radio"/>	<input type="radio"/>

NEW QUESTION 233

- (Topic 6)

You have a Microsoft 365 subscription.

Your company has a customer ID associated to each customer. The customer IDs contain 10 numbers

followed by 10 characters. The following is a sample customer ID: 12-456-7890-abc-de- fghij.

You plan to create a data loss prevention (DLP) policy that will detect messages containing customer IDs.

D18912E1457D5D1DDCBD40AB3BF70D5D

What should you create to ensure that the DLP policy can detect the customer IDs?

- A. a sensitive information type
- B. a sensitivity label
- C. a supervision policy
- D. a retention label

Answer: A

Explanation:

Reference:

<https://docs.microsoft.com/en-us/microsoft-365/compliance/custom-sensitive-info-types?view=o365-worldwide>

NEW QUESTION 235

- (Topic 6)

Your network contains an on-premises Active Directory domain named contoso.local. The domain contains five domain controllers.

Your company purchases Microsoft 365 and creates an Azure AD tenant named contoso.onmicrosoft.com.

You plan to install Azure AD Connect on a member server and implement pass-through authentication.

You need to prepare the environment for the planned implementation of pass-through authentication.

Which three actions should you perform? Each correct answer presents part of the solution.

NOTE: Each correct selection is worth one point.

- A. From a domain controller install an Authentication Agent
- B. From the Microsoft Entra admin center, configure an authentication method.
- C. From Active Director,' Domains and Trusts add a UPN suffix
- D. Modify the email address attribute for each user account.
- E. From the Microsoft Entra admin center, add a custom domain name.
- F. Modify the User logon name for each user account.

Answer: ABE

Explanation:

Deploy Azure AD Pass-through Authentication Step 1: Check the prerequisites

Ensure that the following prerequisites are in place. In the Entra admin center

* 1. Create a cloud-only Hybrid Identity Administrator account or a Hybrid Identity administrator account on your Azure AD tenant. This way, you can manage the configuration of your tenant should your on-premises services fail or become unavailable.

(E) 2. Add one or more custom domain names to your Azure AD tenant. Your users can sign in with one of these domain names.

(A) In your on-premises environment

* 1. Identify a server running Windows Server 2016 or later to run Azure AD Connect. If not enabled already, enable TLS 1.2 on the server. Add the server to the same Active Directory forest as the users whose passwords you need to validate. It should be noted that installation of Pass-Through Authentication agent on Windows Server Core versions is not supported.

* 2. Install the latest version of Azure AD Connect on the server identified in the preceding step. If you already have Azure AD Connect running, ensure that the version is supported.

* 3. Identify one or more additional servers (running Windows Server 2016 or later, with TLS 1.2 enabled) where you can run standalone Authentication Agents. These additional servers are needed to ensure the high availability of requests to sign in. Add the servers to the same Active Directory forest as the users whose passwords you need to validate.

* 4. Etc.

(B) Step 2: Enable the feature
Enable Pass-through Authentication through Azure AD Connect.
If you're installing Azure AD Connect for the first time, choose the custom installation path. At the User sign-in page, choose Pass-through Authentication as the Sign On method. On successful completion, a Pass-through Authentication Agent is installed on the same server as Azure AD Connect. In addition, the Pass-through Authentication feature is enabled on your tenant.

Incorrect:
Not C: From Active Directory Domains and Trusts, add a UPN suffix Not D. Modify the email address attribute for each user account. Not F. Modify the User logon name for each user account.

Reference:
https://learn.microsoft.com/en-us/azure/active-directory/hybrid/connect/how-to-connect-pta-quick-start

NEW QUESTION 239

- (Topic 6)
You have a Microsoft 365 E5 subscription.
You plan to implement Microsoft Purview policies to meet the following requirements: Identify documents that are stored in Microsoft Teams and SharePoint that contain Personally Identifiable Information (PII). Report on shared documents that contain PII. What should you create?

A. a data loss prevention (DLP) policy
B. a retention policy
C. an alert policy
D. a Microsoft Defender for Cloud Apps policy

Answer: A

Explanation:

Demonstrate data protection
Protection of personal information in Microsoft 365 includes using data loss prevention (DLP) capabilities. With DLP policies, you can automatically protect sensitive information across Microsoft 365.
There are multiple ways you can apply the protection. Educating and raising awareness to where EU resident data is stored in your environment and how your employees are permitted to handle it represents one level of information protection using Office 365 DLP.
In this phase, you create a new DLP policy and demonstrate how it gets applied to the IBANs.docx file you stored in SharePoint Online in Phase 2 and when you attempt to send an email containing IBANs.
? From the Security & Compliance tab of your browser, click Home.
? Click Data loss prevention > Policy.
? Click + Create a policy.
? In Start with a template or create a custom policy, click Custom > Custom policy > Next.
? In Name your policy, provide the following details and then click Next: a. Name: EU Citizen PII Policy b. Description: Protect the personally identifiable information of European citizens
? Etc.

https://learn.microsoft.com/en-us/compliance/regulatory/gdpr-discovery-protection-reporting-in-office365-dev-test-environment

NEW QUESTION 240

HOTSPOT - (Topic 6)
Your on-premises network contains an Active Directory domain and a Microsoft Endpoint Configuration Manager site.
You have a Microsoft 365 E5 subscription that uses Microsoft Intune.
You use Azure AD Connect to sync user objects and group objects to Azure Directory (Azure AD) Password hash synchronization is disabled.
You plan to implement co-management.
You need to configure Azure AD Connect and the domain to support co-management. What should you do? To answer, select the appropriate options in the answer area. NOTE: Each correct selection is worth one point.

Answer Area

To configure Azure AD Connect:	<input type="checkbox"/> Configure hybrid Azure AD join. <input checked="" type="checkbox"/> Enable device writeback. <input checked="" type="checkbox"/> Enable password hash synchronization.
To configure the domain:	<input checked="" type="checkbox"/> Add an alternative UPN suffix. <input type="checkbox"/> Register a service connection point. <input type="checkbox"/> Register a service principal name (SPN).

A. Mastered
B. Not Mastered

Answer: A

Explanation:

Answer Area

To configure Azure AD Connect:	<input type="checkbox"/> Configure hybrid Azure AD join. <input checked="" type="checkbox"/> Enable device writeback. <input checked="" type="checkbox"/> Enable password hash synchronization.
To configure the domain:	<input checked="" type="checkbox"/> Add an alternative UPN suffix. <input type="checkbox"/> Register a service connection point. <input type="checkbox"/> Register a service principal name (SPN).

NEW QUESTION 243

HOTSPOT - (Topic 6)

You have a Microsoft 365 E5 subscription that uses Microsoft Defender for Cloud Apps.

You need to create a policy that will generate an email alert when a banned app is detected requesting permission to access user information or data in the subscription.

What should you configure? To answer, select the appropriate options in the answer area. NOTE: Each correct selection is worth one point.

Answer Area

Policy type: These are the selections for Policy type.

Filter type: These are the selections for Filter type.

Filter type: These are the selections for Filter type.

Filter type: These are the selections for Filter type.

Filter type: These are the selections for Filter type.

Filter type: These are the selections for Filter type.

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

Answer Area

Policy type: These are the selections for Policy type.

Filter type: These are the selections for Filter type.

Filter type: These are the selections for Filter type.

Filter type: These are the selections for Filter type.

Filter type: These are the selections for Filter type.

Filter type: These are the selections for Filter type.

NEW QUESTION 246

HOTSPOT - (Topic 6)

You have a Microsoft 365 tenant that has Enable Security defaults set to No in Azure Active Directory (Azure AD).

The tenant has two Compliance Manager assessments as shown in the following table.

Name	Score	Status	Assessment progress	Your improvement actions	Microsoft actions	Group	Product	Regulation
SP800	15444	Incomplete	72%	3 of 450 completed	887 of 887 completed	Group1	Microsoft 365	NIST 800-53
Data Protection Baseline	14370	Incomplete	70%	3 of 489 completed	835 of 835 completed	Group2	Microsoft 365	Data Protection Baseline

The SP800 assessment has the improvement actions shown in the following table.

Improvement action	Test status	Impact	Points achieved	Regulations
Establish a threat intelligence program	None	+9 points	0/9	NIST 800-53, Data Protection Baseline
Establish and document a configuration management program	None	+9 points	0/9	NIST 800-53, Data Protection Baseline

You perform the following actions:

? For the Data Protection Baseline assessment, change the Test status of Establish a threat intelligence program to Implemented.

? Enable multi-factor authentication (MFA) for all users.

For each of the following statements, select Yes if the statement is true. Otherwise, select No.

NOTE: Each correct selection is worth one point.

Statements

Yes No

Establish a threat intelligence program will appear as Implemented in the SP800 assessment.

☐ ☐

The SP800 assessment score will increase by 54 points.

☐ ☐

The Data Protection Baseline score will increase by 9 points.

☐ ☐

- A. Mastered
- B. Not Mastered

Answer: A

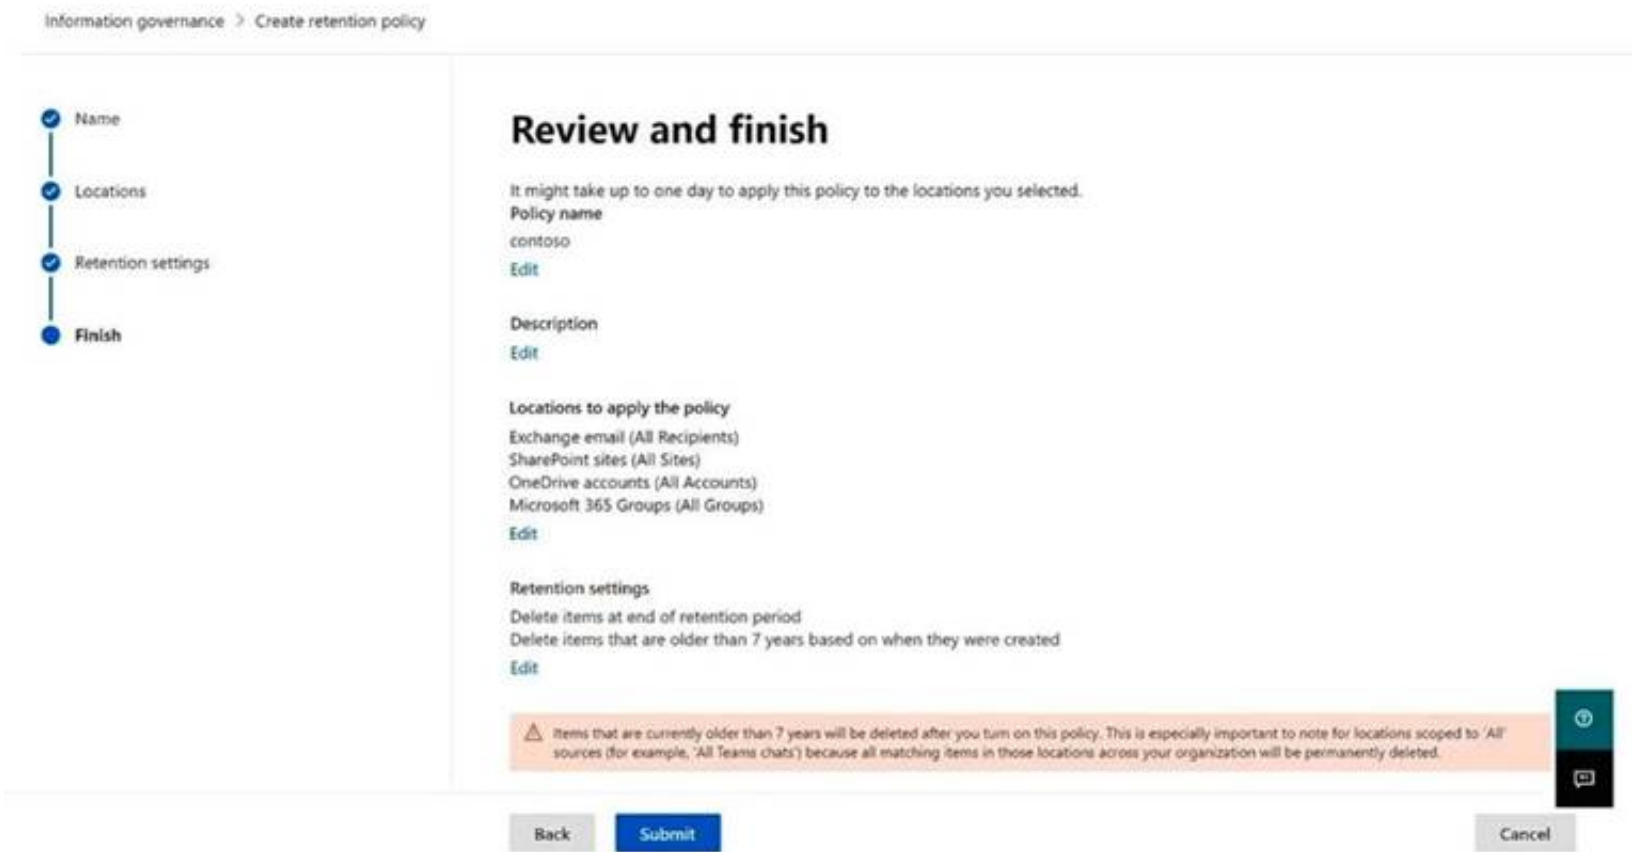

Explanation:

Statements	Yes	No
Establish a threat intelligence program will appear as Implemented in the SP800 assessment.	<input type="radio"/>	<input checked="" type="radio"/>
The SP800 assessment score will increase by 54 points.	<input type="radio"/>	<input checked="" type="radio"/>
The Data Protection Baseline score will increase by 9 points.	<input checked="" type="radio"/>	<input type="radio"/>

NEW QUESTION 251

HOTSPOT - (Topic 6)
HOTSPOT

You have a Microsoft 365 tenant.
You plan to create a retention policy as shown in the following exhibit.

Use the drop-down menus to select the answer choice that completes each statement based on the information presented in the graphic.
NOTE: Each correct selection is worth one point.

Answer Area

Microsoft SharePoint files that are affected by the policy will be [answer choice].

recoverable for up to seven years

deleted seven years after they were created

retained for only seven years from when they were created

Once the policy is created, [answer choice].

some data may be deleted immediately

data will be retained for a minimum of seven years

users will be prevented from permanently deleting email messages for seven years

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

Box 1: Deleted seven years after they were created. From the exhibit:
The retention policy applies to SharePoint sites.
Delete items that are older than 7 years based on when they were created.
Box 2: data will retained for a minimum of seven years
The longest retention period wins. If content is subject to multiple retention settings that retain content for different periods of time, the content will be retained until the end of the longest retention period for the item.
Note: Use a retention policy to assign the same retention settings for content at a site or mailbox level, and use a retention label to assign retention settings at an item level (folder, document, email).
For example, if all documents in a SharePoint site should be retained for 5 years, it's more efficient to do this with a retention policy than apply the same retention label to all documents in that site. However, if some documents in that site should be retained for 5 years and others retained for 10 years, a retention policy wouldn't be able to do this. When you need to specify retention settings at the item level, use retention

labels.

NEW QUESTION 252

HOTSPOT - (Topic 6)

You have device compliance policies shown in the following table.

Name	Platform	Assignment
Policy1	Windows 10 and later	Device1
Policy2	Windows 10 and later	Device1
Policy3	Windows 10 and later	Device2
Policy4	Windows 10 and later	Device2
Policy5	iOS/iPadOS	Device3
Policy6	iOS/iPadOS	Device3

The device compliance state for each policy is shown in the following table.

Policy	State
Policy1	Compliant
Policy2	In grace period
Policy3	Compliant
Policy4	Not compliant
Policy5	In grace period
Policy6	Compliant

NOTE: Each correct selection is worth one point.

Answer Area

Statements	Yes	No
Device1 has an overall compliance state of Compliant.	<input type="radio"/>	<input type="radio"/>
Device2 has an overall compliance state of Not compliant.	<input type="radio"/>	<input type="radio"/>
Device3 has an overall compliance state of In grace period.	<input type="radio"/>	<input type="radio"/>

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

Answer Area

Statements	Yes	No
Device1 has an overall compliance state of Compliant.	<input checked="" type="radio"/>	<input type="radio"/>
Device2 has an overall compliance state of Not compliant.	<input checked="" type="radio"/>	<input type="radio"/>
Device3 has an overall compliance state of In grace period.	<input checked="" type="radio"/>	<input type="radio"/>

NEW QUESTION 255

- (Topic 6)

Your company has a Microsoft 365 E5 subscription.

Users in the research department work with sensitive data.

You need to prevent the research department users from accessing potentially unsafe websites by using hyperlinks embedded in email messages and documents.

Users in other departments must not be restricted.

What should you do?

- A. Create a data loss prevention (DLP) policy that has a Content is shared condition.
- B. Modify the safe links policy Global settings.
- C. Create a data loss prevention (DLP) policy that has a Content contains condition.
- D. Create a new safe links policy.

Answer: D

Explanation:

Use the Microsoft 365 Defender portal to create Safe Links policies

In the Microsoft 365 Defender portal at https://security.microsoft.com, go to Email & Collaboration > Policies & Rules > Threat policies > Safe Links in the Policies section. Or, to go directly to the Safe Links page, use https://security.microsoft.com/safelinksv2.

* 1. On the Safe Links page, select Create to start the new Safe Links policy wizard.

* 2. On the Name your policy page, configure the following settings: Name: Enter a unique, descriptive name for the policy.

Description: Enter an optional description for the policy.

* 3. When you're finished on the Name your policy page, select Next.

* 4. On the Users and domains page, identify the internal recipients that the policy applies to (recipient conditions):

Users: The specified mailboxes, mail users, or mail contacts.

*-> Groups:

Members of the specified distribution groups (including non-mail-enabled security groups within distribution groups) or mail-enabled security groups (dynamic distribution groups aren't supported).

The specified Microsoft 365 Groups.

Domains: All recipients in the specified accepted domains in your organization. Etc.

<https://learn.microsoft.com/en-us/microsoft-365/security/office-365-security/safe-links-policies-configure>

NEW QUESTION 259

DRAG DROP - (Topic 6)

You have a Microsoft 365 subscription.

You need to review reports to identify the following:

- The storage usage of files stored in Microsoft Teams
- The number of active users per team

Which report should you review for each requirement? To answer, drag the appropriate reports to the correct requirements. Each report may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view content

Report	Requirements
The device usage report in Teams	The storage usage of files stored in Microsoft Teams:
The OneDrive usage report	Number of active users per Microsoft Team:
The SharePoint site usage report	
The Teams usage report in Teams	
The User activity report in Teams	

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

Report	Requirements
The device usage report in Teams	The storage usage of files stored in Microsoft Teams: The SharePoint site usage report
The OneDrive usage report	Number of active users per Microsoft Team: The Teams usage report in Teams
The SharePoint site usage report	
The Teams usage report in Teams	
The User activity report in Teams	

NEW QUESTION 260

- (Topic 6)

You have a Microsoft 365 E5 tenant that contains the devices shown in the following table.

Name	Platform
Device1	MacOS
Device2	Windows 10 Pro
Device3	Windows 10 Enterprise
Device4	Ubuntu 18.04 LTS

You plan to implement attack surface reduction (ASR) rules. Which devices will support the ASR rules?

- A. Device 1, Device2, and Device3 only
- B. Device3 only
- C. Device2 and Device3 only
- D. Device1, Device2, Devices and Device4

Answer: C

Explanation:

Reference:

<https://docs.microsoft.com/en-us/microsoft-365/security/defender-endpoint/enable-attack-surface-reduction?view=o365-worldwide#requirements>

NEW QUESTION 265

- (Topic 6)

You have a Microsoft 365 subscription that contains the domains shown in the following exhibit.

Domains

+ Add domain Buy domain Refresh

Domain name ↑	Status	Choose columns
<input type="checkbox"/> Sub1.contoso221018.onmicrosoft.com (D...	Possible service issues	
<input type="checkbox"/> contoso.com	Incomplete setup	
<input type="checkbox"/> contoso221018.onmicrosoft.com	Healthy	
<input type="checkbox"/> Sub2.contoso221018.onmicrosoft.com	Incomplete setup	

Which domain name suffixes can you use when you create users?

- A. only Sub1.contoso221018.onmicrosoft.com
- B. onlycontoso.com and Sub2.contoso221018.onmicrosoft.com
- C. onlvcontoso221018.onmicrosoft.com, Sub.contoso221018.onmicrosoft.com, and Sub2.contoso221018.onmicrosoft.com
- D. all the domains in the subscription

Answer: B

NEW QUESTION 267

- (Topic 6)

You have a Microsoft 365 subscription. You add a domain named contoso.com.

When you attempt to verify the domain, you are prompted to send a verification email to admin@contoso.com.

You need to change the email address used to verify the domain. What should you do?

- A. From the Microsoft 365 admin center, change the global administrator of the Microsoft 365 subscription.
- B. Add a TXT record to the DNS zone of the domain.
- C. From the domain registrar, modify the contact information of the domain.
- D. Modify the NS records for the domain.

Answer: C

NEW QUESTION 270

HOTSPOT - (Topic 6)

You have a Microsoft 365 subscription that contains three groups named All users, Sales team, and Office users, and two users shown in the following table.

Name	Member of
User1	All users, Sales team
User2	All users, Office users

In Microsoft Endpoint Manager, you have the Policies for Office apps settings shown in the following exhibit.

Home / Policy Management		Notifications
Policy configurations		
+ Create	Copy	Reorder priority
Remove	Total policy configurations: 3	
Name	Priority ↑	Recommendation status
Office Users Policy	0	
Sales Team Policy	1	
All users	2	

The policies use the settings shown in the following table.

Policy	Default Shared Folder Location	Default Office Theme
All users	https://sharepoint.contoso.com/addins_all_users	Colorful
Office Users Policy	https://sharepoint.contoso.com/addins_office_users	White
Sales Team Policy	https://sharepoint.contoso.com/addins_sales_team_users_	Dark Gray

What is the default share folder location for User1 and the default Office theme for User2? To answer, select the appropriate options in the answer area.
 NOTE: Each correct selection is worth one point.

The default shared folder location for User1 is:

https://sharepoint.contoso.com/addins_all_users
https://sharepoint.contoso.com/addins_office_users
https://sharepoint.contoso.com/addins_sales_team_users_

The default Office theme for User 2 is:

Colorful
Dark Gray
White

- A. Mastered
 B. Not Mastered

Answer: A

Explanation:

The default shared folder location for User1 is:

https://sharepoint.contoso.com/addins_all_users
https://sharepoint.contoso.com/addins_office_users
https://sharepoint.contoso.com/addins_sales_team_users_

The default Office theme for User 2 is:

Colorful
Dark Gray
White

NEW QUESTION 275

DRAG DROP - (Topic 6)

You have a Microsoft 365 subscription that uses Microsoft Defender for Office 365. You need to configure policies to meet the following requirements:

? Customize the common attachments filter.

? Enable impersonation protection for sender domains.

Which type of policy should you configure for each requirement? To answer, drag the appropriate policy types to the correct requirements. Each policy type may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view content.

NOTE: Each correct selection is worth one point.

Policy Types	Answer Area
<div>Anti-malware</div> <div>Anti-phishing</div> <div>Anti-spam</div> <div>Safe Attachments</div>	<p>Customize the common attachments filter: <input type="text"/></p> <p>Enable impersonation protection for sender domains: <input type="text"/></p>

- A. Mastered
 B. Not Mastered

Answer: A

Explanation:

Box 1: Anti-malware

Customize the common attachments filter. See step 5 below.

* 1. Use the Microsoft 365 Defender portal to create anti-malware policies

In the Microsoft 365 Defender portal at <https://security.microsoft.com>, go to Email & Collaboration > Policies & Rules > Threat policies > Anti-Malware in the Policies section. To go directly to the Anti-malware page, use <https://security.microsoft.com/antimalwarev2>

* 2. On the Anti-malware page, select Create to open the new anti-malware policy wizard. On the Name your policy page, configure these settings:

Name: Enter a unique, descriptive name for the policy. Description: Enter an optional description for the policy.

* 3. When you're finished on the Name your policy page, select Next.

* 4. On the Users and domains page, identify the internal recipients that the policy applies to (recipient conditions)

* 5. On the Protection settings page, configure the following settings: Protection settings section:

Enable the common attachments filter: If you select this option, messages with the specified attachments are treated as malware and are automatically quarantined. You can modify the list by clicking Customize file types and selecting or deselecting values in the list.

* 6. Etc.

Box 2: Anti-phishing

Enable impersonation protection for sender domains. Anti-phishing policies in Microsoft 365

The high-level differences between anti-phishing policies in EOP and anti-phishing policies in Defender for Office 365 are described in the following table:

Feature	Anti-phishing policies in EOP	Anti-phishing policies in Defender for Office 365
Automatically created default policy	✓	✓
Create custom policies	✓	✓
Common policy settings*	✓	✓
Spoof settings	✓	✓
First contact safety tip	✓	✓
Impersonation settings		✓
Advanced phishing thresholds		✓

NEW QUESTION 279

HOTSPOT - (Topic 6)

HOTSPOT

You have a Microsoft 365 E5 tenant that contains the users shown in the following table.

Name	Member of
User1	UserGroup1
User2	UserGroup2
User3	UserGroup3

The tenant contains the devices shown in the following table.

Name	Owner	Installed apps	Platform	Microsoft Intune
Device1	User1	None	Windows 10	Enrolled
Device2	User2	App2	Android	Not enrolled
Device3	User3	None	iOS	Not enrolled

You have the apps shown in the following table.

Name	Type
App1	iOS store app
App2	Android store app
App3	Microsoft store app

You plan to use Microsoft Endpoint Manager to manage the apps for the users.

For each of the following statements, select Yes if the statement is true. Otherwise, select No.

NOTE: Each correct selection is worth one point.

Statements	Yes	No
App1 can be assigned as a required install for User3.	<input type="radio"/>	<input type="radio"/>
App2 can be uninstalled from Device2 by using Microsoft Endpoint Manager.	<input type="radio"/>	<input type="radio"/>
App3 can be installed automatically for UserGroup1.	<input type="radio"/>	<input type="radio"/>

A. Mastered

B. Not Mastered

Answer: A

Explanation:

Statements	Yes	No
App1 can be assigned as a required install for User3.	<input type="radio"/>	<input checked="" type="radio"/>
App2 can be uninstalled from Device2 by using Microsoft Endpoint Manager.	<input type="radio"/>	<input checked="" type="radio"/>
App3 can be installed automatically for UserGroup1.	<input checked="" type="radio"/>	<input type="radio"/>

NEW QUESTION 281
HOTSPOT - (Topic 6)
HOTSPOT
You have a Microsoft 365 tenant.
You create a retention label as shown in the Retention Label exhibit. (Click the Retention Label tab.)

Create retention label

Comment

A user sends an email that contains the components shown in the following table.

Type	File	Includes IP address
Mail body	Not applicable	No
Attachment	File1.docx	Yes
Attachment	File2.xml	Yes

For each of the following statements, select Yes if the statement is true. Otherwise, select No.
NOTE: Each correct selection is worth one point.

Statements	Yes	No
Sensitivity1 is applied to the email.	<input type="radio"/>	<input type="radio"/>
A watermark is added to File1.docx.	<input type="radio"/>	<input type="radio"/>
A header is added to File2.xml.	<input type="radio"/>	<input type="radio"/>

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

Statements	Yes	No
Sensitivity1 is applied to the email.	<input checked="" type="radio"/>	<input type="radio"/>
A watermark is added to File1.docx.	<input type="radio"/>	<input checked="" type="radio"/>
A header is added to File2.xml.	<input type="radio"/>	<input checked="" type="radio"/>

NEW QUESTION 287
DRAG DROP - (Topic 6)
DRAG DROP

Your network contains an on-premises Active Directory domain that syncs to Azure Active Directory (Azure AD). The domain contains the servers shown in the following table.

Name	Operating system	Configuration
Server1	Windows Server 2016	File Server Resource Manager (FSRM)
Server2	Windows Server 2016	None

You use Azure Information Protection.

You need to ensure that you can apply Azure Information Protection labels to the file stores on Server1.

Which three actions should you perform in sequence? To answer, move the appropriate actions from the list of actions to the answer area and arrange them in the correct order.

Actions

Authorize Server1.

Install the Microsoft Rights Management connector on Server2.

Install a certificate on Server2.

Install a certificate on Server1.

Register a service principal name for Server1.

Run GenConnectorConfig.ps1 on Server1.

Run GenConnectorConfig.ps1 on Server2.

Answer Area

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

Actions

Authorize Server1.

Install the Microsoft Rights Management connector on Server2.

Install a certificate on Server2.

Install a certificate on Server1.

Register a service principal name for Server1.

Run GenConnectorConfig.ps1 on Server1.

Run GenConnectorConfig.ps1 on Server2.

Answer Area

Install the Microsoft Rights Management connector on Server2.

Authorize Server1.

Run GenConnectorConfig.ps1 on Server1.

NEW QUESTION 290

HOTSPOT - (Topic 6)

Your company has a Microsoft 365 E5 tenant.

Users at the company use the following versions of Microsoft Office:

- Microsoft 365 Apps for enterprise
- Office for the web
- Office 2016
- Office 2019

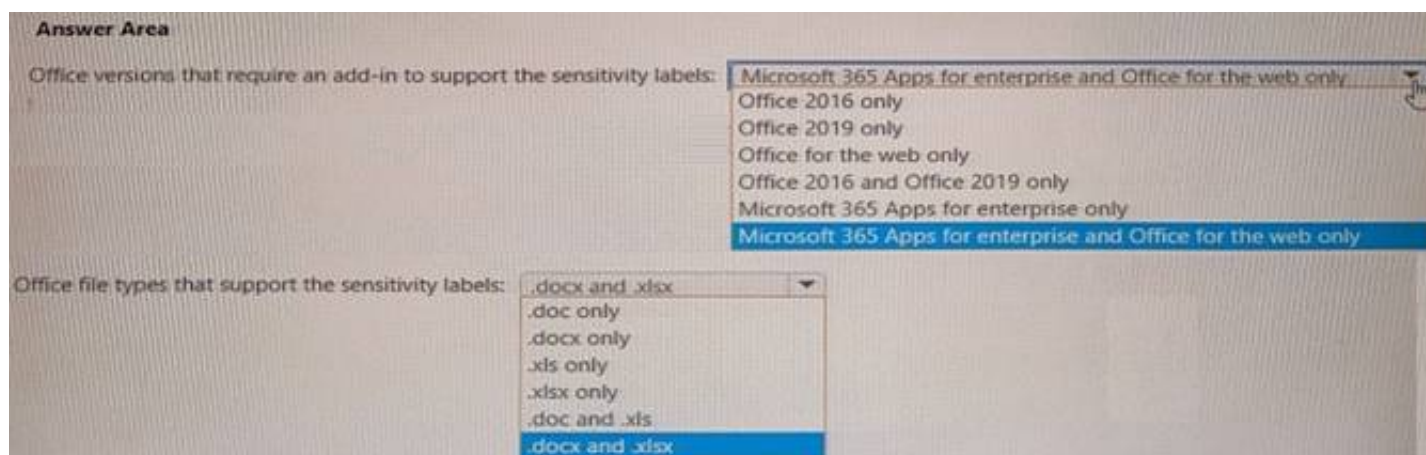

The company currently uses the following Office file types:

- .docx
- .xlsx
- .doc
- xls

You plan to use sensitivity labels. You need to identify the following:

- Which versions of Office require an add-in to support the sensitivity labels.
- Which file types support the sensitivity labels.

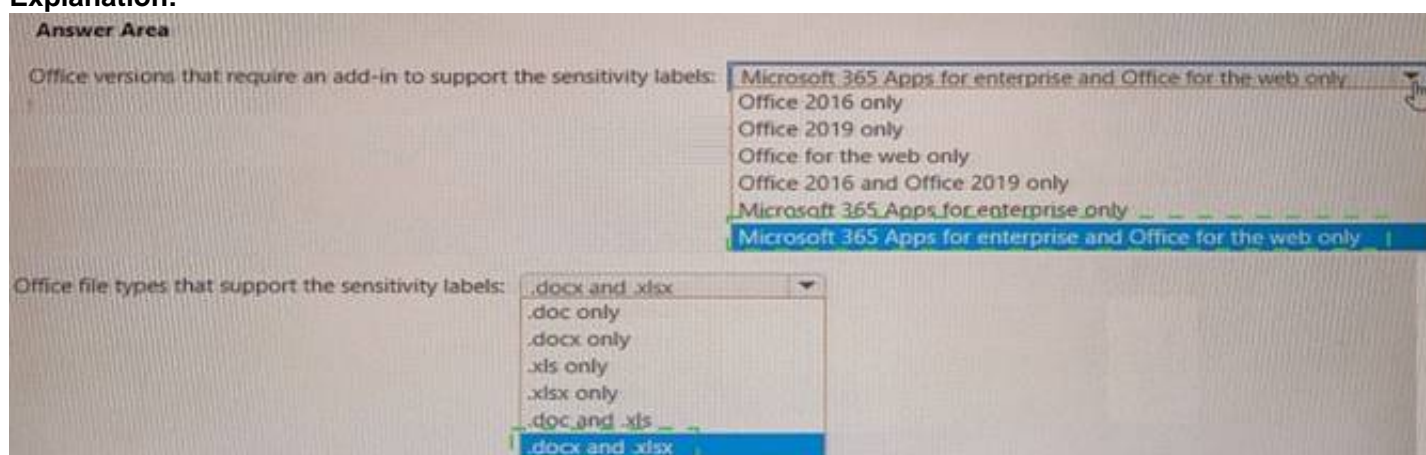

What should you identify? To answer, select the appropriate options in the answer area, NOTE: Each correct selection is worth one point.

- A. Mastered
 B. Not Mastered

Answer: A

Explanation:

NEW QUESTION 295

HOTSPOT - (Topic 6)

You have a Microsoft 365 subscription that contains the administrative units shown in the following table.

Name	Members
AU1	Group1, User2
AU2	Group2, User3, User4

The groups contain the members shown in the following table.

Name	Members
Group1	User1
Group2	User2, User4

The users are assigned the roles shown in the following table.

Name	Role	Scope
User1	None	Not applicable
User2	Password Administrator	AU1
User3	License Administrator	Organization
User4	None	Not applicable

For each of the following statements, select Yes if the statement is true. Otherwise, select No.

NOTE; Each correct selection is worth one point.

Statements	Yes	No
User2 can reset the password of User1.	<input type="radio"/>	<input type="radio"/>
User2 can reset the password of User4.	<input type="radio"/>	<input type="radio"/>
User3 can assign licenses to User1.	<input type="radio"/>	<input type="radio"/>

- A. Mastered
 B. Not Mastered

Answer: A

Explanation:

Answer Area

Statements

User2 can reset the password of User1.

Yes

☒

No

☐

User2 can reset the password of User4.

☐
☒

User3 can assign licenses to User1.

☒
☐

NEW QUESTION 299

HOTSPOT - (Topic 5)

You need to configure the Office 365 service status notifications and limit access to the service and feature updates. The solution must meet the technical requirements.

What should you configure in the Microsoft 365 admin center? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

Answer Area

To configure the notifications:

Briefing email ▼

Briefing email

Help desk information

Organization information

To limit access:

Release preferences ▼

Privileged Access

Release preferences

Office installation options

- A. Mastered
- B. Not Mastered

Answer: A

NEW QUESTION 300

- (Topic 5)

You need to configure Azure AD Connect to support the planned changes for the Montreal Users and Seattle Users OUs.

What should you do?

- A. From the Microsoft Azure AD Connect wizard, select Customize synchronization options.
- B. From PowerShell, run the Add-ADSyncConnectorAttributeInclusion cmdlet.
- C. From PowerShell, run the start-ADSyncSyncCycle cmdlet.
- D. From the Microsoft Azure AD Connect wizard, select Manage federation.

Answer: A

NEW QUESTION 301

- (Topic 4)

Which role should you assign to User1?

Available Choices (select all choices that are correct)

- A. Hygiene Management
- B. Security Reader
- C. Security Administrator
- D. Records Management

Answer: C

Explanation:

A user named User1 must be able to view all DLP reports from the Microsoft 365 admin center.

Users with the Security Reader role have global read-only access on security-related features, including all information in Microsoft 365 security center, Azure Active Directory, Identity Protection, Privileged Identity Management, as well as the ability to read Azure Active Directory sign-in reports and audit logs, and in Office 365 Security & Compliance Center.

Reference:

<https://docs.microsoft.com/en-us/azure/active-directory/users-groups-roles/directory-assign-admin-roles>

NEW QUESTION 304

- (Topic 4)

You need to ensure that all the sales department users can authenticate successfully during Project1 and Project2.
 Which authentication strategy should you implement for the pilot projects?

- A. pass-through authentication
- B. pass-through authentication and seamless SSO
- C. password hash synchronization and seamless SSO
- D. password hash synchronization

Answer: C

Explanation:

Project1: During Project1, the mailboxes of 100 users in the sales department will be moved to Microsoft 365.

Project2: After the successful completion of Project1, Microsoft Teams & Skype for Business will be enabled in Microsoft 365 for the sales department users.

After the planned migration to Microsoft 365, all users must be signed in to on-premises and cloud-based applications automatically.

Fabrikam does NOT plan to implement identity federation.

After the planned migration to Microsoft 365, all users must continue to authenticate to their mailbox and to SharePoint sites by using their UPN.

You need to enable password hash synchronization to enable the users to continue to authenticate to their mailbox and to SharePoint sites by using their UPN.

You need to enable SSO to enable all users to be signed in to on-premises and cloud-based applications automatically.

Reference:

<https://docs.microsoft.com/en-us/azure/active-directory/hybrid/choose-ad-authn>

NEW QUESTION 305

- (Topic 3)

You create the planned DLP policies.

You need to configure notifications to meet the technical requirements. What should you do?

- A. From the Microsoft 365 security center, configure an alert policy.
- B. From the Microsoft Endpoint Manager admin center, configure a custom notification.
- C. From the Microsoft 365 admin center, configure a Briefing email.
- D. From the Microsoft 365 compliance center, configure the Endpoint DLP settings.

Answer: D

Explanation:

Reference:

<https://docs.microsoft.com/en-us/microsoft-365/compliance/dlp-configure-view-alerts-policies?view=o365-worldwide>

NEW QUESTION 307

- (Topic 3)

You need to create the Safe Attachments policy to meet the technical requirements. Which option should you select?

- A. Replace
- B. Enable redirect
- C. Block
- D. Dynamic Delivery

Answer: D

Explanation:

Reference:

<https://github.com/MicrosoftDocs/microsoft-365-docs/blob/public/microsoft-365/security/office-365-security/safe-attachments.md>

NEW QUESTION 310

HOTSPOT - (Topic 3)

You plan to implement the endpoint protection device configuration profiles to support the planned changes.

You need to identify which devices will be supported, and how many profiles you should implement.

What should you identify? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

Supported devices:

Device1 only
Device1 and Device2 only
Device1 and Device3 only
Device1, Device2, and Device3
Device1, Device4, and Device5
Device1, Device2, Device3, Device4, and Device5

Number of required profiles:

1
2
3
4
5

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

Supported devices:

▼
Device1 only
Device1 and Device2 only
Device1 and Device3 only
Device1, Device2, and Device3
Device1, Device4, and Device5
Device1, Device2, Device3, Device4, and Device5

Number of required profiles:

▼
1
2
3
4
5

NEW QUESTION 315

- (Topic 3)

You need to configure the compliance settings to meet the technical requirements. What should you do in the Microsoft Endpoint Manager admin center?

- A. From Compliance policies, modify the Notifications settings.
- B. From Locations, create a new location for noncompliant devices.
- C. From Retire Noncompliant Devices, select Clear All Devices Retire State.
- D. Modify the Compliance policy settings.

Answer: D

Explanation:

Reference:

<https://docs.microsoft.com/en-us/mem/intune/protect/device-compliance-get-started>

NEW QUESTION 320

- (Topic 2)

You need to meet the technical requirement for the EU PII data. What should you create?

- A. a retention policy from the Security & Compliance admin center.
- B. a retention policy from the Exchange admin center
- C. a data loss prevention (DLP) policy from the Exchange admin center
- D. a data loss prevention (DLP) policy from the Security & Compliance admin center

Answer: A

Explanation:

References:

<https://docs.microsoft.com/en-us/office365/securitycompliance/retention-policies>

EU PII wants both documents and email message to be preserved so S&C Admin Center for Retention. If this was for Email only, this probably could have been done in EAC.

NEW QUESTION 323

HOTSPOT - (Topic 2)

You need to meet the technical requirement for log analysis.

What is the minimum number of data sources and log collectors you should create from Microsoft Cloud App Security? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

Minimum number of data sources:

▼

1

3

6

Minimum number of log collectors:

▼

1

3

6

- A. Mastered
B. Not Mastered

Answer: A

Explanation:

References:

<https://docs.microsoft.com/en-us/cloud-app-security/discovery-docker>

NEW QUESTION 326

DRAG DROP - (Topic 2)

You need to meet the requirement for the legal department.

Which three actions should you perform in sequence from the Security & Compliance admin center? To answer, move the appropriate actions from the list of actions to the answer area and arrange them in the correct order.

Actions	Answer Area
Create a data loss prevention (DLP) policy.	
Create an eDiscovery case.	
Create a label.	
Run a content search.	
Create a label policy.	
Create a hold.	
Assign eDiscovery permissions.	
Publish a label.	

- A. Mastered
B. Not Mastered

Answer: A

Explanation:

References: <https://www.sherweb.com/blog/ediscovery-office-365/>

NEW QUESTION 328

- (Topic 1)

You need to create the Microsoft Store for Business. Which user can create the store?

- A. User2
B. User3
C. User4
D. User5

Answer: C

Explanation:

References:

<https://docs.microsoft.com/en-us/microsoft-store/roles-and-permissions-microsoft-store-for-business>

NEW QUESTION 330

- (Topic 2)

Which report should the New York office auditors view?

- A. DLP policy matches
- B. DLP false positives and overrides
- C. DLP incidents
- D. Top Senders and Recipients

Answer: C

Explanation:

References:

<https://docs.microsoft.com/en-us/office365/securitycompliance/data-loss-prevention-policies>

This report also shows policy matches over time, like the policy matches report. However, the policy matches report shows matches at a rule level; for example, if an email matched three different rules, the policy matches report shows three different line items. By contrast, the incidents report shows matches at an item level; for example, if an email matched three different rules, the incidents report shows a single line item for that piece of content. Because the report counts are aggregated differently, the policy matches report is better for identifying matches with specific rules and fine tuning DLP policies. The incidents report is better for identifying specific pieces of content that are problematic for your DLP policies.

NEW QUESTION 334

- (Topic 2)

You need to protect the U.S. PII data to meet the technical requirements. What should you create?

- A. a data loss prevention (DLP) policy that contains a domain exception
- B. a Security & Compliance retention policy that detects content containing sensitive data
- C. a Security & Compliance alert policy that contains an activity
- D. a data loss prevention (DLP) policy that contains a user override

Answer: A

NEW QUESTION 336

- (Topic 1)

On which server should you install the Azure ATP sensor?

- A. Server 1
- B. Server 2
- C. Server 3
- D. Server 4
- E. Server 5

Answer: A

Explanation:

References:

<https://docs.microsoft.com/en-us/azure-advanced-threat-protection/atp-capacity-planning>

However, if the case study had required that the DCs can't have any s/w installed, then the answer would have been a standalone sensor on Server2. In this scenario, the given answer is correct. BTW, ATP now known as Defender for Identity.
