

Microsoft

Exam Questions MD-100

Windows 10

NEW QUESTION 1

- (Exam Topic 4)

Your network contains an Active Directory domain. The domain contains a computer named Computer1 that runs Windows 10. Computer1 has a Trusted Platform Module (TPM) version 12.

The domain contains a domain controller named DC1 that has all the Remote Server Administration Tools (RSAT) installed.

BitLocker Drive Encryption (BitLocker) recovery passwords are stored in Active Directory. You enable BitLocker on the operating system drive of Computer1.

A software update on Computer1 disables the TPM, and BitLocker enters recovery mode. You need to recover your BitLocker password for Computer1.

What should you use to retrieve the recovery password?

- A. Active Directory Users and Computers
- B. repair-bde with the -f parameter
- C. manage-bde with the -unlock parameter
- D. Disk Management

Answer: A

NEW QUESTION 2

- (Exam Topic 4)

You have a computer named Computer1 that runs Windows 11.

You need to ensure that when Computer1 is low on disk space, the computer automatically cleans up temporary files and empties the Recycle Bin.

What should you use?

- A. Optimize Drives
- B. Disk Cleanup
- C. Storage Sense
- D. Storage Spaces

Answer: C

NEW QUESTION 3

- (Exam Topic 4)

You have a computer named Computer1 that runs Windows 10. Computer1 has the local users shown in the following table.

Name	Member of
User1	Administrators
User2	Event Log readers
User3	Device Owners
User4	Power Users
User5	Users

Which users can analyze the event logs on Computer1? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

Users who can analyze security event logs:

▼

User1 only

User1 and User2 only

User1 and User2, and User3 only

User1, User2, User3, and User4 only

User1, User2, User3, User4, and User5

Users who can analyze system event logs:

▼

User1 only

User1 and User2 only

User1 and User2, and User3 only

User1, User2, User3, and User4 only

User1, User2, User3, User4, and User5

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

References:

<https://docs.microsoft.com/en-us/windows/security/identity-protection/access-control/local-accounts#sec-localsy>

NEW QUESTION 4

- (Exam Topic 4)

Your network contains an Active Directory domain. The domain contains 500 computers that run Windows 10. The computers are used as shown in the following table.

Usage	Update note
Manufacturing	Critical computers that must have minimal downtime: Updates must be deferred as long as possible.
Information technology (IT)	Computers for IT staff: Updates must be installed as soon as they are released.
Administration	Computers for general use: Updates must be installed two months after they are released.

You need to apply updates based on the computer usage. What should you configure?

- A. Notifications & actions from System in the Settings apps.
- B. the Windows Update for Business settings by using a Group Policy Object (GPO)
- C. the Windows Installer settings by using a Group Policy Object (GPO)
- D. Delivery Optimization from Update & Security in the Settings apps

Answer: B

Explanation:

Reference:

<https://docs.microsoft.com/en-us/windows/deployment/update/waas-wufb-group-policy>

NEW QUESTION 5

- (Exam Topic 4)

You have a Microsoft Azure Active Directory (Azure AD) tenant. Some users sign in to their computer by using Windows Hello for Business. A user named User1 purchases a new computer and joins the computer to Azure AD. User1 attempts to configure the sign-in options and receives the error message shown in the exhibit.

Sign-in options

***Some settings are hidden or managed by your organization.**

Sign in to Windows, apps and services by teaching Windows to recognize you.

Windows Hello isn't available on this device.

[See how it works and find compatible devices.](#)

You open Device Manager and confirm that all the hardware works correctly. You need to ensure that User1 can use Windows Hello for Business facial recognition to sign in to the computer. What should you do first?

- A. Purchase an infrared (IR) camera.
- B. Upgrade the computer to Windows 10 Enterprise.
- C. Enable UEFI Secure Boot.
- D. Install a virtual TPM driver.

Answer: B

Explanation:

References:

<https://docs.microsoft.com/en-us/windows/security/identity-protection/hello-for-business/hello-planning-guide>

NEW QUESTION 6

- (Exam Topic 4)

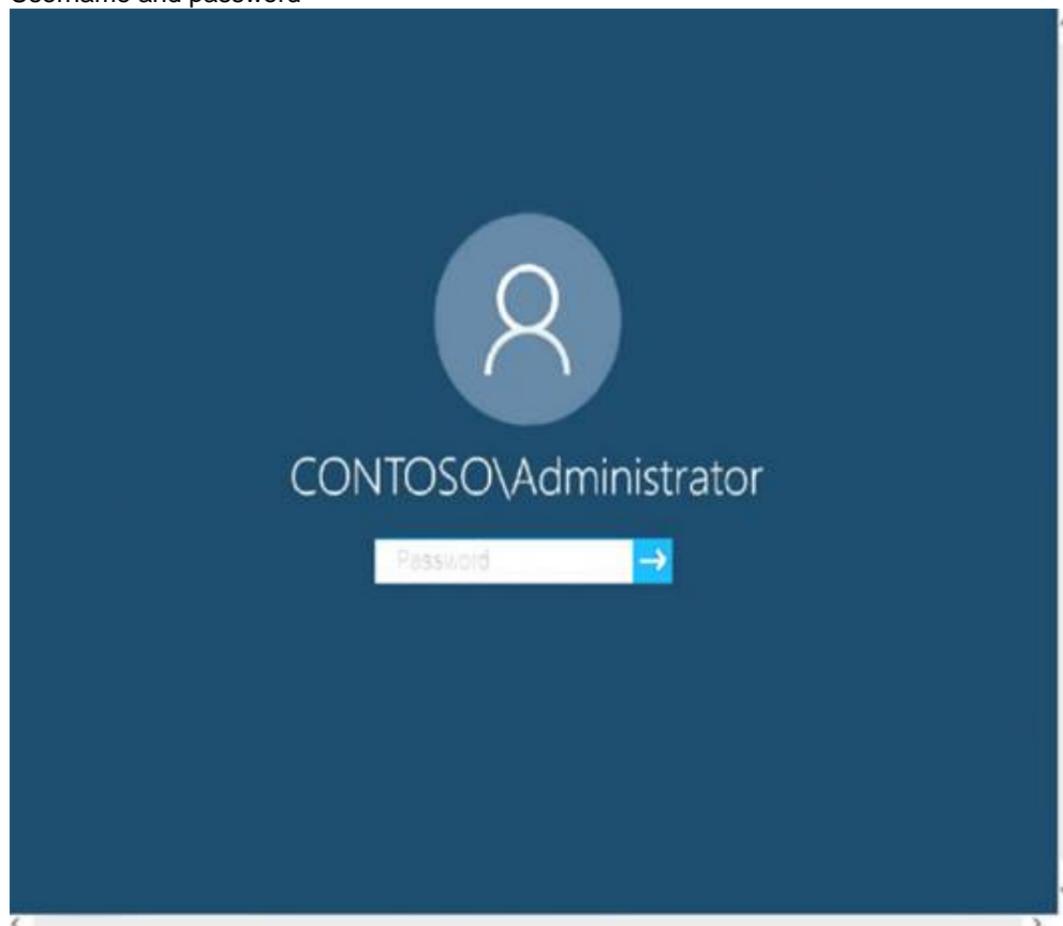

Please wait while the virtual machine loads. Once loaded, you may proceed to the lab section. This may take a few minutes, and the wait time will not be deducted from your overall test time.

When the Next button is available, click it to access the lab section. In this section, you will perform a set of tasks in a live environment. While most functionality will be available to you as it would be in a live environment, some functionality (e.g., copy and paste, ability to navigate to external websites) will not be possible by design.

Scoring is based on the outcome of performing the tasks stated in the lab. In other words, it doesn't matter how you accomplish the task, if you successfully perform it, you will earn credit for that task.

Labs are not timed separately, and this exam may more than one lab that you must complete. You can use as much time as you would like to complete each lab. But, you should manage your time appropriately to ensure that you are able to complete the lab(s) and all other sections of the exam in the time provided.

Please note that once you submit your work by clicking the Next button within a lab, you will NOT be able to return to the lab.
Username and password

Use the following login credentials as needed:

To enter your password, place your cursor in the Enter password box and click on the password below.

Username: Contoso/Administrator

Password: Passw0rd!

The following information is for technical support purposes only: Lab Instance: 11145882

Tasks **Computers**

Users in the Finance group report that they cannot copy files to Client1\Finance. You need to resolve the issue. To complete this task, sign in to the required computer or computers.

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

- > Open File Explorer.
- > Browse and find the file or folder you want to have full access.
- > Right-click it, and select Properties.
- > Click the Security tab to access the NTFS permissions.
- > Click the Advanced button.
- > On the "Advanced Security Settings" page, you need to click the Change link, in the Owner's field.
- > Click the Advanced button.
- > On the "Select User or Group" page, click the Find Now button.
- > From the search result, select your user account, and click OK.
- > On the "Select User or Group" page, click OK.
- > Click Apply.
- > Click OK.
- > Click OK again.
- > Click OK one more time to complete this task.

It's important to note that if you're taking ownership of a folder, you can check the Replace ownership on subcontainers and object option in the Advanced Security Settings page to take control of the subfolders inside of the folder.

Now you'll need to grant full access control to your account, to do this use the following steps:

- > Right-click the file or folder and select Properties.
- > Click the Security tab to access the NTFS permissions.
- > Click the Advanced button.
- > Under the Permissions tab, click Add.
- > Click Select a principal to add your user account.
- > On the "Select User or Group" page, click the Find Now button.
- > From the search result, select your user account, and click OK.
- > On the "Select User or Group" page, click OK.
- > On "Permission Entry", check the Full control option.
- > Click OK.
- > Click OK.
- > Click Apply.
- > Click OK.
- > Click OK to close the file or folder properties to complete the task.

You can now assign the necessary permissions to the Finance group.

If you right-click on a file or folder, choose Properties and click on the Security tab, we can now try to edit some permissions. Go ahead and click the Edit button to get started.

At this point, there are a couple of things you can do. Firstly, you'll notice that the Allow column is probably greyed out and can't be edited. This is because of the inheritance I was talking about earlier. However, you can check items on the Deny column.

When you click the Add button, you have to type in the user name or group name into the box and then click on Check Names to make sure it's correct. If you don't remember the user or group name, click on the Advanced button and then just click Find Now. It will show you all the users and groups.

Click OK and the user or group will be added to the access control list. Now you can check the Allow column or Deny column.

NEW QUESTION 7

- (Exam Topic 4)

You have a workgroup computer named Computer1 that runs Windows 10.

You need to configure Windows Hello for sign-in to Computer1 by using a physical security key. What should you use?

- A. a USB 3.0 device that supports BitLocker Drive Encryption (BitLocker)
- B. a USB device that supports FIDO2
- C. a USB 3.0 device that has a certificate from a trusted certification authority (CA)
- D. a USB device that supports RSA SecurID

Answer: B

Explanation:

Reference:

<https://docs.microsoft.com/en-us/azure/active-directory/user-help/security-info-setup-security-key>

NEW QUESTION 8

- (Exam Topic 4)

You have computers that run Windows 11 as shown in the following table.

Name	IP address	Joined to
Computer1	192.168.10.10	Active Directory
Computer2	192.168.10.15	Workgroup

You ping 192.168.10.15 from Computer1 and discover that the request timed out. You need to ensure that you can successfully ping 192.168.10.15 from Computer1. Solution: On Computer2, you enable PowerShell Remoting.

Does this meet the goal?

- A. Yes
- B. No

Answer: A

NEW QUESTION 9

- (Exam Topic 4)

You have 20 computers that run Windows 10. The computers are in a workgroup.

You need to create a local user named Admin1 on all the computers. Admin1 must be a member of the Remote Management Users group.

What should you do?

- A. From Windows Configuration Designer, create a provisioning package, and then run the provisioning package on each computer.
- B. Create a script that runs the New-ADUser cmdlet and the Set-AdGroup cmdlet.
- C. Create a Group Policy object (GPO) that contains the Local User Group Policy preference.
- D. Create a script that runs the New-MsolUser cmdlet and the Add-ADComputerServiceAccount cmdlet.

Answer: A

Explanation:

References:

<https://blogs.technet.microsoft.com/askpfeplat/2017/11/06/use-group-policy-preferences-to-manage-the-local-ad>

NEW QUESTION 10

- (Exam Topic 4)

You have a computer named Computer1 that runs Windows 10.

You need to prevent standard users from changing the wireless network settings on Computer1. The solution must allow administrators to modify the wireless network settings.

What should you use?

- A. Windows Configuration Designer
- B. MSConfig
- C. Local Group Policy Editor
- D. an MMC console that has the Group Policy Object Editor snap-in

Answer: C

NEW QUESTION 10

- (Exam Topic 4)

Please wait while the virtual machine loads. Once loaded, you may proceed to the lab section. This may take a few minutes, and the wait time will not be deducted from your overall test time.

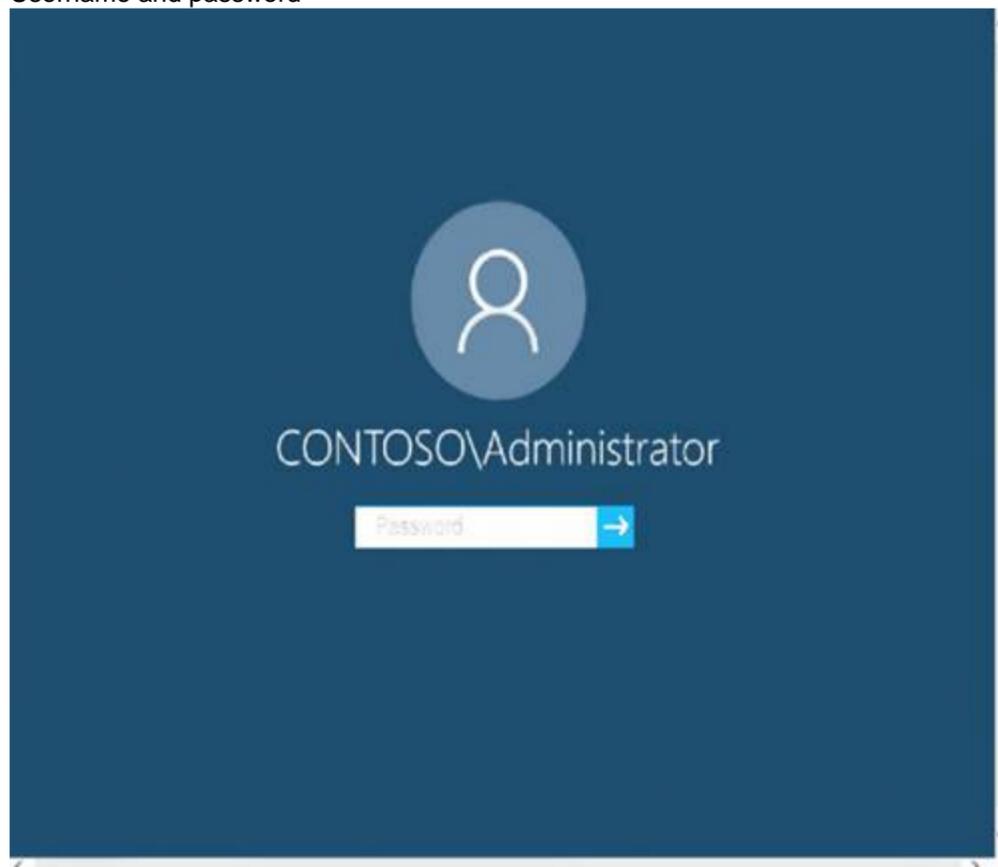

When the Next button is available, click it to access the lab section. In this section, you will perform a set of tasks in a live environment. While most functionality will be available to you as it would be in a live environment, some functionality (e.g., copy and paste, ability to navigate to external websites) will not be possible by design.

Scoring is based on the outcome of performing the tasks stated in the lab. In other words, it doesn't matter how you accomplish the task, if you successfully perform it, you will earn credit for that task.

Labs are not timed separately, and this exam may more than one lab that you must complete. You can use as much time as you would like to complete each lab.

But, you should manage your time appropriately to ensure that you are able to complete the lab(s) and all other sections of the exam in the time provided. Please note that once you submit your work by clicking the Next button within a lab, you will NOT be able to return to the lab.

Username and password

Use the following login credentials as needed:

To enter your password, place your cursor in the Enter password box and click on the password below.

Username: Contoso/Administrator

Password: Passw0rd!

The following information is for technical support purposes only:

Lab Instance: 10921597

You need to create a group named Group2 on Client2. The members of Group2 must be able to change the system time. The solution must use the principle of least privilege.

To complete this task, sign in to the required computer or computers.

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

- > On Client2, Press Windows+R
- > Type lusrmgr.msc
- > Right click Groups and click New Group.
- > Type in the Group name and a description.
- > Click Add to add members to this group. Specify the name of the user or group or computer to be added.
- > Click Create and Close.
- > Press the Win + R keys to open Run, type secpol.msc into Run, and click/tap on OK to open Local Security Policy.
- > Expand open Local Policies in the left pane of Local Security Policy, click/tap on User Rights Assignment, and double click/tap on the Change the system time

policy in the right pane.

- Click/tap on the Add User or Group button.
- Click/tap on the Object Types button.
- Check all the boxes for Object types, and click/tap on the OK.
- Click/tap on the Advanced button.
- Click/tap on the Find Now button, select the name of the user or group
- Click/tap on OK.
- Click/tap on OK.
- When finished, you can close Local Users and Groups.

Reference:

NEW QUESTION 11

- (Exam Topic 4)

You have a computer named Client1 that runs Windows 10 and has Windows Sandbox enabled.

You create a script named Script1.cmd. On Client1, you save Script1.cmd to a folder named C:\Scripts. You need to ensure that when you sign in to Windows Sandbox, Script1.cmd runs automatically.

How should you complete the configuration file? To answer, select the appropriate options in the answer area. NOTE: Each correct selection is worth one point.

Answer Area

```

<Configuration>
  <MappedFolders>
    <MappedFolder>
      <HostFolder>C:\Scripts</HostFolder>
      <ReadOnly>>true</ReadOnly>
    </MappedFolder>
  </MappedFolders>
  <LogonCommand>
    <Command>C:\Users\
  
```

The screenshot shows two dropdown menus. The first dropdown, under 'C:\Users\' in the command line, has 'Administrator', 'Guest', and 'WDAGUtilityAccount' as options. The second dropdown, under '\', has 'C\$\Scripts', 'Desktop\Scripts', and 'Scripts' as options. The command line ends with '\Script1.cmd</Command>'. Below the dropdowns is the closing tag for the LogonCommand and Configuration sections.

```

    \
  
```

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

Answer Area

```

<Configuration>
  <MappedFolders>
    <MappedFolder>
      <HostFolder>C:\Scripts</HostFolder>
      <ReadOnly>>true</ReadOnly>
    </MappedFolder>
  </MappedFolders>
  <LogonCommand>
    <Command>C:\Users\
  
```

The screenshot is identical to the previous one, but with red rectangular boxes highlighting the 'Administrator' option in the first dropdown and the 'C\$\Scripts' option in the second dropdown.

```

    \
  
```

NEW QUESTION 16

- (Exam Topic 4)

You have a computer named Computer1 that runs Windows 10 and is joined to an Active Directory domain named adatum.com.

A user named Admin1 signs in to Computer1 and runs the whoami command as shown in the following exhibit.

```

Command Prompt
c:\Users\admin1>whoami /user /groups /priv

USER INFORMATION
-----
User Name      SID

SeChangeNotifyPrivilege                           Bypass traverse checking
SeUndockPrivilege                                  Remove computer from docking statio
SeIncreaseWorkingSetPrivilege                      Increase a process working set
SeTimeZonePrivilege                                Change the time zone

C:\Users\admin1>
    
```

Use the drop-down menus to select the answer choice that completes each statement based on the information presented in the graphic.
 NOTE: Each correct selection is worth one point.

Answer Area

On Computer1, if Admin1 attempts to open Device Manager, [answer choice].

▼
Admin1 will be prompted for credentials
Admin1 will be prompted for consent
Admin1 will be denied access
Device Manager will open without a prompt

On Computer1, if Admin1 attempts to run the command prompt as an administrator, [answer choice].

▼
Admin1 will be prompted for credentials
Admin1 will be prompted for consent
Admin1 will be denied access
the command prompt will open without a prompt

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

On Computer1, if Admin attempts to open Device Manager, [answer choice].

▼
Admin1 will be prompted for credentials
Admin1 will be prompted for consent
Admin1 will be denied access
Device Manager will open without a prompt

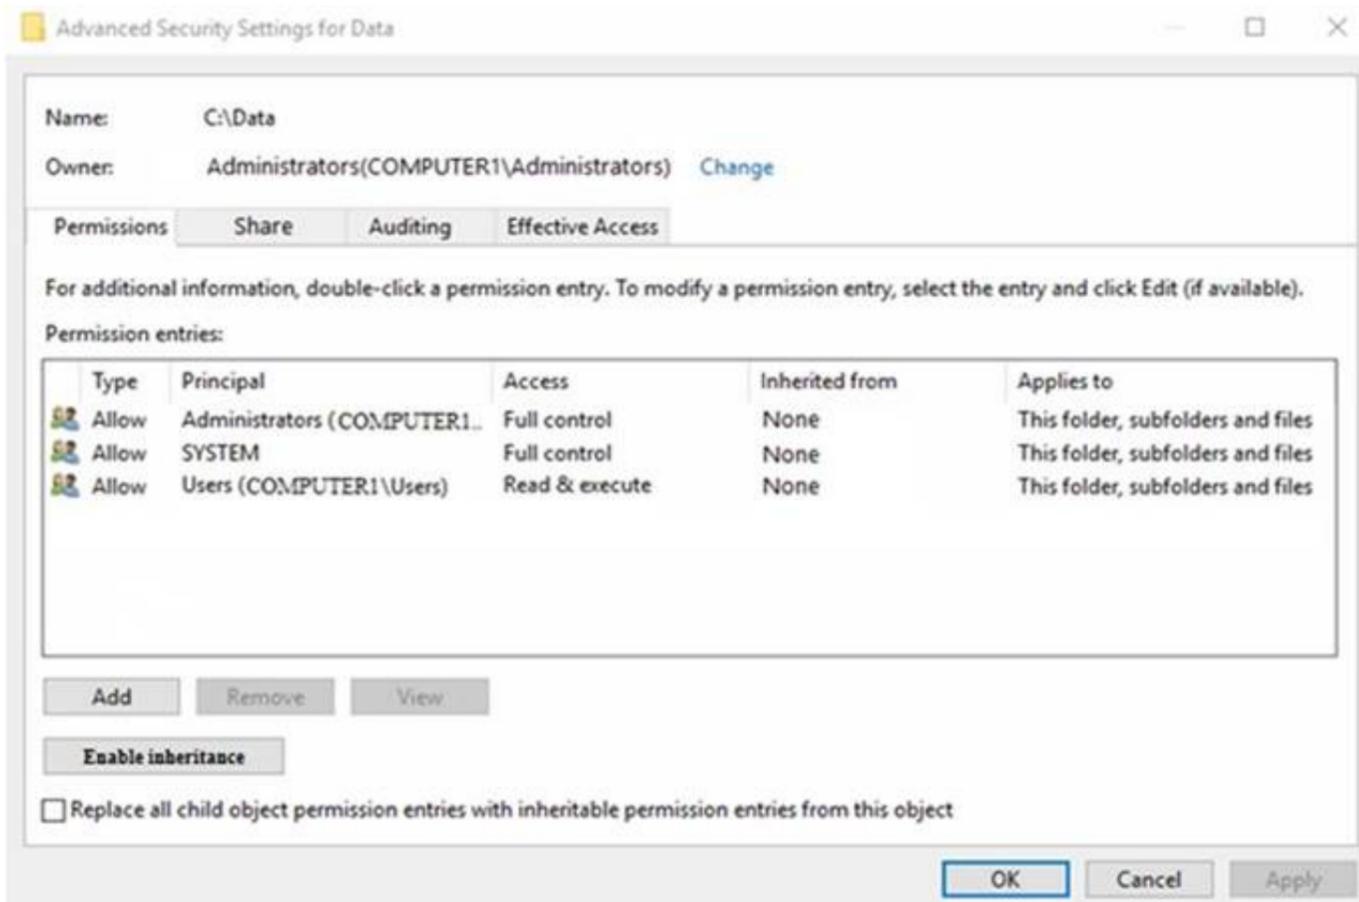

On Computer1, if Admin attempts to run the command prompt as an administrator, [answer choice].

▼
Admin1 will be prompted for credentials
Admin1 will be prompted for consent
Admin1 will be denied access
Device Manager will open without a prompt

NEW QUESTION 20

- (Exam Topic 4)

You have a computer named Computer1 that runs Windows 10. Computer1 contains a folder named Data on drive C. The Advanced Security Settings for the Data folder are shown in the exhibit. (Click the Exhibit tab.)

You share C:\Data as shown in the following table.

Group or user	Share permission
Administrators	Change
Users	Read
User1	Change

User1 is a member of the Users group.

Administrators are assigned Full control NTFS permissions to C:\Data.

For each of the following statements, select Yes if the statement is true. Otherwise, select No. NOTE: Each correct selection is worth one point.

Answer Area

Statements	Yes	No
User1 can read and write files when connected to \\Computer1\Data.	<input type="radio"/>	<input type="radio"/>
User1 can read and write files in C:\Data locally.	<input type="radio"/>	<input type="radio"/>
Administrators can change the NTFS permissions of files and folders when connected to \\Computer1\Data.	<input type="radio"/>	<input type="radio"/>

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

NO, NO, YES

"For example, for a resource, if you assign a user the Read permission and assign the Modify permission on a group that the same user is member of, the effective access permissions are a combination of the Read permissions and the modify permissions, which is modify permission. When you combine Permissions that include Deny permissions, NTFS will evaluate the the deny permissions before the allow permissions that are set on the same resource with explicit deny taking precedence over all Allow Permissions"

NEW QUESTION 21

- (Exam Topic 4)

Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution that might meet the stated goals. Some question sets might have more than one correct solution, while others might not have a correct solution.

After you answer a question in this section, you will NOT be able to return to it. As a result, these questions will not appear in the review screen.

Your network contains an Active Directory domain named contoso.com. The domain contains the users shown in the following table.

Name	Member of
User2	Domain Users
User3	Domain Admins
User4	Server Operators

You have a computer named Computer1 that runs Windows 10 and is in a workgroup.

A local standard user on Computer1 named User1 joins the computer to the domain and uses the credentials of User2 when prompted.

You need to ensure that you can rename Computer1 as Computer33. Solution: You use the credentials of User3 on Computer1. Does this meet the goal?

- A. Yes
- B. No

Answer: A

Explanation:

Renaming a domain-joined computer will also rename the computer account in the domain. To do this, you need domain administrator privileges. User3 is a domain administrator. References:
<https://docs.microsoft.com/en-us/windows/security/identity-protection/access-control/active-directory-security-g>

NEW QUESTION 26

- (Exam Topic 4)

You have a computer named Computer1 that has the following configurations:

- RAM: 4 GB
- CPU: 1.6 GHz
- Hard drive: 128 GB
- Operating system: Windows 10 Pro in S mode

You need to upgrade Computer1 to Windows 11. What should you do first?

- A. Increase the amount of RAM.
- B. Increase the storage capacity of the hard drive.
- C. Switch out of S mode.
- D. Upgrade the CPU.

Answer: C

NEW QUESTION 30

- (Exam Topic 4)

You have computers that run Windows 11 as shown in the following table.

Name	IP address	Joined to
Computer1	192.168.10.10	Active Directory
Computer2	192.168.10.15	Workgroup

You ping 192.168.10.15 from Computer1 and discover that the request timed out. You need to ensure that you can successfully ping 192.168.10.15 from Computer 1.

Solution: On Computer2, you allow incoming ICMFV6 traffic in Windows Defender Firewall. Does this meet the goal?

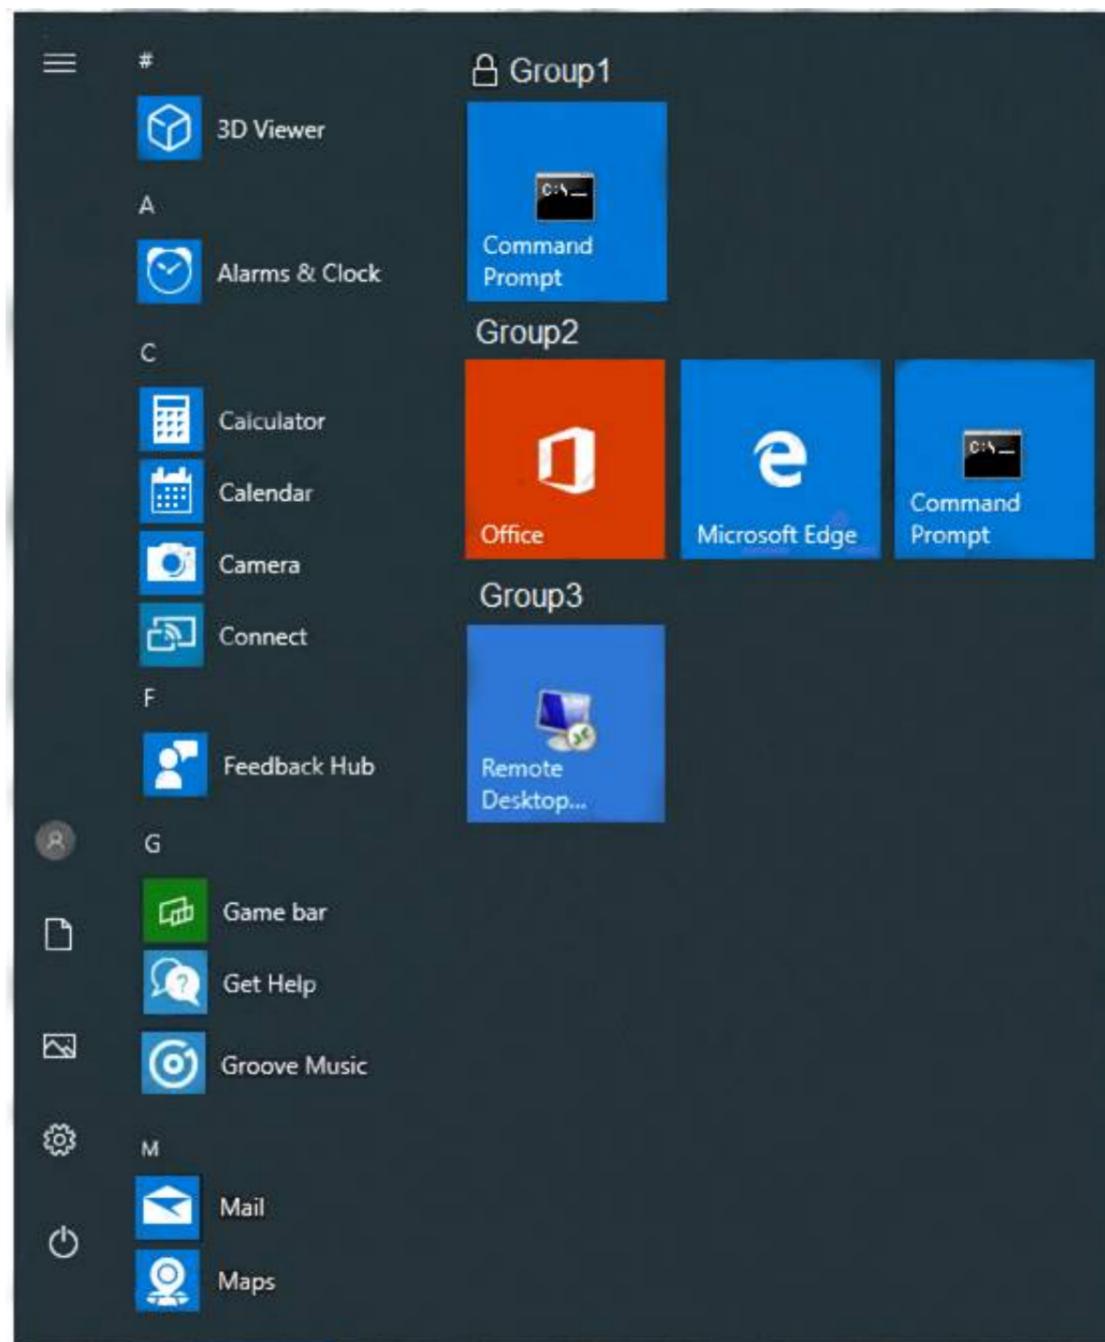

- A. Yes
- B. No

Answer: A

NEW QUESTION 35

- (Exam Topic 4)

You customize the Start menu on a computer that runs Windows 10 as shown in the following exhibit.

You need to add Remote Desktop Connection to Group1 and remove Group3 from the Start menu. Which two actions should you perform from the Start menu customizations? Each correct answer presents part of the solution. NOTE: Each correct selection is worth one point.

- A. Unlock Group!
- B. Remove Command Prompt from Group1.
- C. Delete Group3.
- D. Add Remote Desktop Connection to Group1.
- E. Rename Group3 as Group1.

Answer: AD

NEW QUESTION 38

- (Exam Topic 4)

You are troubleshooting Windows 10 updates that fail to install on a computer that runs Windows 10. You delete the contents of the SoftwareDistribution folder. You need to delete the signatures of the Windows Update packages. Which folder should you delete?

- A. %systemroot%\system32\catroot2
- B. %systemdrive%\recovery
- C. %systemroot%\WinSxS
- D. %systemdrive%\System Volume Information

Answer: A

Explanation:

References:

<https://tipsmake.com/how-to-delete-pending-updates-on-windows-10>

NEW QUESTION 40

- (Exam Topic 4)

Your company has several mobile devices that run Windows 10.

You need configure the mobile devices to meet the following requirements:

- > Windows updates may only be download when mobile devices are connect to Wi-Fi.
- > Access to email and the Internet must be possible at all times.

What should you do?

- A. Open the Setting app and select Update & Securit
- B. Then select and configure Change active hours.

- C. Open the Setting app and select Network & Internet
- D. Then select Change connection properties, and set the Metered connection option for cellular network connections to On.
- E. Open the Setting app and select Network & Internet Then select Data Usage and set a data limit.
- F. Open the Setting app and select Update & Security
- G. Then select and configure Delivery Optimization.

Answer: B

Explanation:

Reference:

<https://www.makeuseof.com/tag/5-ways-temporarily-turn-off-windows-update-windows-10/>

NEW QUESTION 43

- (Exam Topic 4)

Please wait while the virtual machine loads. Once loaded, you may proceed to the lab section. This may take a few minutes, and the wait time will not be deducted from your overall test time.

When the Next button is available, click it to access the lab section. In this section, you will perform a set of tasks in a live environment. While most functionality will be available to you as it would be in a live environment, some functionality (e.g., copy and paste, ability to navigate to external websites) will not be possible by design.

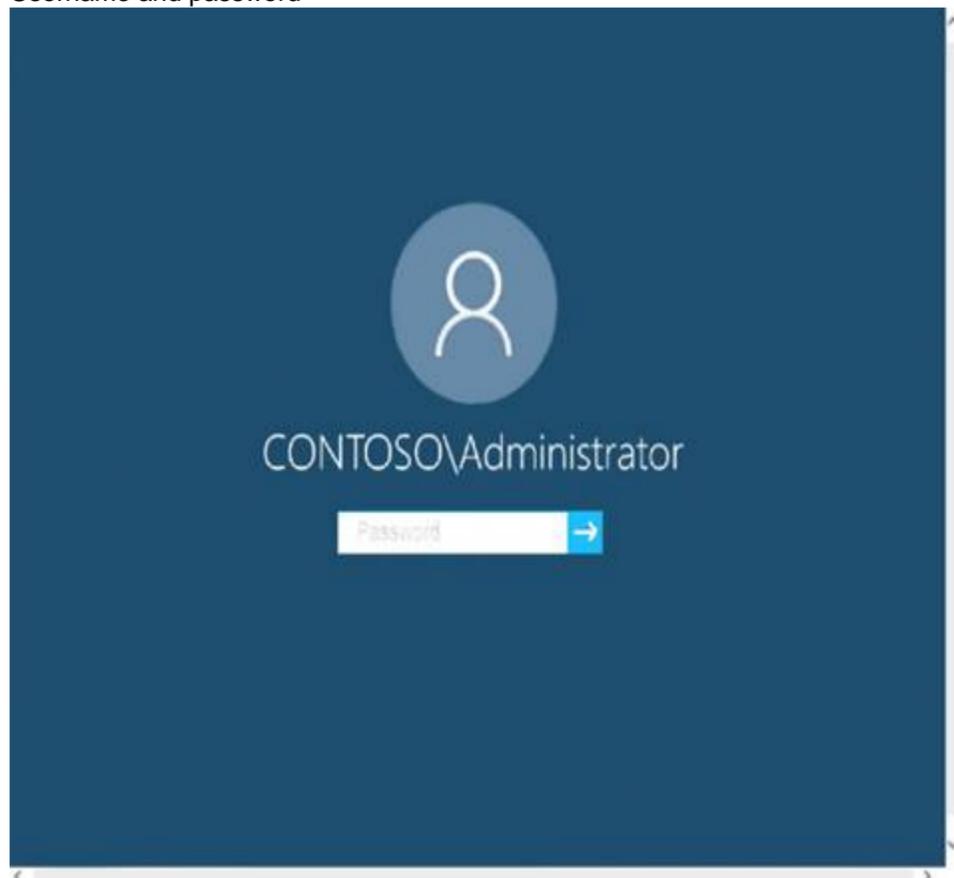

Scoring is based on the outcome of performing the tasks stated in the lab. In other words, it doesn't matter how you accomplish the task, if you successfully perform it, you will earn credit for that task.

Labs are not timed separately, and this exam may have more than one lab that you must complete. You can use as much time as you would like to complete each lab.

But, you should manage your time appropriately to ensure that you are able to complete the lab(s) and all other sections of the exam in the time provided.

Please note that once you submit your work by clicking the Next button within a lab, you will NOT be able to return to the lab.

Username and password

Username: Contoso/Administrator

Password: Passw0rd!

The following information is for technical support purposes only:

Lab Instance: 10921597

You need to create a file named File1.txt in a folder named Folder1 on the C drive of Client2. You need to ensure that a user named User1 can read the contents of File1.txt. The solution must prevent User1 from modifying the file. To complete this task, sign in to Client2 and perform the required action.

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

- > After creating File1.txt in Folder1, right-click the file and select Properties.
- > Access the Security tab, click Disable inheritance
- > Click on Remove all inherited permissions from this object, click Apply, and select Yes in the dialog box that appears.
- > Click OK
- > Back on the Security tab select Edit to change permissions.
- > Click Add, then enter User1 in the Enter the object names to select section.
- > Click Check Names, and then click OK.
- > Check only the Read box in the Allow column.
- > Click apply, Ok, and OK

NEW QUESTION 45

- (Exam Topic 4)

Your network contains an Active Directory domain named contoso.com. The domain contains a computer named Computer1 that runs Windows 10. Several user settings are configured in a Default Domain Policy Group Policy Object (GPO). Users sign in to Computer1 as shown in the following table.

Name	Created in/on	Member of
User1	Contoso.com	Domain Users
User2	Computer1	Administrators

You configure the following GPOs on Computer1:

- > Local Computer
- > Local Computer\User2
- > Local Computer\Administrators
- > Local Computer\Non-Administrators Each GPO has different user settings configured.

For each of the following statements, select Yes if the statement is true. Otherwise, select No.

Statements	Yes	No
The Local Computer GPO applies to User1.	<input type="radio"/>	<input type="radio"/>
The Local Computer\Administrators GPO applies to User2.	<input type="radio"/>	<input type="radio"/>
The Default Domain Policy GPO applies to User2.	<input type="radio"/>	<input type="radio"/>

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

Statements	Yes	No
The Local Computer GPO applies to User1.	<input type="radio"/>	<input checked="" type="radio"/>
The Local Computer\Administrators GPO applies to User2.	<input checked="" type="radio"/>	<input type="radio"/>
The Default Domain Policy GPO applies to User2.	<input type="radio"/>	<input checked="" type="radio"/>

NEW QUESTION 50

- (Exam Topic 4)

You deploy Windows 10 to several computers. The computers will be used by users who frequently present their desktop to other users. You need to prevent applications from generating toast notifications in the notification area. Which settings should you configure from the Settings app?

- A. Shared experiences
- B. Privacy
- C. Focus assist
- D. Tablet mode

Answer: C

Explanation:

Focus Assist will automatically hide incoming notifications, so they don't pop up and distract you while you're playing a game, giving a presentation, or using a full-screen application.

NEW QUESTION 53

- (Exam Topic 4)

Your network contains an Active Directory domain that is synced to a Microsoft Azure Active Directory (Azure AD) tenant. The company plans to purchase computers preinstalled with Windows 10 Pro for all users. The company has the following requirements:

- > The new computers must be upgraded to Windows 10 Enterprise automatically.
- > The new computers must be joined to Azure AD automatically when the user starts the new computers for the first time.
- > The users must not be required to accept the End User License Agreement (EULA).

You need to deploy the new computers. What should you do?

- A. Make use of the wipe and load refresh deployment method.
- B. Perform in-place upgrade on the new computers.
- C. Provide provisioning packages for the new computers.
- D. Make use of Windows Autopilot.

Answer: D

Explanation:

Windows Autopilot is a collection of technologies used to set up and pre-configure new devices, getting them ready for productive use. You can also use Windows Autopilot to reset, repurpose and recover devices.

The OEM Windows 10 installation on the new computers can be transformed into a "business-ready" state, applying settings and policies, installing apps, and even changing the edition of Windows 10 being used (e.g. from Windows 10 Pro to Windows 10 Enterprise) to support advanced features.

The only interaction required from the end user is to connect to a network and to verify their credentials. Everything beyond that is automated.

Reference:

<https://docs.microsoft.com/en-us/windows/deployment/windows-autopilot/windows-autopilot>

NEW QUESTION 56

- (Exam Topic 4)

You have a computer named Computer1 that runs Windows 10. You restart Computer1 by using Advanced startup and select Boot log. In which folder is the boot log file stored?

- A. C:\
- B. C:\Windows
- C. C:\Windows\debug
- D. C:\Windows\System32\LogFiles

Answer: B

Explanation:

Reference:
<https://winaero.com/enable-boot-log-windows-10/>

NEW QUESTION 59

- (Exam Topic 4)

You have a computer that runs Windows 10 and has the Windows Assessment and Deployment Kit (Windows ADK) installed. You need to perform the following tasks:

- Prepare a Windows PE (WinPE) working directory.
- Add scripting support to a WinPE image.
- Mount and unmount a WinPE image.

Which command should you use for each task? To answer, drag the appropriate commands to the correct tasks. Each command may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view content.

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

Copype.cmd Dism.exe Mount.exe

NEW QUESTION 60

- (Exam Topic 4)

You have a computer named Computer1 that runs Windows 10. Several users have signed in to Computer1 and have a profile. You create a taskbar modification file named LayoutModification.xml. You need to ensure that LayoutModification.xml will apply to all users who sign in to Computer1. To which folder should you copy LayoutModification.xml?

- A. C:\Users\Public\Public Desktop
- B. C:\Windows\ShellExperiences
- C. C:\Users\Default\AppData\Local\Microsoft\Windows\Shell\
- D. C:\Windows\System32\Configuration

Answer: C

Explanation:

Reference:
<https://docs.microsoft.com/en-us/windows/configuration/start-layout-xml-desktop>

NEW QUESTION 64

- (Exam Topic 4)

Your network contains an Active Directory domain named contoso.com. The domain contains a server named Server1 that runs Windows Server 2016 and a computer named Computer1 that runs Windows 10.

Server1 contains a share named Backup. All users can read and write data in Backup.

On Monday at 13:00, you configure Backup and Restore (Windows 7) on Computer1 to use the following settings:

- > Backup Destination: \\Server1\Backup
- > What do you want to back up?: Local Disk (D:), Include a system image of drives: System Reserved, (C:)

> Schedule: Daily at 23:00

You need to identify how many backups will be available on Thursday at 17:00.

What should you identify? To answer, select the appropriate options in the answer area. NOTE: Each correct selection is worth one point.

Local Disk (D:) backups:

<input type="checkbox"/> One backup that uses ZIP files <input type="checkbox"/> One backup that uses a VHDX file <input type="checkbox"/> Three backups that use ZIP files <input type="checkbox"/> Three backups that use VHDX files

System image backups of drive C:

<input type="checkbox"/> One backup that uses ZIP files <input type="checkbox"/> One backup that uses a VHDX file <input type="checkbox"/> Three backups that use ZIP files <input type="checkbox"/> Three backups that use VHDX files

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

References:

https://www.windowscentral.com/how-make-full-backup-windows-10#create_system_image_windows10https://www.windowscentral.com/how-make-full-backup-windows-10#create_system_image_windows10

NEW QUESTION 68

- (Exam Topic 4)

You have a computer that runs Windows 10 and contains the folders shown in the following table.

Name	Path
FolderA	C:\FolderA
FolderB	C:\FolderA\FolderB
FolderC	C:\FolderA\FolderB\FolderC

You create the groups shown in the following table.

Name	Members
Group1	User1, User2
Group2	User2, User3
Group3	User1, User3

On FolderA, you remove permission inheritance. To each folder, you assign the NTFS permissions shown in the following table.

Folder	Permission
FolderA	Modify to Group1 Read to Group2
FolderB	Write to Group2
FolderC	Read to Group3

For each of the following statements, select Yes if the statement is true. Otherwise, select No.

NOTE: Each correct selection is worth one point.

Statements

User1 can read and write all files in FolderC.

User2 can delete all files in FolderB.

User3 can delete all files in FolderC.

Yes **No**

<input type="radio"/>	<input type="radio"/>
<input type="radio"/>	<input type="radio"/>
<input type="radio"/>	<input type="radio"/>

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

YES YES NO

NEW QUESTION 73

- (Exam Topic 4)

Your domain contains named Computer named Computer1 that runs Windows 10. Computer1 does not have a TPM.

You need to be able to encrypt the C drive by using BitLocker Drive Encryption (BitLocker). The solution must ensure that the recovery key is stored in Active Directory.

Which two Group Policy settings should you configure? To answer, select the appropriate settings in the answer area.
 NOTE: Each correct selection is worth one point.

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

References:

<https://docs.microsoft.com/en-us/windows/security/information-protection/bitlocker/bitlocker-group-policy-setti>

NEW QUESTION 78

- (Exam Topic 4)

Your network contains an Active Directory domain. The domain contains the users shown in the following table.

Name	Member of
User1	Domain Admins
User2	Backup Operators

The domain contains a computer named Computer1. Computer1 contains the users shown in the following table.

Name	Member of
User3	Administrators
User4	Users

On Computer1, you create a restore point named RP1.

Which users can restore RP1 on Computer1? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

Answer Area

Can restore RP1 on Computer1 while Windows is running:

User3 only
User1 and User3 only
User3 and User4 only
User1, User2, and User3 only
User1, User3, and User4 only

Can restore RP1 if Computer1 restarts by using Advanced startup:

User3 only
User1 and User3 only
User3 and User4 only
User1, User2, and User3 only
User1, User3, and User4 only

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

Graphical user interface, text, application Description automatically generated

Reference:

NEW QUESTION 83

- (Exam Topic 4)

Please wait while the virtual machine loads. Once loaded, you may proceed to the lab section. This may take a few minutes, and the wait time will not be deducted from your overall test time.

When the Next button is available, click it to access the lab section. In this section, you will perform a set of tasks in a live environment. While most functionality will be available to you as it would be in a live environment, some functionality (e.g., copy and paste, ability to navigate to external websites) will not be possible by design.

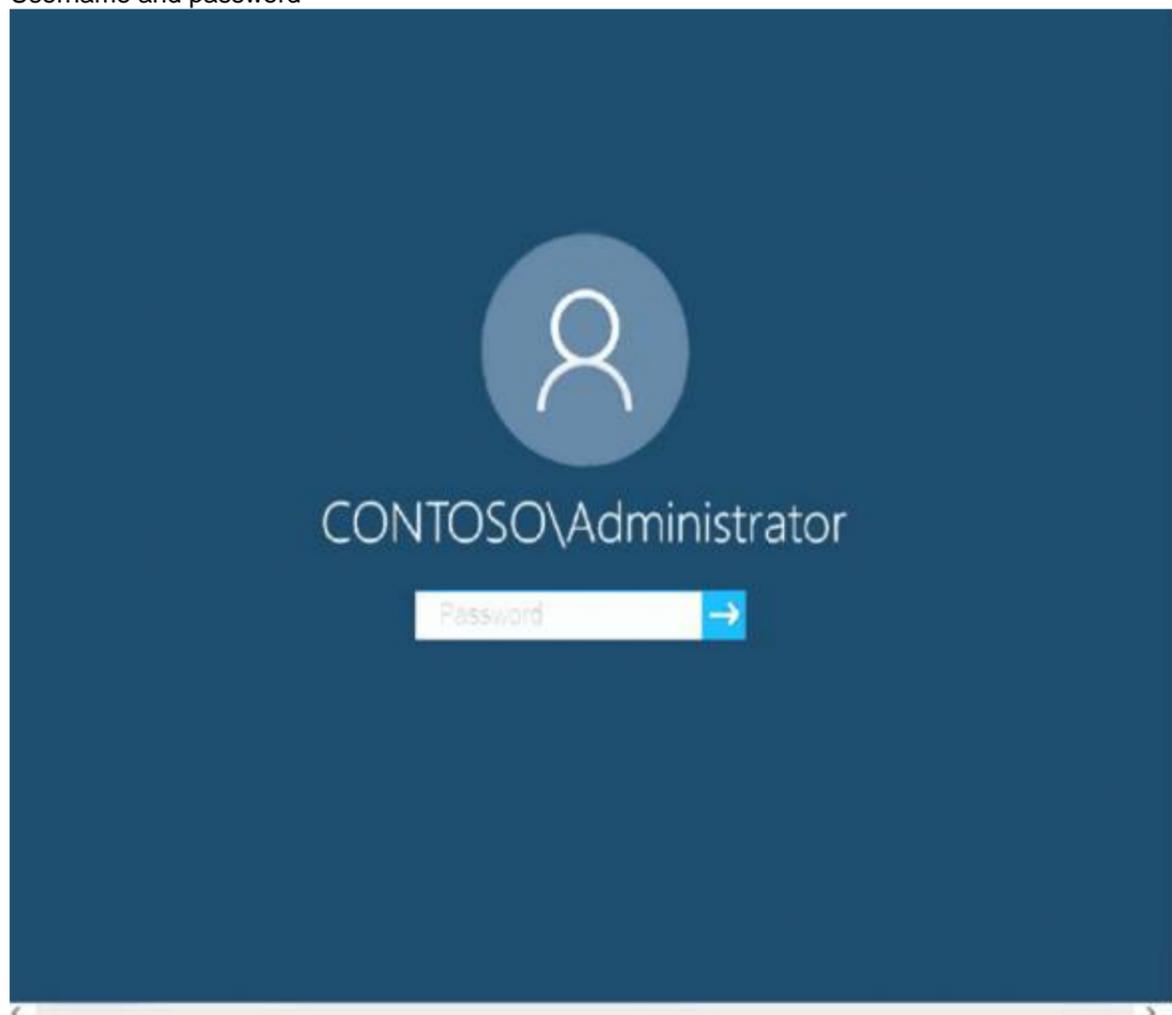

Scoring is based on the outcome of performing the tasks stated in the lab. In other words, it doesn't matter how you accomplish the task, if you successfully perform it, you will earn credit for that task.

Labs are not timed separately, and this exam may more than one lab that you must complete. You can use as much time as you would like to complete each lab.

But, you should manage your time appropriately to ensure that you are able to complete the lab(s) and all other sections of the exam in the time provided.

Please note that once you submit your work by clicking the Next button within a lab, you will NOT be able to return to the lab.

Username and password

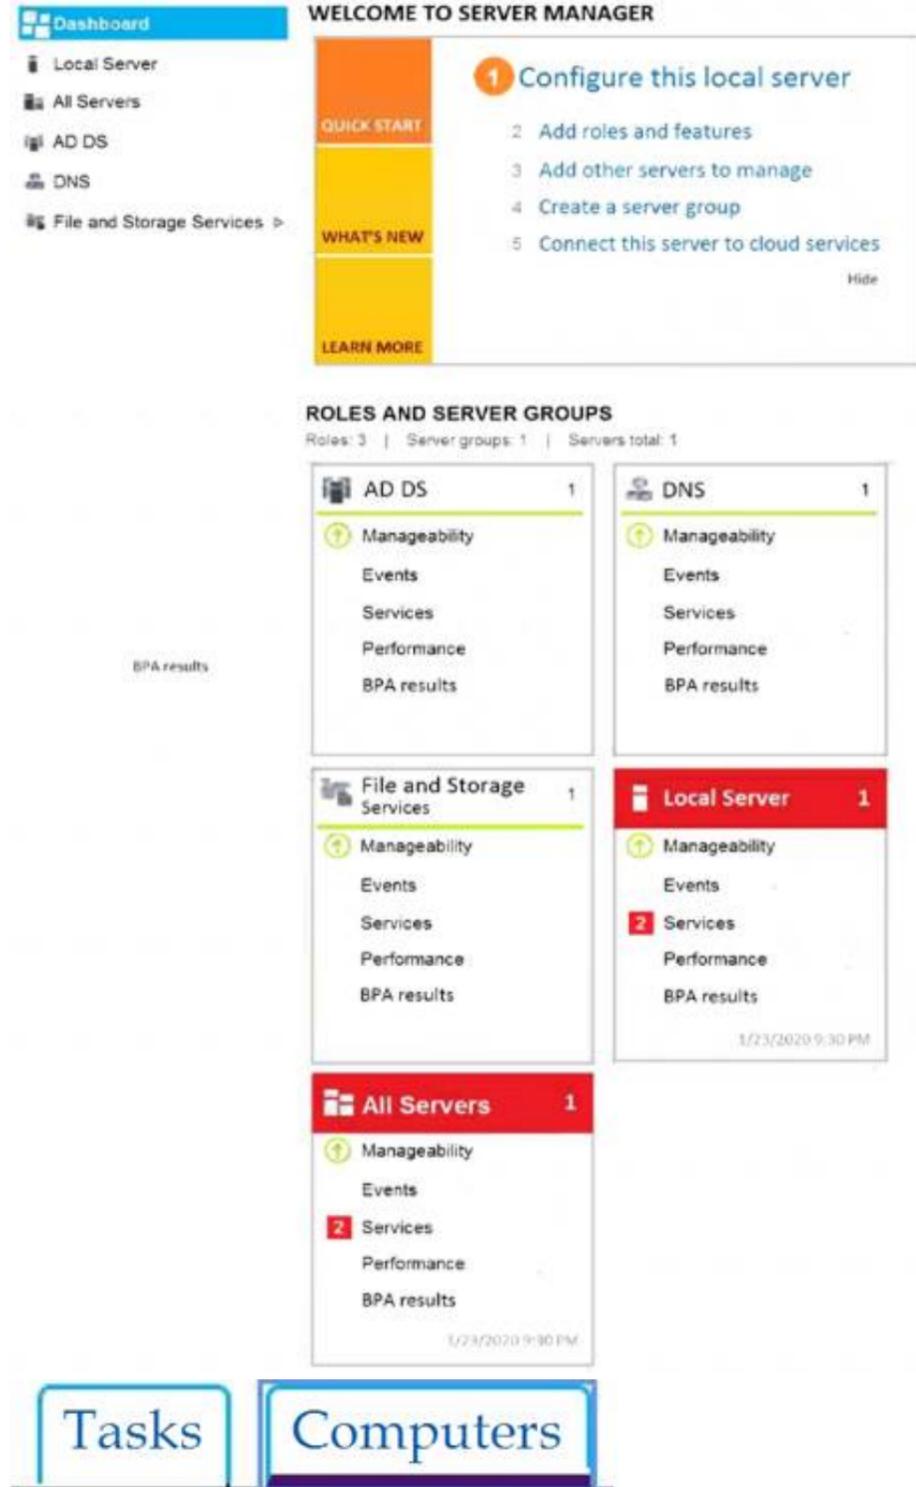

Use the following login credentials as needed:

To enter your password, place your cursor in the Enter password box and click on the password below.

Username: Contoso/Administrator

Password: Passw0rd!

The following information is for technical support purposes only: Lab Instance: 11145882

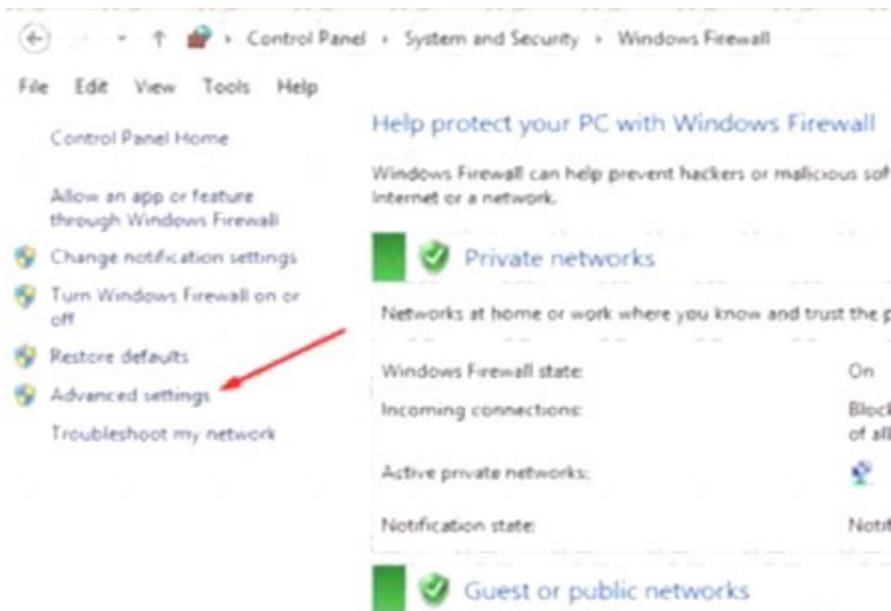

Administrators report that they cannot use Event Viewer to remotely view the event logs on Client3. You need to ensure that the administrators can access the event logs remotely on Client3. The solution must ensure that Windows Firewall remains enabled. To complete this task, sign in to the required computer or computers.

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

- * 1. Go to Control Panel -> System and Security -> Windows Firewall.
- * 2. Click on the Advanced settings link in the left-hand side.

* 3. Enable COM+ Network Access (DCOM-In).

* 4. Enable all the rules in the Remote Event Log Management group.

Reference:
<https://www.zubairalexander.com/blog/unable-to-access-event-viewer-on-a-remote-computer/>

NEW QUESTION 88

- (Exam Topic 4)

You plan to deploy Windows 10 Enterprise to company-owned devices. You capture a Windows 10 image file from a reference device.

You need to generate catalog files and answer files for the deployment.

What should you use for each file? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

Catalog file:

- Deployment Image Servicing and Management (DISM)
- Windows Configuration Designer
- Windows Deployment Services (WDS)
- Windows System Image Manager (Windows SIM)

Answer file:

- Deployment Image Servicing and Management (DISM)
- Windows Configuration Designer
- Windows Deployment Services (WDS)
- Windows System Image Manager (Windows SIM)

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

Graphical user interface, text, application Description automatically generated

References:

<https://docs.microsoft.com/en-us/windows-hardware/customize/desktop/wsim/open-a-windows-image-or-catalog-file>

NEW QUESTION 93

- (Exam Topic 4)

You have a computer named Client1 that runs Windows 10 and has Windows Sandbox enabled. You need to create a Windows Sandbox configuration file.

How should you format the file, and which file extension should you use? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

Answer Area

Format: YAML ▼
JSON
 XML
 YAML

Extension: .wsb ▼
 .sbx
 .vmcx
.wsb

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:
 Answer Area

Format: YAML ▼
JSON
 XML
YAML

Extension: .wsb ▼
 .sbx
 .vmcx
.wsb

NEW QUESTION 95

- (Exam Topic 4)

You have a file named Reg1.reg that contains the following content.

```
Windows Registry Editor Version 5.00
```

```
[HKEY_CLASSES_ROOT\Directory\Background\shell\Notepad]
```

```
[HKEY_CLASSES_ROOT\Directory\Background\shell\Notepad\command]
```

```
@="notepad.exe"
```

What is the effect of importing the file?

- A. A key named command will be renamed as notepad.exe.
- B. In a key named Notepad, the command value will be set to @="notepad.exe".
- C. In a key named command, the default value will be set to notepad.exe.

Answer: C

NEW QUESTION 100

- (Exam Topic 4)

Your network contains an Active Directory domain. The domain contains the users shown in the following table.

Name	Member of
User1	Group1
User2	Group1, Group2
User3	Group2

The domain contains a computer named Computer1 that runs Windows 10. Computer1 contains a folder named Folder1 that has the following permissions:

- > User2: Deny Write
- > Group1: Allow Read
- > Group2: Allow Modify

Folder1 is shared as Share1\$. Share1\$ has the following configurations:

- > Everyone: Allow Full control
- > Access-based enumeration: Enabled

For each of the following statements, select Yes if the statement is true. Otherwise, select No.

NOTE: Each correct selection is worth one point.

Statements

User1 can list files in \\Computer1\Share1\$.

Yes

No

User2 can list files in \\Computer1\Share1\$.

If User3 connects to \\Computer1 from File Explorer, Share1\$ will be visible.

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:
 YES, YES, NO

References:

<https://www.varonis.com/blog/ntfs-permissions-vs-share/>

<http://www.ntfs.com/ntfs-permissions-file-advanced.htm>

<https://docs.microsoft.com/en-us/windows-server/storage/dfs-namespaces/enable-access-based-enumeration-on>

NEW QUESTION 103

- (Exam Topic 4)

You have a computer named Computer1. Computer1 runs Windows 10 Pro. Computer1 has a cellular connection and a Wi-Fi connection. You want to prevent Computer1 from using the cellular connection unless a you manually connects to the cellular network. What should you do?

To complete this task, sign in to the required computer or computers.

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

- Select the Network icon. icon on the lower right corner of the taskbar, and then select the cellular network
- Clear the Let Windows manage this connection check box.

Reference:

<https://support.microsoft.com/en-za/help/10739/windows-10-cellular-settings>

NEW QUESTION 108

- (Exam Topic 4)

Your network contains an Active Directory domain. The domain contains a computer named Computer1 that runs Windows 10. The domain contains the users shown in the following table.

Name	Member of
Admin1	Domain Admins, Group1
User1	Group1
User2	Group2

Computer1 has four printers as shown in the following table.

Name	Type	Added by	Permissions
Printer1	Local printer	Admin1	Print: Group1 Manage the printer: Group1
Printer2	Network printer	Admin1	Print: Domain Users Manage the printer: Domain Users
Printer3	Local printer	User1	Print: Group1 Manage the printer: Group1
Printer4	Local printer	User2	Print: Domain Users Manage the printer: Domain Users

Which printers will be available to User1 when the user signs in to Computer1?

- A. Printer3 only
- B. Printer1 and Printer3 only
- C. Printer1, Printer2, and Printer3 only
- D. Printer1, Printer3, and Printer4 only
- E. Printer1, Printer2, Printer3, and Printer4

Answer: E

NEW QUESTION 110

- (Exam Topic 4)

You have a computer named Computer1 that runs Windows 10. You need to enable boot logging on Computer1. What should you do?

- A. At a command prompt, run the bcdboot.exe command and specify the /v parameter.
- B. From the Settings app, configure the Start settings.
- C. From System Properties in Control Panel, configure the Startup and Recovery settings.
- D. From System Configuration configure the Boot settings.

Answer: D

Explanation:

Reference:

<https://www.windowscentral.com/how-enable-boot-log-windows-10>

NEW QUESTION 111

- (Exam Topic 4)

Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution that might meet the stated goals. Some question sets might have more than one correct solution, while others might not have a correct solution.

After you answer a question in this section, you will NOT be able to return to it. As a result, these questions will not appear in the review screen.

You have two computers named Computer1 and Computer2 that run Windows 10.

You have an Azure Active Directory (Azure AD) user account named admin@contoso.com that is in the local Administrators group on each computer.

You sign in to Computer1 by using admin@contoso.com.

You need to ensure that you can use Event Viewer on Computer1 to connect to the event logs on Computer2. Solution: On Computer2, you run the winrm quickconfig command.

Does this meet the goal?

- A. Yes
- B. No

Answer: B

Explanation:

Windows Remote Management is a component of the Windows Hardware Management features that manage server hardware locally and remotely.

References:

<https://docs.microsoft.com/en-us/windows/win32/winrm/about-windows-remote-management>

NEW QUESTION 116

- (Exam Topic 4)

You are troubleshooting the failed installation of a VPN application on a device. During the installation, the application displays a Stop error, and you must restart the device. After the restart you discover that the device can no longer connect to the network. What should you use to resolve the issue?

- A. Network reset
- B. Network Adapter troubleshooter
- C. Incoming Connections troubleshooter
- D. Remote Assistance

Answer: B

NEW QUESTION 120

- (Exam Topic 4)

Your network contains an Active Directory domain. The domain contains computers that run Windows 10. You must ensure that Windows BitLocker Drive Encryption is enabled on all client computers, even though a Trusted Platform Module (TPM) chip is installed in only some of them.

You need to accomplish this goal by using one Group Policy object (GPO). What should you do?

- A. Enable the Allow enhanced PINs for startup policy setting, and select the Allow BitLocker without a compatible TPM check box
- B. Enable the Enable use of BitLocker authentication requiring preboot keyboard input on slates policy setting, and select the Allow BitLocker without a compatible TPM check box
- C. Enable the Require additional authentication at startup policy setting, and select the Allow BitLocker without a compatible TPM check box
- D. Enable the Control use of BitLocker on removable drives policy setting, and select the Allow BitLocker without a compatible TPM check box

Answer: C

Explanation:

We need to allow Windows BitLocker Drive Encryption on all client computers (including client computers that do not have Trusted Platform Module (TPM) chip).

We can do this by enabling the option to allow BitLocker without a compatible TPM in the group policy. The "Allow BitLocker without a compatible TPM" option is a checkbox in the "Require additional authentication at startup" group policy setting. To access the "Allow BitLocker without a compatible TPM" checkbox, you need to first select Enabled on the "Require additional authentication at startup" policy setting.

Reference:

<https://docs.microsoft.com/en-us/windows/security/information-protection/bitlocker/bitlocker-group-policy-setti>

NEW QUESTION 123

- (Exam Topic 4)

You have a computer named Computer1 that runs Windows 10.

The relevant services on Computer1 are shown in the following table.

Name	Startup type	Status	Dependent on
Service1	Automatic	Stopped	Service2, Service3
Service2	Automatic	Stopped	Service6
Service3	Disabled	Running	None
Service4	Disabled	Stopped	Service5
Service5	Automatic	Running	None
Service6	Manual	Stopped	None

Which service will start after you restart Computer1?

- A. Service3 and Services only
- B. Service 1, Setvice2. and Services
- C. Service2, Services, and Service6
- D. Services only

Answer: C

Explanation:

Service1 cannot start because it is dependent on Service3 which is disabled.
 Service2 will start because it is set to Automatic. Service2 starting will cause Service6 to start. Service3 will not start because it is disabled.
 Service4 will not start because it is disabled.
 Service5 will start because it is set to Automatic and is not dependent on any other services. Service6 will start because Service2 is dependent on Service6.

NEW QUESTION 127

- (Exam Topic 4)

Your company has a Remote Desktop Gateway (RD Gateway).
 You have a server named Server1 that is accessible by using Remote Desktop Services (RDS) through the RD Gateway.
 You need to configure a Remote Desktop connection to connect through the gateway. Which setting should you configure?

- A. Connection settings
- B. Server authentication
- C. Local devices and resources
- D. Connect from anywhere

Answer: D

NEW QUESTION 129

- (Exam Topic 4)

You have a computer named Client1 that runs Windows 11 Home. You need to ensure that you can create virtual machines on Client1.
 Which four actions should you perform in sequence? To answer, move the appropriate actions from the list of actions to the answer area and arrange them in the correct order.

Actions

Answer Area

Restart the operating system

Enter a Windows 11 Pro product key

Enter a Windows 11 Enterprise product key

From Programs and Features, enable the Hyper-V Windows feature

From the Activation settings in the Settings app, select **Change product key**

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

Graphical user interface, application Description automatically generated

NEW QUESTION 134

- (Exam Topic 4)

You have a workgroup computer named Computer1 that runs Windows 10. Computer1 has the users accounts shown in the following table:

Name	Member of
User1	Administrators
User2	Users, Administrators
User3	Users

Computer1 has the local Group Policy shown in the following table.

Setting	Value
Startup script	ScriptA1
Shutdown script	ScriptA2
Logon script	ScriptA3
Logoff script	ScriptA4

You create the Local Computer\Administrators policy shown in the following table.

Setting	Value
Logon script	ScriptB1
Logoff script	ScriptB2

You create the Local Computer\Non-Administrators policy shown in the following table.

Setting	Value
Logon script	ScriptC1
Logoff script	ScriptC2

For each of the following statements, select Yes if the statement is true. Otherwise, select No.

Statements	Yes	No
If User1 shuts down Computer1, script ScriptA2 will run.	<input type="radio"/>	<input type="radio"/>
If User2 signs in to Computer1, scripts ScriptA3, ScriptB1, and ScriptC1 will run.	<input type="radio"/>	<input type="radio"/>
If User3 signs out of Computer1, scripts ScriptC2 and ScriptA4 will run.	<input type="radio"/>	<input type="radio"/>

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

Reference:
[https://docs.microsoft.com/en-us/previous-versions/windows/it-pro/windows-vista/cc766291\(v=ws.10\)](https://docs.microsoft.com/en-us/previous-versions/windows/it-pro/windows-vista/cc766291(v=ws.10))

NEW QUESTION 136

- (Exam Topic 4)

You have a computer named Computer1 that runs Windows10. Computer1 is in a workgroup. Computer1 contains the users shown in the following table.

Name	Member of
User1	Group1
User2	Group1
User3	Group1
User4	Users
Admin1	Administrators

You need to apply the same Group Policy settings to only User1, User2 and User3. The solution must use a minimum number of local Group Policy objects (GPOs).

How many local GPOs should you create?

- A. 1
- B. 2
- C. 3

Answer: A

Explanation:

You can use security filtering to restrict the GPO to the required users. Only users with the Read and Apply Group Policy permissions will have the GPO applied to them.

NEW QUESTION 137

- (Exam Topic 4)

You have a computer that runs Windows 11 and hosts the Hyper-V virtual machines shown in the following table.

Name	Generation	Configuration version
VM1	1	9.0
VM2	1	10.0
VM3	2	8.0
VM4	2	10.0

You need to install Windows 11 on a virtual machine. On which virtual machine can you install Windows 11?

- A. VM2only
- B. VM4only
- C. VM3 and VM4 only
- D. VM2 and VM4 only
- E. VM1,VM2,VM3, andVM4

Answer: E

NEW QUESTION 138

- (Exam Topic 4)

A user has a computer that runs Windows 10.The user has access to the following storage locations:

- > A USB flash drive
- > Microsoft OneDrive
- > OneDrive for Business
- > A drive mapped to network share
- > A secondary partition on the system drive

You need to configure Back up using File History from the Settings app.

Which two storage locations can you select by using File History? Each correct answer presents complete solution.

NOTE: Each correct selection is worth one point.

- A. OneDrive for Business
- B. OneDrive
- C. the USB flash drive
- D. the secondary partition on the system drive
- E. the drive mapped to a network share

Answer: CE

NEW QUESTION 143

- (Exam Topic 4)

You are troubleshooting the network connectivity of a computer that runs Windows 10. The computer is connected physically to the network but rejects network traffic from an external source. You need to reinstall the TCP/IP stack on the computer. What should you run?

- A. the netsh int ip reset command
- B. the Resec-NetAdapcerAdvancedPropercy cmdlet
- C. the netcf g -d command
- D. the Debug-NetworkController cmdlet

Answer: A

Explanation:

Reference: <https://howtofix.guide/reset-tcp-ip/>

NEW QUESTION 144

- (Exam Topic 4)

Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution that might meet the stated goals. Some question sets might have more than one correct solution, while others might not have a correct solution.

After you answer a question in this section, you will NOT be able to return to it. As a result, these questions will not appear in the review screen.

Your network contains an Active Directory domain named contoso.com. The domain contains the users shown in the following table.

Name	Member of
User2	Domain Users
User3	Domain Admins
User4	Server Operators

You have a computer named Computer1 that runs Windows 10 and is in a workgroup.

A local standard user on Computer1 named User1 joins the computer to the domain and uses the credentials of User2 when prompted.

You need to ensure that you can rename Computer1 as Computer33. Solution: You use the credentials of User2 on Computer1.

Does this meet the goal?

- A. Yes
- B. No

Answer: B

Explanation:

Renaming a domain-joined computer will also rename the computer account in the domain. To do this, you need domain administrator privileges. User2 is a domain user, not an administrator. Use User3's credentials instead. References: <https://docs.microsoft.com/en-us/windows/security/identity-protection/access-control/active-directory-security-g>

NEW QUESTION 149

- (Exam Topic 4)

You have a computer that runs Windows 11 and has Windows Sandbox enabled. You need to configure a Windows Sandbox environment. The solution must meet the following requirements:

- Support a virtual GPU.
- Mount the C:\Temp folder as read only.
- Prevent users from copying files to the sandbox by using the clipboard.

How should you complete the configuration file? To answer, drag the appropriate values to the correct targets. Each value may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view content.

Values	Answer Area
<input type="text" value="Default"/>	<pre> <Configuration> <VGpu> <input type="text"/> </VGpu> <Networking>Disable</Networking> <MappedFolders> <MappedFolder> <HostFolder>C:\temp</HostFolder> <ReadOnly> <input type="text"/> </ReadOnly> </MappedFolder> </MappedFolders> <LogonCommand> <Command>C:\users\WDAGUtilityAccount\Desktop\Temp\startup.cmd</Command> </LogonCommand> <ProtectedClient> <input type="text"/> </ProtectedClient> <ClipboardRedirection>Default</ClipboardRedirection> <MemoryInMB>6144</MemoryInMB> </Configuration> </pre>
<input type="text" value="Disable"/>	
<input type="text" value="Enable"/>	
<input type="text" value="False"/>	
<input type="text" value="True"/>	

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

Answer Area

```

<Configuration>
  <VGpu>  </VGpu>
  <Networking>Disable</Networking>
  <MappedFolders>
    <MappedFolder>
      <HostFolder>C:\temp</HostFolder>
      <ReadOnly>  </ReadOnly>
    </MappedFolder>
  </MappedFolders>
  <LogonCommand>
    <Command>C:\users\WDAGUtilityAccount\Desktop\Temp\startup.cmd</Command>
  </LogonCommand>
  <ProtectedClient>  </ProtectedClient>
  <ClipboardRedirection>Default</ClipboardRedirection>
  <MemoryInMB>6144</MemoryInMB>
</Configuration>

```

NEW QUESTION 151

- (Exam Topic 4)

Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution that might meet the stated goals. Some question sets might have more than one correct solution, while others might not have a correct solution.

After you answer a question in this section, you will NOT be able to return to it. As a result, these questions will not appear in the review screen.

Your network contains an Active Directory domain. The domain contains a computer named Computer1 that runs Windows 8.1.

Computer1 has apps that are compatible with Windows 10.

You need to perform a Windows 10 in-place upgrade on Computer1.

Solution: You copy the Windows 10 installation media to a Microsoft Deployment Toolkit (MDT) deployment share. You create a task sequence, and then you run the MDT deployment wizard on Computer1.

Does this meet the goal?

- A. Yes
- B. No

Answer: A

Explanation:

Reference:

<https://docs.microsoft.com/en-us/windows/deployment/deploy-windows-mdt/upgrade-to-windows-10-with-the>

NEW QUESTION 154

- (Exam Topic 4)

Your network contains an Active Directory domain named adatum.com. The domain contains two computers named Computer1 and Computer2 that run Windows 10.

The domain contains the user accounts shown in the following table.

Name	Member of
User1	Domain Admins
User2	Domain Users
User3	Domain Users

Computer2 contains the local groups shown in the following table.

Name	Members
Group1	ADATUM\User2 ADATUM\User3
Group2	ADATUM\User2
Group3	ADATUM\User3
Administrators	ADATUM\Domain Admins ADATUM\User3
Remote Desktop Users	Group1

The relevant user rights assignments for Computer2 are shown in the following table.

Policy	Security Setting
Allow log on through Remote Desktop Services	Administrators, Remote Desktop Users
Deny log on through Remote Desktop Services	Group2
Deny log on locally	Group3

For each of the following statements, select Yes if the statement is true. Otherwise, select No.

NOTE: Each correct selection is worth one point.

Statements	Yes	No
User1 can establish a Remote Desktop session to Computer2.	<input type="radio"/>	<input type="radio"/>
User2 can establish a Remote Desktop session to Computer2.	<input type="radio"/>	<input type="radio"/>
User3 can establish a Remote Desktop session to Computer2.	<input type="radio"/>	<input type="radio"/>

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

Box 1: Yes

User1 is an administrator and has the Allow log on through Remote Desktop Services.

Box 2: No

User2 is a member of Group2 which has the Deny log on through Remote Desktop Services. Box 3: Yes

User3 is a member of the administrators group and has the Allow log on through Remote Desktop Services.

Note: Deny permissions take precedence over Allow permissions. If a user belongs to two groups, and one of them has a specific permission set to Deny, that user is not able to perform tasks that require that permission even if they belong to a group that has that permission set to Allow.

References:

<https://docs.microsoft.com/en-us/azure/devops/organizations/security/about-permissions?view=azure-devops&ta>

NEW QUESTION 158

- (Exam Topic 4)

You have a computer named Computer1 that runs Windows 10. Computer1 connects to multiple wireless networks.

You need to view the wireless networks to which Computer1 connects. What should you use?

- A. the System log in Event Viewer
- B. Wi-Fi in the Settings app
- C. the properties of the wireless adapter in Network Connections in Control Panel
- D. the Details tab for the wireless adapter in Device Manager

Answer: B

Explanation:

Reference:

<https://www.windowscentral.com/how-connect-wi-fi-network-windows-10>

NEW QUESTION 161

- (Exam Topic 4)

Your network contains an Active Directory domain. The domain contains 10 computers that run Windows 10. Users in the finance department use the computers.

You have a computer named Computer1 that runs Windows 10.

From Computer1, you plan to run a script that executes Windows PowerShell commands on the finance department computers.

You need to ensure that you can run the PowerShell commands on the finance department from Computer1.

What should you do on the finance department computers?

- A. From the local Group Policy, enable the Allow Remote Shell Access setting.
- B. From the local Group Policy, enable the Turn on Script Execution setting.
- C. From the Windows PowerShell, run the Enable-MMAgent cmdlet.
- D. From the Windows PowerShell, run the Enable-PSRemoting cmdlet.

Answer: D

Explanation:

References:

<https://docs.microsoft.com/en-us/powershell/module/microsoft.powershell.core/enable-psremoting?view=powershell-6>

NEW QUESTION 165

- (Exam Topic 4)

You have an app named App1 that uses an on-premises Microsoft SQL Server database named DB1. You plan to migrate DB1 to an Azure SQL managed instance.

You need to enable customer-managed Transparent Data Encryption (TDE) for the instance. The solution must maximize encryption strength.

Which type of encryption algorithm and key length should you use for the TDE protector?

- A. RSA2048
- B. RSA4096
- C. RSA3072
- D. AES256

Answer: D

NEW QUESTION 170

- (Exam Topic 4)

Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution that might meet the stated goals. Some question sets might have more than one correct solution, while others might not have a correct solution.

After you answer a question in this section, you will NOT be able to return to it. As a result, these questions will not appear in the review screen.

A user named User1 has a computer named Computer1 that runs Windows 10. Computer1 is joined to an Azure Active Directory (Azure AD) tenant named contoso.com. User1 joins Computer1 to contoso.com by using user1@contoso.com.

Computer1 contains a folder named Folder1. Folder1 is in drive C and is shared as Share1. Share1 has the permission shown in the following table.

Group	Share permission
Everyone	Full control
AzureAD:user1@contoso.com	Owner

A user named User2 has a computer named Computer2 that runs Windows 10. User2 joins Computer2 to contoso.com by using user2@contoso.com.

User2 attempts to access Share1 and receives the following error message: "The username or password is incorrect."

You need to ensure that User2 can connect to Share1.

Solution: In Azure AD, you create a group named Group1 that contains User1 and User2. You grant Group1 Change access to Share1.

Does this meet the goal?

- A. Yes
- B. No

Answer: A

Explanation:

References:

<https://docs.microsoft.com/en-us/azure/storage/files/storage-files-active-directory-enable#assign-access-permiss>

NEW QUESTION 175

- (Exam Topic 4)

Please wait while the virtual machine loads. Once loaded, you may proceed to the lab section. This may take a few minutes, and the wait time will not be deducted from your overall test time.

When the Next button is available, click it to access the lab section. In this section, you will perform a set of tasks in a live environment. While most functionality will be available to you as it would be in a live environment, some functionality (e.g., copy and paste, ability to navigate to external websites) will not be possible by design.

Scoring is based on the outcome of performing the tasks stated in the lab. In other words, it doesn't matter how you accomplish the task, if you successfully perform it, you will earn credit for that task.

Labs are not timed separately, and this exam may more than one lab that you must complete. You can use as much time as you would like to complete each lab.

But, you should manage your time appropriately to ensure that you are able to complete the lab(s) and all other sections of the exam in the time provided.

Please note that once you submit your work by clicking the Next button within a lab, you will NOT be able to return to the lab.

Username and password

Use the following login credentials as needed:

To enter your password, place your cursor in the Enter password box and click on the password below.

Username: Contoso/Administrator

Password: Passw0rd!

The following information is for technical support purposes only: Lab Instance: 11145882

The screenshot shows the Windows Server Manager interface. On the left is a navigation pane with 'Local Server', 'All Servers', 'AD DS', 'DNS', and 'File and Storage Services'. The main area is titled 'WELCOME TO SERVER MANAGER' and contains a 'QUICK START' list with five steps: 1. Configure this local server, 2. Add roles and features, 3. Add other servers to manage, 4. Create a server group, and 5. Connect this server to cloud services. Below this is the 'ROLES AND SERVER GROUPS' section, which shows a grid of role cards for 'AD DS', 'DNS', 'File and Storage Services', 'Local Server', and 'All Servers'. Each card lists sub-items like 'Manageability', 'Events', 'Services', 'Performance', and 'BPA results'. At the bottom, there are two buttons labeled 'Tasks' and 'Computers'.

Users who attempt to sign in to the domain from Client3 report that the sign-ins fail. You need to resolve the issue. To complete this task, sign in to the required computer or computers.

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

- Use a local administrator account to log on to the computer.
- Select Start, press and hold (or right-click) Computer > Properties.
- Select Change settings next to the computer name.
- On the Computer Name tab, select Change.
- Under the Member of heading, select Workgroup, type a workgroup name, and then select OK.

- When you are prompted to restart the computer, select OK.
- On the Computer Name tab, select Change again.
- Under the Member of heading, select Domain, and then type the domain name.
- Select OK, and then type the credentials of the user who has permissions in the domain.
- When you are prompted to restart the computer, select OK.
- Restart the computer.

NEW QUESTION 178

- (Exam Topic 4)

You have a computer that runs Windows 10 and is joined to Azure Active Directory (Azure AD). You attempt to open Control Panel and receive the error message shown on the following exhibit.

You need to be able to access Control Panel. What should you modify?

- A. the PowerShell execution policy
- B. the Local Group Policy
- C. the Settings app
- D. a Group policy preference

Answer: B

Explanation:

References:

<https://windows10skill.com/this-operation-has-been-cancelled-due-to-restrictions-in-effect-on-this-pc/>

NEW QUESTION 180

- (Exam Topic 4)

Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution that might meet the stated goals. Some question sets might have more than one correct solution, while others might not have a correct solution.

After you answer a question in this section, you will NOT be able to return to it. As a result, these questions will not appear in the review screen.

You have a workgroup computer that runs Windows 10. The computer contains the local user accounts shown in the following table.

Name	Member of
Administrator	Administrators
User1	Administrators
User2	Users
User3	Users

You need to configure the desktop background for User1 and User2 only.

Solution: You create two new local Group Policy Objects (GPOs) and apply one GPO to User1 and the other GPO to User2. You configure the Desktop Wallpaper setting in each GPO.

Does this meet the goal?

- A. Yes
- B. No

Answer: A

Explanation:

Reference:

<https://www.windowscentral.com/how-apply-local-group-policy-settings-specific-users-windows-10>

NEW QUESTION 181

- (Exam Topic 4)

You have 100 computers that run Windows 10 and are members of an Active Directory domain.

Two support technicians named Tech1 and Tech2 will be responsible for monitoring the performance of the computers.

You need to configure the computers to meet the following requirements:

- Ensure that Tech1 can create and manage Data Collector Sets (DCSs).

- > Ensure that Tech2 can start and stop the DCSs.
- > Use the principle of least privilege.

To which group should you add each technician? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

Answer Area

Tech1: ▼

Event Log Readers
Performance Log Users
Performance Monitor Users
Remote Management Users

Tech2: ▼

Event Log Readers
Performance Log Users
Performance Monitor Users
Remote Management Users

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

Reference:

<https://docs.microsoft.com/en-us/windows/security/identity-protection/access-control/active-directory-security-g>

NEW QUESTION 183

- (Exam Topic 4)

A user has a computer that runs Windows 10.

When the user connects the computer to the corporate network, the user cannot access the internal corporate servers. The user can access servers on the Internet.

You run the ipconfig command and receive the following output.

```

Connection-specific DNS Suffix . :
Description . . . . . : Ethernet 1
Physical Address. . . . . : 00-50-B6-7B-E4-81
DHCP Enabled. . . . . : Yes
Autoconfiguration Enabled . . . . : Yes
Link-local IPv6 Address . . . . . : fe80::5d56:3419:e83b:3c46%17(Preferred)
IPv4 Address. . . . . : 192.168.0.121(Preferred)
Subnet Mask . . . . . : 255.255.255.0
Lease Obtained. . . . . : Wednesday, October 31, 2018 8:07:14 AM
Lease Expires . . . . . : Wednesday, October 31, 2018 8:07:14 PM
Default Gateway . . . . . : 192.168.0.1
DHCP Server . . . . . : 192.168.0.2
DHCPv6 IAID . . . . . : 536891574
DHCPv6 Client DUID. . . . . : 00-01-00-01-22-AC-5F-64-00-50-B6-7B-E4-81
DNS Servers . . . . . : 131.107.10.60
                        192.168.0.3
NetBIOS over Tcpi . . . . . : Enabled
    
```

You send a ping request and successfully ping the default gateway, the DNS servers, and the DHCP server. Which configuration on the computer causes the issue?

- A. the DNS servers
- B. the IPv4 address
- C. the subnet mask
- D. the default gateway address

Answer: A

NEW QUESTION 187

- (Exam Topic 4)

Use the drop-down menus to select the answer choice that completes each statement based on the information presented on the graphic.

You have a computer named Computer1 that runs Windows 10.
 You complete a full back up of Computer1 to an external USB drive. You store the USB drive offsite.
 You delete several files from your personal Microsoft OneDrive account by using File Explorer, and then you empty the Recycle Bin on Computer1.
 You need to recover the files 60 days after you deleted them in the least amount of time possible. What should you use?

- A. the OneDrive recycle bin
- B. the full backup on the external USB drive
- C. Recovery in the Settings app

Answer: B

Explanation:

NEW QUESTION 192

- (Exam Topic 4)

Please wait while the virtual machine loads. Once loaded, you may proceed to the lab section. This may take a few minutes, and the wait time will not be deducted from your overall test time.

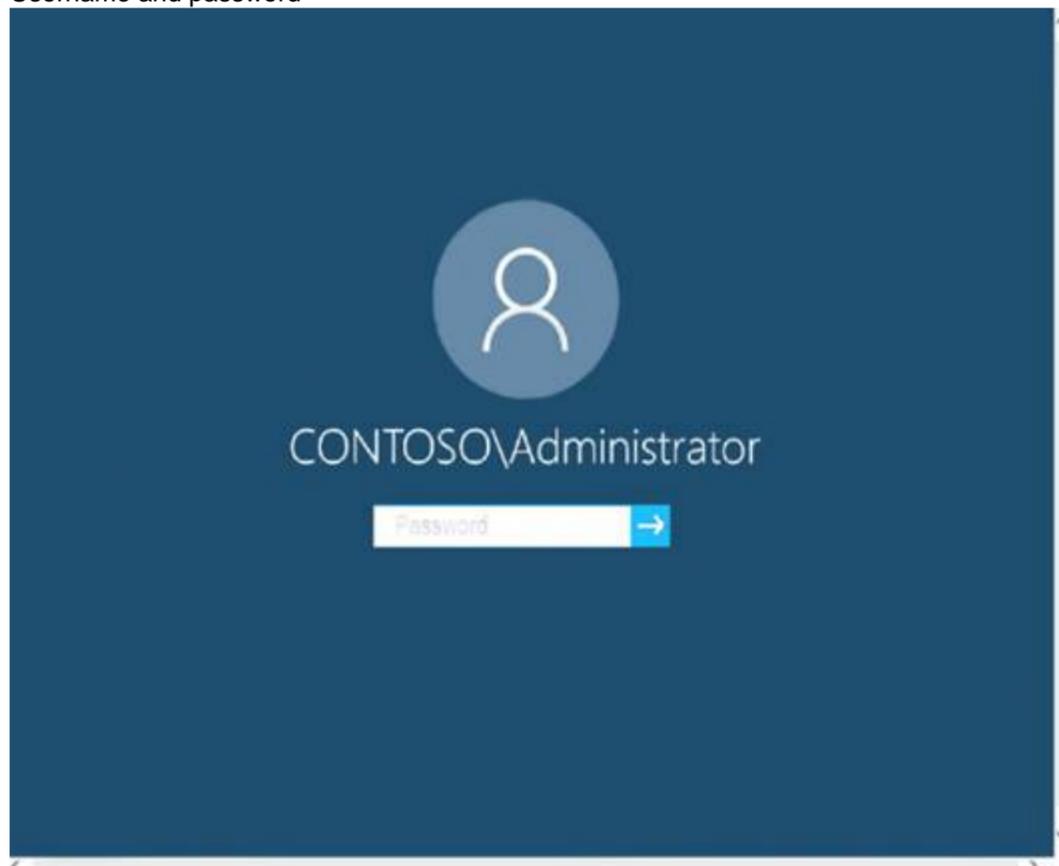

When the Next button is available, click it to access the lab section. In this section, you will perform a set of tasks in a live environment. While most functionality will be available to you as it would be in a live environment, some functionality (e.g., copy and paste, ability to navigate to external websites) will not be possible by design.

Scoring is based on the outcome of performing the tasks stated in the lab. In other words, it doesn't matter how you accomplish the task, if you successfully perform it, you will earn credit for that task.

Labs are not timed separately, and this exam may more than one lab that you must complete. You can use as much time as you would like to complete each lab. But, you should manage your time appropriately to ensure that you are able to complete the lab(s) and all other sections of the exam in the time provided.

Please note that once you submit your work by clicking the Next button within a lab, you will NOT be able to return to the lab.

Username and password

Use the following login credentials as needed:

To enter your password, place your cursor in the Enter password box and click on the password below.

Username: Contoso/Administrator

Password: Passw0rd!

The following information is for technical support purposes only: Lab Instance: 11145882

The screenshot shows the Windows Server Manager interface. At the top, there's a 'Dashboard' menu with options like 'Local Server', 'All Servers', 'AD DS', 'DNS', and 'File and Storage Services'. The main area is titled 'WELCOME TO SERVER MANAGER' and contains a 'QUICK START' section with a numbered list: 1. Configure this local server, 2. Add roles and features, 3. Add other servers to manage, 4. Create a server group, 5. Connect this server to cloud services. Below this is a 'WHAT'S NEW' section and a 'LEARN MORE' button. The 'ROLES AND SERVER GROUPS' section shows a summary: Roles: 3, Server groups: 1, Servers total: 1. It displays four role cards: 'AD DS', 'DNS', 'File and Storage Services', and 'Local Server'. Each card lists 'Manageability', 'Events', 'Services', 'Performance', and 'BPA results'. The 'Local Server' and 'All Servers' cards have a red header and a '2' in a red box next to 'Services'. At the bottom, there are two buttons: 'Tasks' and 'Computers'.

You need to create an HTML report that shows which policies and policy settings are applied to CONTOSO\User1 on Client1. You must save the output to a file named Report.html in a folder named Folder1 on the C drive of Client1. To complete this task, sign in to the required computer or computers.

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

On Client1, log in as administrator. Open command prompt and type:
 gresult /h CONTOSO\User1\C:\Folder1\Report.html

NEW QUESTION 193

- (Exam Topic 4)

Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution that might meet the stated goals. Some question sets might have more than one correct solution, while others might not have a correct solution.

After you answer a question in this section, you will NOT be able to return to it. As a result, these questions will not appear in the review screen.

You have a computer that runs Windows 10. The computer contains a folder named D:\Scripts. D:\Scripts contains several PowerShell scripts.

You need to ensure that you can run the PowerShell scripts without specifying the full path to the scripts. The solution must persist between PowerShell sessions.

Solution: From PowerShell, you run `$env:Path += ";d:\scripts"`. Does this meet the goal?

- A. Yes
- B. No

Answer: A

Explanation:

References:

https://docs.microsoft.com/en-us/powershell/module/microsoft.powershell.core/about/about_environment_varia

NEW QUESTION 196

- (Exam Topic 4)

Your company has an on-premises network that contains an Active Directory domain. The domain is synced to Microsoft Azure Active Directory (Azure AD). All computers in the domain run Windows 10 Enterprise.

You have a computer named Computer1 that has a folder named C:\Folder1. You want to use File History to protect C:\Folder1.

Solution: You enable File History on Computer1. You then enable archiving for Folder1.

Does this meet the goal?

- A. Yes
- B. No

Answer: B

Explanation:

File History only backs up copies of files that are in Libraries, and Desktop folders and the OneDrive files available offline on your PC. If you have files or folders elsewhere that you want backed up, you can add them to one of these folders.

Reference:

<https://support.microsoft.com/en-us/help/17128/windows-8-file-history>

NEW QUESTION 201

- (Exam Topic 4)

Your company has an on-premises network that contains an Active Directory domain. The domain is synced to Microsoft Azure Active Directory (Azure AD). All computers in the domain run Windows 10 Enterprise.

You have a computer named Computer1 that has a folder named C:\Folder1. You want to use File History to protect C:\Folder1.

Solution: You enable File History on Computer1. You then encrypt the contents of Folder1.

Does this meet the goal?

- A. Yes
- B. No

Answer: B

Explanation:

File History only backs up copies of files that are in Libraries, and Desktop folders and the OneDrive files available offline on your PC. If you have files or folders elsewhere that you want backed up, you can add them to one of these folders.

Reference:

<https://support.microsoft.com/en-us/help/17128/windows-8-file-history>

NEW QUESTION 203

- (Exam Topic 4)

You have a computer that runs Windows 8.1.

When you attempt to perform an in-place upgrade to Windows 10, the computer fails to start after the first restart.

You need to view the setup logs on the computer. Which folder contains the logs?

- A. %Windows.~BT\Sources\Panther\
- B. %Windows%\Logs
- C. %Windows%\Temp
- D. %Windows.~BT%\Inf

Answer: A

Explanation:

References:

<https://docs.microsoft.com/en-us/windows-hardware/manufacture/desktop/windows-setup-log-files-and-eventlo>

NEW QUESTION 205

- (Exam Topic 4)

Your network contains an Active Directory domain. The domain contains three computers named Computer1, Computer2, and Computer3 that run Windows 10. The computers are on the same network and have network connectivity.

Windows Defender Firewall on Computer1 has the server-to-server connection security rule shown in the following table.

Name	Endpoint 1	Endpoint 2	Authentication mode
Rule1	Any	Any	Require inbound and request outbound

Windows Defender Firewall on Computer2 has the server-to-server connection security rule shown in the following table.

Name	Endpoint 1	Endpoint 2	Authentication mode
Rule1	Any	Any	Do not authenticate

Windows Defender Firewall on Computer3 has the server-to-server connection security rule shown in the following table.

Name	Endpoint 1	Endpoint 2	Authentication mode
Rule1	Any	Any	Require inbound and request outbound

All the connection security rules are enabled and configured to use only the Computer (Kerberos VS) authentication method.

For each of the following statements, select Yes if the statement is true. Otherwise, select No.

NOTE: Each correct selection is worth one point.

Statements

Yes No

If Computer1 initiates communication to Computer2, network traffic will be encrypted.

Computer2 can establish communications to Computer3.

If Computer3 initiates communication to Computer1, network traffic will be encrypted.

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

NO NO NO

Traffic will not be encrypted by default. The question does not have this option configured by default. Encryption is optional, not default to authentications. Encryption needs to be enabled in the GPO. The default is data integrity which is not default to encrypt. Actually, if you encrypt you will use both integrity with encryption. Devices in the encryption zone require authentication to communicate with other devices.

NEW QUESTION 207

- (Exam Topic 4)

You have a Microsoft 365 tenant that contains 70 remote users. The remote users work from various locations. Recently, each remote user purchased a personal computer that runs Windows 10 Home. You need to configure the VPN settings on the computers automatically by using the least amount of administrative effort. What should you use?

- A. an unattend answer file
- B. a Group Policy Object (GPO)
- C. Windows Autopilot
- D. a provisioning package

Answer: D

Explanation:

Reference:

<https://docs.microsoft.com/en-us/windows/configuration/provisioning-packages/provisioning-packages>

NEW QUESTION 208

- (Exam Topic 4)

Your company deploys Windows 10 Enterprise to all computers. All the computers are joined to Microsoft Azure Active Directory (Azure AD). The company purchases a new computer for a new user and creates an Azure AD account for the user. The user signs in to the computer by using the Azure AD account. The user discovers the activation error shown in the following exhibit.

Activation

Windows

Edition	Windows 10 Pro
Activation	Windows is not activated
Product ID	XXXXX-XXXXX-XXXXX-XXXXX
Product Key	XXXXX-XXXXX-XXXXX-XXXXX-XXXXX

Windows can't activate at this time. Try activating again later. If that doesn't work, contact your system administrator. Error code: 0x800705B4

If you're having problems with activation, select Troubleshoot to try to fix the problem.

Activate Windows now

Running a non-genuine copy of Windows can put you at greater risk from viruses and other security threats.

Go to the Store to buy genuine Windows or enter a product key.

You need to activate Windows 10 Enterprise on the computer. What should you do?

- A. In Azure A
- B. assign a Windows 10 Enterprise license to the user.
- C. At the command prompt, run slmgr /lrc.
- D. Reinstall Windows as Windows 10 Enterprise.
- E. At the command prompt, run slmgr /ato.

Answer: A

Explanation:

Reference:
<https://docs.microsoft.com/en-us/windows/deployment/windows-10-subscription-activation>

NEW QUESTION 213

- (Exam Topic 4)

You have a computer that runs Windows 10 and hosts four Hyper-V virtual machines that run Windows 10. You upgrade the computer to Windows 11. You need to ensure that the virtual machines support hibernation. What should you do?

- A. Update the configuration version of the virtual machines.
- B. Enable integration services.
- C. Rebuild the virtual machines as generation 2 virtual machines.
- D. Delete any virtual machine checkpoints.

Answer: A

NEW QUESTION 217

- (Exam Topic 4)

Please wait while the virtual machine loads. Once loaded, you may proceed to the lab section. This may take a few minutes, and the wait time will not be deducted from your overall test time.

When the Next button is available, click it to access the lab section. In this section, you will perform a set of tasks in a live environment. While most functionality will be available to you as it would be in a live environment, some functionality (e.g., copy and paste, ability to navigate to external websites) will not be possible by design.

Scoring is based on the outcome of performing the tasks stated in the lab. In other words, it doesn't matter how you accomplish the task, if you successfully perform it, you will earn credit for that task.

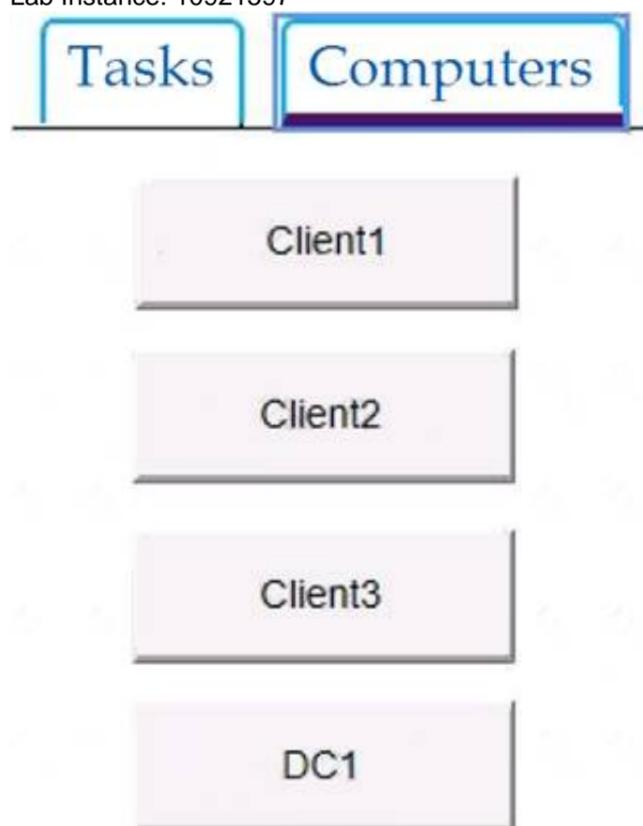

Labs are not timed separately, and this exam may more than one lab that you must complete. You can use as much time as you would like to complete each lab. But, you should manage your time appropriately to ensure that you are able to complete the lab(s) and all other sections of the exam in the time provided.

Please note that once you submit your work by clicking the Next button within a lab, you will NOT be able to return to the lab.

Username and password

Use the following login credentials as needed:
 To enter your password, place your cursor in the Enter password box and click on the password below.
 Username: Contoso/Administrator
 Password: Passw0rd!
 The following information is for technical support purposes only:
 Lab Instance: 10921597

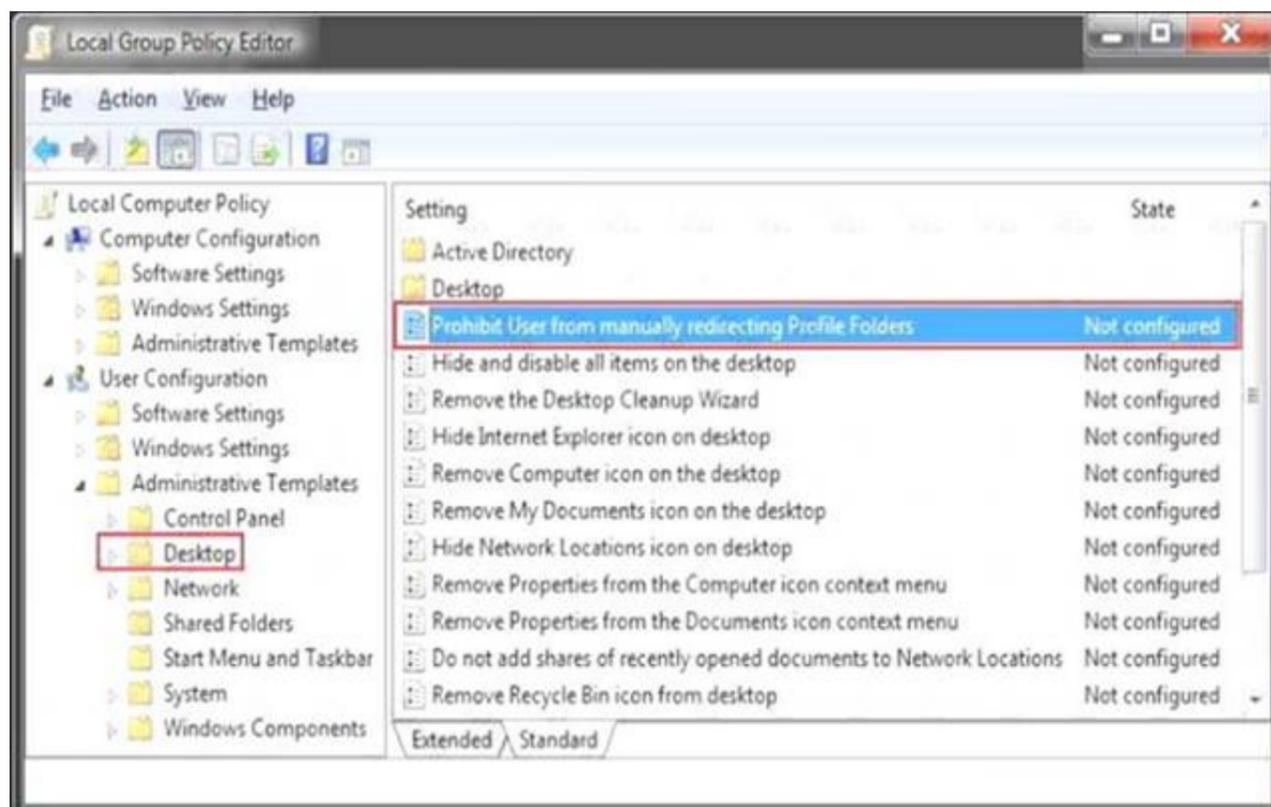

You need to enable the Prohibit User from manually redirecting Profile Folders Group Policy setting only for the administrative users of Client3. To complete this task, sign in to the required computer or computers.

- A. Mastered
- B. Not Mastered

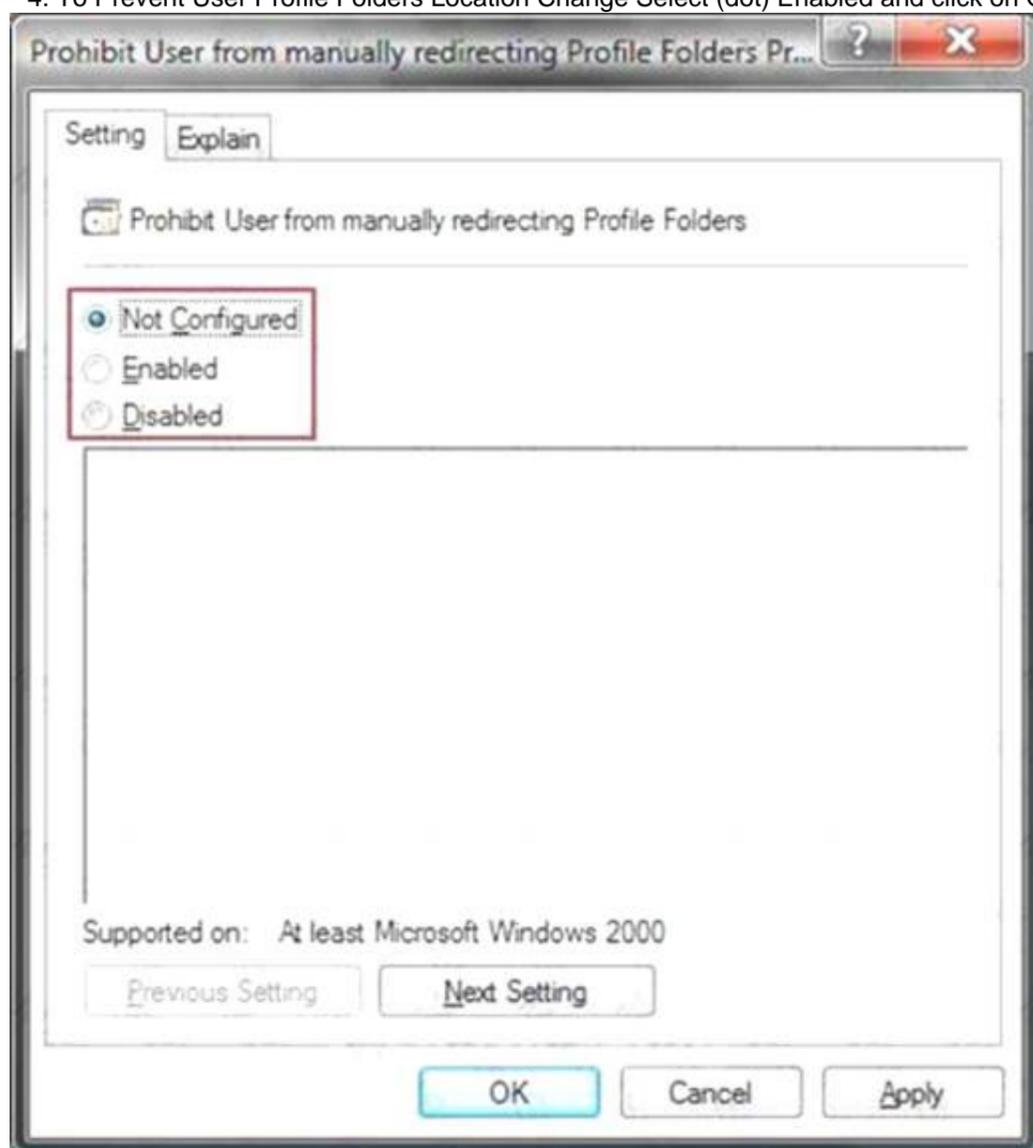

Answer: A

Explanation:

- * 1. Open the Administrator Group Local Group Policy Editor.
- * 2. In the left pane, click on User Configuration, Administrative Templates, and Desktop.

- * 3. In the right pane, right click on Prohibit User from Manually redirecting Profile Folders and click on Properties.
- * 4. To Prevent User Profile Folders Location Change Select (dot) Enabled and click on OK.

- * 5. Close the Local Group Policy Editor window. References:
<https://www.vistax64.com/threads/user-profile-folders-prevent-or-allow-location-change.180719/>

NEW QUESTION 221

- (Exam Topic 4)

You install Windows 10 Pro on a computer named CLIENT1.

You need to ensure that all per-user services are disabled on CLIENT1. The solution must minimize administrative effort.

What should you use?

- A. the sc command
- B. Task Manager
- C. Services
- D. the sfc command

Answer: A

NEW QUESTION 225

- (Exam Topic 4)

You have 10 new Windows 10 devices.

You plan to deploy a provisioning package that will configure a wireless network profile. You need to ensure that a support technician can install the provisioning package on the devices. The solution must use the principle of least privilege. To which group should you add the support technician?

- A. Users
- B. Power Users
- C. Network Configuration Operators
- D. Administrators

Answer: D

Explanation:

Reference:
<https://docs.microsoft.com/en-us/windows/configuration/provisioning-packages/provisioning-apply-package>

NEW QUESTION 228

- (Exam Topic 3)
 Which users can create a new group on Computer3?

- A. User31 only
- B. User1 and User32 only
- C. Admin1 and User31 only
- D. Admin1, User31, and User32 only

Answer: A

Explanation:

Reference:
https://ss64.com/nt/syntax-security_groups.html

NEW QUESTION 230

- (Exam Topic 3)
 For each of the following statements, select Yes if the statement is true. Otherwise, select No.
 NOTE: Each correct selection is worth one point.

Statements	Yes	No
When User1 attempts to open D:\Folder1\Report.docx, an event is created in the security event log.	<input type="checkbox"/>	<input type="checkbox"/>
When User1 attempts to save changes to D:\Folder1\Report.docx, an event is created in the security event log.	<input type="checkbox"/>	<input type="checkbox"/>
When User2 attempts to open D:\Folder1\Report.docx, an event is created in the security event log.	<input type="checkbox"/>	<input type="checkbox"/>

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

Graphical user interface, text, application, email Description automatically generated
 Reference:
<https://www.sciencedirect.com/topics/computer-science/security-event-log>

NEW QUESTION 234

- (Exam Topic 3)
 On Computer1, you need to configure the custom Visual Effects performance settings. Which user accounts can you use?

- A. Admm1, User11, and User13 only
- B. Admin1 only
- C. Admin1, User11, and User12 only
- D. Admin1, User11, User12, and User13
- E. Admin1 and User11 only

Answer: D

NEW QUESTION 237

- (Exam Topic 3)
 You implement the planned changes for Computer1.

For each of the following statements, select Yes if the statement is true. Otherwise, select No.
 NOTE: Each correct selection is worth one point.

Statements	Yes	No
User1 can write to D:\Folder1\Report.docx.	<input type="radio"/>	<input type="radio"/>
User2 can write to D:\Folder1\Report.docx.	<input type="radio"/>	<input type="radio"/>
User3 can write to D:\Folder1\Report.docx.	<input type="radio"/>	<input type="radio"/>

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

A screenshot of a computer Description automatically generated with low confidence

Box 1: Yes

User1 already has full control access through membership of Group1. Therefore, User1 can write to the file. Box 2: No

The planned changes will grant User2 full control access to the file. However, User2 is a member of Group2 which has Deny/Write access. The Deny permission will always take precedence. Therefore, User2 will not be able to write to the file.

Box 3: No

The planned changes will grant User3 full control access to the folder. That permission will be inherited by the file. However, User3 is a member of Group2 which has Deny/Write access. The Deny permission will always take precedence. Therefore, User3 will not be able to write to the file.

NEW QUESTION 239

- (Exam Topic 2)

You need to meet the technical requirement for Computer1.

What should you do? To answer, select the appropriate options in the answer area.

Answer Area

User who should configure Kiosk (assigned access):

	▼
User1	
User2	
User3	
User11	
User12	

Configure Kiosk (assigned access) for:

	▼
User4	
User5	
User12	
User13	

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

Answer Area

User who should configure Kiosk (assigned access):

	▼
User1	
User2	
User3	
User11	
User12	

Configure Kiosk (assigned access) for:

	▼
User4	
User5	
User12	
User13	

NEW QUESTION 240

- (Exam Topic 2)

You need to meet the quality update requirement for ComputerA. For how long should you defer the updates?

- A. 14 days
- B. 10 years
- C. 5 years
- D. 180 days
- E. 30 days

Answer: E

Explanation:

References:

<https://www.thewindowsclub.com/delay-defer-feature-updates-365-days-windows-10>

NEW QUESTION 245

- (Exam Topic 2)

You need to meet the technical requirement for User6. What should you do?

- A. Add User6 to the Remote Desktop Users group in the domain.
- B. Remove User6 from Group2 in the domain.
- C. Add User6 to the Remote Desktop Users group on Computer2.
- D. Add User6 to the Administrators group on Computer2.

Answer: B

NEW QUESTION 247

- (Exam Topic 2)

You need to meet the technical requirements for the San Diego office computers. Which Windows 10 deployment method should you use?

- A. wipe and load refresh
- B. Windows Autopilot
- C. provisioning Packages
- D. in-place upgrade

Answer: B

Explanation:

References:

<https://docs.microsoft.com/en-us/windows/deployment/windows-autopilot/windows-autopilot>

NEW QUESTION 250

- (Exam Topic 1)

You need to sign in as LocalAdmin on Computer11. What should you do first?

- A. From the LAPS UI tool, view the administrator account password for the computer object of Computer11.
- B. From Local Security Policy, edit the policy password settings on Computer11.
- C. From the LAPS UI tool, reset the administrator account password for the computer object of Computer11.
- D. From Microsoft Intune, edit the policy password settings on Computer11.

Answer: A

Explanation:

References:

<https://technet.microsoft.com/en-us/mt227395.aspx>

NEW QUESTION 255

- (Exam Topic 1)

You need to take remote control of an employee's computer to troubleshoot an issue. What should you send to the employee to initiate a remote session?

- A. a numeric security code
- B. a connection file
- C. an Easy Connect request
- D. a password

Answer: A

Explanation:

References:

<https://support.microsoft.com/en-us/help/4027243/windows-10-solve-pc-problems-with-quick-assist>

NEW QUESTION 260

- (Exam Topic 1)

You need to recommend a solution to monitor update deployments. What should you include in the recommendation?

- A. Windows Server Update (WSUS)
- B. the Update Management solution in Azure Automation
- C. the Update Compliance solution in Azure Log Analytics
- D. the Azure Security Center

Answer: C

Explanation:

References:

<https://docs.microsoft.com/en-us/windows/deployment/update/update-compliance-monitor>

NEW QUESTION 261

- (Exam Topic 1)

An employee reports that she must perform a BitLocker recovery on her laptop. The employee does not have her BitLocker recovery key but does have a Windows 10 desktop computer.

What should you instruct the employee to do from the desktop computer?

- A. Run the `manage-bde.exe -status` command
- B. From BitLocker Recovery Password Viewer, view the computer object of the laptop
- C. Go to <https://account.activedirectory.windowsazure.com> and view the user account profile
- D. Run the `Enable-BitLockerAutoUnlock` cmdlet

Answer: C

Explanation:

References:

<https://cedonpartners.com/blog/storing-recovering-bitlocker-keys-azure-active-directory/>

NEW QUESTION 266

- (Exam Topic 4)

Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution that might meet the stated goals. Some question sets might have more than one correct solution, while others might not have a correct solution.

After you answer a question in this section, you will NOT be able to return to it. As a result, these questions will not appear in the review screen.

Your company has an on-premises network that contains an Active Directory domain. The domain is synced to Microsoft Azure Active Directory (Azure AD). All computers in the domain run Windows 10 Enterprise.

You are logged on as the local administrator on a Computer named Computer1.

A user named Mia Hamm has a computer named Computer2. Mia Hamm reports that she is experiencing problems with Computer2.

You want to use Event Viewer on Computer1 to view the event logs on Computer2. What should you do?

- A. On Computer1, run the `Connect-WSMan -ComputerName "Computer1"` cmdlet.
- B. On Computer2
- C. run the `Get-Eventlog -List -ComputerName "Computer1"` cmdlet.
- D. On Computer2
- E. log on as a domain administrator, then open Event Viewer and select the Connect to another computer... option.
- F. On Computer1
- G. open the Windows Defender Firewall and enable the Remote Event Log Management inbound rule

Answer: C

Explanation:

You are logged on as a local administrator. You need the required permissions to access Event Viewer logs on all remote Windows computers.

Reference:

<https://docs.microsoft.com/en-us/windows/win32/winrm/about-windows-remote-management>

NEW QUESTION 268

- (Exam Topic 4)

Please wait while the virtual machine loads. Once loaded, you may proceed to the lab section. This may take a few minutes, and the wait time will not be deducted from your overall test time.

When the Next button is available, click it to access the lab section. In this section, you will perform a set of tasks in a live environment. While most functionality will be available to you as it would be in a live

environment, some functionality (e.g., copy and paste, ability to navigate to external websites) will not be possible by design.

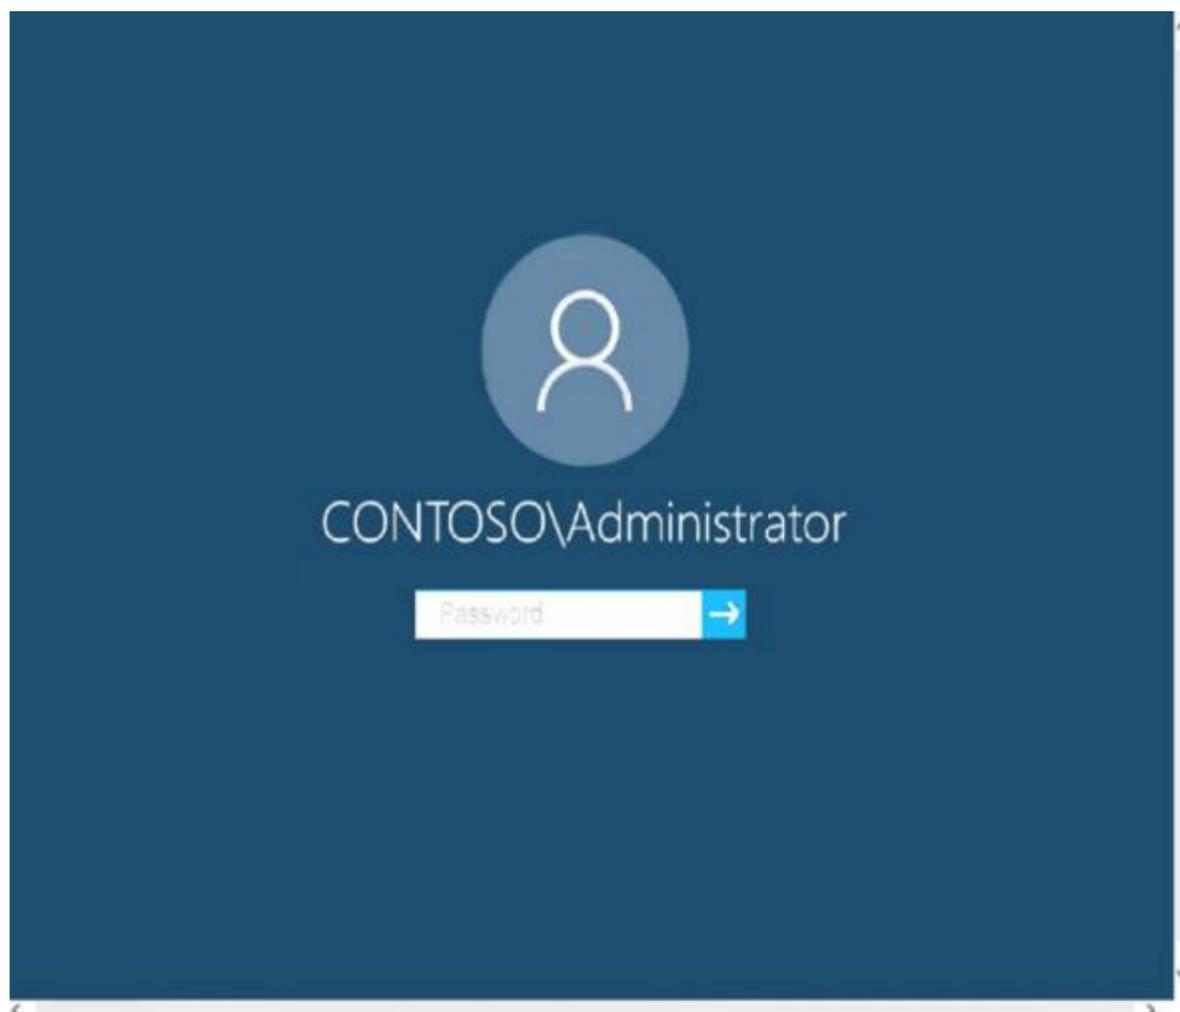

Scoring is based on the outcome of performing the tasks stated in the lab. In other words, it doesn't matter how you accomplish the task, if you successfully perform it, you will earn credit for that task.

Labs are not timed separately, and this exam may more than one lab that you must complete. You can use as much time as you would like to complete each lab.

But, you should manage your time appropriately to ensure that you are able to complete the lab(s) and all other sections of the exam in the time provided.

Please note that once you submit your work by clicking the Next button within a lab, you will NOT be able to return to the lab.

Username and password

Use the following login credentials as needed:

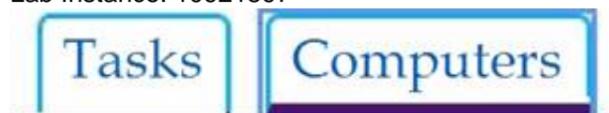

To enter your password, place your cursor in the Enter password box and click on the password below.

Username: Contoso/Administrator

Password: Passw0rd!

The following information is for technical support purposes only:

Lab Instance: 10921597

You need to identify the total number of events that have Event ID 63 in the Application event log. You must type the number of identified events into C:\Folder1\FileA.txt.

To complete this task, sign in to the required computer or computers and perform the required action.

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

- > Open Event Viewer.
- > Click the log that you want to filter, then click Filter Current Log from the Action pane or right-click menu. This will open the Filter Current Log dialog box.
- > You can specify a time period if you know approximately when the relevant events occurred. You can specify the event level, choosing between Critical, Warning, Verbose, Error and Information. If you select none of these, all event levels will be returned. You can't modify which event log is being checked as filters apply only to a single log.
- > You can choose the event sources which have generated the log entries, and search for key words, users, or computers. You can also search using specific event IDs.

Reference:

<https://www.manageengine.com/products/active-directory-audit/kb/how-to/how-to-search-the-event-viewer.htm>

NEW QUESTION 273

- (Exam Topic 4)

You have a computer named Computer1 that runs Windows 10.

On Computer1, you create the local users shown in the following table.

Name	Member of
User1	Users
User2	Users, Guests
User3	Power Users, Guest
User4	Guests, Users, Administrators
User5	Users, Distributed COM Users

Which three user profiles will persist after each user signs out? Each correct answer presents part of the solution.

NOTE: Each correct selection is worth one point.

- A. User1
- B. User2
- C. User3
- D. User4
- E. User5

Answer: ADE

NEW QUESTION 278

- (Exam Topic 4)

Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution that might meet the stated goals. Some question sets might have more than one correct solution, while others might not have a correct solution.

After you answer a question in this section, you will NOT be able to return to it. As a result, these questions will not appear in the review screen.

You deploy Windows 10 to a computer named Computer1.

Computer1 contains a folder named C:\Folder1. Folder1 contains multiple documents.

You need to ensure that you can recover the files in Folder1 by using the Previous Versions tab. Solution: You enable File History and add Folder1 in the Documents library.

Does this meet the goal?

- A. Yes
- B. No

Answer: A

Explanation:

Reference:

<https://support.microsoft.com/en-za/help/17128/windows-8-file-history>

NEW QUESTION 279

- (Exam Topic 4)

Your network contains an Active Directory domain. The domain contains 1,000 computers that run Windows 10.

You configure Microsoft Edge settings by using domain and local Group Policy Objects (GPOs).

You need to generate a report that contains all the Microsoft Edge policy settings applied to a computer. What should you do?

- A. From PowerShell
- B. run the Gec-GPO cmdlet.
- C. From PowerShell
- D. run the Gec-GPOReporc cmdlet.
- E. From Microsoft Edge, open edge://policy.
- F. From Microsoft Edge, open edge://settings.

Answer: C

Explanation:

The Get-GPOReport cmdlet would generate a report for all domain group policy objects. However, this would not display the settings that are applied by local group policy objects.

To display the settings applied by both domain and local GPOs, you would have to open Microsoft Edge and enter edge://policy in the address bar.

NEW QUESTION 284

- (Exam Topic 4)

A user named User1 has a computer named Computer1 that runs Windows 10.

User1 connects to a Microsoft Azure virtual machine named VM1 by using Remote Desktop. User1 creates a VPN connection to a partner organization.

When the VPN connection is established, User1 cannot connect to VM1. When User1 disconnects from the VPN, the user can connect to VM1.

You need to ensure that User1 can connect to VM1 while connected to the VPN. What should you do?

- A. From the proxy settings, add the IP address of VM1 to the bypass list to bypass the proxy.

- B. From the properties of VPN1, clear the Use default gateway on remote network check box.
- C. From the properties of the Remote Desktop connection to VM1, specify a Remote Desktop Gateway (RDGateway).
- D. From the properties of VPN1, configure a static default gateway address.

Answer: B

Explanation:

References:

<https://www.stevejenkins.com/blog/2010/01/using-the-local-default-gateway-with-a-windows-vpn-connection/>

NEW QUESTION 285

- (Exam Topic 4)

You have a computer named Computer1 that runs Windows 10. Computer1 is in a workgroup. Computer1 contains the local users shown in the following table.

Name	Member of
User1	Group1, Group2
User2	Group1

You create a folder named Folder1 that has the permissions shown in the following table.

Principal	Access	Inherited from	Applies to
Group2	Deny Write	None	This folder, subfolders, and files
Group1	Allow Full control	None	This folder, subfolders, and files
Administrators	Allow Full control	None	This folder, subfolders, and files

You create a file named File1.txt in Folder1 and allow Group2 Full control permissions to File1.txt. For each of the following statements, select Yes if the statement is true. Otherwise, select No. NOTE: Each correct selection is worth one point.

Statements	Yes	No
User1 can create a new file in Folder1	<input type="radio"/>	<input type="radio"/>
User1 can save changes to File1.txt	<input type="radio"/>	<input type="radio"/>
User2 can view the content of File1.txt	<input type="radio"/>	<input type="radio"/>

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

References:

<https://www.dell.com/support/article/za/en/zadhs1/sln156352/understanding-file-and-folder-permissions-in-win>

NEW QUESTION 286

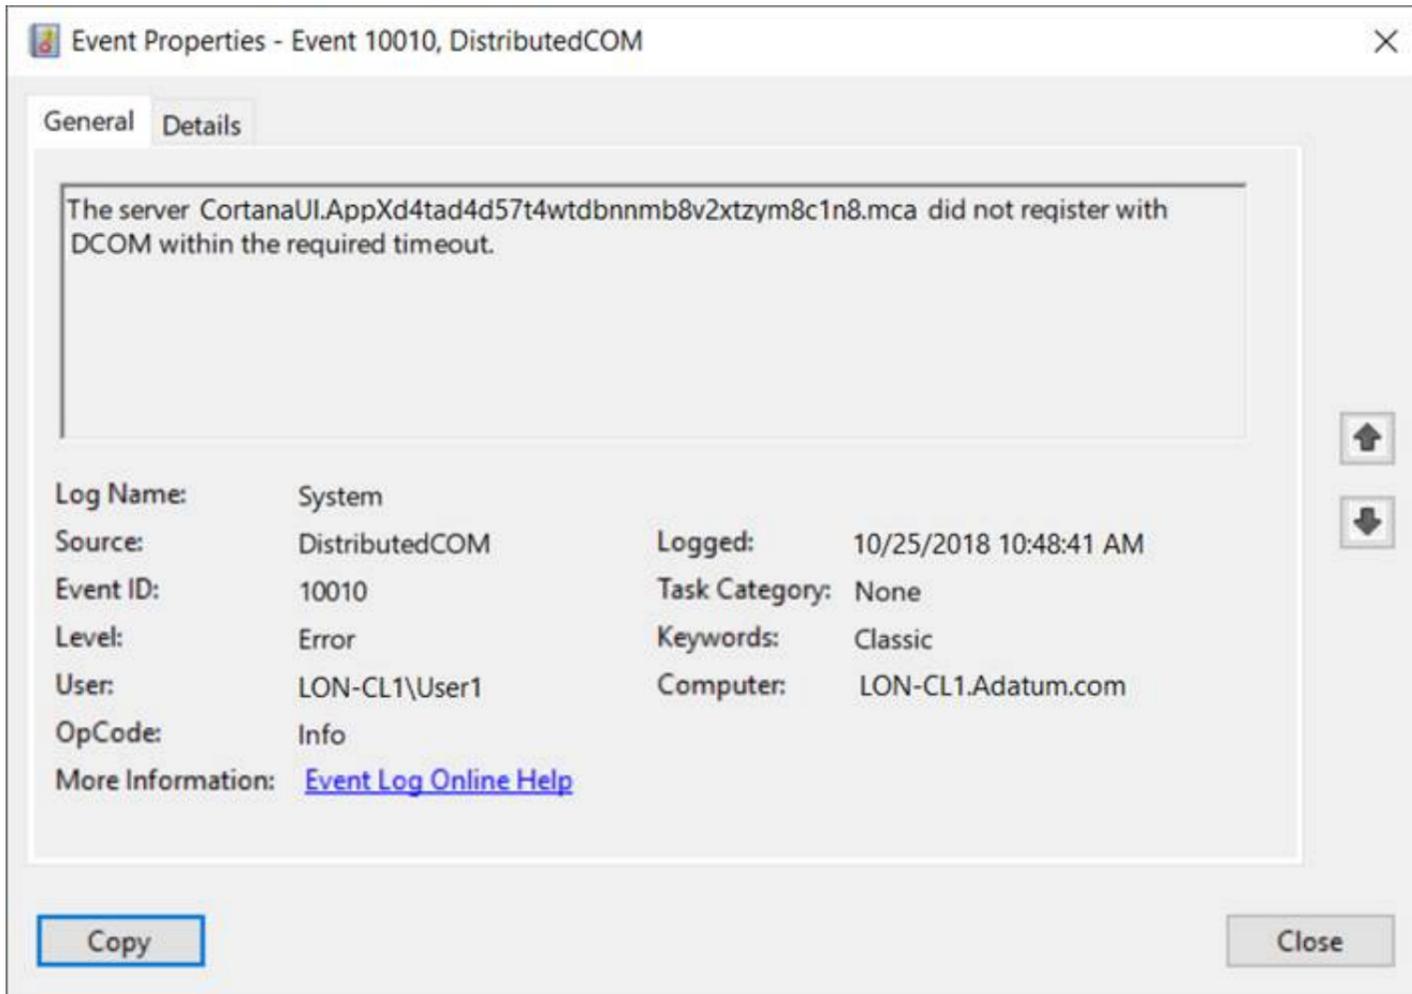

- (Exam Topic 4)

You have a computer named LON-CL1.Adatum.com that runs Windows 10.

From Event Viewer, you create a custom view named View1 that has the following filter:

- > User: User1
- > Logged: Any time
- > Event logs: System
- > Computer: LON-CL1
- > Event IDs: 10000 – 11000
- > Event level: Error, Verbose

You open Event Viewer and discover the event shown in the exhibit. (Click the Exhibit tab.)

The event does not appear in View1.
 You need to ensure that the event appears in View1. What should you do?

- A. Add a Task Category setting to the filter.
- B. Add the computer account to the Event Log Readers group.
- C. Create an event subscription.
- D. Modify the Computer setting in the filter.

Answer: A

Explanation:

References:
<https://www.techrepublic.com/article/how-to-use-custom-views-in-windows-10s-event-viewer/>

NEW QUESTION 287

- (Exam Topic 4)

You have a computer that runs Windows 11 and hosts a Hyper-V virtual machine named VM1. You create the disks shown in the following table.

Name	Format	Type	Parent
Base1	VHD	Fixed size	Not applicable
Base2	VHDX	Fixed size	Not applicable
Disk1	VHD	Dynamically expanding	Not applicable
Disk2	VHD	Differencing	Base1.vhd
Disk3	VHDX	Dynamically expanding	Not applicable
Disk4	VHDX	Differencing	Base2.vhdx

You add Disk1, Disk2, Disk3, and Disk4 to a SCSI controller attached to VM1. You need to identify the following:
 Which disks will increase in size automatically when files are copied to the disks. Which disks can be manually increased in size while VM1 is running.
 What should you identify? To answer, select the appropriate options in the answer area.

Disks that will increase in size automatically:

- Base1 and Disk2 only
- Base2 and Disk4 only
- Disk1 and Disk3 only**
- Disk3 and Disk4 only
- Base2, Disk3, and Disk4 only
- Disk1, Disk2, Disk3, and Disk4

Disks that can be manually increased in size while VM1 is running:

- Base1 and Disk2 only
- Base2 and Disk4 only
- Disk1 and Disk3 only
- Disk3 and Disk4 only
- Base2, Disk3, and Disk4 only
- Disk1, Disk2, Disk3, and Disk4**

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

Graphical user interface, text, application, Word, website Description automatically generated

NEW QUESTION 292

- (Exam Topic 4)

Your network contains an Active Directory domain that contains the objects shown in the following table.

Name	Type	Member of
User1	User	Group1
User2	User	Group2
Group1	Global group	None
Group2	Domain local group	None
Computer1	Computer	Group1
Computer2	Computer	Group1

Computer1 contains the shared folders shown in the following table.

Name	NTFS permission	Share permission	Folder enumeration mode
Share1	Group1: Write	Group1: Full control	Access-based
Share2\$	Group2: Full control	Group2: Read	Unrestricted

The computers have the network configurations shown in the following table.

Name	Network Discovery	Windows Defender Firewall
Computer1	On	Incoming connections: Block all connections to apps that are not on the list of allowed apps
Computer2	Off	Incoming connections: Block all connections to apps that are not on the list of allowed apps

For each of the following statements, select Yes if the statement is true. Otherwise, select No.

NOTE: Each correct selection is worth one point.

Statements	Yes	No
Share1 is listed if User1 connects to \\Computer1 from Computer2.	<input type="radio"/>	<input type="radio"/>
Share1 is listed if User2 connects to \\Computer1 from Computer2.	<input type="radio"/>	<input type="radio"/>
Share2\$ is listed if User2 connects to \\Computer1 from Computer2.	<input type="radio"/>	<input type="radio"/>

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

Box 1: Yes

User1 is in Group1 which has permission to access the share so the share will be visible. Box 2: No

User2 is in Group2 which does not have permission to access Share1. Access-based enumeration is enabled so Share1 will not be listed as User2 does not have permission to access it.

Box 3: No

Share2\$ is a hidden share (dollar sign appended) so the share will never be listed.

NEW QUESTION 294

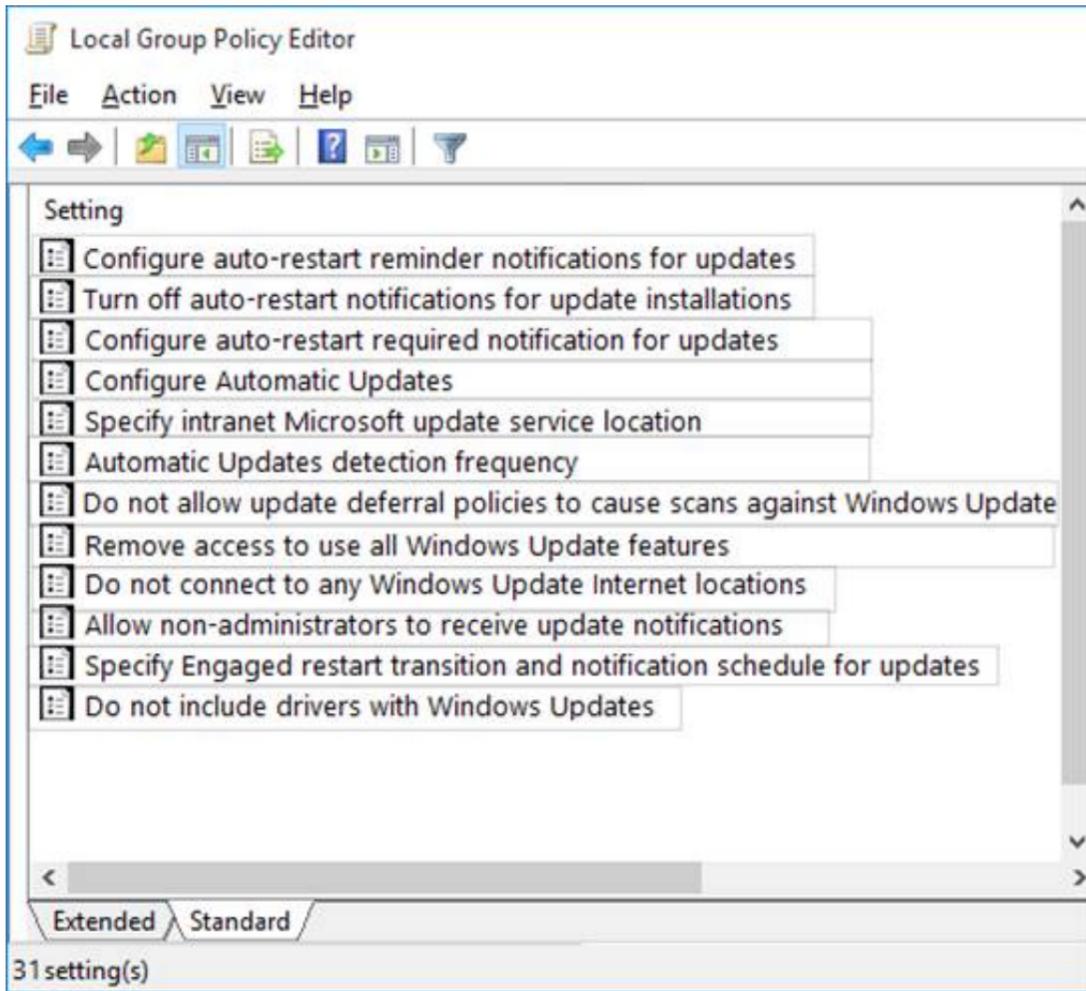

- (Exam Topic 4)

You have 10 computers that run Windows 10.

You have a Windows Server Update Services (WSUS) server.

You need to configure the computers to install updates from WSUS.

Which two settings should you configure? To answer, select the appropriate options in the answer area. NOTE: Each correct selection is worth one point.

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

References:

<https://docs.microsoft.com/en-us/windows/deployment/update/waas-manage-updates-wsus#configure-automatic>

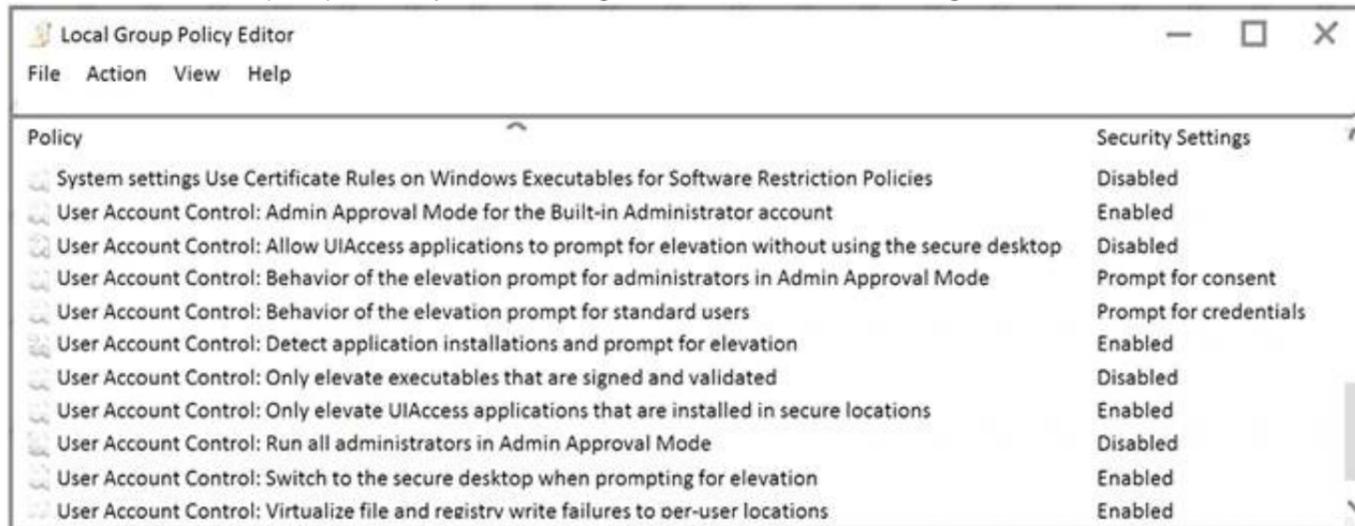

NEW QUESTION 296

- (Exam Topic 4)

You have a workgroup computer named Computer1 that runs Windows 10 and has the users shown in the following table.

Name	Member of
Administrator	Administrators
User1	Administrators
User2	Users

User Account Control (UAC) on Computer1 is configured as shown in the following exhibit.

For each of the following statements, select Yes if the statement is true. Otherwise, select No.

NOTE: Each correct selection is worth one point.

Statements

Yes No

When Administrator opens a command prompt by using the Run as administrator option, the user will be prompted for consent.

When User1 opens a command prompt by using the Run as administrator option, the user will be prompted for consent.

When User2 opens a command prompt by using the Run as administrator option, the user will be prompted for credentials.

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

Box 1: Yes

User Account Control: Behavior of the elevation prompt for administrators in Admin Approval Mode is set to Prompt for consent When an operation requires elevation of privilege, the user is prompted to select either Permit or Deny. If the user selects Permit, the operation continues with the user's highest available privilege.

Box 2: Yes

User1 is a member of Administrators group.

User Account Control: Behavior of the elevation prompt for administrators in Admin Approval Mode is set to Prompt for consent When an operation requires elevation of privilege, the user is prompted to select either Permit or Deny. If the user selects Permit, the operation continues with the user's highest available privilege.

Box 3: Yes

User Account Control: Behavior of the elevation prompt for standard users is set to Prompt for credentials (Default) When an operation requires elevation of privilege, the user is prompted to enter an administrative user name and password. If the user enters valid credentials, the operation continues with the applicable privilege.

References:

<https://docs.microsoft.com/en-us/windows/security/identity-protection/user-account-control/user-account-contro>

NEW QUESTION 299

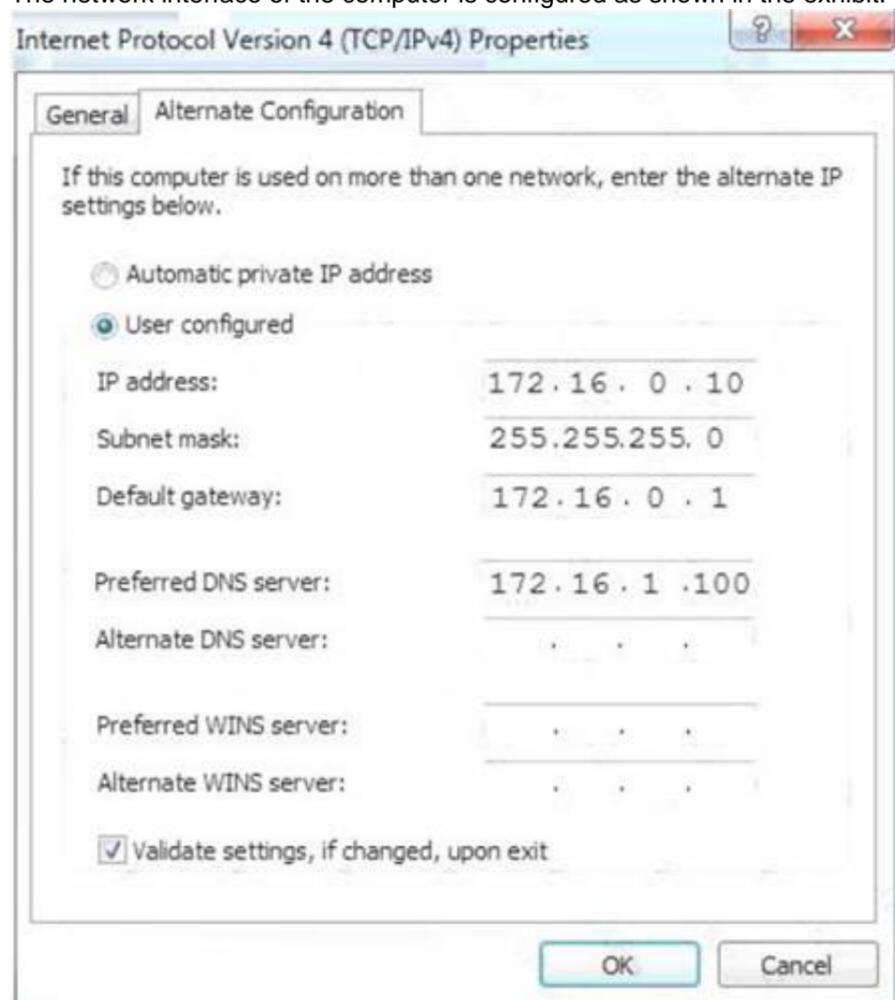

- (Exam Topic 4)

Your network contains the segments shown in the following table.

Name	IP address space	Covered by DHCP	Next available IP address
Segment1	172.16.0.0/24	Yes	172.16.0.58
Segment2	192.168.1.0/24	No	Not applicable

You have a computer that runs Windows 10.

The network interface of the computer is configured as shown in the exhibit. (Click the Exhibit tab.)

You need to identify which IP address the computer will have on the network when the computer connects to the segments.

Which IP address should you identify for each segment? To answer, select the appropriate options in the answer area.
 NOTE: Each correct selection is worth one point.

Segment1: ▼

172.16.0.10
172.16.0.58
An address that starts with 169.254

Segment2: ▼

172.16.0.10
172.16.0.58
An address that starts with 169.254
An address that starts with 192.168.1

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

Segment1: ▼

172.16.0.10
172.16.0.58
An address that starts with 169.254

Segment2: ▼

172.16.0.10
172.16.0.58
An address that starts with 169.254
An address that starts with 192.168.1

NEW QUESTION 303

- (Exam Topic 4)

You have a computer that runs Windows 10. The computer contains two local user accounts named User1 and User2. User2 is a member of the local Administrators group.

User1 performs the actions shown in the following table.

Time	Name	Action
9:00 AM	C:\Users\User1\Documents\File1.docx	Create a file.
9:01 AM	D:\Folder1\File2.txt	Create a file.
10:10 AM	C:\Users\User1\Documents\File1.docx	Save the file.
10:14 AM	D:\Folder1\File2.txt	Save the file.
10:19 AM	D:\Folder1\File2.txt	Save the file.
10:25 AM	D:\Folder1\File2.txt	Save the file.

User2 performs the actions shown in the following table.

Time	Action
9:49 AM	Sign in.
9:50 AM	Add D:\Folder1 to the Documents library.
10:00 AM	Turn on File History and configure File History to save copies of files every 20 minutes.
10:05 AM	Create a restore point.
10:06 AM	Sign out.

For each of the following statements, select Yes if the statement is true. Otherwise, select No.
 NOTE: Each correct selection is worth one point.

Statements	Yes	No
User1 can use File History to restore File1.docx to the contents contained in the file at 10:05 AM.	<input type="radio"/>	<input type="radio"/>
User1 can use File History to restore File2.txt to the contents contained in the file at 10:15 AM.	<input type="radio"/>	<input type="radio"/>
User1 can use File History to restore File2.txt to the contents contained in the file at 10:20 AM.	<input type="radio"/>	<input type="radio"/>

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

Graphical user interface, text, application Description automatically generated

NEW QUESTION 304

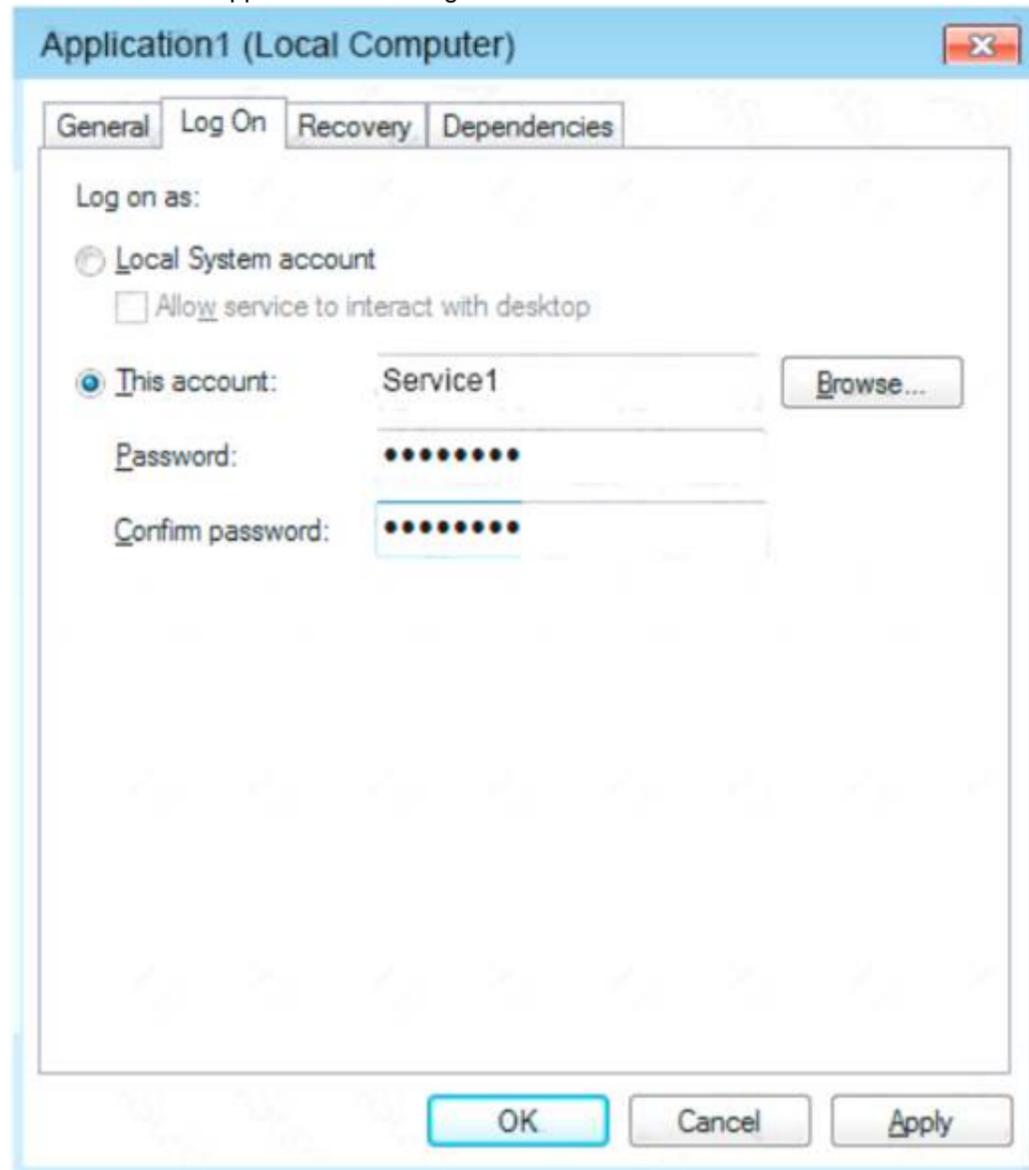

- (Exam Topic 4)

Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution that might meet the stated goals. Some question sets might have more than one correct solution, while others might not have a correct solution.

After you answer a question in this section, you will NOT be able to return to it. As a result, these questions will not appear in the review screen.

You have a computer named Computer1 that runs Windows10.

A service named Application1 is configured as shown in the exhibit.

You discover that a user used the Service1 account to sign in to Computer1 and deleted some files.

You need to ensure that the identity used by Application1 cannot be used by a user to sign in to the desktop on Computer1. The solution must use the principle of least privilege.

Solution: On Computer1, you configure Application1 to sign in as the LocalSystem account and select the Allow service to interact with desktop check box. You delete the Service1 account.

Does this meet the goal?

- A. Yes
- B. No

Answer: B

Explanation:

NEW QUESTION 308

- (Exam Topic 4)

You have an isolated network segment that contains only three computers named Computer1, Computer2, and Computer3 that run Windows 10. The network settings for each computer are shown in the following table.

Name	TCP/IPv4		TCP/IPv6
	General	Alternate configuration	
Computer1	IP assignment: Automatic (DHCP)	Automatic private IP address	Obtain an IPv6 address automatically
Computer2	IP assignment: Manual IP address: 169.254.15.10 Mask: 255.255.0.0	<i>Not applicable</i>	IPv6 address: 2001::15 Subnet prefix length: 64
Computer3	IP assignment: Manual IP address: 192.168.15.5 Mask: 255.255.0.0	<i>Not applicable</i>	IPv6 address: FE80::5 Subnet prefix length: 64

Windows Defender Firewall is configured to allow ICMP and ICMPv6 traffic.

For each of the following statements, select Yes if the statement is true. Otherwise, select No. NOTE: Each correct selection is worth one point.

Answer Area

Statements	Yes	No
On Computer1, the ping Computer2 command will return a successful result.	<input type="radio"/>	<input type="radio"/>
On Computer1, the ping FE80::5 command will return a successful result.	<input type="radio"/>	<input type="radio"/>
On Computer1, the ping 192.168.15.5 command will return a successful result.	<input type="radio"/>	<input type="radio"/>

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

Answer Area

Statements	Yes	No
On Computer1, the ping Computer2 command will return a successful result.	<input type="radio"/>	<input checked="" type="radio"/>
On Computer1, the ping FE80::5 command will return a successful result.	<input type="radio"/>	<input checked="" type="radio"/>
On Computer1, the ping 192.168.15.5 command will return a successful result.	<input type="radio"/>	<input checked="" type="radio"/>

NEW QUESTION 312

- (Exam Topic 4)

Your network contains an Active Directory domain named Contoso.com.

A user named User1 has a personal computer named Computer that runs Windows 10 Pro. User1 has a VPN connection to the corporate network.

You need to ensure that when User1 connection to the corporate network.

You need to ensure that when user1 connects to the VPN, network traffic uses a proxy located in the corporate network. The solution must ensure that User1 can access the internet when disconnected from the VPN.

What should you do?

- A. From the Settings app, modify the properties of the VPN connection.
- B. From the Setting app, modify proxy settings for the local computer.
- C. From Control panel, modify the properties of the VPN connection
- D. From Control Panel, modify the Windows Defender Firewall settings

Answer: A

NEW QUESTION 314

- (Exam Topic 4)

You have computers that run Windows 11 as shown in the following table.

Name	IP address	Joined to
Computer1	192.168.10.10	Active Directory
Computer2	192.168.10.15	Workgroup

You ping 192.168.10.15 from Computer1 and discover that the request timed out. You need to ensure that you can successfully ping 192.168.10.15 from Computer1. Solution: On Computer1, you turn off Windows Defender Firewall-Does this meet the goal?

- A. Yes
- B. No

Answer: B

NEW QUESTION 318

- (Exam Topic 4)

You have a computer named Computer1 that runs Windows 10. Computer1 has a folder named C:\Folder1.

You need to meet the following requirements:

- > Log users that access C:\Folder1.
- > Log users that modify and delete files in C:\Folder1. Which two actions should you perform?

- A. From the properties of C:\Folder1, configure the Auditing settings.
- B. From the properties of C:\Folder1, select the Encryption contents to secure data option.
- C. From the Audit Policy in the local Group Policy, configure Audit directory service access.
- D. From the Audit Policy in the local Group Policy, you configure Audit object access.
- E. From the Audit Policy in the local Group Policy, you configure Audit system events.

Answer: AD

Explanation:

Files and folders are objects and are audited through object access. Reference:

NEW QUESTION 323

- (Exam Topic 4)

Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution that might meet the stated goals. Some question sets might have more than one correct solution, while others might not have a correct solution.

After you answer a question in this section, you will NOT be able to return to it. As a result, these questions will not appear in the review screen.

You have two computers named Computer1 and Computer2 that run Windows 10.

You have an Azure Active Directory (Azure AD) user account named admin@contoso.com that is in the local Administrators group on each computer.

You sign in to Computer1 by using admin@contoso.com.

You need to ensure that you can use Event Viewer on Computer1 to connect to the event logs on Computer2. Solution: On Computer2, you enable the Remote Event Log Management inbound rule from Windows Defender Firewall.

Does this meet the goal?

- A. Yes
- B. No

Answer: A

Explanation:

Reference:
<https://docs.microsoft.com/en-us/previous-versions/windows/it-pro/windows-server-2008-R2-and-2008/cc76643>

NEW QUESTION 325

- (Exam Topic 4)

You deploy 100 computers that run Windows 10. Each computer has a cellular connection and a Wi-Fi connection.

You need to prevent the computers from using the cellular connection unless a user manually connects to the cellular network.

What should you do?

- A. Set the Use cellular instead of Wi-Fi setting for the cellular connection to Never
- B. Run the netsh wlan set hostednetwork mode=disallow command
- C. Clear the Let Windows manage this connection check box for the cellular connection
- D. Select the Let Windows manage this connection check box for the Wi-Fi connection

Answer: C

Explanation:

NEW QUESTION 327

- (Exam Topic 4)

Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution that might meet the stated goals. Some question sets might have more than one correct solution, while others might not have a correct solution.

After you answer a question in this section, you will NOT be able to return to it. As a result, these questions will not appear in the review screen.

You deploy Windows 10 to a computer named Computer1.

Computer1 contains a folder named C:\Folder1. Folder1 contains multiple documents.

You need to ensure that you can recover the files in Folder1 by using the Previous Versions tab. Solution: You enable File History and add Folder1 to File History. Does this meet the goal?

- A. Yes
- B. No

Answer: A

Explanation:

adding c:\Folder1 to File History WILL allow you to use the Previous Versions on that folder. Assuming you are able to turn File History on in the first place.

Reference:

<https://support.microsoft.com/en-za/help/17128/windows-8-file-history>

NEW QUESTION 329

- (Exam Topic 4)

You have a computer named Computer1 that runs Windows 10. On Computer1, you turn on File History.

You need to protect a folder named D:\Folder1 by using File History. What should you do?

- A. From File Explorer, modify the General settings of D:\Folder1
- B. From File Settings app, configure the Backup settings
- C. From the Settings app, configure the Recovery settings
- D. From File History in Control Panel, configure the Select drive settings

Answer: B

Explanation:

To configure File History, click More options on the Backup screen. The Backup options screen allows you to set how often File History backs up your files and how long versions are saved.

NEW QUESTION 331

- (Exam Topic 4)

Your network contains an Active Directory domain. The domain contains a group named Group1.

All the computers in the domain run Windows 10. Each computer contains a folder named C:\Documents that has the default NTFS permissions set.

You add a folder named C:\Documents\Templates to each computer.

_ You need to configure the NTFS permissions to meet the following requirements: All domain users must be able to open the files in the Templates folder.

_ Only the members of Group1 must be allowed to edit the files in the Templates folder.

How should you configure the NTFS settings on the Templates folder? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

Inheritance: ▼

Enable inheritance.
Disable inheritance and remove permissions.
Disable inheritance and copy explicit permissions.

Permissions for domain users: ▼

Allow Read&Execute
Deny Read&Execute
Allow Modify
Deny Modify

Permissions for Group1: ▼

Allow Read&Execute
Deny Read&Execute
Allow Modify
Deny Modify

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

Inheritance: ▼

Enable inheritance.
Disable inheritance and remove permissions.
Disable inheritance and copy explicit permissions.

Permissions for domain users: ▼

Allow Read&Execute
Deny Read&Execute
Allow Modify
Deny Modify

Permissions for Group1: ▼

Allow Read&Execute
Deny Read&Execute
Allow Modify
Deny Modify
