Exam Questions HPE2-W11

Selling HPE Aruba Networking Solutions

NEW QUESTION 1

You are meeting with a retailer, which has many small branches and is rapidly growing. What is one benefit of HPE Aruba Networking ESP solutions for this customer?

- A. The customer can deploy a single HPE Aruba Networking switch per site because the switches offer wired and wireless capabilities within one box.
- B. HPE Aruba Networking helps secure branches by requiring all traffic to be back-hauled to the data center.
- C. HPE Aruba Networking offers different architectures and network device families, each specialized for either campus or branch networking.
- D. Non-IT experts can install HPE Aruba Networking devices at new sites, and HPE Aruba Networking Central will automatically discover and configure them.

Answer: D

Explanation:

HPE Aruba Networking ESP solutions are designed to simplify and accelerate the deployment and management of branch networks. They enable non-IT experts to install HPE Aruba Networking devices such as access points, switches, and gateways at new sites, and HPE Aruba Networking Central will automatically discover and configure them using zero-touch provisioning¹². This reduces the time and cost of setting up new branches, and ensures consistent and secure network policies across all sites³. NEW QUESTION 2

You suspect that the HPE Aruba Networking network management solution might resonate with a customer. What is one good way to open the conversation?

- A. Access an Aruba AP Web UI and demonstrate configuring a wireless LAN (WLAN).
- B. Assess how well the customer understands the wireless technologies currently in use.
- C. Point out the differences between HPE Aruba's, Cisco's, and Juniper's management approach one by one.
- D. Ask about how much visibility the customer currently has into the network.

Answer: D

Explanation:

HPE Aruba Networking network management solution is a cloud-based platform that provides AI-powered insights, automation, and security for wired, wireless, and SD-WAN networks¹. A good way to open the conversation is to ask the customer about their current network visibility, such as how they monitor network performance, troubleshoot issues, and optimize user experience. This can help to identify their pain points and show how HPE Aruba Networking network management solution can address them.

NEW QUESTION 3

A customer states, " We've recently deployed a lot of "smart" wireless devices for building automation, and our current network isn't reliable enough for them." What should you conclude?

- A. You might have a good opportunity to sell HPE Aruba Networking Wi-Fi 6 or 6E and Aruba Central solutions to this customer.
- B. You should advise this customer to wait until Wi-Fi 7 is released to upgrade their network.
- C. You might have a good opportunity to sell HPE Aruba Networking Central to this customer, but probably not HPE Aruba Networking APs or switches.
- D. You should advise this customer to move the "smart" devices to Ethernet connections and deploy HPE Aruba Networking switches.

Answer: A

Explanation:

HPE Aruba Networking Wi-Fi 6 or 6E solutions are designed to provide fast, reliable, and secure wireless connectivity for smart devices and IoT applications. They support high- density environments, multi-gigabit speeds, and advanced features such as OFDMA and TWT¹². HPE Aruba Networking Central is a cloud-based network management platform that simplifies and automates the deployment, configuration, and monitoring of wireless, wired, and SD-WAN networks³. It also provides AI-powered insights, automation, and security for the entire network³.

NEW QUESTION 4

An organization has adopted a hybrid work model and is concerned about security. Which distinguishing value of HPE Aruba Networking ESP should you emphasize?

- A. HPE Aruba Networking ESP relays all user traffic through the HPE Aruba Networking cloud to filter and secure the traffic.
- B. HPE Aruba Networking ESP makes it easy to enforce consistent role-based policies whether users connect from home, while traveling, or at an office.
- C. HPE Aruba Networking ESP takes an Internet perimeter-focused approach to security, which is ideal for organizations with remote workers
- D. HPE Aruba Networking ESP empowers admins to define manual security policies based on criteria such as switch port and SSID.

Answer: B

Explanation:

HPE Aruba Networking ESP is a cloud-native platform that unifies infrastructure, security, policies, and AI-powered management across all your edges¹. One of its distinguishing values is that it enables Zero Trust security, which applies consistent role-based policies to users and devices regardless of where they connect from². This ensures that only authorized and authenticated users and devices can access the network and its resources. NEW QUESTION 5

A senior IT manager tells you that she wants IT staff members to spend less time troubleshooting issues so they have more time to focus on new initiatives. How can HPE Aruba Networking ESP deliver the senior IT manager's desired outcome?

- A. HPE Aruba User Experience Insight (UXI) helps IT to determine why data center applications are not performing as well as they should be.
- B. HPE Aruba Networking Edge-to-Cloud solutions rely on AI to automate the onboarding of devices.

- C. HPE Aruba Networking Central with AIOps accelerates IT troubleshooting by providing insights and recommendations that help remedy issues.
- D. HPE Aruba Networking ClearPass monitors network devices' performance and automatically notifies IT admins of performance issues.

Answer: C

Explanation:

HPE Aruba Networking Central with AIOps is a cloud-native network management platform that leverages artificial intelligence to provide insights, automation, and security for wired, wireless, and SD-WAN networks¹. It helps IT staff to spend less time troubleshooting issues by using data-driven analytics, root cause analysis, and proactive remediation². It also simplifies network troubleshooting with intuitive dashboards, action commands, and intelligent network insights^{3,4}.

NEW QUESTION 6

You want to determine if a business decision-maker might be interested in HPE Aruba Networking Central with AIOps. What is a good topic to discuss?

- A. The cost to the business when network issues interfere with user productivity
- B. The benefits of better aligning the data center IT operations team with the development team
- C. The security benefits of applying intelligent access policies that follow users and devices
- D. The difference between machine learning and other forms of artificial intelligence (AI)

Answer: A

Explanation:

HPE Aruba Networking Central with AIOps is a cloud-native network management platform that leverages artificial intelligence to provide insights, automation, and security for wired, wireless, and SD-WAN networks¹. A good topic to discuss with a business decision-maker is how HPE Aruba Networking Central with AIOps can help reduce the cost of network downtime, improve user experience, and optimize network performance².
