NEW QUESTION 55

- (Topic 5)

You have a Microsoft 365 subscription that uses Microsoft Teams. You feed 10 identify which teams were inactive during the past 90 days. What should you use?

- A. Teams advisor
- B. the Office 365 Groups activity report
- C. the Teams user activity report
- D. the Teams usage report

Answer: D

Explanation:

According to the Microsoft documentation1, you can use the Teams usage report in the Microsoft Teams admin center to get an overview of the usage activity in Teams. This includes the number of active users, channels, guests, and post messages via chat and conversations to know how many users in each team are actively using Teams to communicate and collaborate. However, this report only shows the last 7 or 28 days of activity of teams, which may not be enough to

identify inactive teams over a longer period. Alternatively, you can use PowerShell scripts to generate activity reports that check the audit records of inactive teams and provide an HTML report file based on SharePoint site activity in the group's document library in the past 90 days and conversations that occurred in the mailbox in the past year². However, this method requires writing complex and time-consuming PowerShell commands, which may not be feasible for administrators who need to produce multiple reports on a daily basis.

Another method to detect inactive teams in your Teams environment is by setting an expiration policy for the associated group in Azure AD. This notifies the owner of the team or group by sending an email to renew or delete the team after specified days if no activity is detected³. However, this method also has some drawbacks, such as:

? The owner may fail to notice the email or renew the team within the timeline of the configured policy, resulting in the team being deleted automatically and not being restorable after 30 days.

? The expiration policy applies to all Microsoft 365 groups in an Azure AD organization, not just Teams. This may affect other groups that are not related to Teams.

? The expiration policy requires Azure AD Premium licenses for the members of all groups to which the policy is applied.

Therefore, based on this information, the correct answer is D. the Teams usage report. This report is the most straightforward and accessible way to find inactive teams in Microsoft Teams, even though it has some limitations. The other options are either not related to finding inactive teams (Teams advisor) or require additional licenses or permissions (the Office 365 Groups activity report and the Teams user activity report).

You apply TeamsUpgradePolicy to the user accounts of the company’s R&D and human resources (HR) departments by using the coexistence modes shown in the following table.

Department	Coexistence mode
R&D	TeamsOnly
HR	SfbWithTeamsCollabAndMeetings

For each of the following statements, select Yes if the statement is true. Otherwise, select No.
NOTE: Each correct selection is worth one point.

Statements	Yes	No
Users in the R&D department will not be able to join Skype for Business Online meetings.	<input type="radio"/>	<input type="radio"/>
Existing Skype for Business Online meetings scheduled by users in the HR department will migrate automatically to Microsoft Teams.	<input type="radio"/>	<input type="radio"/>
Users in the HR department will be able to make and receive PSTN calls by using Microsoft Teams.	<input type="radio"/>	<input type="radio"/>

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

Box 1: No
TeamsOnly: Can schedule meetings in Teams only, but can join Skype for Business or Teams meetings.
Box 2: Yes
By default, when assigning either TeamsOnly or SfbWithTeamsCollabAndMeetings to an individual user, any existing Skype for Business meetings scheduled by that user for the future are converted to Teams meetings.
Box 3: No
SfBWithTeamsCollabAndMeetings: Has the chat and calling functionality of user in SfBOnly mode.
SfBOnly: Can initiate chats and calls from Skype for Business only.

All team members can add the Microsoft Flow app to a team.	<input type="radio"/>	<input type="radio"/>
All team members can add the Microsoft Planner app to a team.	<input type="radio"/>	<input type="radio"/>

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

Box 1: Yes
“Allow interaction with custom apps” in the org-wide policy and “upload custom apps” in the global policy are set to on. This means that users can upload custom apps to teams that allow it and to teams for which they are owners.
Box 2: Yes
The global policy allows Microsoft Flow.
Box 3: No
The global policy allows Microsoft Planner. However, the org-wide settings blocks Microsoft Planner. In this case, the org-wide policy blocking the app will override the global policy meaning the app will be blocked. When an app is blocked, users will not be able to add the app to a team.

Task 9

You need to deploy the Microsoft Viva Connections app to Teams and install the app as the first item on the app bar of the Teams client for all users.

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

To deploy the Microsoft Viva Connections app to Teams and install the app as the first item on the app bar of the Teams client for all users, you need to use the Teams admin center and PowerShell. Here are the steps to follow:

? Sign in to the Teams admin center with your Microsoft 365 username and password1.

? In the left navigation, go to Teams apps > Manage apps.

? Click Upload and then select the Viva Connections app package that you created using PowerShell2. If you have not created the app package yet, you can follow the instructions in this article to do so.

? After uploading the app package, click on the app name and then click Publish.

? In the left navigation, go to Teams apps > Setup policies.

? Select an existing policy or create a new one by clicking Add.

? In the Setup policy pane, under Installed apps, click Add apps and then select the Viva Connections app from the list.

? Drag and drop the Viva Connections app to reorder it as the first item on the app bar.

? Click Save and then Close.

? To assign the setup policy to all users, you can use PowerShell to run the following cmdlet:

Get-CsOnlineUser | Grant-CsTeamsAppSetupPolicy -PolicyName "YourPolicyName"

Replace "YourPolicyName" with the name of the policy that you created or modified in step 6.

Note: It may take up to 24 hours for the changes to take effect.

Now, you have deployed and installed the Microsoft Viva Connections app to Teams as the first item on the app bar for all users.

Task 5

You need to prevent incoming Teams call notifications when users are already on a Teams call or in a Teams meeting. The solution must NOT reject the call.

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

To prevent incoming Teams call notifications when users are already on a Teams call or in a Teams meeting, you can use the Teams admin center to enable the Mute notifications during meetings and calls option. This option will suppress the incoming call notifications without rejecting the call. The caller will still hear the ringing tone and the callee can still answer the call from the Teams app or the taskbar. Here are the steps to enable this option:

? Sign in to the Teams admin center with your Microsoft 365 username and password1.

? In the left navigation, go to Teams > Teams update policies.

? Select an existing policy or create a new one by clicking Add.

? In the Update policy pane, under Meetings and calls, turn on the toggle for Mute notifications during meetings and calls.

? Click Save and then Close.

Note: You can assign different update policies to different users or groups of users. For more information, see Manage update policies in Microsoft Teams2.

Task 4

You need to add the following disclaimer as pan of all Teams meeting invites: “Disc aimer: This meeting may be recorded for quality and training purposes.”

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

To add a disclaimer to all Teams meeting invites, you can use the Exchange admin center to create a mail flow rule that applies the disclaimer to meeting requests. Here are the steps to follow:

? Sign in to the Exchange admin center with your Microsoft 365 username and password1.

? In the left navigation, go to Mail flow > Rules.

? Click Add (+) and then select Create a new rule.

? In the New rule pane, enter a name for the rule, such as “Meeting disclaimer”.

? Under Apply this rule if, select A message header includes any of these words.

? In the Specify header name box, enter X-MS-Exchange-Calendar-Meeting- Request. This is a special header that identifies meeting requests2.

? In the Specify words or phrases box, enter True. This means that the rule will apply to any message that has the header set to True.

? Click Add and then OK.

? Under Do the following, select Append the disclaimer.

? In the Specify disclaimer text box, enter the disclaimer text that you want to add to the meeting invites, such as:

Disclaimer: This meeting may be recorded for quality and training purposes.

? Click Enter text and then OK.

? Under Choose a mode for this rule, select Enforce.

? Click Save.

Now, when you or anyone in your organization schedules a Teams meeting, the disclaimer will be added to the meeting invites automatically.

NEW QUESTION 134

SIMULATION - (Topic 4)

Task 10

You need to set Microsoft SharePoint as the only cloud storage option for all teams.

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

To set Microsoft SharePoint as the only cloud storage option for all teams, you need to use the Teams admin center to disable the third-party cloud storage services. Here are the steps to follow:

? Sign in to the Teams admin center with your Microsoft 365 username and password1.

? In the left navigation, go to Org-wide settings > Services & add-ins.

? Under Cloud file storage, click Manage.

? In the Cloud file storage pane, turn off the toggles for Box, Dropbox, Google Drive, and Citrix ShareFile. This will disable these services for all teams and users in your organization.

? Click Save.

Now, Microsoft SharePoint will be the only cloud storage option for all teams. Users will be able to access SharePoint files from the Files tab in each team channel or from the Files app on the left side of Teams.

Task 3

Adele Vance Is a member of your company s technology adoption team.

You need to provide only Adele with the ability to turn on and off Teams preview features.

- A. Mastered
 B. Not Mastered

Answer: A

Explanation:

To provide only Adele Vance with the ability to turn on and off Teams preview features, you need to create and assign a custom update policy for her. Here are the steps to do so:

? Sign in to the Microsoft Teams admin center with your Microsoft 365 username and password1.

? In the left navigation, go to Teams > Teams Update policies.

? Select Add to create a new policy or select an existing policy to open Update policy.

? Name the update policy, add a description, and select Enabled from the drop- down menu for Allow public preview. This option enables Teams Public Preview regardless of whether a user is enrolled in Office Current Channel (Preview). The end user must also opt in to Teams public preview in their Teams app2.

? Click Save and then Close.

? In the left navigation, go to Users and then search for Adele Vance from the list of users.

? In the user details page, go to Policies and then click Edit next to Assigned policies.

? In the Assigned policies pane, under Update policy, select the policy that you created or modified in step 4 from the drop-down menu.

? Click Apply and then Close.

Now, Adele Vance can turn on and off Teams preview features by following these steps in her Teams app3:

? Select the three dots to the left of your profile to display the Teams menu.

? Select About > Public preview.

? Select Switch to Public preview or Switch back to standard version.

NEW QUESTION 194

- (Topic 5)
Your company uses Microsoft Teams and a Microsoft calling plan. The company has a main office in Chicago. The company opens a new office in Toronto that has 500 users. You need to ensure that the correct address is available to emergency responders. What should you do?

- A. Create a calling policy and assign the policy to each user.
- B. Create a configuration profile and assign the profile to the device of each user.
- C. Add an emergency address, and then modify the outbound calling setting for each user.
- D. Add an emergency address, and then modify the location for each phone number.

Answer: D

Explanation:

According to the Microsoft documentation1, you need to add an emergency address for each location where your users make and receive phone calls. An emergency address is a civic address—the physical or street address of a place of business for your organization. It is used to route emergency calls to the appropriate dispatch authorities and to assist in locating the emergency caller. After you add an emergency address, you need to assign a phone number to it. You can assign either a user number or a service number. A user number is assigned to a specific user in your organization who makes and receives phone calls. A service number is used for services such as Audio Conferencing (for dial-in numbers), auto attendants, or call queues. To assign a phone number to an emergency address, you need to modify the location for each phone number. You can do this by using the Microsoft Teams admin center or PowerShell. For example, to modify the location for a user number by using PowerShell, you can use the Set-CsOnlineVoiceUser cmdlet with the -LocationID parameter2.

NEW QUESTION 237

- (Topic 5)

Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution that might meet the stated goals. Some question sets might have more than one correct solution, while others might not have a correct solution.

After you answer a question in this section, you will NOT be able to return to it. As a result, these questions will not appear in the review screen.

You company has a Microsoft 365 subscription and a Virtual Desktop Infrastructure (VDI) solution.

The company's Microsoft Teams upgrade policy is set to Teams only coexistence mode. You deploy the Microsoft Installer (MSI) package for Microsoft Teams to the VDI solution. Several months later, users of the VDI solution report that their workstation is missing several new Microsoft Teams features.

You need to ensure that the VDI solution users can use the new Microsoft Teams features. Solution: You uninstall the Microsoft Teams MSI package, and then reinstall a new

Microsoft Teams MSI package.

Does this meet the goal?

- A. Yes
- B. No

NEW QUESTION 243

- (Topic 5)

Your company has a Microsoft 365 subscription.

You need to prevent only users in the company's research department from deleting chat messages.

What should you do first from the Microsoft Teams admin center?

- A. Configure the Meeting settings.
- B. Create a new messaging policy.
- C. Modify the global messaging policy.
- D. Create a new meeting policy.

Answer: B

NEW QUESTION 245

- (Topic 5)

You have a Microsoft 365 E5 subscription that uses Teams.

You need to ensure that all the files in Teams channels are stored for at least one year after the files are deleted.

What should you do?

- A. Create an Audit retention policy.
- B. Enable Customer Lockbox.
- C. Create a data loss prevention (DIP) policy for Teams chat and channel messages.
- D. Create a retention policy for Microsoft SharePoint sites.

Answer: D

NEW QUESTION 247

- (Topic 5)

You have a Microsoft 365 subscription. You plan to implement Microsoft Teams.

You need to perform network quality and connectivity tests from an on-premises network to Microsoft 365 Online services by using the Network Testing Companion

You install the Network Testing Companion module on a local Windows 10 device. Which additional software should you install to perform the tests?

- A. the Microsoft Teams desktop client
- B. Network Assessment Tool
- C. Windows Assessment Toolkit
- D. Windows Performance Analyzer (WPA)

Answer: B

Explanation:

According to the Microsoft documentation¹, the Network Testing Companion is a PowerShell module that allows you to perform network quality and connectivity tests from an on-premises network to Microsoft 365 Online services by using the Network Testing Companion. The Network Testing Companion module requires the following software to be installed on the local Windows 10 device:

? PowerShell 5.1 or later

? .NET Framework 4.7.2 or later

? Microsoft Teams Network Assessment Tool

The Microsoft Teams Network Assessment Tool is a tool that tests the connectivity to various Teams servers deployed in the Microsoft Azure network. It measures network performance by streaming packets to the nearest edge site and back for a configurable amount of time².

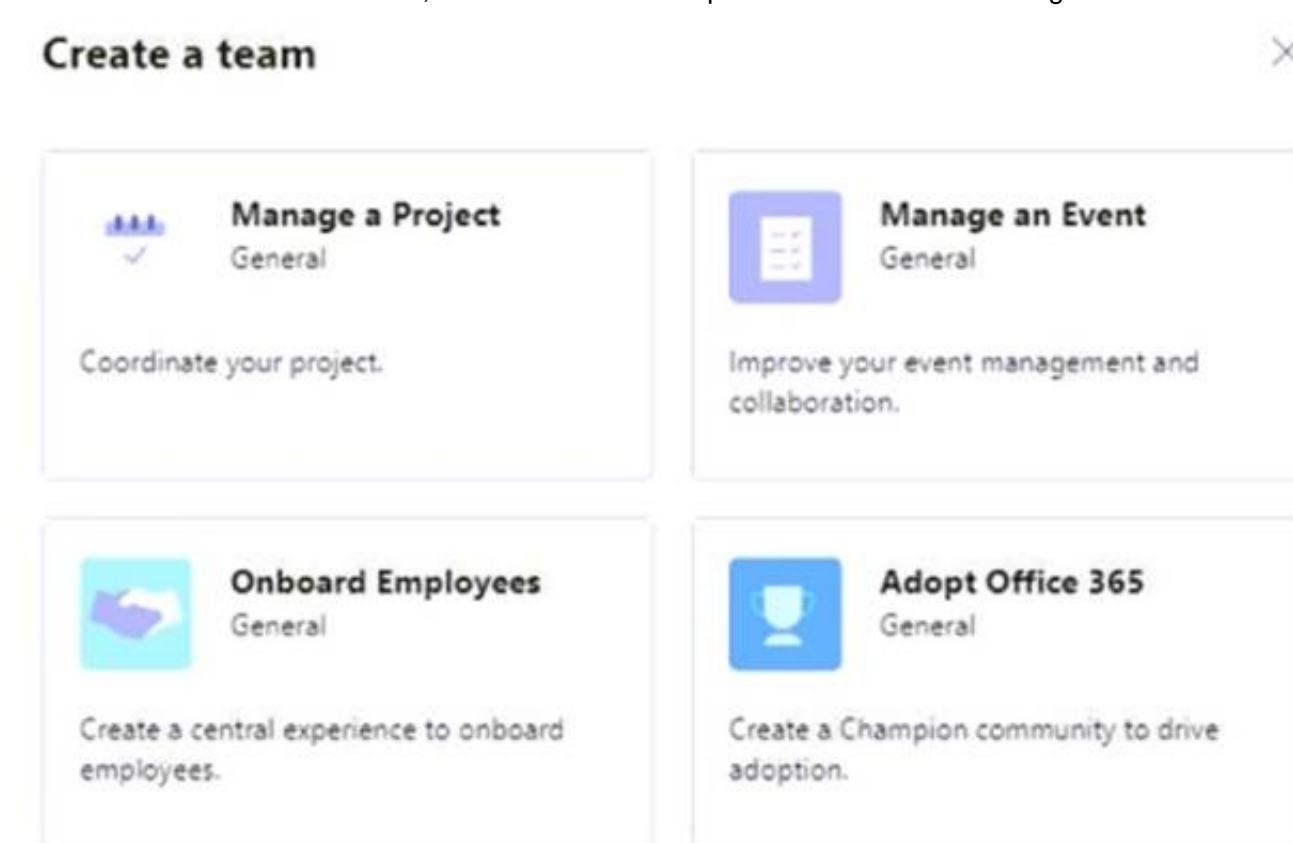

Therefore, based on this information, the correct answer is B. Network Assessment Tool. This tool is required to perform network quality and connectivity tests by using the Network Testing Companion module. The other options are either not related to network testing (the Microsoft Teams desktop client and Windows Performance Analyzer) or not required for the Network Testing Companion module (Windows Assessment Toolkit).
