

PMI

Exam Questions PMI-RMP

PMI Risk Management Professional

NEW QUESTION 1

Adrian is the project manager of the NHP Project. In her project there are several work packages that deal with electrical wiring. Rather than to manage the risk internally she has decided to hire a vendor to complete all work packages that deal with the electrical wiring. By removing the risk internally to a licensed electrician Adrian feels more comfortable with project team being safe. What type of risk response has Adrian used in this example?

- A. Avoidance
- B. Mitigation
- C. Acceptance
- D. Transference

Answer: D

NEW QUESTION 2

Ben is the project manager of the YHT Project for his company. Alice, one of his team members, is confused about when project risks will happen in the project. Which one of the following statements is the most accurate about when project risk happens?

- A. Project risk can happen at any moment.
- B. Project risk happens throughout the project execution.
- C. Project risk is always in the future.
- D. Project risk is uncertain, so no one can predict when the event will happen.

Answer: C

NEW QUESTION 3

Jeff works as a project manager for BlueWell Inc. He is determining which risks can affect the project. Which of the following are the inputs to the identify risks process that Jeff will use to accomplish the task? Each correct answer represents a complete solution. Choose all that apply.

- A. Scope baseline
- B. Activity cost estimates
- C. Risk register
- D. Risk management plan

Answer: ABD

NEW QUESTION 4

Where can a project manager find risk-rating rules?

- A. Risk management plan
- B. Organizational process assets
- C. Enterprise environmental factors
- D. Risk probability and impact matrix

Answer: B

NEW QUESTION 5

Tracy is the project manager of the NLT Project for her company. The NLT Project is scheduled to last 14 months and has a budget at completion of \$4,555,000. Tracy's organization will receive a bonus of \$80,000 per day that the project is completed early up to \$800,000. Tracy realizes that there are several opportunities within the project to save on time by crashing the project work. Crashing the project is what type of risk response?

- A. Transference
- B. Mitigation
- C. Exploit
- D. Enhance

Answer: D

NEW QUESTION 6

You are the project manager of the GHE Project. You have identified the following risks with the characteristics as shown in the following figure: How much capital should the project set aside for the risk contingency reserve?

- A. \$142,000
- B. \$41,750
- C. \$23,750
- D. \$232,000

Answer: C

NEW QUESTION 7

You are the project manager for GHY Project and are working to create a risk response for a negative risk. You and the project team have identified the risk that the project may not complete on time, as required by the management, due to the creation of the user guide for the software you're creating. You have elected to hire an external writer in order to satisfy the requirements and to alleviate the risk event. What type of risk response have you elected to use in this instance?

- A. Avoidance
- B. Exploiting

- C. Transference
- D. Sharing

Answer: C

NEW QUESTION 8

The only output of the perform qualitative risk analysis are risk register updates. When the project manager updates the risk register he will need to include several pieces of information including all of the following except for which one?

- A. Trends in qualitative risk analysis
- B. Risk probability-impact matrix
- C. Watchlist of low-priority risks
- D. Risks grouped by categories

Answer: B

NEW QUESTION 9

Courtney is the project manager for her organization. She is working with the project team to complete the qualitative risk analysis for her project. During the analysis Courtney encourages the project team to begin the grouping of identified risks by common causes. What is the primary advantage to group risks by common causes during qualitative risk analysis?

- A. It helps the project team realize the areas of the project most laden with risks.
- B. It saves time by collecting the related resources, such as project team members, to analyze the risk events.
- C. It can lead to developing effective risk responses.
- D. It can lead to the creation of risk categories unique to each project.

Answer: C

NEW QUESTION 10

You are a risk auditor for your company. You are reviewing the contract types a project manager has used in her project. Of the following, which contract type has the most risk for the project manager as a buyer?

- A. Cost plus percentage of costs
- B. Time and material
- C. Cost plus incentive fee
- D. Fixed-price, incentive fee

Answer: A

NEW QUESTION 10

You are the project manager for your organization and you are working with Thomas, a project team member. You and Thomas have been working on a specific risk response for a probable risk event in the project. Thomas is empowered with a risk response and will control all aspects of the identified risk response in which a particular risk event will happen within the project. What title, in regard to risk, is bestowed on Thomas?

- A. Risk expeditor
- B. Risk owner
- C. Risk team leader
- D. Risk coordinator

Answer: B

NEW QUESTION 13

You are the project manager for the TTR project. You are in the process of gathering information for risk identification. You ask experts to participate in the process through their emails for maintaining anonymity. You collect the responses, summarize them, and are then re-circulated to the experts for further comment. Which of the following techniques are you using for risk identification?

- A. Delphi
- B. Expert judgment
- C. SWOT analysis
- D. Brainstorming

Answer: A

NEW QUESTION 18

Gary is the project manager of his organization. He is managing a project that is similar to a project his organization completed recently. Gary has decided that he will use the information from the past project to help him and the project team to identify the risks that may be present in the project. Management agrees that this checklist approach is ideal and will save time in the project. Which of the following statement is most accurate about the limitations of the checklist analysis approach for Gary?

- A. The checklist analysis approach is fast but it is impossible to build an exhaustive checklist.
- B. The checklist analysis approach saves time, but can cost more.
- C. The checklist analysis approach only uses qualitative analysis.
- D. The checklist is also known as top down risk assessment.

Answer: A

NEW QUESTION 23

Management has asked you to perform a risk audit and report back on the results. Bonny, a project team member asks you what a risk audit is. What do you tell Bonny?

- A. A risk audit is a review of all the risks that have yet to occur and what their probability of happening are.
- B. A risk audit is a review of the effectiveness of the risk responses in dealing with identified risks and their root causes, as well as the effectiveness of the risk management process.
- C. A risk audit is a review of all the risk probability and impact for the risks, which are still present in the project but which have not yet occurred.
- D. A risk audit is an audit of all the risks that have occurred in the project and what their true impact on cost and time has been.

Answer: B

NEW QUESTION 27

Harry works as a project manager for the NHQ Project. He is performing quantitative risk analysis for his project. One of the project risks has a 40 percent probability of happening, and it will cost the project \$65,000 if the risk happens. What is the expected monetary value of this risk event?

- A. Negative \$26,000
- B. Negative \$67,000
- C. Zero - the risk event has not yet occurred
- D. \$27,000

Answer: A

NEW QUESTION 30

You work as a project manager for BlueWell Inc. You are performing the quantitative risk analysis for your project. One of the project risks has a 50 percent probability of happening, and it will cost the project \$55,000 if the risk happens. What will be the expected monetary value of this risk event?

- A. Negative \$27,500
- B. Zero - the risk event has not yet occurred
- C. Negative \$26,000
- D. Negative \$55,000

Answer: A

NEW QUESTION 34

You are the project manager of the GHY project for your organization. You are about to start the qualitative risk analysis process for the project and you need to determine the roles and responsibilities for conducting risk management. Where can you find this information?

- A. Enterprise environmental factors
- B. Risk register
- C. Risk management plan
- D. Staffing management plan

Answer: C

NEW QUESTION 39

You work as the project manager for Bluewell Inc. You are working on NGQQ Project you're your company. You have completed the risk analysis processes for the risk events. You and the project team have created risk responses for most of the identified project risks. Which of the following risk response planning techniques will you use to shift the impact of a threat to a third party, together with the responses?

- A. Risk acceptance
- B. Risk avoidance
- C. Risk transference
- D. Risk mitigation

Answer: C

NEW QUESTION 41

The risk transference is referred to the transfer of risks to a third party, usually for a fee, it creates a contractual-relationship for the third party to manage the risk on behalf of the performing organization. Which one of the following is NOT an example of the transference risk response?

- A. Use of insurance
- B. Warranties
- C. Life cycle costing
- D. Performance bonds

Answer: C

NEW QUESTION 45

Holly is the project manager of the NHQ project for her company. Her project sponsor, Tracy, has requested that Thomas, the department manager, from the Risk Management Department, will work with Holly to determine the effectiveness of the risk responses. Tracy and Thomas are concerned that some of the risks within Holly's project may not be addressed to depth they would like. In this scenario, who is responsible for ensuring that risk audits are performed at an appropriate frequency throughout the project?

- A. Thomas
- B. Tracy
- C. The project team

D. Holly

Answer: D

NEW QUESTION 46

The Identify Risk process determines the risks that affect the project and document their characteristics. Why should the project team members be involved in the Identify Risk process?

- A. They are the individuals that will need a sense of ownership and responsibility for the risk events.
- B. They are the individuals that will have the best responses for identified risks events within the project.
- C. They are the individuals that are most affected by the risk events.
- D. They are the individuals that will most likely cause and respond to the risk events.

Answer: A

NEW QUESTION 48

Which of the following statements describe the purpose of an Issue Log? Each correct answer represents a complete solution. Choose all that apply.

- A. It analyzes the impact that the issue is having on the project.
- B. It tracks the actions taken to resolve the issue.
- C. It tracks the outcome of the actions taken.
- D. It addresses the risks that could affect the project.

Answer: ABC

NEW QUESTION 52

Shawn is the project manager of the WHT Project for his company. In this project Shawn's team reports that they have found a way to complete the project work for less cost than what was originally planned. The project team presents a new software that will help to automate the project work. While the software and the associated training costs \$25,000 it will save the project nearly \$65,000 in total costs. Shawn agrees to the software and changes to the project management plan accordingly. What type of risk response has been used in this instance?

- A. Avoidance
- B. Exploiting
- C. Accepting
- D. Enhancing

Answer: B

NEW QUESTION 54

Melody is the project manager for her organization. She has created a risk response to conduct more tests on the software her project is creating. The identified risk that prompted this response was that the software is mission-critical and must be flawless before it can be put into product. What type of a risk response has Melody used in this scenario?

- A. Mitigation
- B. Enhance
- C. Transference
- D. Avoidance

Answer: A

NEW QUESTION 57

The Project Risk Management knowledge area focuses on which of the following processes? Each correct answer represents a complete solution. Choose all that apply.

- A. Quantitative Risk Analysis
- B. Risk Monitoring and Control
- C. Potential Risk Monitoring
- D. Risk Management Planning

Answer: ABD

NEW QUESTION 60

In addition to monitoring and controlling the project risks for their status and information the risk monitoring and controlling process accomplishes four key things for a project. Which one of the following is NOT a determination that is made by the risk monitoring and controlling process?

- A. Determines if the project assumptions are still valid
- B. Determines if the risk management policies and procedures are being followed
- C. Determines if the risk contingency reserves should be modified to be in alignment with the current risk assessment
- D. Determines if the project constraints are still valid

Answer: D

NEW QUESTION 61

Lamont is the project manager of a project that has recently finished the final project deliverables. The project customer has signed off on the project deliverable

and Lamont has a few administrative closure activities to complete. In the project, there were several large risks that could have wrecked the project but Lamont and his project team found some creative methods to resolve the risks without affecting the project costs or project end date. What should Lamont do with the risk responses he identified during the project's monitoring and controlling process?

- A. Include the risk response in the project risk management plan.
- B. Include the responses in the project management plan.
- C. Nothin
- D. The risk responses are included in the project's risk register already.
- E. Include the risk responses in the organization's lessons learned database.

Answer: D

NEW QUESTION 64

There are seven risk responses, a project manager can use to address risk events. Which one of the following is a risk response that is appropriate for positive or negative risk events depending on the scenario in the project?

- A. Avoidance
- B. Acceptance
- C. Sharing
- D. Transference

Answer: B

NEW QUESTION 65

Which types of project tends to have more well-understood risks?

- A. Operational work projects
- B. First-of-its kind technology projects
- C. Recurrent projects
- D. State-of-art technology projects

Answer: C

NEW QUESTION 66

You are project manager for ABD project. You, with your team, are working on the following activities:

Probabilistic analysis of a project.

Probability of achieving cost and time objectives. Trends in Qualitative Risk Analysis results.

On which of the following processes are you working on?

- A. Plan Risk Management
- B. Perform Quantitative Risk Analysis
- C. Perform Qualitative Risk Analysis
- D. Identify Risks

Answer: B

NEW QUESTION 68

Lisa is the project manager of the SQL project for her company. She has completed the risk response planning with her project team and is now ready to update the risk register to reflect the risk response. Which of the following statements best describes the level of detail Lisa should include with the risk responses she has created?

- A. The level of detail is set by historical information.
- B. The level of detail should correspond with the priority ranking.
- C. The level of detail must define exactly the risk response for each identified risk.
- D. The level of detail is set of project risk governance.

Answer: B

NEW QUESTION 72

Which of the following documents is described in the statement below? "It is developed along with all processes of the risk management. It contains the results of the qualitative risk analysis, quantitative risk analysis, and risk response planning."

- A. Risk management plan
- B. Project charter
- C. Risk register
- D. Quality management plan

Answer: C

NEW QUESTION 73

When does the Identify Risks process take place in a project?

- A. At the Planning stage.
- B. Throughout the project life-cycle.
- C. At the Initiating stage.
- D. At the Executing stage.

Answer: B

NEW QUESTION 76

You work as a project manager for TechSoft Inc. You are preparing to plan risk responses for your project with your project team. How many risk responses are available for a positive risk event in the project?

- A. Three
- B. Four
- C. Seven
- D. One

Answer: B

NEW QUESTION 81

Sammy is the project manager for her organization. She would like to rate each risk based on its probability and affect on time, cost, and scope. Harry, a project team member, has never done this before and thinks Sammy is wrong to attempt this approach. Harry says that an accumulative risk score should be created, not three separate risk scores. Who is correct in this scenario?

- A. Harry is correct, because the risk probability and impact considers all objectives of the project.
- B. Harry is correct, the risk probability and impact matrix is the only approach to risk assessment.
- C. Sammy is correct, because organizations can create risk scores for each objective of the project.
- D. Sammy is correct, because she is the project manager.

Answer: C

NEW QUESTION 86

You work as a project manager for BlueWell Inc. You are currently working with the project stakeholders to identify risks in your project. You understand that the qualitative risk assessment and analysis can reflect the attitude of the project team and other stakeholders to risk. Effective assessment of risk requires management of the risk attitudes of the participants. What should you, the project manager, do with assessment of identified risks in consideration of the attitude and bias of the participants towards the project risk?

- A. Evaluate and document the bias towards the risk events
- B. Evaluate the bias through SWOT for true analysis of the risk events
- C. Document the bias for the risk events and communicate the bias with management
- D. Evaluate the bias towards the risk events and correct the assessment accordingly

Answer: D

NEW QUESTION 90

There are five outputs of the risk monitoring and controlling process. Which one of the following is NOT an output of the process?

- A. Organizational process assets updates
- B. Risk register updates
- C. Vendor contracts
- D. Change requests

Answer: C

NEW QUESTION 94

Harry is a project manager of a software development project. In the early stages of planning, he and the stakeholders operated with the belief that the software they were developing would work with their organization's current computer operating system. Now that the project team has started developing the software it has become apparent that the software will not work with nearly half of the organization's computer operating systems. The incorrect belief Harry had in the software compatibility is an example of what in project management?

- A. Issue
- B. Assumption
- C. Risk
- D. Constraint

Answer: B

NEW QUESTION 99

Harry is the project manager of the MMQ Construction Project. In this project, Harry has identified a supplier who can create stained glass windows for 1,000 window units in the construction project. The supplier is an artist who works by himself, but creates windows for several companies throughout the United States. Management reviews the proposal to use this supplier and while they agree that the supplier is talented, they do not think the artist can fulfill the 1,000 window units in time for the project's deadline. Management asked Harry to find a supplier who can fulfill the completion of the windows by the needed date in the schedule. What risk response has management asked Harry to implement?

- A. Mitigation
- B. Acceptance
- C. Avoidance
- D. Transference

Answer: A

NEW QUESTION 100

Ruth is the project manager of ISFH project for her company. This project is forty percent complete and it appears that some risk events are going to happen in the project that will have an adverse affect on the project. Ruth creates a change request regarding the risks. Is this a valid response?

- A. No, change requests should not address risks, only risk response strategies should be issued.
- B. No, change requests should not address pending risks, but only scope changes.
- C. Yes, change requests can be recommended for corrective actions for contingency plans.
- D. Yes, change requests can ask for additional funds to pay for the risk impact.

Answer: C

NEW QUESTION 102

Examine the figure given below.

What will be the expected monetary value of Risk C?

- A. -\$113,750
- B. \$175,000 if the risk event actually happens
- C. -\$175,000
- D. -\$27,000

Answer: D

NEW QUESTION 107

You are the project manager of the HJU project for your company. This project will last for 18 months and has a project budget of \$567,000. Robert, one of your stakeholders, has introduced a scope change request that will likely have an impact on the project costs and schedule. Robert assures you that he will pay for the extra time and costs associated with the risk event. You tell Robert that the change request may affect more areas of the project than just time and cost and that you are worried about the additional risks the change request will bring. What project management component is responsible for evaluating a change request and its impact on all of the project management knowledge areas?

- A. Project change control system
- B. Integrated change control
- C. Risk analysis
- D. Configuration management

Answer: B

NEW QUESTION 112

You are the program manager for your organization. Management is considering a new program but they are worried about the program risks that may affect the program success. You know that there are three positive risks responses and three negative risk responses that each risk can have. Management asks you which risk response would be most appropriate for a large risk event if they wanted to hire a third-party to own the risk event for the program. What risk event is most appropriate?

- A. Avoidance
- B. Sharing
- C. Transference
- D. Mitigation

Answer: C

NEW QUESTION 115

Your organization has named you the project manager of the JKN Project. This project has a BAC of \$1,500,000 and it is expected to last 18 months. Management has agreed that if the schedule baseline has a variance of more than five percent then you will need to crash the project. What happens when the project manager crashes a project?

- A. Project risks will increase.
- B. The project will take longer to complete, but risks will diminish.
- C. Project costs will increase.
- D. The amount of hours a resource can be used will diminish.

Answer: C

NEW QUESTION 119

You are the project manager of the HJH project for your company. In your project, you have created the probability-impact risk matrix as shown in the following figure:

If Risk D happens in this project, how much will be left in the contingency reserve?

- A. \$440,000
- B. \$233,500
- C. \$258,500
- D. \$243,500

Answer: B

NEW QUESTION 122

Thomas is the project manager of the NHJ Project for his company. He has identified several positive risk events within his project and he thinks these events can save the project time and money. Positive risk events, such as these within the NHJ Project are also known as what?

- A. Benefits

- B. Opportunities
- C. Ancillary constituent components
- D. Contingency risks

Answer: B

NEW QUESTION 123

Holly is the project manager of the NSS Project for her company. She is discussing some of the project risks and the issues that have happened in the project. Holly has faxed the status report to her project client for their review. Based on the standard communication model, which component in this scenario is the decoder?

- A. Project customer
- B. Telephone wire
- C. Holly
- D. Project customer's fax machine

Answer: D

NEW QUESTION 128

You are the project manager for the NHH project. You are working with your project team to examine the project from four different defined perspectives to increase the breadth of identified risks by including internally generated risks. What risk identification approach are you using in this example?

- A. Root cause analysis
- B. SWOT analysis
- C. Influence diagramming techniques
- D. Assumptions analysis

Answer: B

NEW QUESTION 129

Which of the following diagrams displays sensitivity analysis data?

- A. Fishbone
- B. Influence
- C. Tornado
- D. Cause and effect

Answer: C

NEW QUESTION 131

You work as a project manager for TechSoft Inc. You, the project team, and the key project stakeholders have completed a round of quantitative risk analysis. You now need to update the risk register with your findings so that you can communicate the risk results to the project stakeholders - including management. You will need to update all of the following information except for which one?

- A. Probabilistic analysis of the project
- B. Probability of achieving cost and time objectives
- C. Risk distributions within the project schedule
- D. Trends in quantitative risk analysis

Answer: C

NEW QUESTION 134

During which of the following processes, probability and impact matrix is prepared?

- A. Perform Qualitative Risk Analysis
- B. Monitoring and Control Risks
- C. Plan Risk Responses
- D. Perform Quantitative Risk Analysis

Answer: A

NEW QUESTION 139

Consider the risk probability-impact matrix in the figure given below:
If Risk B happens in this project, how much will be left in the contingency reserve?

- A. \$193,500
- B. -\$334,500
- C. It depends on the total budget of the project.
- D. \$148,300

Answer: A

NEW QUESTION 142

You work as a project manager for BlueWell Inc. You with your team are using a method or a (technical) process that conceives the risks even if all theoretically possible safety measures would be applied. One of your team member wants to know that what is a residual risk. What will you reply to your team member?

- A. It is a risk that can not be addressed by a risk response.
- B. It is a risk that will remain no matter what type of risk response is offered.
- C. It is a risk that remains because no risk response is taken.
- D. It is a risk that remains after planned risk responses are taken.

Answer: D

NEW QUESTION 145

You work as a project manager for BlueWell Inc. Your project is using a new material to construct a large warehouse in your city. This new material is cheaper than traditional building materials, but it takes some time to learn how to use the material properly. You have communicated to the project stakeholders that you will be able to save costs by using the new material, but you will need a few extra weeks to complete training to use the materials. This risk response of learning how to use the new materials can also be known as what term?

- A. Team development
- B. Benchmarking
- C. Cost of conformance to quality
- D. Cost-benefits analysis

Answer: C

NEW QUESTION 148

You are the project manager of the YHG project for your company. Within the project, you and the project team have identified a risk event that could have a financial impact on the project of \$450,000. This risk event has a 70 percent chance of occurring in the project. The project identifies a solution that will reduce the probability of the risk event to ten percent, but it will cost \$260,000 to implement. Management agrees with the solution and asks that you include the risk response in the project plan. What risk response is this?

- A. This is mitigation because the response reduces the probability.
- B. This is not a risk response, but a change request.
- C. This is transference because of the \$260,000 cost of the solution.
- D. This is avoidance because the risk response caused the project plan to be changed.

Answer: A

NEW QUESTION 152

You are the project manager of QSL project for your organization. You are working with your project team and several key stakeholders to create a diagram that shows how various elements of a system interrelate and the mechanism of causation within the system. What diagramming technique are you using as a part of the risk identification process?

- A. Predecessor and successor diagramming
- B. System or process flowcharts
- C. Cause and effect diagrams
- D. Influence diagrams

Answer: B

NEW QUESTION 153

You work as a project manager for BlueWell Inc. You have declined a proposed change request because of the risk associated with the proposed change request. Where should the declined change request be documented and stored?

- A. Change request log
- B. Lessons learned
- C. Project archives
- D. Project document updates

Answer: A

NEW QUESTION 158

Risks with low ratings of probability and impact are included on a for future monitoring.

- A. Risk alarm
- B. Watchlist
- C. Observation list
- D. Risk register

Answer: B

NEW QUESTION 163

You are the project manager of the NHK Project. Management wants to know how often your risk identification process will occur during the project. Considering that your project is scheduled to last one year and involves five distinct phases, how often should risk identification take place?

- A. Monthly
- B. Once per project life cycle phase
- C. Quarterly
- D. Vary depending on the situations within the project

Answer: D

NEW QUESTION 164

Which of the following processes looks at the complex web of actors, rules, conventions, processes, and mechanisms concerned with how relevant risk information is collected, analyzed and communicated, and how management decisions are taken?

- A. Risk Communication
- B. IRGC
- C. Risk Response Planning
- D. Risk Governance

Answer: D

NEW QUESTION 165

You are the project manager for the ABC organization. Your current project has 75 internal stakeholders and 245 external stakeholders. Many of the risks within your project will only affect the internal stakeholders, but several of the identified risk events will affect the external stakeholders. Management would like to know the total number of communication channels in the project. How many communication channels exist in this project?

- A. 245
- B. 51,040
- C. 102,080
- D. 320

Answer: B

NEW QUESTION 166

You work as the project manager for Bluewell Inc. Your project has several risks that will affect several stakeholder requirements. Which project management plan will define who will be available to share information on the project risks?

- A. Risk Management Plan
- B. Stakeholder management strategy
- C. Resource Management Plan
- D. Communications Management Plan

Answer: D

NEW QUESTION 171

You are the project manager of the AMD project for your organization. In this project, you are currently performing quantitative risk analysis. The tool and technique you are using is simulation where the project model is computed many times with the input values chosen at random for each iteration. The goal is to create a probability distribution from the iterations for the project schedule. What technique will you use with this simulation?

- A. Pareto modeling
- B. Expected Monetary Value
- C. Analogous modeling
- D. Monte Carlo Technique

Answer: D

NEW QUESTION 175

Sensitivity analysis is a technique for systematically changing parameters in a model to determine the effects of such changes and is useful for computer modelers for a range of purposes. Which of the following purposes does the sensitivity analysis include? Each correct answer represents a complete solution. Choose all that apply.

- A. Increased understanding or quantification of the system
- B. Estimating the average outcome
- C. Model development
- D. Decision making or the development of recommendations for decision makers

Answer: ACD

NEW QUESTION 177

Nancy is the project manager of the NHH project. She and the project team have identified a significant risk in the project during the qualitative risk analysis process. Bob is familiar with the technology that the risk is affecting and proposes to Nancy a solution to the risk event. Nancy tells Bob that she has noted his response, but the risk really needs to pass through the quantitative risk analysis process before creating responses. Bob disagrees and ensures Nancy that his response is most appropriate for the identified risk. Who is correct in this scenario?

- A. Bob is correct
- B. Bob is familiar with the technology and the risk event so his response should be implemented.
- C. Bob is correct
- D. Not all risk events have to pass the quantitative risk analysis process to develop effective risk responses.
- E. Nancy is correct
- F. All risks of significant probability and impact should pass the quantitative risk analysis process before risk responses are created.
- G. Nancy is correct
- H. Because Nancy is the project manager she can determine the correct procedures for risk analysis and risk response
- I. In addition, she has noted the risk response that Bob recommends.

Answer: B

NEW QUESTION 178

You are the project manager of the NNH Project. In this project you have created a contingency response that the schedule performance index should be less than 0.93. The NNH Project has a budget at completion of \$945,000 and is 45 percent complete though the project should be 49 percent complete. The project has spent \$455,897 to reach the 45 percent complete milestone. What is the project's schedule performance index?

- A. -\$37,800
- B. 0.93
- C. 0.92
- D. 1.06

Answer: C

NEW QUESTION 183

You are the project manager of a large construction project. This project will last for 18 months and will cost \$750,000 to complete. You are working with your project team, experts, and stakeholders to identify risks within the project before the project work begins. Management wants to know why you have scheduled so many risk identification meetings throughout the project rather than just initially during the project planning. What is the best reason for the duplicate risk identification sessions?

- A. The iterative meetings allow the project manager and the risk identification participants to identify newly discovered risk events throughout the project.
- B. The iterative meetings allow all stakeholders to participate in the risk identification processes throughout the project phases.
- C. The iterative meetings allow the project manager to discuss the risk events which have passed the project and which did not happen.
- D. The iterative meetings allow the project manager to communicate pending risks events during project execution.

Answer: A

NEW QUESTION 184

Ted is the project manager of the HRR project for his company. Management has asked that Ted periodically reviews the contingency reserve as risk events happen, pass, or are still pending. What is the purpose of reviewing the contingency reserve?

- A. It helps to evaluate if the remaining reserve is adequate for the risk exposure.
- B. It helps to determine how much more funds will need to be invested in the project.
- C. It helps to evaluate secondary and residual risks related to the risk responses and their costs.
- D. It helps to determine the probability and impact of project risks.

Answer: A

NEW QUESTION 189

Mary is a project manager in her organization. On her current project she is working with her project team and other key stakeholders to identify the risks within the project. She is currently aiming to create a comprehensive list of project risks so she is using a facilitator to help generate ideas about project risks. What risk identification method is Mary likely using?

- A. Brainstorming
- B. Delphi Techniques
- C. Checklist analysis
- D. Expert judgment

Answer: A

NEW QUESTION 192

John is the project manager of the NHQ Project for his company. His project has 75 stakeholders, some of which are external to the organization. John needs to make certain that he communicates about risk in the most appropriate method for the external stakeholders. Which project management plan will be the best guide for John to communicate to the external stakeholders?

- A. Risk Response Plan
- B. Risk Management Plan
- C. Communications Management Plan
- D. Project Management Plan

Answer: C

NEW QUESTION 194

Pete works as a project manager for BlueWell Inc. The Management has told him that he must implement an agreed-upon contingency response if the cost performance index in his project is less than 0.90. Consider that Pete's project has a budget at completion of \$275,000. His project is 65 percent complete and he has spent \$175,000 to date. However, Pete is scheduled to be 78 percent complete. What is the cost performance index for this project to determine if the contingency response should happen?

- A. 1.02
- B. 0.96
- C. 0.90
- D. 0.89

Answer: A

NEW QUESTION 199

Gary is the project manager for his project. He and the project team have completed the qualitative risk analysis process and are about to enter the quantitative risk analysis process when Mary, the project sponsor, wants to know what quantitative risk analysis will review. Which of the following statements best defines what quantitative risk analysis will review?

- A. The quantitative risk analysis process will review risk events for their probability and impact on the project objectives.
- B. The quantitative risk analysis seeks to determine the true cost of each identified risk event and the probability of each risk event to determine the risk exposure.
- C. The quantitative risk analysis process will analyze the effect of risk events that may substantially impact the project's competing demands.
- D. The quantitative risk analysis reviews the results of risk identification and prepares the project for risk response management.

Answer: C

NEW QUESTION 204

Mark works as a project manager for TechSoft Inc. Mark, the project team, and the key project stakeholders have completed a round of qualitative risk analysis. He needs to update the risk register with his findings so that he can communicate the risk results to the project stakeholders – including management. Mark will need to update all of the following information except for which one?

- A. Prioritized list of quantified risks
- B. Watchlist of low-priority risks
- C. Trends in qualitative risk analysis
- D. Risks grouped by categories

Answer: A

NEW QUESTION 207

As a part of monitoring and controlling the project, the project manager should update the risk register. The project manager should update the risk register with information on risk reassessment, risk audits, and periodic risk reviews. What other information should the project manager update the risk register with?

- A. Actual costs and schedule delays of risk events.
- B. Actual outcomes of risk management duties by the project team.
- C. Actual cost of risk events.
- D. Actual outcomes of the project's risks and of the risk responses.

Answer: D

NEW QUESTION 212

Marsha is the project manager of the NHQ Project. There's a risk that her project team has identified, which could cause the project to be late by more than a month. Marsha does not want this risk event to happen so she devises extra project activities to ensure that the risk event will not happen. The extra steps, however, will cost the project an additional \$10,000. What type of risk response is this approach?

- A. Enhancing
- B. Exploiting
- C. Mitigation
- D. Transference

Answer: C

NEW QUESTION 217

Sensitivity analysis is a technique for systematically changing parameters in a model to determine the effects of such changes and is useful for computer modelers for a range of purposes. Which of the following purposes does the sensitivity analysis include? Each correct answer represents a complete solution. Choose all that apply.

- A. Estimating the average outcome
- B. Model development
- C. Decision making or the development of recommendations for decision makers
- D. Increased understanding or quantification of the system

Answer: BCD

NEW QUESTION 222

Frank is a project team member in your project. Frank has been adding changes to the software interface for the software that your project is creating. Because Frank has been adding these features new risks have entered into the project. You elect that these additions should be removed from the project even if it takes extra time and money to remove the features. What are these riskladen features called?

- A. Gold plating
- B. Scope creep
- C. Negative risks
- D. Corrective actions

Answer: B

NEW QUESTION 224

Your organization, as part of its enterprise environmental factors, has established risk governance to be implemented in each project. Part of this governance is the reassessment of risks within each project. How much detail and repetition in approach for risks to be reassessed for probability and impact?

- A. Each risk reassessment should go into the same depth as the original risk assessment activity.
- B. The probability and impact of risk event should determine the level of reassessment throughout the project lifecycle.
- C. The amount of detail of repetition that is appropriate depends on how the project progresses relative to its objectives.
- D. The level of detail and reassessment should reflect the priority of the project.

Answer: C

NEW QUESTION 227

Tom works as a project manager for BlueWell Inc. He is determining which risks can affect the project. Which of the following inputs of the identify risks process is useful in identifying risks, and provides a quantitative assessment of the likely cost to complete the scheduled activities?

- A. Activity cost estimates
- B. Cost management plan
- C. Activity duration estimates
- D. Risk management plan

Answer: A

NEW QUESTION 228

Kelly is the project manager of the NNQ Project for her company. This project will last for one year and has a budget of \$350,000. Kelly is working with her project team and subject matter experts to begin the risk response planning process. When the project manager begins the plan risk response process, what two inputs will she need?

- A. Risk register and the risk response plan
- B. Risk register and power to assign risk responses
- C. Risk register and the risk management plan
- D. Risk register and the results of risk analysis

Answer: C

NEW QUESTION 230

There are seven risk responses for any project. Which one of the following is a valid risk response for a negative risk event?

- A. Enhance
- B. Exploit
- C. Acceptance
- D. Share

Answer: C

NEW QUESTION 231

Frank is the project manager of the NHL Project for his company and he is starting the risk identification process for the project. Frank needs to ensure that the correct stakeholders are interviewed as part of risk identification. What document will help Frank to communicate and solicit inputs of the project stakeholders during risk identification?

- A. Project charter
- B. Risk register
- C. Requirements management plan
- D. Stakeholder register

Answer: D

NEW QUESTION 234

Bill is the project manager of the JKH Project. He and the project team have identified a risk event in the project with a high probability of occurrence and the risk event has a high cost impact on the project. Bill discusses the risk event with Virginia, the primary project customer, and she decides that the requirements surrounding the risk event should be removed from the project. The removal of the requirements does affect the project scope, but it can release the project from the high risk exposure. What risk response has been enacted in this project?

- A. Mitigation
- B. Transference
- C. Acceptance
- D. Avoidance

Answer: D

NEW QUESTION 237

Your project uses a piece of equipment that if the temperature of the machine goes above 450 degree Fahrenheit the machine will overheat and have to be shut down for 48 hours. Should this machine overheat even once it will delay the project's end date. You work with your project to create a response that should the temperature of the machine reach 430, the machine will be paused for at least an hour to cool it down. The temperature of 430 is called what?

- A. Risk response
- B. Risk event
- C. Risk trigger
- D. Risk identification

Answer: C

NEW QUESTION 239

You are the project manager of the CUL project in your organization. You and the project team are assessing the risk events and creating a probability and impact matrix for the identified risks. Which one of the following statements best describes the requirements for the data type used in qualitative risk analysis?

- A. A qualitative risk analysis requires fast and simple data to complete the analysis.
- B. A qualitative risk analysis requires accurate and unbiased data if it is to be credible.
- C. A qualitative risk analysis encourages biased data to reveal risk tolerances.

D. A qualitative risk analysis required unbiased stakeholders with biased risk tolerances.

Answer: B

NEW QUESTION 241

You work as a project manager for BlueWell Inc. You would like to utilize sensitivity analysis in your project, but the management does not understand how this will be displayed. What type of chart is usually used with sensitivity analysis to show the relative affect of risks on the project?

- A. Ishikawa chart
- B. Force field analysis chart
- C. GERT Chart
- D. Tornado diagram

Answer: D

NEW QUESTION 246

Adrian is a project manager for a new project using a technology that has recently been released and there's relatively little information about the technology. Initial testing of the technology makes the use of it look promising, but there's still uncertainty as to the longevity and reliability of the technology. Adrian wants to consider the technology factors a risk for her project. Where should she document the risks associated with this technology so she can track the risk status and responses?

- A. Project scope statement
- B. Risk register
- C. Project charter
- D. Risk low-level watch list

Answer: B

NEW QUESTION 251

You are the project manager for your company and a new change request has been approved for your project. This change request, however, has introduced several new risks to the project. You have communicated these risk events and the project stakeholders understand the possible effects these risks could have on your project. You elect to create a mitigation response for the identified risk events. Where will you record the mitigation response?

- A. Risk register
- B. Risk log
- C. Risk management plan
- D. Project management plan

Answer: A

NEW QUESTION 254

Della works as a project manager for SoftTech Inc. She is working with the project stakeholders to begin the quantitative risk analysis process. Which of the following inputs will be needed for the quantitative risk analysis process in her project? Each correct answer represents a complete solution. Choose all that apply.

- A. Risk management plan
- B. Project scope statement
- C. Risk register
- D. Cost management plan

Answer: ACD

NEW QUESTION 259

Donna is the project manager of the QSD Project and she believes Risk Event D in the following figure is likely to happen. If this event does happen, how much will Donna have left in the risk contingency reserve if none of the other risk events have happened?

- A. \$35,000
- B. \$41,700
- C. \$14,000
- D. \$6,700

Answer: D

NEW QUESTION 261

You are the project manager of RTF project for your organization. You are working with your project team and several key stakeholders to create a diagram that shows causal factors for an effect to be solved. What diagramming technique are you using as a part of the risk identification process?

- A. Cause and effect diagrams
- B. System or process flow charts
- C. Predecessor and successor diagramming
- D. Influence diagrams

Answer: A

NEW QUESTION 266

Fred is the project manager of the PKL project. He is working with his project team to complete the quantitative risk analysis process as a part of risk management

planning. Fred understands that once the quantitative risk analysis process is complete, the process will need to be completed again in at least two other times in the project. When will the quantitative risk analysis process need to be repeated?

- A. Quantitative risk analysis process will be completed again after the cost management planning and as a part of monitoring and controlling.
- B. Quantitative risk analysis process will be completed again after new risks are identified and as part of monitoring and controlling.
- C. Quantitative risk analysis process will be completed again after the risk response planning and as a part of monitoring and controlling.
- D. Quantitative risk analysis process will be completed again after the plan risk response planning and as part of procurement.

Answer: C

NEW QUESTION 270

Todd is the project manager of the EST project for his company. His organization has established certain rules in the enterprise environmental factors which affect the approach that Todd takes in managing his project. One of the rules requires Todd to consider the risk attitude of the stakeholders participating in risk analysis. Why must risk attitude be considered as a part of risk analysis?

- A. Risk attitude can affect the measurement of probability and impact.
- B. Risk attitude can establish a stakeholder's influence over project decisions.
- C. Risk attitude identifies stakeholders that are hygiene seekers or motivation seekers.
- D. Risk attitude establishes stakeholders as positive or negative stakeholders.

Answer: A

NEW QUESTION 275

Wendy is the project manager of the FBL project for your company. She has identified several risks within her project and has created a risk contingency reserve of \$45,000 total. Her project is nearly complete and many of the risks have not happened in the project. What should Wendy do with the funds in the contingency reserve?

- A. The funds remain in the contingency reserve until all of the risks have passed.
- B. The funds for the risks that have passed and have not happened are transferred to the project budget.
- C. The funds for the risks that have passed and have not happened are released.
- D. The funds remain in the contingency reserve until the project is closed.

Answer: C

NEW QUESTION 278

You are the project manager of the GHQ project for your company. You are working with your project team to prepare for the qualitative risk analysis process. Mary, a project team member, does not understand why you need to complete qualitative risks analysis. You explain to Mary that qualitative risks analysis helps you determine which risks needs additional analysis. There are also some other benefits that qualitative risks analysis can do for the project. Which one of the following is NOT an accomplishment of the qualitative risk analysis process?

- A. Corresponding impact on project objectives
- B. Time frame for a risk response
- C. Prioritization of identified risk events based on probability and impact
- D. Cost of the risk impact if the risk event occurs

Answer: D

NEW QUESTION 279

Jane is the project manager of the GBB project for her company. In the current project a vendor has offered the project a ten percent discount based if they will order 100 units for the project. It is possible that the GBB Project may need the 100 units, but the cost of the units is not a top priority for the project. Jane documents the offer and tells the vendor that they will keep the offer in mind and continue with the project as planned. What risk response has been given in this project?

- A. Acceptance
- B. Enhance
- C. Exploiting
- D. Sharing

Answer: A

NEW QUESTION 280

You are the project manager for a construction project. The project includes a work that involves very high financial risks. You decide to insure processes so that any ill happening can be compensated. Which type of strategies have you used to deal with the risks involved with that particular work?

- A. Mitigate
- B. Avoid
- C. Accept
- D. Transfer

Answer: D

NEW QUESTION 285

You are the project manager of the AFD project for your company. You are working with the project team to reassess existing risk events and to identify risk events that have not happened and whose relevancy to the project has passed. What should you do with these events that have not happened and would not happen now in the project?

- A. Add the risks to the risk register

- B. Add the risks to a low-priority watchlist
- C. Close the outdated risks
- D. Add the risk to the issues log

Answer: C

NEW QUESTION 290

You are the project manager of the NHH project for your company. You and the project team have completed the quantitative risk analysis for your project. During this process you create a contingency reserve based on the risk probability-impact matrix as seen in the figure below. Based on the information in the figure above, what amount would you need to include in your risk contingency fund?

- A. -\$465,000
- B. \$171,500
- C. -\$258,500
- D. \$258,500

Answer: D

NEW QUESTION 293

You are completing the qualitative risk analysis process with your project team and are relying on the risk management plan to help you determine the budget, schedule for risk management, and risk categories. You discover that the risk categories have not been created. When should the risk categories have been created?

- A. Create work breakdown structure process
- B. Plan risk management process
- C. Risk identification process
- D. Define scope process

Answer: B

NEW QUESTION 298

Which of the following is a risk response planning technique associated with threats that seeks to reduce the probability of occurrence or impact of a risk to below an acceptable threshold?

- A. Avoidance
- B. Exploit
- C. Transference
- D. Mitigation

Answer: D

NEW QUESTION 300

Harold is the project manager of a large project in his organization. He has been actively communicating and working with the project stakeholders. One of the outputs of the manage stakeholder expectations process can actually create new risk events for Harold's project. Which output of the manage stakeholder expectations process can create risks?

- A. Project document updates
- B. Change requests
- C. Organizational process assets updates
- D. Project management plan updates

Answer: B

NEW QUESTION 303

You work as a project manager for BlueWell Inc. You are working with your team members on the risk responses in the project. Which risk response will likely cause a project to use the procurement processes?

- A. Exploiting
- B. Mitigation
- C. Sharing
- D. Acceptance

Answer: C

NEW QUESTION 304

You are the project manager of the NHH Project for your company and you have completed the risk analysis processes for the risk events. You and the project team have created risk responses for most of the identified project risks. Now, you would like to assign risk owners to the events. Which risk events should have risk response owners?

- A. Only the risks with a high risk rating
- B. Each agreed-to and funded risk response should have a risk response owner
- C. Each risk that has a risk response should have a risk response owner
- D. Only the risk events that are considered a negative risk event with a high risk rating

Answer: B

NEW QUESTION 306

You are the project manager of the GHY project for your organization. You are working with your project team to begin identifying risks for the project. As part of your preparation for identifying the risks within the project you will need eleven inputs for the process. Which one of the following is NOT an input to the risk identification process?

- A. Quality management plan
- B. Cost management plan
- C. Stakeholder register
- D. Procurement management plan

Answer: D

NEW QUESTION 311

You are the project manager for your organization. You have identified a risk event you're your organization could manage internally or externally. If you manage the event internally it will cost your project \$578,000 and an additional \$12,000 per month the solution is in use. A vendor can manage the risk event for you. The vendor will charge \$550,000 and \$14,500 per month that the solution is in use. How many months will you need to use the solution to pay for the internal solution in comparison to the vendor's solution?

- A. Approximately 8 months
- B. Approximately 15 months
- C. Approximately 13 months
- D. Approximately 11 months

Answer: D

NEW QUESTION 315

Fill in the blank with an appropriate phrase.

_____ is the study of how the variation (uncertainty) in the output of a mathematical model can be apportioned, qualitatively or quantitatively, to different sources of variation in the input of a model.

- A. Sensitivity analysis

Answer: A

NEW QUESTION 319

You are the project manager of the NNN project for your company. You and the project team are working together to plan the risk responses for the project. You feel that the team has successfully completed the risk response planning and now you must initiate what risk process it is. Which of the following risk processes is repeated after the plan risk responses to determine if the overall project risk has been satisfactorily decreased?

- A. Qualitative risk analysis
- B. Quantitative risk analysis
- C. Risk identification
- D. Risk response implementation

Answer: B

NEW QUESTION 323

A part of a project deals with the hardware work. As a project manager, you have decided to hire a company to deal with all hardware work on the project. Which type of risk response is this?

- A. Exploit
- B. Mitigation
- C. Transference
- D. Avoidance

Answer: C

NEW QUESTION 328

Wendy is about to perform qualitative risk analysis on the identified risks within her project. Which one of the following will NOT help Wendy to perform this project management activity?

- A. Project scope statement
- B. Risk management plan
- C. Risk register
- D. Stakeholder register

Answer: D

NEW QUESTION 330

A project manager must have certain interpersonal skills to communicate with stakeholders and manage their expectations of the project work. Which of the following interpersonal skills has been identified as one of the biggest reasons for project success or failure?

- A. Motivation
- B. Communication
- C. Influencing
- D. Political and cultural awareness

Answer: B

NEW QUESTION 335

Which risk response is acceptable for both positive and negative risk events?

- A. Transferring
- B. Acceptance
- C. Sharing
- D. Enhancing

Answer: B

NEW QUESTION 337

You work as a project manager for BlueWell Inc. You are about to complete the quantitative risk analysis process for your project. You can use three available tools and techniques to complete this process. Which one of the following is NOT a tool or technique that is appropriate for the quantitative risk analysis process?

- A. Expert judgment
- B. Data gathering and representation techniques
- C. Organizational process assets
- D. Quantitative risk analysis and modeling techniques

Answer: C

NEW QUESTION 338
