

**HP**

## **Exam Questions HPE0-V25**

HPE Hybrid Cloud Solutions

**NEW QUESTION 1**

Match the RAID level with its capacity overhead. (Each option may be used once, more than once, or not at all.)

Capacity of one drive	Capacity of two drives	<b>Answer Area</b>	RAID 1
Zero overhead from capacity prospective			RAID 0
			RAID 5
			RAID 6

- A. Mastered
- B. Not Mastered

**Answer: A**

**Explanation:**

- > RAID 0: This level has zero overhead from capacity perspective, as it uses all the available disk space for data storage without any redundancy or parity. However, it also has no fault tolerance and if one disk fails, all data is lost.
- > RAID 1: This level has capacity of one drive as overhead, as it uses disk mirroring to create an exact copy of data on two or more disks. This provides high reliability and fault tolerance, but reduces the usable disk space by half.
- > RAID 5: This level has capacity of one drive as overhead, as it uses disk striping with parity to distribute data and parity blocks across three or more disks. This provides a balance between performance and reliability, as it can tolerate one disk failure without losing data.
- > RAID 6: This level has capacity of two drives as overhead, as it uses disk striping with double parity to distribute data and two parity blocks across four or more disks. This provides higher reliability and fault tolerance than RAID 5, as it can tolerate two disk failures without losing data.

**NEW QUESTION 2**

Match each HPE tool with its business value.

Tool	Business Value
HPE Product Bulletin	Accurately size and efficiently deliver world-class solutions on HPE GreenLake Lighthouse, which powers HPE GreenLake Cloud Services and HPE infrastructure.
HPE CloudPhysics	Aides with the purchase, sale, and support of HPE solutions by providing technical overviews and specifications.
Solution Sales Enablement Tool	Provides curated information about HPE strategy and solutions as well as sales, marketing, and technical information aligned to specific solutions.
HPE Seismic	Provides data-driven insights to improve IT performance, ROI, and data protection through analysis of IT metadata.

- A. Mastered
- B. Not Mastered

**Answer: A**

**Explanation:**

- > HPE Product Bulletin: Aides with the purchase, sale, and support of HPE solutions by providing technical overviews and specifications.
- > HPE CloudPhysics: Provides data-driven insights to improve IT performance, ROI, and data protection through analysis of IT metadata.
- > Solution Sales Enablement Tool: Provides curated information about HPE strategy and solutions as well as sales, marketing, and technical information aligned to specific solutions.
- > HPE Seismic: Accurately size and efficiently deliver world-class solutions on HPE GreenLake Lighthouse, which powers HPE GreenLake Cloud services and HPE infrastructure.
- > HPE CloudPhysics: <https://www.hpe.com/us/en/storage/cloudphysics.html>
- > Solution Sales Enablement Tool: <https://sset.ext.hpe.com/>
- > HPE Seismic: <https://www.hpe.com/us/en/newsroom/blog-post/2021/02/hpe-reimagines-customer-and-partner-e>

**NEW QUESTION 3**

Map the HPE platform and workload-oriented solutions with the customer's challenge.

Solution	Challenge
Containers solutions	Unify operations and management
Data Management and Analytics solutions	Provide stability to scale anywhere
Hybrid Cloud solutions	Improve user experience while managing costs
Transcoding & Visualization solutions	Accelerate time to value from insights
VDI solutions	Simplify acquisition and deployment of complex systems

- A. Mastered
- B. Not Mastered

**Answer: A**

**Explanation:**

Containers solutions -> Simplify acquisition and deployment of complex systems1  
 Data Management and Analytics solutions -> Accelerate time to value from insights2 management3  
 Hybrid Cloud solutions -> Unify operations and  
 Transcoding & Visualization solutions -> Provide stability to scale anywhere  
 VDI solutions -> Improve user experience while managing costs

**NEW QUESTION 4**

your customer runs a small datacenter ana their storage requirements change on a month-to-month basis. They want to easily monitor their Cloud costs/usage and grow their resources.  
 Which self-service platform will fill their requirements?

- A. HPE InfoSight
- B. HPE GreenLake central
- C. HPE GreenLake Data Services Cloud Console
- D. HPE Compute Ops Management

**Answer: B**

**Explanation:**

HPE GreenLake Central is a self-service platform that gives customers a consistent cloud experience for all their applications and data, across edges, colocations, and data centers. Some of the features of HPE GreenLake Central include:

- > Easily monitor cloud costs and usage: HPE GreenLake Central provides customers with visibility and control over their cloud spending and consumption across hybrid environments. Customers can view their usage and costs by service, location, application, or business unit. They can also set budgets, alerts, and policies to optimize their cloud resources and expenses.
- > Grow resources as needed: HPE GreenLake Central enables customers to scale up or down their cloud services and resources as their business needs change. Customers can access a catalog of cloud services from HPE and partners through a self-service portal and order them with a few clicks. They can also leverage buffer capacity that is ready to use in minutes, not months.

**NEW QUESTION 5**

Match the RAID level to the number of drive failures an array can handle without losing data. (Each option may be used once, more than once, or not at all.)

any single drive

any two drives

**Answer Area**

RAID 1

RAID 1 ADM

RAID 5

RAID 6

- A. Mastered
- B. Not Mastered

**Answer: A**

**Explanation:**

- > RAID 1: any single drive
- > RAID 1 ADM: any two drives
- > RAID 5: any single drive

- RAID 6: any two drives
- RAID 1: This is a level of RAID that uses mirroring to create an exact copy of data on two or more disks. It can tolerate the failure of any single drive without losing data, as long as the other drive is still functional.
- RAID 1 ADM: This is a level of RAID that uses advanced data mirroring to create two copies of data on three disks. It can tolerate the failure of any two drives without losing data, as long as the third drive is still functional.
- RAID 5: This is a level of RAID that uses striping with parity to distribute data and parity information across three or more disks. It can tolerate the failure of any single drive without losing data, as long as the other drives can reconstruct the data from the parity information.
- RAID 6: This is a level of RAID that uses striping with double parity to distribute data and two sets of parity information across four or more disks. It can tolerate the failure of any two drives without losing data, as long as the other drives can reconstruct the data from the double parity information.

**NEW QUESTION 6**

What does an SSD wear Gauge define?

- A. Remaining lifetime for the SSD drive
- B. Type of technology used within the SSD drive
- C. Type of interface used for the SSD drive
- D. Maximum speed of the SSD drive

**Answer: A**

**Explanation:**

According to HPE, SmartSSD Wear Gauge is a feature that provides an estimate of the remaining useful life of an SSD drive based on its usage patterns<sup>1</sup>. It can help you monitor the health and performance of your SSD drives and plan for replacement or upgrade when needed<sup>1</sup>.

**NEW QUESTION 7**

Your customer wants a new server for a File & print workload. What are the most important factors to consider?(Select two.)

- A. support level
- B. power supply wattage
- C. storage capacity
- D. transfer rate
- E. form factor

**Answer: CE**

**Explanation:**

This is because a file and print workload requires a server that can store and share large amounts of data with multiple users and devices. Therefore, the server should have enough storage capacity to meet the current and future data needs of the customer. The form factor of the server also matters because it determines how much space the server occupies and how easy it is to install and maintain. Depending on the customer's preferences and constraints, they may choose a tower, rack or blade server.

**NEW QUESTION 8**

You connect to the compute ops Management (COM) through the Green lake Cloud Platform dashboard. The server you want to manage is missing Click where you can add the server so it appears in the CoM.

**Featured Applications**

The screenshot displays a grid of application cards:

- Aruba Central**: Network management system designed to simplify the deployment and maintenance of Aruba wired and wireless infrastructure at scale. Includes a "Get Started" button and a link to "View Network Products".
- Data Services Cloud Console**: Data Services Cloud Console. Includes a "Launch" button and a link to "View Storage Products".
- Compute Ops Management**: Securely manage your compute infrastructure, wherever it lives. Includes a "Launch" button and a link to "View Compute Products".
- HPE GreenLake Central**: Manage your cloud services and view usage, cost, and more. Includes a "Launch" button and a link to "View Cloud Products".
- HPE InfoSight**: AI-driven intelligence across servers, storage, virtual machines and more. Includes a "Launch" button.
- HPE GreenLake Developer Portal**: Integrate apps and services. Includes a "Launch" button.

**Recommended for You**

This section features a card for **HPE GreenLake for Aruba networking**. It includes a photo of a woman, the text "In-depth intelligence and insights on your network-as-a-service consumption", and a "Learn More" button.

**Quick Actions**

The Quick Actions section contains two cards:

- Invite Users**: Send a sign-up link to users so you can collaborate with your team. Includes a "Send an Invite" button.
- Assign User Access**: Assign a custom role or built-in roles to your team. Includes an "Assign Roles" button.

This section is titled **Get the latest news about HPE GreenLake**. It includes the text "Get weekly news on releases, updates, and more as we make HPE GreenLake the go-to edge-to-cloud platform." and a "Subscribe Now" button.

- A. Mastered
- B. Not Mastered

Answer: A

**Explanation:**  
**Featured Applications**

The screenshot displays a dashboard with several application tiles and quick actions. The tiles include:

- Aruba Central:** Network management system designed to simplify the deployment and maintenance of Aruba wired and wireless infrastructure at scale. Includes a 'Get Started' button.
- Data Services Cloud Console:** Data Services Cloud Console. Includes a 'Launch' button.
- Compute Ops Management:** Securely manage your compute infrastructure, wherever it lives. Includes a 'Launch' button.
- HPE GreenLake Central:** Manage your cloud services and view usage, cost, and more. Includes a 'Launch' button.
- HPE InfoSight:** AI-driven intelligence across servers, storage, virtual machines and more. Includes a 'Launch' button.
- HPE GreenLake Developer Portal:** Integrate apps and services. Includes a 'Launch' button.

Under the 'Quick Actions' section, there are two main options:

- Invite Users:** Send a sign-up link to users so you can collaborate with your team. Includes a 'Send an Invite' button.
- Assign User Access:** Assign a custom role or built-in roles to your team. Includes an 'Assign Roles' button.

On the right side, there are two promotional cards:

- Recommended for You:** HPE GreenLake for Aruba networking. In-depth intelligence and insights on your network-as-a-service consumption. Includes a 'Learn More' button.
- Get the latest news about HPE GreenLake:** Get weekly news on releases, updates, and more as we make HPE GreenLake the go-to edge-to-cloud platform. Includes a 'Subscribe Now' button.

**NEW QUESTION 9**

you are preparing a proposal to refresh your customers existing OL380 GE and G7 servers With newer generations. Before making a decision, your customer needs to know if a refresh is worth the cost. Which option show the value of the purchase to your customer?

- A. Solution sales Enablement Tool
- B. selective Storage presentation
- C. TCO/ROI Calculator
- D. Smart CID

Answer: C

**Explanation:**

According to HPE, the TCO/ROI Calculator is a tool that helps you compare the total cost of ownership (TCO) and return on investment (ROI) of different server solutions<sup>1</sup>. It can help you demonstrate how a server refresh can reduce costs, improve performance, and increase efficiency for your customer.

**NEW QUESTION 10**

you want to quickly look up the list price of an HPE hardware component. Which pre-saves tool has a QuickQuote function?

- A. HPE smart CID
- B. HPE CloudPhysics
- C. HPE seismic
- D. HPE Product Bulletin

Answer: D

**Explanation:**

This tool has a Quick Quote function that allows you to quickly look up the list price of an HPE hardware component by entering the product number or selecting from a list of products. You can also add multiple products to a quote and export it to a file or email it to yourself or others.

**NEW QUESTION 10**

Review the Exhibit:

Match the definition to each colored boxed acronym from the image.

**Answer Area**

Box	Definition
"p"	Class of Raid Controller
"4"	Controller Type (form factor)
"16"	Number of SAS lanes
"ie"	Port Type
"m"	Smart Array Series

- A. Mastered
- B. Not Mastered

**Answer:** A

**Explanation:**

p: Class of Raid Controller 4: Number of SAS lanes 16: Smart Array Series

ie: Port Type

m: Controller Type (form factor)

HPE Smart Array P416ie-m SR Gen10 Controller is a flexible Smart Array controller that provides enterprise-class storage performance, increased internal scalability with SAS Expander Card, and data protection for HPE Synergy Compute Modules. The controller has these features:

- > p: The P stands for Performance class, which indicates that the controller has high performance and reliability for demanding workloads.
- > 4: The 4 indicates that the controller has four SAS lanes per port, which means that it can support up to four SAS devices per port.
- > 16: The 16 indicates that the controller belongs to the 16th generation of Smart Array controllers, which offer enhanced security, performance, and manageability.
- > ie: The ie stands for internal/external, which means that the controller has both internal and external ports. The internal ports connect to the drives inside the compute module, while the external ports connect to the SAS Expander Card or external storage devices.
- > m: The m stands for mezzanine, which means that the controller is a mezzanine card that plugs into a dedicated slot on the compute module.

**NEW QUESTION 14**

A customer wants to create a 3TB boot partition on their HPE ProLiant DL360 Gen10 Plus server. What setting must be enabled to allow this configuration?

- A. Secure Boot
- B. unlimited Extensible Firmware Interface (UEFI) Boot Mode
- C. Legacy BIOS Boot Mode
- D. Virtualization-Maximum performance

**Answer:** B

**Explanation:**

setting that must be enabled to allow a 3TB boot partition on their HPE ProLiant DL360 Gen10 Plus server is B. Unified Extensible Firmware Interface (UEFI) Boot Mode. This is because UEFI Boot Mode supports booting from disks larger than 2.2 TB by using the GUID Partition Table (GPT) format. GPT allows for partitions of up to 9.4 ZB (9.4 x 10<sup>21</sup> bytes) in size.<sup>12</sup>

**NEW QUESTION 15**

your customer needs to capture, store, manage, and analyze a dataset that exceeds capacity of typical database software tools. What storage technology should you propose to meet their needs?

- A. Block Storage
- B. Containers
- C. Big Data
- D. File Storage

**Answer:** C

**Explanation:**

According to Simplilearn, big data storage is a new technology that allows you to store large amounts of data that exceed the capacity of typical database software tools<sup>1</sup>. Big data storage can handle various types of data, such as structured, unstructured, or semi-structured data, and provide fast and scalable access to it<sup>1</sup>.

**NEW QUESTION 20**

.....

## **Thank You for Trying Our Product**

### **We offer two products:**

1st - We have Practice Tests Software with Actual Exam Questions

2nd - Questions and Answers in PDF Format

### **HPE0-V25 Practice Exam Features:**

- \* HPE0-V25 Questions and Answers Updated Frequently
- \* HPE0-V25 Practice Questions Verified by Expert Senior Certified Staff
- \* HPE0-V25 Most Realistic Questions that Guarantee you a Pass on Your FirstTry
- \* HPE0-V25 Practice Test Questions in Multiple Choice Formats and Updatesfor 1 Year
