

# Microsoft

## Exam Questions PL-600

Microsoft Power Platform Solution Architect

## About ExamBible

*[Your Partner of IT Exam](#)*

## Found in 1998

ExamBible is a company specialized on providing high quality IT exam practice study materials, especially Cisco CCNA, CCDA, CCNP, CCIE, Checkpoint CCSE, CompTIA A+, Network+ certification practice exams and so on. We guarantee that the candidates will not only pass any IT exam at the first attempt but also get profound understanding about the certificates they have got. There are so many alike companies in this industry, however, ExamBible has its unique advantages that other companies could not achieve.

## Our Advances

### \* 99.9% Uptime

All examinations will be up to date.

### \* 24/7 Quality Support

We will provide service round the clock.

### \* 100% Pass Rate

Our guarantee that you will pass the exam.

### \* Unique Gurantee

If you do not pass the exam at the first time, we will not only arrange FULL REFUND for you, but also provide you another exam of your claim, ABSOLUTELY FREE!

NEW QUESTION 1

HOTSPOT - (Topic 1)

You need to ensure that the solution meets the data security and compliance requirements.  
What should you recommend? To answer, select the appropriate options in the answer area.  
NOTE: Each correct selection is worth one point.

Scenario	Relationship behavior
A worker transfers to a new client company.	<div><div></div><div>Assign: Cascade All</div><div>Assign: Cascade None</div><div>Merge: Cascade All</div><div>Rollup View: Cascade All</div></div>
A user deletes a worker's job placement history.	<div><div></div><div>Delete: Cascade All</div><div>Delete: Remove Link</div><div>Delete: Restrict</div></div>

Answer:

Scenario	Relationship behavior
A worker transfers to a new client company.	<div><div></div><div>Assign: Cascade All</div><div>Assign: Cascade None</div><div>Merge: Cascade All</div><div>Rollup View: Cascade All</div></div>
A user deletes a worker's job placement history.	<div><div></div><div>Delete: Cascade All</div><div>Delete: Remove Link</div><div>Delete: Restrict</div></div>

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

Box 1: Assign: Cascade None

Scenario: Worker still records must be archived after ten years and are then removed from the main system.

Assign: The referenced table record owner is changed. Cascade None: Do nothing.

## NEW QUESTION 2

- (Topic 1)

You need to investigate the canvas app functionality issues.

Which two tools can you use? Each correct answer presents a complete solution.

NOTE: Each correct selection is worth one point.

- A. App checker
- B. Errors function
- C. Solution checker
- D. Power Platform admin center

**Answer: AC**

### Explanation:

Scenario: The testing team reports that one of the canvas apps is not working as expected. An error message displays as specific pages load.

A: The App checker is now available to help provide a clear list of formula issues in your app, and to provide items to fix to make your app accessible. The App checker is an area that the PowerApps team will continue to invest in, and build on in order help to make debugging, performance and best practice decisions an easier and more guided experience.

C: With the solution checker feature, you can perform a rich static analysis check on your solutions against a set of best practice rules and quickly identify these problematic patterns. After the check completes, you receive a detailed report that lists the issues identified, the components and code affected, and links to documentation that describes how to resolve each issue.

Reference:

<https://powerapps.microsoft.com/en-us/blog/new-app-checker-helps-you-fix-errors-and-make-accessible-apps/>

## NEW QUESTION 3

HOTSPOT - (Topic 1)

You need to design tables for the solution.

What should you recommend? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

Data type	Technical solution
Job placement record	<div><div></div><div>Custom table</div><div>Activity table</div><div>Virtual table</div></div>
Security clearance record	<div><div></div><div>Lookup (N:1)</div><div>Choice</div><div>Lookup (N:N)</div></div>

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

Box 1: Virtual Table

A virtual table is a custom table in Microsoft Dataverse that has columns containing data from an external data source. Virtual tables appear in your app to users as regular table rows, but contain data that is sourced from an external database, such as an Azure SQL Database. Rows based on virtual tables are available in all clients including custom clients developed using the Dataverse web services.

Scenario:

- ? First Up uses an on-premises system to manage current and historical patient data including medications and medical visits.
- ? The company plans to reference historical data in the existing system. The records held in these systems will not be migrated to the new solution except for medication information.
- ? The solution must provide a worker appointment booking system that can access worker historical job placement data.
- ? First Up staff members must be able to view and update worker records. They must be able to see current and historical job placement data on the same form in the new solution.

Box 2: Lookup (N:1)

Each worker can have many security clearances, so need a 1:N relationship.

Scenario: The solution must support tracking of security clearance information for a worker including the date, status, and certifying agency.

NEW QUESTION 4

- (Topic 1)

You need to recommend a solution for handling data entry requirements for the mobile audit teams.

What are two possible ways to achieve the goal? Each correct answer presents a complete solution.

NOTE: Each correct selection is worth one point.

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

Scenario:

Audit teams must have the ability to view worker information on their mobile devices. Audit teams must be able to record data during visits to locations where workers are placed.

When you create an app, or someone shares an app with you, you can run that app on the Power Apps mobile app or in a web browser.

Reference:  
<https://docs.microsoft.com/en-us/powerapps/user/run-app-browser>

**NEW QUESTION 5**

DRAG DROP - (Topic 1)

You need to recommend methods for assigning security to each group of users.

What should you recommend? To answer, drag the appropriate methods to the correct groups of users. Each method may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view content.

NOTE: Each correct selection is worth one point.

Methods

Dataverse Application User

Power Platform Local Business Owner Team

Azure Active Directory B2B Guest Access

Azure Active Directory Security Group Team

Answer Area

Group of users	Method
Full-time employees	Method
Automation	Method
Corporate governance auditing team	Method

- A. Mastered
- B. Not Mastered

Answer: A

**Explanation:**

Box 1: Power Platform Local Business Owner Team

Owner team: An owner team owns records and has security roles assigned to the team. A user's privileges can come from their individual security roles, those of the teams that they're part of or the ones they inherit. A team has full access rights on the records that the team owns. Team members are added manually to the owner team.

Scenario: Employee authentication with the existing system is provided by an on-premises Active Directory instance that is linked to Azure Active Directory.

Box 2: Azure Active Directory Security Group Team

An Azure Active Directory (Azure AD) group team. Similar to owner team, an Azure AD group team can own records and can have security roles assigned to the team.

Note: The administration of app and data access for Microsoft Dataverse has been extended to allow administrators to use their organization's Azure Active Directory (Azure AD) groups to manage access rights for licensed Dataverse users.

Box 3: Azure Active Directory B2B Guest Access

An Azure AD B2B collaboration user is an external user, typically from a partner organization, that you invite to sign into your Azure AD organization using their own credentials. This B2B collaboration user (also generally referred to as a guest user) can then access the apps and resources you want to share with them. A user object is created for the B2B collaboration user in the same directory as your employees. B2B collaboration user objects have limited privileges in your directory by default, and they can be managed like employees, added to groups, and so on.

Scenario: Before First Up signs a contract to place workers at a client company, a member of the audit team visits the company and interviews company management. Audit members use different types of devices including Android and iOS devices. First Up has no plans to require the use of a single type of device.

**NEW QUESTION 6**

- (Topic 2)

You need to provide the IT team and managers with a mobile solution. How many apps should you recommend?

- A.

- one app for each job role
- B. one app for each user
- C. one app for all employees of the team
- D. one app for each team of employees

Answer: A

Explanation:

Scenario: IT staff needs a mobile solution to see IT cases at the top of the menu since this is their primary focus. Managers need to see all customer dashboards at the top of their menu on their mobile device.

NEW QUESTION 7

DRAG DROP - (Topic 2)

You need to recommend a solution for integrating luggage information.

What should you recommend? To answer, drag the appropriate types to the correct tables. Each type may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view content.

NOTE: Each correct selection is worth one point.

Types	Table	Type
Custom table	Luggage	
Virtual table		
Activity table	Passenger	
Custom activity table		

- A. Mastered
- B. Not Mastered

**Answer:** A

**Explanation:**

Luggage: Custom activity table

An activity can be thought of as any action for which an entry can be made on a calendar. An activity has time dimensions (start time, stop time, due date, and duration) that help determine when the action occurred or will occur. Activities also contain data that helps determine what action the activity represents, for example, subject and description.

Passenger: Customer table

The account and contact tables in Microsoft Dataverse are essential for identifying and managing customers, selling products and services, and providing superior service to the customers. A customer address table is used to store address and shipping information for a customer.

Scenario: The company has a custom app for managing and tracking passenger luggage. The app uses Microsoft Dataverse.

Agents need to view which pieces of luggage match to each passenger, and then need to add the total on the passenger record.

#### NEW QUESTION 8

- (Topic 2)

You need to select an appropriate app for Relecloud. Which app should you recommend?

- A. Dynamics 365 Field Service
- B. Dynamics 365 Sales
- C. Dynamics 365 Project Operations
- D. Dynamics 365 Customer Service

**Answer:** D

**Explanation:**

Microsoft Dynamics 365 Customer Service is a module for customer service automation that streamlines case and knowledge management, enables personalized customer service with a 360-degree customer view, and provides visibility into customer service department performance with dashboards and reports.

Reference:

<https://docs.microsoft.com/en-us/dynamics365/customer-service/overview>

NEW QUESTION 9

- (Topic 2)  
You need to provide the IT specialists with design diagrams. What should you provide?

- A. Business process modeler (BPM) B AI Builder
- B. Entity relationship diagram (ERD)
- C. Dynamics 365 Product Visualize

Answer: A

Explanation:

Scenario: IT specialists want to design Power BI reports. They need to understand the underlying table relationships of the system.  
Business process modeler (BPM) in Microsoft Dynamics Lifecycle Services (LCS) is a tool that you can use to create, view, and modify repeatable implementations that are based on business process libraries. BPM helps you align your business processes with industry- standard processes that are described by the American Productivity & Quality Center

(APQC)

Reference:  
<https://docs.microsoft.com/en-us/dynamics365/fin-ops-core/dev-itpro/lifecycle- services/bpm-overview>

NEW QUESTION 10

HOTSPOT - (Topic 3)  
You need to design the quality inspection order data model.  
What should you recommend? To answer, select the appropriate options in the answer area.  
NOTE: Each correct selection is worth one point.

Requirement	Action
Obtain the serial number and other machine attributes for use in the inspection order.	<div><div></div><div>Use a virtual table.</div><div>Import to a custom table.</div><div>Create a lookup to Dynamics 365 Field Service.</div></div>
Configure the relationship between inspection orders and inspection ratings.	<div><div></div><div>Create a one-to-many relationship and set the behavior to Parental.</div><div>Create a many-to-many relationship and set the behavior to Parental.</div><div>Create a one-to-many relationship and set the behavior to Cascade None.</div><div>Create a many-to-many relationship and set the behavior to Cascade None.</div></div>

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

Box 1: Create a lookup to Dynamics 365 Field Service  
Scenario: Machines are assigned serial numbers and placed in stock until they are shipped to customers.  
Entity lookup: Allows technicians to choose a Dynamics 365 record. In the inspection designer interface, admins must select an entity and a field to display. For a chosen entity, the Name field and mandatory fields are the entity attributes that can be displayed in the lookup.  
Box 2: Create a one-to-many relationship and set the behavior to Parental  
Scenario: Inspection orders must:  
? Allow entry of quality ratings of passed or failed for each quality metric identified for the machine being rated.  
? Be automatically marked as failed if one inspection step rating is marked as failed.  
Each inspection order can have one or many inspection steps, and each inspection step has a rating.  
Note: Each pair of tables that are eligible to have a 1:N relationship can have multiple 1:N relationships between them. Yet usually only one of those relationships can be considered a parental table relationship.

#### NEW QUESTION 10

- (Topic 3)

You need to recommend a solution for creating the initial inspection checklists. What should you recommend?

- A. Power Apps Maker portal  
B. Dataverse for Teams  
C. Power Apps Studio  
D. Data Migration utility

**Answer: B**

#### Explanation:

Scenario: Standardized checklists must be stored in the solution for use by inspectors. A copy must be created when a new inspection is initiated.

Dataverse for Teams – built on Microsoft Dataverse – provides relational data storage, rich data types, enterprise-grade governance, and one-click solution deployment to the Microsoft Teams app store.

Dataverse for teams table creation has all of the things that are great about Microsoft Lists, without the major downsides.

Reference:

<https://docs.microsoft.com/en-us/powerapps/teams/create-table>

#### NEW QUESTION 12

HOTSPOT - (Topic 3)

You need to recommend solutions to meet the inspection requirements.

What should you recommend? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

#### Requirement

#### Solution

View, assign, and resolve inspection bottlenecks.

	▼
Booking rules	
Schedule board	
Proficiency models	

Automatically input measurement readings from inspection gauges

	▼
Custom connector	
Azure IoT Hub connector	
Azure IoT Central connector	
Microsoft Dataverse connector	

Answer:

#### Requirement

#### Solution

View, assign, and resolve inspection bottlenecks.

	▼
Booking rules	
Schedule board	
Proficiency models	

Automatically input measurement readings from inspection gauges

	▼
Custom connector	
Azure IoT Hub connector	
Azure IoT Central connector	
Microsoft Dataverse connector	

- A. Mastered  
B. Not Mastered

**Answer: A**

#### Explanation:

Box 1: Schedule board

The Dynamics 365 Field Service schedule board provides an overview of resource availability and bookings you can make.

Box 2: Azure IoT Central connector

Information about each machine produced must be transferred to Dynamics 365 Field Service.

The difference between IoT hub and IoT central is that IoT is an application platform that simplifies the creation of Internet of Things solutions. IoT Central helps to reduce the challenges of implementing IoT development, operations, and management. IoT Central is a fully managed Software as a Service solution.

Note: There are three ways you can use to connect IoT-enabled devices into the Field Service solution:

? Connected Field Service for Azure IoT Central

- ? Connected Field Service for Azure IoT Hub
- ? Connected Field Service for non-Azure IoT providers using the extensible IoT provider framework

#### NEW QUESTION 14

- (Topic 3)

You need to resolve the issue reported during testing. What should you do?

- A. Create an image data type within the Inspection Order table.
- B. Create a relationship within the Inspection Order table to the originating inspection order.
- C. Create a Quick View form for the inspection order.

**Answer: B**

#### Explanation:

Need to store the image in the table.

Scenario: The company uses photos of employees to generate employee badges. Photos are uploaded into Microsoft 365 user profiles.

#### NEW QUESTION 18

- (Topic 3)

You need to manage user access to the app.

Which two connection types should you recommend? Each correct answer presents part of the solution.

NOTE: Each correct selection is worth one point.

- A. Virtual table with a customer connector
- B. Office 365 Outlook connector
- ☒ C. Microsoft Dataverse connector
- D. Office 365 Users connector

**Answer: CD**

#### Explanation:

Office 365 Users lets you access user profiles in your organization using your Office 365 account. You can use the Use the connection in your Power Platform app. Dataverse is part of the Microsoft 365 collaboration and productivity tools. Using federation, applications can connect to Dataverse using the same system user identities and credentials available in an Azure Active Directory based network.

Scenario:

? Users must be active employees of Fabrikam.

? Quality inspection app: Fabrikam is evaluating Microsoft Power Platform to determine whether it can meet the company's requirements for a manufacturing defect and quality inspection solution. Each machine produced must be subjected to a quality inspection at various points during production. Each machine must undergo a more extensive quality inspection before the machine can be shipped to the customer.

Reference:

<https://docs.microsoft.com/en-us/powerapps/maker/canvas-apps/connections/connection-office365-users>

#### NEW QUESTION 23

- (Topic 4)

You are a Power Apps architect for a company. The IT administrator designs a Power Apps app that is ready to be tested. The company uses application lifecycle management (ALM).

Each version and solution component must be tracked as it is tested.

You need to recommend a strategy to deploy solutions for the user acceptance testing environment.

What should you recommend?

- A. Use Package Deployer and deploy a managed solution.
- B. Use Package Deployer and deploy an unmanaged solution.
- C. Use Solution Packager and deploy a managed solution.
- D. Use Solution Packager and deploy an unmanaged solution.

**Answer: D**

#### Explanation:

Solution Packager is a tool that can unpack a compressed solution file into multiple XML files and other files, so they can be easily managed by a source control system.

Unmanaged solution: An open solution with no restrictions on what can be added, removed, or modified. This is recommended during development of a solution.

C: Managed solution

A completed solution ready to be imported into an organization. Once imported, components can't be added or removed, although they can optionally allow further customization. This is recommended when development of the solution is complete.

Reference:

<https://docs.microsoft.com/en-us/power-platform/alm/solution-packager-tool>

#### NEW QUESTION 25

- (Topic 4)

You are designing a Power Platform solution for a company. The company issues each employee a tablet device.

The company wants to simplify the opportunity management processes and automate when possible. The company identifies the following requirements:

? Users must have a visual guide to know which data to enter in each step of the opportunity management process.

? The system must automatically assign the opportunity to a manager for approval once all data is entered.

? The system must notify an assignee each time an opportunity is assigned to them by using push notifications.

? When a user selects a push notification, the associated opportunity must display.

You need to recommend the Power Platform components that will meet their requirements.  
Which three Power Platform components should you recommend? Each correct answer presents part of the solution.  
NOTE: Each correct selection is worth one point.

- A. Business process flows
- B. Power Apps mobile apps
- C. Power Virtual Agents chatbots
- D. Power Automate desktop flows
- E. Power Automate cloud flows

**Answer:** ABE

**Explanation:**

A: Use business process flows to define a set of steps for people to follow to take them to a desired outcome. These steps provide a visual indicator that tells people where they are in the business process.  
B: Push notifications are used in Power Apps mobile to engage app users and help them prioritize key tasks. In Power Apps, you can create notifications for Power Apps mobile by using the Power Apps Notification connector. You can send notifications to any app that you create in Power Apps.  
E: Create a cloud flow when you want your automation to be triggered either automatically, instantly, or via a schedule.  
\_ Automated flows: Create an automation that is triggered by an event such as arrival of an email from a specific person, or a mention of your company in social media.  
Reference:

<https://docs.microsoft.com/en-us/power-automate/business-process-flows-overview> <https://docs.microsoft.com/en-us/powerapps/mobile/power-apps-mobile-notification>

**NEW QUESTION 26**

HOTSPOT - (Topic 4)

You are implementing a Microsoft Power Platform solution for a customer to include data migration from multiple legacy systems. The data includes lead and contact data. The environment includes an assigned security group.

The following issues have occurred during a go-live deployment attempt:

- Lookup values are not populated when data migration is complete.
- Data is being added to the contacts table that is not part of the data migration.
- Various users do not appear in the list of users available for record assignment. You need to resolve the go-live deployment issues.

How should you resolve the issue? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

Answer Area

Issue	Solution
Lookup values are not populated when data migration is complete.	<div><div>Split the import data into smaller import batches.</div><div>Import the data by using an application user.</div><div>Split the import data into smaller import batches.</div><div>Disable all Power Automate flows, plug-ins, and workflows.</div><div>Run data migration in a specific order.</div></div>
Data is being added to the contacts table that is not part of the data migration.	<div><div>Disable all Power Automate flows, plug-ins, and workflows.</div><div>Disable auditing.</div><div>Import the data by using an application user.</div><div>Disable all Power Automate flows, plug-ins, and workflows.</div><div>Split the import data into smaller import batches.</div></div>
Various users do not appear in the list of users available for record assignment.	<div><div>Add to a security group.</div><div>Add to a security group.</div><div>Add a security role.</div><div>Add a Microsoft 365 role.</div><div>Add a field security profile.</div></div>

- A. Mastered
- B. Not Mastered

**Answer:** A

**Explanation:**

**NEW QUESTION 27**

HOTSPOT - (Topic 4)

A company uses Power Pages for article submissions. The article properties are stored in a table in Microsoft Dataverse and the content of the article is stored in a related Microsoft SharePoint library. The company invites different experts outside its organization to review an article before publishing it. The reviewers are granted access to the articles in Microsoft Dataverse. The company has the following requirements:

- Provide a app to canvas the reviewers that exposes both the article properties and content in read-only mode.
- Once the review is completed, the reviewer saves the review data, and the article and the review no longer appear in the app.

You need to recommend the components to be used for each requirement. Which options should you use?

NOTE: Each correct selection is worth one point.

Answer Area

Requirement	Option
Security configuration for reviewers	<div><div>Create a dedicated access team and add the reviewers to the team.</div><div>Create a dedicated access team and add the reviewers to the team.</div><div>Create a dedicated access team template and add it to the article record.</div><div>Create a dedicated owner team in the Microsoft Dataverse environment and add the reviewers to the team.</div><div>Create a dedicated Microsoft Teams channel with a security role for the article and add the reviewers as members.</div></div>
Access to the app	<div><div>Embed app in Power Pages portal.</div><div>Embed app in Power Pages portal.</div><div>Share app through the Power Apps maker portal.</div><div>Register app in Azure AD and email the registration link.</div><div>Publish the app in Power Apps Studio and email the link to the app.</div></div>

- A. Mastered

B. Not Mastered

Answer: A

Explanation:

Requirement	Option
Security configuration for reviewers	<div>Create a dedicated access team and add the reviewers to the team. Create a dedicated access team and add the reviewers to the team. Create a dedicated access team template and add it to the article record. Create a dedicated owner team in the Microsoft Dataverse environment and add the reviewers to the team. Create a dedicated Microsoft Teams channel with a security role for the article and add the reviewers as members.</div>
Access to the app	<div>Embed app in Power Pages portal. Embed app in Power Pages portal. Share app through the Power Apps maker portal. Register app in Azure AD and email the registration link. Publish the app in Power Apps Studio and email the link to the app.</div>

NEW QUESTION 28

- (Topic 4)

A company provides mobile diagnostic imaging services. You are designing a Power Apps solution to manage patient appointments and procedures. Patient records are stored within the company s cloud patient billing system. The patient ID must be the only information stored within the app. The patient name and date of birth must be visible to the technician to verify the patient's identity. You need to recommend a solution to display the patient information. What should you recommend?

- A. Virtual table
- B. Business rule
- C. Privacy preference
- D. Data gateway
- E. Custom dataflow

Answer: A

Explanation:

A virtual table is a custom table in Microsoft Dataverse that has columns containing data from an external data source. Virtual tables appear in your app to users as regular table rows, but contain data that is sourced from an external database, such as an Azure SQL Database. Rows based on virtual tables are available in all clients including custom clients developed using the Dataverse web services.

Reference:

<https://docs.microsoft.com/en-us/powerapps/maker/data-platform/create-edit-virtual-entities>

NEW QUESTION 33

HOTSPOT - (Topic 4)

You are conducting performance testing for a Microsoft Power Platform solution. The solution uses Power Automate cloud flows to query and synchronize data across 10 different tables based on various criteria. You make the following observations:

- Internet speed during testing is fast (500 Mbps).
- There are 50 Dynamics real-time workflows in use.
- There are 63 Dynamics asynchronous workflows in use.
- There are 76 Power Automate cloud flows in use. You identify the following performance issues;

You need to recommend steps to resolve the performance issues.

What should you recommend? To answer, select the appropriate options m the answer area.

NOTE: Each correct selection is worth one point.

Performance issue	Recommendation
Data changes are slow to save.	<div>Reduce usage of near real-time workflows. Convert all Dynamics 365 workflows to Power Automate cloud flows. Review and revise filters in cloud flow queries and conditional logic.</div>
Background processes often take hours to complete.	<div>Reduce usage of near real-time workflows. Convert all Dynamics 365 workflows to Power Automate cloud flows. Review and revise filters in cloud flow queries and conditional logic.</div>

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

Box 1: Reduce usage of near real-time workflows

A real-time workflow can be converted to asynchronous workflow and back to real-time.

Box 2: Convert all Dynamics 365 workflows to Power Automate cloud flows. Workflows are limited to Microsoft Dynamics 365/CRM application only. Power Automate can span across multiple web-based services or applications at the same time.

Dynamics 365 CRM Workflows can be converted to Power Automate flows.

NEW QUESTION 35

- (Topic 4)

A company uses manual processes to track interactions with customers. The company wants to use Power Platform to improve productivity.

The company has the following requirements:

- ? Provide customers with an online portal where they can submit and review cases.
- ? Ensure that customers can chat online with a customer service representative at any time.
- ? Route chats to customer service representatives based on skill and availability.

You need to recommend a solution to the company.

Which three components should you recommend? Each correct answer presents part of the solution.

NOTE: Each correct selection is worth one point.

- A. Dynamics 365 Virtual Agents chatbots
- B. Customer self-service portal
- C. Dynamics 365 Field Service
- D. Business process flows
- E. Omnichannel for Customer Service

**Answer:** BDE

**Explanation:**

B: Customer self-service portal: A customer self-service portal enables customers to access self-service knowledge, support resources, view the progress of their cases, and provide feedback.

Note: Based on the selected environment in Power Apps, you can create a Dataverse starter portal or a portal in an environment containing customer engagement apps (Dynamics 365 Sales, Dynamics 365 Customer Service, Dynamics 365 Field Service, Dynamics 365 Marketing, and Dynamics 365 Project Service Automation).

E: Omnichannel for Customer Service offers a suite of capabilities that extend the power of Dynamics 365 Customer Service Enterprise to enable organizations to instantly connect and engage with their customers across digital messaging channels.

Reference:

<https://docs.microsoft.com/en-us/powerapps/maker/portals/portal-templates> <https://docs.microsoft.com/en-us/dynamics365/customer-service/embed-chat-widget-portal>

**NEW QUESTION 40**

- (Topic 4)

You are designing a database table for a client. You have the following requirements:

- ? Maintain a comprehensive list of colors and their corresponding RGB values and hexadecimal values.
- ? Prevent the addition of duplicate colors based on the hexadecimal value for the color.

You need to recommend a design for the table.

Which two actions should the client perform after the table is created? Each correct answer presents part of the solution.

NOTE: Each correct selection is worth one point.

- A. Mark the hex value column as business required.
- B. Configure and schedule a recurring bulk record deletion job.
- C. Create alternate keys for the table.
- D. Mark the RGB value column as business required.

**Answer:** CD

**Explanation:**

B: Setting a column to Business Required means that the default behavior of a model-driven or canvas app will enforce this requirement in the app.

C: With alternate keys you can now define a column in a Dataverse table to correspond to a unique identifier (or unique combination of columns) used by the external data store. This alternate key can be used to uniquely identify a record in Dataverse in place of the primary key. You must be able to define which columns represent a unique identity for your records. Once you identify the columns that are unique to the table, you can declare them as alternate keys through the customization user interface (UI) or in the code.

Reference:

<https://docs.microsoft.com/en-us/powerapps/maker/data-platform/create-edit-field-portal>

<https://docs.microsoft.com/en-us/powerapps/developer/data-platform/define-alternate-keys-entity>

**NEW QUESTION 44**

- (Topic 4)

Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution that might meet the stated goals. Some question sets might have more than one correct solution, while others might not have a correct solution.

After you answer a question in this section, you will NOT be able to return to it. As a result, these questions will not appear in the review screen.

A company plans to automate the expense approval process.

Users currently enter data into an on-premises SQL Server database. You need to allow users to submit expenses from mobile devices.

Solution: Create a canvas app for expense data entry. Create a custom connector. Create a cloud flow for approval and use the custom connector to add data to the SQL Server database.

Does the solution meet the goal?

- A. Yes
- B. No

**Answer:** B

**Explanation:**

**NEW QUESTION 47**

- (Topic 4)

You are a Microsoft Power Platform solution architect working on a project. API calls are being sent between external applications and a Microsoft Power Platform solution.

The number of requests per user within a given time frame varies. Some users may be exceeding the service protection API limits.

You need to ensure that the API conforms to service protection limits.

Which three metrics should you review? Each correct answer presents part of the solution.  
NOTE: Each correct selection is worth one point.

- A. The number of requests that a user can make each day.
- B. The total number of requests that can be processed each day.
- C. The number of concurrent requests that a user can make.
- D. The total execution time for requests by all users.
- E. The combined execution time required to process requests from a user.

**Answer:** ACE

**Explanation:**

Three types of service protection API limit errors that can be returned:

? Number of requests This limit counts the total number of requests during the preceding 300 second period.

? Execution time This limit tracks the combined execution time of incoming requests during the preceding 300 second period.

? Concurrent requests This limit tracks the number of concurrent requests. Reference:

<https://docs.microsoft.com/en-us/powerapps/developer/data-platform/api-limits>

**NEW QUESTION 51**

DRAG DROP - (Topic 4)

You need to recommend methods for assigning security to each group of users. The customer provides the following requirements:

? Customers need the ability to submit a case through an online portal.

? Portal must handle 75 concurrent users submitting cases.

? Service data must be retained for at least six years.

You need to determine which requirements are functional or non-functional.

Which requirements are functional or non-functional? To answer, drag the appropriate types to the correct requirements. Each type may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view content.

NOTE: Each correct selection is worth one point.

Types	Requirement	Type
Functional	Customers need the ability to submit a case through an online portal.	
Non-functional	Portal must handle 75 current users submitting cases.	
	Service data must be retained for at least six years.	

Answer:

Types	Requirement	Type
Functional	Customers need the ability to submit a case through an online portal.	Functional
Non-functional	Portal must handle 75 current users submitting cases.	Non-functional
	Service data must be retained for at least six years.	Non-functional

- A. Mastered
- B. Not Mastered

**Answer:** A

**Explanation:**

Box 1: Functional

Functional requirements describe what the solution needs to do or its behaviors.

Box 2: Non-functional

Non-functional requirements commonly describe non-behavior aspects of the solution such as performance requirements.

Box 3: Non-functional

Examples of common non-functional requirement types include:

? Availability

? Compliance/regulatory

? Data retention/residency

? Performance (response time, and so on)

? Privacy

- ? Recovery time
- ? Security
- ? Scalability

#### NEW QUESTION 54

- (Topic 4)

You are designing a Microsoft Power Platform solution for a company that has multiple Microsoft Dataverse environments. You need to prevent specific users from accessing specific environments. What should you do?

- A. Remove all security roles from the users of the specific environments.
- B. Remove the user from the business unit.
- C. Remove the user from all security groups.
- D. Remove the user from all teams.

**Answer:** A

#### Explanation:

Microsoft Dataverse uses a role-based security model to help secure access to the database. Security roles can be used to configure environment-wide access to all resources in the environment.

Reference:

<https://docs.microsoft.com/en-us/power-platform/admin/database-security>

#### NEW QUESTION 58

HOTSPOT - (Topic 4)

You are supporting a recent go-live for a model-driven app that includes mobile offline functionality.

Users report the following issues:

- ? The process of downloading initial metadata for the app takes hours to complete.
- ? Some account views are unavailable when the app is offline.
- ? Changes to users' security privileges are not reflected in the mobile app.
- ? Contact data is not available when the app is offline.

You need to resolve the mobile app performance issues.

What should you review? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

Issue	Resolution
The process of downloading initial metadata for the app takes hours to complete.	<div><div></div><div>Synchronize the mobile app.</div><div>Remove organization data filters.</div><div>Reduce records included in the profile filter.</div></div>
Changes to users' security privileges are not reflected in the mobile app.	<div><div></div><div>Synchronize the mobile app.</div><div>Reduce records included in the profile filter.</div><div>Remove reference to tables not included in mobile profile.</div></div>
Some account views are unavailable when the app is offline.	<div><div></div><div>Synchronize the mobile app.</div><div>Reduce records included in the profile filter.</div><div>Remove reference to tables not included in mobile profile.</div></div>
Contact data is not available when the app is offline.	<div><div></div><div>Reduce records included in the profile filter.</div><div>Update mobile profile to include contact information.</div><div>Remove reference to tables not included in mobile profile.</div></div>

Answer:

Issue	Resolution
The process of downloading initial metadata for the app takes hours to complete.	<div><div></div><div>Synchronize the mobile app.</div><div><del>Remove organization data filters.</del></div><div>Reduce records included in the profile filter.</div></div>
Changes to users' security privileges are not reflected in the mobile app.	<div><div></div><div>Synchronize the mobile app.</div><div>Reduce records included in the profile filter.</div><div>Remove reference to tables not included in mobile profile.</div></div>
Some account views are unavailable when the app is offline.	<div><div></div><div>Synchronize the mobile app.</div><div>Reduce records included in the profile filter.</div><div><del>Remove reference to tables not included in mobile profile.</del></div></div>
Contact data is not available when the app is offline.	<div><div></div><div><del>Reduce records included in the profile filter.</del></div><div>Update mobile profile to include contact information.</div><div><del>Remove reference to tables not included in mobile profile.</del></div></div>

- A. Mastered
- B. Not Mastered

Answer: A

NEW QUESTION 63

- (Topic 4)  
A pharma company uses a proprietary system to manage its chemical experiments. The company uses Microsoft Dynamics 365 Project Operations to manage lab staff and resources.  
Employees manually update Project Operations data with data from their proprietary system as needed. Employees are not able to provide a definite schema for their data.  
You need to provide a solution that will allow employees to configure their own automatic updates.  
Which component should you use?

- A. Dataflows
- B. Custom connectors
- C. Data gateways
- D. Microsoft Power Automate flows

Answer: D

NEW QUESTION 67

- (Topic 4)  
A client uses Dynamics 365 Sales, Power BI datasets, and Power BI dataflows.  
The Dynamics 365 Sales implementation has security roles that restrict data export. You need to ensure that data has the same restrictions in Power BI as it does in Dynamics 365 Sales.  
You need to design the security to avoid sensitive data from being seen.  
Which two actions should you recommend? Each correct answer presents part of the solution.  
NOTE: Each correct selection is worth one point.

- A. Use Microsoft Dataverse restrictions before setting up the Power BI reports.
- B. Limit the role in Dynamics 365 Sales to only data allowed so it cannot be exported to Microsoft Excel.
- C. Limit the role and ensure that exporting to Microsoft Excel is not allowed in both Dynamics 365 Sales and Power BI.
- D. Share Power BI dashboards only with users who are supported to see this data.

Answer: AB

Explanation:

A: When you share a dashboard or report, the people you share it with can view it and interact with it, but can't edit it. They see the same data that you see in the dashboard and reports and get access to the entire underlying dataset unless row-level security (RLS) is applied to the underlying dataset.  
B: Depending on the sensitivity of an organization's data, it is often necessary to disable the ability to export or print reports.  
Reference:  
<https://docs.microsoft.com/en-us/power-bi/collaborate-share/service-share-dashboards>

NEW QUESTION 69

DRAG DROP - (Topic 4)  
You are designing a business strategy for a client who has a Power Platform solution. The client works with critical data where any data loss creates a high risk.  
You need to document the failover process for the stakeholders.  
Which four actions should you perform in sequence? To answer, move the appropriate actions from the list of actions to the answer area and arrange them in the correct order.

Actions

If the second call is successful, the application continues normally.

The application makes a service call to the datacenter.

The application receives an exception after attempting the service call.

The application automatically tries the call again.

The application redirects calls to an on-premises server.

Answer Area

⏪

⏩

⏴

⏵

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

Your Partner of IT Exam

## Actions

- If the second call is successful, the application continues normally.
- The application makes a service call to the datacenter.
- The application receives an exception after attempting the service call.
- The application automatically tries the call again.
- The application redirects calls to an on-premises server.

## Answer Area

- The application makes a service call to the datacenter.
- The application receives an exception after attempting the service call.
- The application redirects calls to an on-premises server.
- If the second call is successful, the application continues normally.

### NEW QUESTION 70

HOTSPOT - (Topic 4)

You are performing a fit gap requirements analysis.

You need to select Microsoft Power Platform components to satisfy the requirements. Which components should you use? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

#### Answer Area

##### Requirement

Coordinate long-term end-to-end delivery of financial counseling services to farmers.

Manage project accounting and recognize revenue compliant with international financial reporting standards.

Notify users of their overdue tasks on a daily basis.

Notify users of their overdue tasks on a daily basis.

##### Component

- Model-driven app
- Model-driven app
- Power Virtual Agents
- Dynamics 365 Customer Voice
- Dynamics 365 Finance
- Dynamics 365 Project Operations
- Dynamics 365 Field Service
- Dynamics 365 Finance
- Power Automate
- Power Automate
- Power Virtual Agents
- AppSource

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

#### Answer Area

##### Requirement

Coordinate long-term end-to-end delivery of financial counseling services to farmers.

Manage project accounting and recognize revenue compliant with international financial reporting standards.

Notify users of their overdue tasks on a daily basis.

Notify users of their overdue tasks on a daily basis.

##### Component

- Model-driven app
- Model-driven app

### NEW QUESTION 73

HOTSPOT - (Topic 4)

An animal welfare organization wants to track the movement of wolf packs in a region. Cameras at specific locations capture images when motion is detected within the camera sensor range. Staff upload the images manually to a shared drive and then analyze the images.

The organization wants to automate image capture and analysis. The organization has the following requirements:

- ? Save captured images in an appropriate location.
- ? Analyze saved images by using an image recognition process.
- ? Display data in real-time dashboards.

You need to recommend the correct technology for the requirements.

What should you recommend? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

Requirement	Technology option
Save captured images in an appropriate location.	<div>▼</div> <div>Business process flow</div> <div>Desktop flow</div> <div>Instant cloud flow</div> <div>Automated cloud flow</div>
Analyze saved images by using an image recognition process.	<div>▼</div> <div>Instant cloud flow and AI Builder</div> <div>Automated cloud flow and AI Builder</div> <div>Desktop flow and AI Builder</div>
Display data in real-time dashboards.	<div>▼</div> <div>Dynamics 365 interactive experience dashboard</div> <div>Model-driven app dashboard with native graphs</div> <div>Model-driven app dashboard with Power BI</div>

- A. Mastered  
 B. Not Mastered

**Answer:** A

**Explanation:**

Box 1: Automated cloud flow.

Create a cloud flow when you want your automation to be triggered either automatically, instantly, or via a schedule.

Automated flows: Create an automation that is triggered by an event such as arrival of an email from a specific person, or a mention of your company in social media.

Box 2: Desktop flow and AI Builder

Desktop flows are used to automate tasks on the Web or the desktop. Using Power Automate Desktop you can automate tasks on the desktop as well as the Web.

Box 3: Model-driven app dashboard with Power BI

The Power BI cloud service works with Microsoft Dataverse apps to provide a self-service analytics solution. Power BI automatically refreshes the app's data displayed.

**NEW QUESTION 77**

DRAG DROP - (Topic 4)

You are designing data loss policies for a Microsoft Power Platform implementation. You have the following requirements:

- Solutions that use the HTTP connector must not include any other connectors.
- Prevent the use of the Microsoft Forms connector.
- Allow the use of the Azure DevOps connector.

You need to determine in which data policy group to add each connector.

Data policy groups	Connector	Data policy group
Business	HTTP connector	
Non-business	Azure DevOps connector	
Blocked	Microsoft Forms connector	

- A. Mastered  
 B. Not Mastered

**Answer:** A

**Explanation:**

Box 1: Business

If you put a connector in the Business group, it can only be used with other connectors from that group in any given app or flow.

Box 2: Non-business

DLP policies enforce rules for which connectors can be used together by classifying connectors as either Business or Non-Business.

Box 3: Blocked

Sometimes you might want to block the usage of certain connectors altogether by classifying them as Blocked.  
Data policy group Business blocked

## NEW QUESTION 82

HOTSPOT - (Topic 4)

An automobile parts manufacturer wants to replace an existing system with a Microsoft Power Platform solution. The company has been experiencing undesired data changes in their current system. The cause of the changes is due to the relationships that are set up between tables in the database that the system uses. The new solution must meet the following requirements:

- Track vehicle manufacturers and models.
- Display a list of all models that a manufacturer produces.

Ensure that each vehicle model can be associated to only one manufacturer.

- Delete all associated models when a user deletes a manufacturer.
- Automatically populate information from the manufacturer when creating a new model from the model list on the manufacturer page.

You need to recommend table relationships to meet the business requirements. Which relationship settings should you recommend? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

Answer Area

Business requirement	Relationship
The system must delete all associated models when a user deletes a manufacturer.	<div><div>Use a parental 1:N relationship between manufacturer and model.</div><div>Use a parental 1:N relationship between manufacturer and model.</div><div>Use a referential 1:N relationship between manufacturer and model.</div><div>Use field mappings in 1:N relationship between manufacturer and model.</div><div>Use an N:N relationship between manufacturer and model.</div></div>
The system must auto-populate information from the manufacturer when creating a new model from the model list on the manufacturer page.	<div><div>Use field mappings in 1:N relationship between manufacturer and model.</div><div>Use a parental 1:N relationship between manufacturer and model.</div><div>Use a referential 1:N relationship between manufacturer and model.</div><div>Use field mappings in 1:N relationship between manufacturer and model.</div><div>Use an N:N relationship between manufacturer and model.</div></div>

- A. Mastered  
B. Not Mastered

Answer: A

Explanation:

## NEW QUESTION 83

- (Topic 4)

You are designing a Microsoft Power Platform solution that uses Microsoft Dataverse.

You need to recommend a way to update currency exchange rates within Microsoft Dataverse.

What are two possible ways to achieve this goal? Each correct answer presents a complete solution.

NOTE: Each correct selection is worth one point.

- A. Review AppSource for prebuilt solutions.  
B. Create a Power Automate flow that uses a custom connection or HTTP request to an outside source for exchange rates.  
C. Embed an iframe that points to a currency exchange service into a model-driven app.  
D. Use the Power BI connector to establish a link that updates Microsoft Dataverse with the current exchange rate.

Answer: AB

Explanation:

B: We need is a source for exchange rates. There are some published connectors, but you also use a free service called Exchange Rates API, which are based on the European Central Bank, and create a custom connection.

Now that we have our custom connector defined and have a way to request the latest exchange rates, the next step is to create a Power Automate flow that will update all of currencies setup in our Dataverse environment.

Dataverse is a multicurrency system, in which each record can be associated with its own currency. This currency is called the transaction currency. The multicurrency features enable users to perform financial transactions like opportunities, quotes, orders, and invoices in multiple currencies. This feature also provides a currency choice to the end user when a financial transaction occurs.

<https://readyxrm.blog/2021/03/10/updating-currency-exchange-rates-in-dataverse/>

## NEW QUESTION 88

HOTSPOT - (Topic 4)

A company plans to create a Microsoft Power Platform solution that integrates with Dynamics 365 Sales. The solution must meet the following requirements:

• Connect directly with a Microsoft Azure SQL database as an external data source at run time where specific data is available in the Dynamics 365 Sales solution without the need for data replication.

• An external system needs to send data to the company's Dynamics 365 Sales solution. You need to recommend the most suitable solution to integrate Dynamics 365 Sales with both systems.

What should you recommend? To answer, select the appropriate option in the answer area.

Answer Area

Integration requirement

Have read-only visibility of data from an external Azure SQL database.

Solutions

Use virtual tables.  
Use a custom plug-in.  
Use Dynamics 365 Web API.  
Use a web resource to display data.

External system sends data to Dynamics 365 Sales.

Solutions

Use a custom plug-in.  
Use Dynamics 365 Web API.  
Use a web resource to display data.

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

Answer Area

Integration requirement

Have read-only visibility of data from an external Azure SQL database.

Solutions

Use virtual tables.  
Use a custom plug-in.  
Use Dynamics 365 Web API.  
Use a web resource to display data.

External system sends data to Dynamics 365 Sales.

Solutions

Use a custom plug-in.  
Use Dynamics 365 Web API.  
Use a web resource to display data.

NEW QUESTION 91

DRAG DROP - (Topic 4)

You are a Microsoft Power Platform architect.

You need to design a process to transport configuration and test data from one environment to a separate environment

Which four actions should you recommend be performed in sequence? To answer, move the appropriate actions from the list of actions to the answer area and arrange them in the correct order.

Actions

Import the ZIP file data.

Import the CSV file data.

Define the schema of the source data to be exported.

Use the schema to export data.

Download the Configuration Migration tool from NuGet.

Create personal views to define the source data to be exported.

Download the schema of the source data to be exported.

Download the Configuration Migration tool from AppSource.

NEW QUESTION 98

- (Topic 4)  
You are designing a Microsoft Power Platform solution that will include multiple applications.  
You have the following requirements:

- Support agents managing cases.
- Project managers reviewing and updating their projects.
- Stock managers managing warehouses.
- New site visitors self-registering.
- Employees tracking time entries.

Which three requirements can you meet by implementing role-based applications? Each correct answer presents a complete solution. NOTE: Each correct selection is worth one point.

- A. New site visitors self-resisting.

B. Project managers reviewing and updating their projects.

C. Stock managers managing warehouses.

D. Support agents managing cases.

E. Staff tracking time entries.

Answer: BCD

NEW QUESTION 99

DRAG DROP - (Topic 4)  
A company plans to integrate Microsoft Power Platform with existing systems, including Microsoft Dynamics 365 Omni channel for Customer Service.  
You need to recommend a solution for each requirement.  
Which components should you recommend for the requirements?

To answer, drag the appropriate solutions to the correct requirements. Each solution may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view content.

Solutions

Custom API

Custom pages

Microsoft Power Virtual Agent

Answer Area

Requirement

Display information about the contact in the Omnichannel app.

Ensure only tables needed are exposed for integration purposes.

Display data hierarchy from other systems within Dynamics 365 without saving the data within Microsoft Dataverse.

Solution

- A. Mastered

B. Not Mastered

Answer: A

Explanation:

Solutions	Requirement	Solution
Custom API	Display information about the contact in the Omnichannel app.	Microsoft Power Virtual Agent
Custom pages	Ensure only tables needed are exposed for integration purposes.	Custom API
Microsoft Power Virtual Agent	Display data hierarchy from other systems within Dynamics 365 without saving the data within Microsoft Dataverse.	Custom pages

#### NEW QUESTION 100

- (Topic 4)

A company has a list of contacts in a Microsoft Excel file. The company wants to load the contact information into a Power Platform solution.

You need to recommend a data-loading solution. What should you recommend?

- A. Use the Excel Template feature.
- B. Add to an existing list of contacts in a static worksheet.
- C. Use the import from Excel feature.

**Answer:** A

#### Explanation:

Import data that's stored somewhere else into your model-driven app using the import feature in Power Apps. Every table has required columns that must exist in your input file. It's recommended that

you download an

Excel template, add your data, and then import the file to your app. The template saves time and effort. Don't add or modify columns in the template to avoid issues during the import. Note:

Step 1: Download an Excel template

To avoid mapping issue, it's recommended that you use an Excel template that you can download from your app. Once the template is downloaded add your data and then import the file back to your app. Remember don't add or modify columns in the template to avoid issues during the import process. Step 2: Import your data Use the template that you downloaded in the previous step (modified with your data) and import the file to your app.

Reference:

<https://docs.microsoft.com/en-us/powerapps/user/import-data>

#### NEW QUESTION 105

HOTSPOT - (Topic 4)

You are designing a model-driven app that provides marketing, sales, and service operations to a company.

The app must integrate with the following systems and data sources:

- A third-party marketing system for lead generation and website submissions.
- A Microsoft Excel Online file that contains manufacturing data on relevant products.
- A separate Microsoft Dataverse environment.

You need to recommend Power Automate connectors for the app.

Which connections should you recommend? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

**Answer Area**

Data source	Connector type
Third-party marketing system	<div>Power BI connector</div> <div>SharePoint connector</div> <div>Custom connector</div> <div>Microsoft Forms connector</div>
Microsoft Dataverse environment	<div>SharePoint</div> <div>Azure Data Factory</div> <div>Microsoft Dataverse</div>

- A. Mastered
- B. Not Mastered

**Answer:** A

#### Explanation:

Box 1: Custom connector

While Azure Logic Apps, Microsoft Power Automate, and Microsoft Power Apps offer over 325+ connectors to connect to Microsoft and non-Microsoft services, you may want to communicate with services that aren't available as prebuilt connectors.

Box 2: Microsoft Dataverse

The Microsoft Dataverse connector provides several triggers to start your flows and many actions that you can use to create or update data in Dataverse while your flows run. You can use Dataverse actions even if your flows don't use a trigger from the Dataverse connector.

Use the Microsoft Dataverse connector to create cloud flows that start when data changes in Dataverse tables and custom messages.

#### NEW QUESTION 108

DRAG DROP - (Topic 4)

A company uses Microsoft Power Platform solutions.

The company plans to set up application lifecycle management (ALM) capabilities to store the solutions in source control, which will be used to automate the release process.

You need to set up the initial ALM infrastructure to store the solutions in source control. Which four actions should you perform in sequence?

To answer, move the appropriate actions from the list of actions to the answer area and arrange them in the correct order.

Actions

Run the pipeline.

Create an Export pipeline.

Create an Azure DevOps Project.

Install the Microsoft Power Platform Build Tools.

Create a Release pipeline.

Add a task for Microsoft Power Platform Import Solution.

NEW QUESTION 110

DRAG DROP - (Topic 4)

A company plans to integrate a model-driven app with external data sources. The company has the following requirements:

- Consume data in its data warehouse from Microsoft Dataverse.
- Use a plug-in to retrieve information from an external service.

You need to recommend a Microsoft Azure component for each requirement.

Which Azure components should you recommend? To answer, drag the appropriate Azure components to the correct requirements.

Each Azure component may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view content.

NOTE: Each correct selection is worth one point.

Azure Event Hub

Azure Service Bus

Azure Data Factory

Azure Synapse Link

Answer Area

Requirement

Consume data in a data warehouse.

Consume data from an external source.

Azure component

- A. Mastered  
B. Not Mastered

Answer: A

Explanation:

Azure Event Hub

Azure Service Bus

Consume data in a data warehouse.

Consume data from an external source.

Azure component

Azure Data Factory

Azure Service Bus

NEW QUESTION 111

- (Topic 4)

A company wants to add an interactive checklist to a Power Platform solution to ensure that salespeople are following the same steps when qualifying leads.

You need to recommend a solution that will incorporate this checklist. What should you recommend?

- A. Mastered  
B. Not Mastered

Answer: A

NEW QUESTION 113

DRAG DROP - (Topic 4)

You are performing a requirements analysis for a customer. The customer provides the following requirements:

- ? Power Platform storage capacity must remain under 100 percent.
- ? Customer service representatives must be sent an email when they are assigned a case.
- ? Help desk technicians must be shown an error message when they try to delete a task row.
- ? The plug-in pass rate must remain over 99 percent for the production environment.

You need determine if the requirements are functional or non-functional.

Which requirement type should you use? To answer, drag the appropriate requirement types to the correct requirements. Each requirement type may be used

once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view content.  
NOTE: Each correct selection is worth one point.

Requirement types	Requirement	Requirement type
	Power Platform storage capacity must remain under 100 percent.	
Functional	Customer Service representatives must be sent an email when they are assigned a case.	
Non-functional	Help desk technicians must be shown an error message when they try to delete a task row.	
	The plug-in pass rate must remain over 99 percent for the production environment.	

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

Box 1: Non-functional  
Non-functional requirements commonly describe non-behavior aspects of the solution such as performance requirements.  
Box 2: Functional  
Functional requirements describe what the solution needs to do or its behaviors. Box 3: Functional  
Box 4: Non-functional  
Examples of common non-functional requirement types include:  
? Availability  
? Compliance/regulatory  
? Data retention/residency  
? Performance (response time, and so on)  
? Privacy  
? Recovery time  
? Security  
? Scalability

NEW QUESTION 117

HOTSPOT - (Topic 4)  
A company offers continuing education courses for medical professionals. Each time a course is offered, the company tracks that the session has taken place in an Excel workbook.  
The company maintains a list of required qualifications for an educator to teach a course. Educator qualifications range from languages spoken to advanced degrees.  
The company needs the following custom table relationships defined:  
? Associate educators with a list of their professional qualifications.  
? Assign a primary educator to each course that is held.  
? Collect information about every course that is held.  
You need to determine the type of relationship that best fits the requirement.  
Which type of table relationship should you use? To answer, select the appropriate options in the answer area.  
NOTE: Each correct selection is worth one point.

Requirement	Relationship
Educators must be associated with their qualifications.	<div>▼</div> <div>Many-to-many relationship that uses a system generated table</div> <div>Many-to-many relationship that uses a custom table</div> <div>One-to-many relationship</div>
When a course is held there must be a primary educator assigned.	<div>▼</div> <div>Many-to-many relationship that uses a system generated table</div> <div>Many-to-many relationship that uses a custom table</div> <div>One-to-many relationship</div>
When a course is held, the company needs to collect information on that session.	<div>▼</div> <div>Many-to-many relationship that uses a system generated table</div> <div>Many-to-many relationship that uses a custom table</div> <div>One-to-many relationship</div>

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

Requirement	Relationship
Educators must be associated with their qualifications.	<div><div></div><div>Many-to-many relationship that uses a system generated table</div><div>Many-to-many relationship that uses a custom table</div><div>One-to-many relationship</div></div>
When a course is held there must be a primary educator assigned.	<div><div></div><div>Many-to-many relationship that uses a system generated table</div><div>Many-to-many relationship that uses a custom table</div><div>One-to-many relationship</div></div>
When a course is held, the company needs to collect information on that session.	<div><div></div><div>Many-to-many relationship that uses a system generated table</div><div>Many-to-many relationship that uses a custom table</div><div>One-to-many relationship</div></div>

NEW QUESTION 121

HOTSPOT - (Topic 4)

You are supporting the go-live process for a company. The company is responsible for migrating data to the Microsoft Power Platform by using a custom solution. The company reports the following issues:

- Migration processes fail due to operation timeouts.
- Records that include lookup columns often fail to load. You need to recommend a solution.

What should you recommend? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

Issue	Solution
Migration processes fail due to operation timeouts.	<div><div></div><div>Increase multithreading and/or batch size settings.</div><div>Increase multithreading and/or batch size settings.</div><div>Decrease multithreading and/or batch size settings.</div><div>Ensure you are loading data into all tables at the same time.</div><div>Ensure you are loading data into tables in a particular order.</div></div>
Records that include lookup columns often fail to load.	<div><div></div><div>Ensure you are loading data into tables in a specific order.</div><div>Increase multithreading and/or batch size settings.</div><div>Decrease multithreading and/or batch size settings.</div><div>Ensure you are loading data into all tables at the same time.</div><div>Ensure you are loading data into tables in a specific order.</div></div>

- A. Mastered  
B. Not Mastered

Answer: A

Explanation:

Issue	Solution
Migration processes fail due to operation timeouts.	<div><div></div><div>Increase multithreading and/or batch size settings.</div><div>Increase multithreading and/or batch size settings.</div><div>Decrease multithreading and/or batch size settings.</div><div>Ensure you are loading data into all tables at the same time.</div><div>Ensure you are loading data into tables in a particular order.</div></div>

NEW QUESTION 126

HOTSPOT - (Topic 4)

A company has an on-premises data warehouse and analytics solution- The data warehouse consists of multiple multi-dimensional data cubes representing over five years of operational data. The data warehouse consolidates and normalizes data that is sourced from 20 different systems.

The company plans to replace the existing solution with a Microsoft Power Platform solution that connects to the data warehouse. The company wants to provide analytical information to executives in a Microsoft Teams channel to support business planning.

The new solution must meet these requirements: Support the current data warehouse.

The solution must support drill-through capabilities into the data. You need to recommend a solution.

What should you recommend? To answer, select the appropriate options in the answer area. NOTE: Each correct selection is worth one point.

Answer Area

Requirement

Data storage and normalization.

Solution

Data Gateway

Azure Data Lake

Dataverse for Teams

Azure Analysis Services

Visibility to key operational metrics from various Teams

Power BI

AI Builder

Teams adaptive cards

Microsoft Teams integration object

Answer:

Answer Area

Requirement

Data storage and normalization.

Solution

Data Gateway

Azure Data Lake

Dataverse for Teams

Azure Analysis Services

Visibility to key operational metrics from various Teams

Power BI

AI Builder

Teams adaptive cards

Microsoft Teams integration object

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

Box 1: Azure Data Lake  
A data warehouse is a centralized repository of integrated data from one or more disparate sources. Data warehouses store current and historical data and are used for reporting and analysis of the data.

NEW QUESTION 128

HOTSPOT - (Topic 4)  
You are designing a Microsoft Power Platform solution for a company.  
Which components should you recommend? To answer, select the appropriate options in the answer area.  
NOTE: Each correct selection is worth one point.

Requirement

Allow users to change the status of a record only if a custom column named Reason is populated.

Component

Business rule

Power Automate flow

Asynchronous plug-in

Background workflow

Requirement

Prompt users to update each opportunity product record when an opportunity is won or lost.

Component

JavaScript code

Real-time workflow

Power Automate flow

Asynchronous plug-in

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

Box 1: Business rule  
You can create business rules and recommendations to apply logic and validations without writing code or creating plug-ins. Business rules provide a simple interface to implement and maintain fast-changing and commonly used rules.  
Box 2: Power Automate flow  
Trigger the Power Automate flow with “When a record is updated”, then add a Condition in the flow and configure it with Status Label equals to Won.

#### NEW QUESTION 131

- (Topic 4)

A company has a model-driven app. The app has forms with both Business Rules and JavaScript added to handle the business logic on the form. The form contains logic that is enforced by using business rules. The company wants to apply the business rules to all forms in the app. You need to recommend a simplified form setup so the form can be maintained moving forward. What should you recommend?

- A. Manage the business logic with a Power Apps Component Framework (PCF) control.
- B. Evaluate whether complex parts of the logic can be solved by using Power Apps Component Framework (PCF) controls.
- C. Use Business Rules for the remaining functionality.
- D. Remove the Business Rules and use only JavaScript.
- E. Update logic to ensure Business Rules are optimized.
- F. Use JavaScript for the remaining functionality.

**Answer: B**

#### Explanation:

PCF controls are reusable. Reference:

<https://docs.microsoft.com/en-us/powerapps/developer/component-framework/overview>

#### NEW QUESTION 136

- (Topic 4)

A local bank uses Microsoft Power Platform apps to store customer data.

The bank IT director discovers that all employees can see the social security numbers of their customers. The IT team does not understand how field-level security works and needs help with the design.

You need to recommend a solution to the bank that meets the following requirements:

- The system must restrict access to customer social security numbers to the vice president of finance only.  
The vice president of finance must be able to read and update customer social security numbers.

Which two actions should you recommend? Each correct answer presents part of the solution.

NOT: Each correct selection is worth one point

- A. Set the values for the read permission and for the update permission for social security number to yet
- B. Enable field-level security for the member table.
- C. Create a held-level security profile.
- D. Enable field-level security for the social security number column.

**Answer: CD**

#### Explanation:

Field-level security is managed by the security profiles. To implement field-level security, a system administrator performs the following tasks.

? Enable field security on one or more fields for a given entity.

? Associate one or more existing security profiles, or create one or more new security profiles to grant the appropriate access to specific users or teams.

Reference:

<https://docs.microsoft.com/en-us/power-platform/admin/field-level-security>

#### NEW QUESTION 138

- (Topic 4)

You are assessing the capabilities of a project for a customer in the education sector. The solution must meet the following requirements

- include curriculum and student management capabilities.
- Conform to on-going Microsoft platform upgrades.
- Minimize custom coding and configuration

You need to recommend a solution. What should you recommend?

- A. Power Apps portal
- B. Microsoft Power Platform admin center
- C. Microsoft 365 admin center
- D. AppSource

**Answer: A**

#### NEW QUESTION 143

- (Topic 4)

Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution that might meet the stated goals. Some question sets might have more than one correct solution, while others might not have a correct solution.

After you answer a question in this section, you will NOT be able to return to it. As a result these questions will not appear in the review screen.

A company uses a Microsoft Excel sheet to manage its loan application process. The company wants to optimize the process.

You need to discover inefficiencies in the process.

Solution: Record the actions required to complete the loan application process in the process advisor feature. Use task mining to discover inefficiencies in the process.

Does the solution meet the goal?

- A. Yes
- B. No

**Answer: B**

#### NEW QUESTION 144

DRAG DROP - (Topic 4)

You are a Microsoft Power Platform solution architect capturing requirements for a national retail chain project. The project has the following requirements

- Retail employees must use the application on a company-owned tablet device.

- The app must store data offline
- Environment capacity must be monitored to ensure usage stays within 80 percent of available capacity
- Apps are shared with security group teams for users to access.

You need to identify the project s functional and non-functional requirements.

How should you categorize the requirements? To answer, drag the appropriate categories to the correct requirements. Each category may be used once, more than once, or not at all You may need to drag the split bar between panes or scroll to view content.

**Categories**

Functional

Non-functional

**Requirement**

Retail employees must use the application on a company-provided tablet device.

The app must store data offline.

Environment capacity must be monitored to ensure usage stays within 80 percent of available capacity.

Apps are shared with security group teams for users to access.

**Category**

Answer:

**Categories**

Functional

Non-functional

**Requirement**

Retail employees must use the application on a company-provided tablet device.

The app must store data offline.

Environment capacity must be monitored to ensure usage stays within 80 percent of available capacity.

Apps are shared with security group teams for users to access.

**Category**

Functional

Functional

Non-functional

Non-functional

- A. Mastered  
 B. Not Mastered

**Answer:** A

#### NEW QUESTION 148

- (Topic 4)

Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution that might meet the stated goals. Some question sets might have more than one correct solution, while others might not have a correct solution.

After you answer a question in this section, you will NOT be able to return to it. As a result, these questions will not appear in the review screen.

A company plans to automate the expense approval process.

Users currently enter data into an on-premises SQL Server database. You need to allow users to submit expenses from mobile devices.

Solution: Create a canvas app for expense data entry. Install an on-premises gateway. Create a cloud flow for approval and to add data to the SQL Server database.

Does the solution meet the goal?

- A. Yes  
 B. No

**Answer:** A

#### NEW QUESTION 153

HOTSPOT - (Topic 4)

A multinational organization uses a single Microsoft Power Platform environment. The instance hosts multiple customizations for different users m different regions.

Users in some regions complain about slow toad time of the customizations. You need to architect a solution based on the main requirement.

What should you recommend? To answer, select the appropriate option in the answer area.

NOTE: Each correct selection is worth one point.

**Answer Area**

**Goal**

Divisions actively collaborate on customers.

Regions have separate customers but use the same functionality and need global reporting.

Regions have separate functionality and customers but need global reporting on data.

**Suggested solution**

Single instance; use Microsoft Azure Traffic Manager where needed

Multi-tenant with one Power Platform environment in each region

Multiple instances in different regions; Power BI for reporting

Single multi-geo instance

Multiple instances in different regions with data replication

Multi-tenant with one Power Platform environment in each region

Multiple instances in different regions; Power BI for reporting

Single multi-geo instance

Single instance; use Microsoft Azure Traffic Manager

Multi-tenant with one Power Platform environment in each region

Multiple instances in different regions; Power BI for reporting

Single multi-geo instance

- A. Mastered  
 B. Not Mastered

**Answer:** A

**Explanation:**

Answer Area	Goal	Suggested solution
	Divisions actively collaborate on customers.	Single instance; use Microsoft Azure Traffic Manager where needed Multi-tenant with one Power Platform environment in each region Multiple instances in different regions; Power BI for reporting Single multi-geo instance
	Regions have separate customers but use the same functionality and need global reporting.	Multiple instances in different regions with data replication Multi-tenant with one Power Platform environment in each region Multiple instances in different regions; Power BI for reporting Single multi-geo instance
	Regions have separate functionality and customers but need global reporting on data.	Single instance; use Microsoft Azure Traffic Manager Multi-tenant with one Power Platform environment in each region Multiple instances in different regions; Power BI for reporting Single multi-geo instance

NEW QUESTION 158

HOTSPOT - (Topic 4)

You are designing a Power Platform solution for a company that provides in-home appliance maintenance. When a customer schedules a service appointment, a dispatcher assigns one technician for a specific time and location.

The solution must capture information about the technician assigned to each appointment and the list of tools that the technician must bring to the appointment.

You need to recommend the data type for the captured information.

Which data type should you use? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

Requirement	Data type
Capture information about the technician assigned to each service appointment.	<div><div></div><div>Choice</div><div>Choices</div><div>Customer</div><div>Lookup</div></div>
Select the tools that the technician must bring to an appointment.	<div><div></div><div>Choices</div><div>Customer</div><div>Lookup</div><div>Text</div></div>

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

Box 1: Choice

Like Choices below, but can only select one of the option.

Box 2: Choices

You can customize forms (main, quick create, and quick view) and email templates by adding multi-select columns that are called Choices. When you add a choices column, you can specify multiple values that will be available for users to select. When users fill out the form they can select one, multiple, or all the values displayed in a drop-down list.

NEW QUESTION 163

- (Topic 4)

Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution that might meet the stated goals. Some question sets might have more than one correct solution, while others might not have a correct solution.

After you answer a question in this section, you will NOT be able to return to it. As a result, these questions will not appear in the review screen.

A company plans to automate the expense approval process.

Users currently enter data into an on-premises SQL Server database. You need to allow users to submit expenses from mobile devices.

Solution: Create a canvas app for expense data entry. Create a desktop flow. Create a cloud flow for approval and trigger the desktop flow to add data to the SQL Server database.

Does the solution meet the goal?

- A. Yes
- B. No

Answer: B

#### NEW QUESTION 166

- (Topic 4)

You are designing a solution for a national vehicle repair company. You have the following requirements:

- Customers must search for vehicle issues by using natural language expressions.
- Customers must contact a customer service agent as required. You need to recommend a solution.

Which two features should you include? Each correct answer presents part of the solution.

- A. Power Virtual Agents
- B. Business process flow
- C. Power Apps portal
- D. Customer Insights

**Answer:** BC

#### NEW QUESTION 169

HOTSPOT - (Topic 4)

A company plans to create a Power Platform solution that integrates with Dynamics 365 Sales.

The solution must meet the following requirements:

? Connect directly with a Microsoft Azure SQL database as an external data source at run time where specific data is available in the Dynamics 365 Sales solution without the need for data replication.

? An external system needs to send data to the company's Dynamics 365 Sales solution.

You need to recommend the most suitable solution to integrate Dynamics 365 Sales with both systems.

What should you recommend? To answer, select the appropriate option in the answer area.

NOTE: Each correct selection is worth one point.

Integration requirement	Solutions
Have read-only visibility of data from an external Azure SQL database.	<div><div></div><div>Use virtual tables. Use a custom plug-in. Use Dynamics 365 Web API. Use a web resource to display data.</div></div>
External system sends data to Dynamics 365 Sales.	<div><div></div><div>Use a custom plug-in. Use Dynamics 365 Web API. Use a web resource to display data.</div></div>

Answer:

Integration requirement	Solutions
Have read-only visibility of data from an external Azure SQL database.	<div><div></div><div>Use virtual tables. ✓ Use a custom plug-in. Use Dynamics 365 Web API. Use a web resource to display data.</div></div>
External system sends data to Dynamics 365 Sales.	<div><div></div><div>Use a custom plug-in. ✓ Use Dynamics 365 Web API. ✓ Use a web resource to display data.</div></div>

- A. Mastered
- B. Not Mastered

**Answer:** A

**Explanation:**

Box 1: Use Virtual tables

A virtual entity is a custom entity in Dynamics 365 Customer Engagement (on-premises) that has fields containing data from an external data source. Virtual entities appear in your app to users as regular entity records, but contain data that is sourced from an external database, such as an Azure SQL Database. Records based on virtual entities are available in all clients including custom clients developed using the Dynamics 365 Customer Engagement Web Services.

Box 2: Use Dynamics 365 Web API.

Dynamics 365 Web Services API: Many times, straight database-to-database integrations aren't a possibility. In these cases, the development of a solution may depend on utilization of the Dynamics 365 Customer Engagement web services API (Application Programming Interface).

#### NEW QUESTION 171

DRAG DROP - (Topic 4)

A client plans to implement Microsoft Power Platform solutions.

The client identifies the following requirements for handling opportunities:

- Users must follow the same set of steps each time they process opportunities

- For opportunities with values greater than \$20,000, a follow-up date and second contact field must appear on the form.
- An error message must display if a follow-up date is not within seven days of the opportunity creation date.

You need to recommend tools to meet the client requirements.

What should you recommend? To answer, drag the appropriate tools to the correct requirement. Each tool may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view content.

NOTE: Each correct selection is worth one point.

Tools	Requirement	Tool
Business Rule	Users must follow the same set of steps each time they process opportunities.	
Business process flow	For opportunities with values greater than \$20,000, a follow-up date and second contact field must appear on the form.	
Workflows	An error message must display if a follow-up date is not within seven days of the opportunity creation date.	

- A. Mastered  
B. Not Mastered

**Answer:** A

**Explanation:**

Tools	Requirement	Tool
Business Rule	Users must follow the same set of steps each time they process opportunities.	Business process flow
Business process flow	For opportunities with values greater than \$20,000, a follow-up date and second contact field must appear on the form.	Business Rule
Workflows	An error message must display if a follow-up date is not within seven days of the opportunity creation date.	Workflows

#### NEW QUESTION 173

- (Topic 4)

A company uses a third-party cloud-based app to make real-time business decisions. The app has a RESTful API.

You must design a Microsoft Power Platform solution that interacts with the third-party app. Changes made in the Microsoft Power Platform solution must be reflected in the cloud app.

You need to recommend technologies to integrate the Microsoft Power Platform solution with the cloud app.

Which two technologies should you recommend? Each correct answer presents part of the solution.

NOTE: Each correct selection is worth one point.

- A. Scheduled Power Automate cloud flow with a custom connector to the cloud app  
B. Power Virtual Agents  
C. Custom plug-on registered with Microsoft Dataverse  
D. Model-driven app

**Answer:** AC

**Explanation:**

A: To enable Logic Apps, Power Automate, or Power Apps to communicate with the REST or SOAP API, use a custom connector, which is a wrapper around a REST API (Logic Apps also supports SOAP APIs).

C: Custom APIs are a powerful way to connect to any existing API, hosted anywhere, from PowerApps. You do not need a PowerApps Enterprise subscription to register or use a Custom API.

Custom APIs are RESTful endpoints that you can connect to and use from PowerApps. All you'll need is a Swagger definition file for your endpoint.
